

ASBESTOS CONTAINING MATERIAL POLICY

PURPOSE

To ensure that the University's Facilities Service Operations adhere to all applicable Federal, State and Local requirements related to compliance with the handling of Asbestos Containing Materials.

STATEMENT OF POLICY

The Asbestos Containing Material (ACM) policy will govern the assessment, management and handling of all such material and will follow all guidelines and regulatory requirements under all applicable Federal, State and Local jurisdictional purview at all LIU Facilities.

The appropriate University Facilities Oversight Staff will attain the requisite trainings and/or certifications for assessing, managing, and handling asbestos containing materials, commensurate with the degree to which the policy goal and regulatory framework needs must be achieved.

The Environmental Health and Safety Manager (EHSM) will attain appropriate ACM assessment certifications and will review and update for completeness the certifications of all staff seeking and attaining different levels of ACM certifications.

This policy encompasses University staffing ability and capability to assess, design, develop and implement the scope of requirements, as well as appropriate documentation and communications that will address and manage the proper handling of ACM in all of LIU's facilities.

DEFINITIONS

ACM: Asbestos Containing Material

POLICY TYPE: OPERATIONS
