

BLOODBORNE PATHOGENS POLICY

PURPOSE

To ensure that the University's Facilities Service Operations adhere to all applicable Federal, State and Local requirements related to the operational management of Bloodborne Pathogens.

STATEMENT OF POLICY

The University's Facilities Service Operations has adopted and adheres to a Bloodborne Pathogens Program that complies with the Occupational Safety and Health Administration Bloodborne Pathogens Standard, Title 29 Code of Federal Regulations 1910.130.

PROCEDURES

The Facilities Services Operations team, specifically, the Environmental Health and Safety Manager (EHSM) has responsibility for the requisite assessment, documentation and reporting for the Bloodborne Pathogens program. EHSM reviews of the regulatory environment is a requirement that provides for and addresses the need for updates to the program based on new regulations or guidelines.
