

LONG ISLAND UNIVERSITY

HAZARD COMMUNICATION PROGRAM POLICY

PURPOSE

To ensure that the University's Facilities Service Operations adhere to all applicable Federal, State and Local requirements related to compliance with the Hazard Communication Standards.

STATEMENT OF POLICY

The University's Facilities Service Operations organization, specifically, the Environmental Health and Safety Manager (EHSM) reviews, updates, and maintains compliance required under the following:

- Code of Federal Regulations (CFR) - 1910.1200 - Hazard Communication Standard.

PROCEDURES

The Environmental Health and Safety Chemical Hygiene Plan, specifically, the EHSM is responsible for the proper notification and communication of all Facilities Services work operations where employees may be exposed to hazardous substances; during normal working conditions and/or during an emergency situation.

Under the program, Facilities Service Operations employees will be informed of the following under the auspices of the Hazard Communication Standard:

- the hazardous properties of chemicals/products with which employees work;
- safe handling procedures and measures to take to protect employees from these chemicals/products;
- hazards associated with non-routine tasks.
