

# LONG ISLAND UNIVERSITY

Dear Members of the LIU Community,

Thank you all for making Long Island University's Reopening a success. Your commitment to the health and safety of our entire community by following state guidelines is making a positive difference.

Our goal is to continue to provide a high quality educational experience for our students, both in the classroom and online, by enhancing health and safety guidelines on campus.

New York State has developed protocols for colleges to report new cases by campus on a daily basis, and they are also monitoring cases over specific 2 week periods. If a campus in New York reaches 100 Covid-19 cases over the 2 week period then the college campus must move to remote learning for 2 weeks. Students who live on campus are allowed to remain on campus. See [NYS guidelines](#).

The New York State Department of Health will post college data on their website, and we will also post daily updates on Long Island University's website. We are aligning our actions with NYS guidance to ensure accuracy and transparency.

To ensure a safe campus, we need a commitment from the entire campus community. Now is the time to be a little more considerate of others. Please continue to mask up in your classroom and in public spaces on and off campus. This heightened respect for others will help ensure your good health and reduce the chances of the virus spreading to others.

I want to thank each of you for making our campus safer. We will continue to do our part to provide a healthy and secure environment, while maintaining a high quality educational experience.

Sincerely,

Kimberly R. Cline  
President
