

# LONG ISLAND UNIVERSITY

Dear Students,

Earlier this semester, Long Island University announced an exciting partnership with the Nassau County Department of Health to open a Vaccination P.O.D. at the University Center. This P.O.D. has provided an essential service to our Long Island community and we thank our School of Nursing faculty, administrators and student volunteers for their outstanding work leading these efforts.

Today, we are pleased to announce that our P.O.D. will begin vaccinating Long Island University students. The first vaccinations will be given on Friday, April 23, 2021 to approximately 500 students.

Please take a moment to let us know whether or not you are interested in being vaccinated at Long Island University.

**[Yes, I would like to be vaccinated at LIU.](#)**

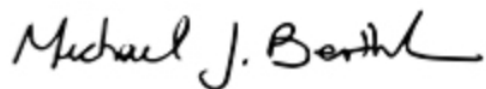

**[Thank you, but I am already vaccinated.](#)**

**[No, I am not interested in being vaccinated at LIU.](#)**

Please note, you will receive an additional email when you are selected to receive the vaccination with additional details and an appointment time.

Thank you for your continued commitment to keeping our Long Island University healthy. We wish you a successful completion of the spring semester.

Sincerely,

Michael J. Berthel  
Chief of Student Affairs
