Notice to Students: The information in this publication is accurate as of September 1, 2022. However, circumstances may require that a given course be withdrawn or alternate offerings be made. Therefore, LIU reserves the right to amend the courses described herein and cannot guarantee enrollment into any specific course section. All applicants are reminded that the University is subject to policies promulgated by its Board of Trustees, as well as New York State and federal regulations.

The University reserves the right to effect changes in the curriculum, administration, tuition and fees, academic schedule, program offerings, modes and methods of instruction, and other phases of school activity, at any time, without prior notice. The University assumes no liability for interruption of classes or other instructional activities due to fire, flood, strike, war, epidemic, government action, or other force majeure. The University expects each student to be knowledgeable about the information presented in this bulletin and other official publications pertaining to his/her course of study and campus life. For additional information or specific degree requirements, prospective students should call the Office of University Admissions. Registered students should speak with their Success Coach.

ABOUT LONG ISLAND UNIVERSITY

Mission Statement
Long Island University’s mission is to provide excellence and access in private higher education to those who seek to expand their knowledge and prepare themselves for meaningful, educated lives and for service to their communities and the world.

Vision
To become a nationally recognized, globally engaged, teaching and research university.

Motto
Long Island University’s motto is Urbi et Orbi – “To the City and to the World.”

Founding Date
Long Island University was founded in 1926.

Carnegie Classification
Doctoral Universities-High Research Activity (R2)

Alumni
LIU has an active network of more than 275,000 alumni, including leaders and innovators in industries across the globe.

Athletics
Colors: Blue and Gold
Mascot: Sharks
Teams: 35
National Affiliation: NCAA Division I
Conference: Northeast Conference (NEC)

Accreditation
Long Island University is accredited by the Middle States Commission on Higher Education, 1007 North Orange Street, 4th Floor, Wilmington, DE 19801 (www.msche.org). The MSCHE is an institutional accrediting agency recognized by the U.S. Secretary of Education and the Council for Higher Education Accreditation (CHEA).

In addition to the institutional accreditation provided by Middle States, many of LIU’s academic programs are accredited by specialized accreditation agencies. Additional information can be found at https://liu.edu/about/accreditations.

University Policies
Long Island University maintains a Policy Site to provide a comprehensive listing of all policies that are easily accessible to all members of the University community. The site contains the most up-to-date versions of all policies. For questions regarding a policy, contact policy@liu.edu.

Policy categories include:
- Academic Affairs
- Admissions
- Compliance
- Diversity, Equity, and Inclusion
- Facilities
- Human Resources
- Information Technology
- Public Safety
- Student Affairs
- Student Finance
- Student Registration
To view all University Policies, visit www.liu.edu/policy.

Title IX

Long Island University does not discriminate on the basis of race, color, national origin, sex, disability, or age in its programs. The Title IX Coordinator has been designated to handle inquiries regarding the non-discrimination policies:

Title IX Coordinator
Long Island University
700 Northern Boulevard
Brookville, New York 11548
Phone: (516) 299-3522
For assistance related to Title IX or other civil rights laws, please contact OCR at OCR@ed.gov or 800-421-3481, TDD 800-877-8339.

FERPA Notice to Students
The Family Educational Rights and Privacy Act (FERPA) of 1974 specifically provide that a school may provide what they deem "directory information," without the student's consent or as provided by the law. Directory information at Long Island University includes the following: the student's name, enrollment status, class, major field of study, dates of attendance, degrees, and awards received, past and present participation in officially recognized sports and non-curricular activities, physical factors (height, weight) of athletes and the most previous educational agency or institution attended.

Students who wish to have their directory information withheld can make this election by filing the appropriate form at Enrollment Services.

University Grievance Policy
This policy complies with the Middle States Commission on Higher Education’s Verification of Compliance with Accreditation—Relevant Federal Regulations, area 4, and with the Commission’s policy on published information. The University additionally complies with federal regulations 34 CFR §602.16(a)(1)(ix) and 34 CFR §668.43(b).

Pursuant to the United States Department of Education’s Program Integrity Rules, the University provides all prospective and current students with the contact information of the state agency or agencies that handle complaints against postsecondary education institutions offering in-person [classroom] learning, distance learning or correspondence education within that state.

Students should attempt to resolve academic and non-academic grievances through the proper internal channels at the University, which are identified in the Student Handbooks and/or current University Catalogs.

For an academic complaint, students should first attempt to resolve their complaint directly with the appropriate faculty member. If the student is not satisfied with the result, they should address their complaint to the department chair or program director. Students who wish to pursue the matter further should contact their respective academic dean. Students seeking clarification of program requirements, graduation requirements, academic standing, or academic suspension should contact their Success Coach or academic advisor.

For a non-academic complaint, students should first consult their Success Coach or academic advisor for guidance on how to resolve the issue. Success Coaches or academic advisors may direct the student to other resources, such as a Resident Director, Public Safety, a faculty member with whom the student is familiar, or counseling staff. If the student is not satisfied with the result and wishes to pursue the matter further, they should contact the Dean of Students or an Associate Dean of Students. Students may request confidentiality; on occasion, confidentiality cannot be guaranteed, except by counseling staff, where matters are always confidential unless otherwise outlined in the Student Health and Counseling Confidentiality Policy.

Students are advised that most external complaint processes require that they exhaust avenues of complaint internal to the institution before they pursue an appeal.

To report violations of law, breaches of policy or allegations of improper conduct pertaining to the University, or, to otherwise provide reliable information may file a report through the EthicsPoint 2 Compliance Line/NAVEX Global toll free number, 866-295-3143. The University expects that reports submitted through EthicsPoint are made in a good-faith effort to address legitimate issues needing correction, or to otherwise provide reliable information.
Current and prospective students who wish to file complaints with the Middle States Commission on Higher Education or with the New York State Department of Education will find appropriate contact information on the Accreditations page of the University website.

LIU Brooklyn Undergraduate Catalog 2022 - 2023
ADMISSION

All communications concerning admission to the LIU Brooklyn (including LIU Pharmacy (Arnold & Marie Schwartz College of Pharmacy and Health Sciences)) should be addressed to the Office of Admissions, LIU Brooklyn, 1 University Plaza, Brooklyn, NY 11201-5372; 718-488-1011 or by visiting the LIU Brooklyn website at www.liu.edu/brooklyn/admissions. LIU Global admissions should be addressed to the LIU Global website at www.liu.edu/global/admissions. Students are also invited to email the Office of Admissions at bkln-admissions@liu.edu.

General Information

Long Island University accepts applications for enrollment in a registered certificate, undergraduate, graduate, or doctoral program. Through the application review process, the University seeks evidence that applicants are academically and intellectually qualified and prepared to pursue college-level work.

All communications concerning admission to Long Island University should be addressed to the Office of Admissions. Information about admission to the University is found on liu.edu/visit.

The Office of Admissions accepts and reviews applications on a rolling basis, allowing prospective students to submit applications at any time during the cycle.

Freshman Admissions

Early Action applications and supporting documentation for fall admission must be submitted on or before November 15. Early Action notification begins December 1.

Early Decision applications and supporting documentation for fall admission must be submitted on or before December 15. Early Decision notification begins January 2.

To ensure consideration for all available departmental and merit-based scholarships and on campus housing opportunities, applicants should submit applications by December 1 for fall admission and by October 1 for spring admission.

Applicants should submit the below required material for consideration:

- Undergraduate application at liu.edu/apply or via the Common Application.
- Non-refundable $50 application fee.
- High school transcript.

Applicants may submit the following for consideration:

- If English is not the student’s native language, an official copy of TOEFL, IELTS, or iBT; students may also provide evidence of English proficiency through submission of standardized test scores.
- Recommendation from one teacher or guidance counselor. Each applicant is considered through a review of their application and supporting material.
- Admitted freshman students are required to provide proof of successful completion of high school or its equivalent prior to the first day of classes.

Freshman applicants may apply for fall, spring, or summer admission as full- or part-time degree seeking students. Classes are offered during the day, evening and on weekends. A non-degree option (for a student not enrolled in a degree program) is available to visiting students.

Test scores should be forwarded to the Office of Admissions. Credit includes the following:

- International Baccalaureate Program Credit
- Advanced Placement Credit
- College Level Examination Program Application materials are to be submitted directly to LIU:

  Long Island University
  Office of Admissions
  1 University Plaza
  Brooklyn, NY 11201-5372

Transfer Admissions

Applicants for transfer admission from accredited two-year and four-year colleges are considered. Students transferring from non-accredited institutions must consult with the Office of Admissions to determine eligibility for transfer credits.

Some academic departments have special criteria for admission and may require a higher GPA, an audition, or portfolio review. The Office of Admissions weighs all available information and evidence of achievement.

Transfer students are evaluated primarily based on their college work. Students with fewer than 24 credits of previous college work, or those who enrolled in college courses before completing high school, must submit secondary school records.

Transfer students will receive an official transfer credit evaluation after being admitted to the University. Generally, transfer credits are awarded for equivalent academic courses that have been completed with grades of C- or better at accredited colleges or universities. Students transferring directly to LIU from two-year institutions can receive a maximum of 72 credits. Those transferring from four-year institutions can receive a maximum of 90 transfer credits.

Coursework is transferable to LIU if it is equivalent to a course currently offered at LIU and was earned at a regionally accredited college or university with a grade of C- or better. Courses not approved for transfer through the admissions process may be reviewed at the departmental level, and after approval, will be credited to the student's transcript. Other transferable credit may include: advanced placement credit, international baccalaureate credit, advanced levels, and CLEP. Certain programs might require higher scores than outlined above in order to gain transfer credit for a particular program.

Applicability of transfer credits and actual length of time required to complete a bachelor’s degree depends on the number of credits earned. The Office of Admissions resolves transfer credit questions related to:

- Inter-Campus Transfer: Students wishing to enroll in classes at another LIU campus are required to complete the internal transfer form with their Success Coach. Students will be required to meet any special criteria outlined by the academic program they seek to enter.
- College Credits for Military Service Joint Services Transcript: LIU awards College credits to eligible veterans and active members of the military. The Army, Coast Guard, Marine Corps, and Navy use the centralized Joint Services Transcript (JST) system. Students may receive college credits for military training and specific occupational training. Official Joint Services Transcripts must be submitted electronically to Admissions.
- Community College of the Air Force: Veterans and active members of the Air Force may be eligible to receive college credits upon an admissions review of official CCAF transcripts.
- Life Experience Credits: Life experience credits may be awarded in recognition of knowledge obtained in ways other than study at an accredited college, and in accordance with the Life Experience Credit Policy.

Articulation Agreements

LIU Brooklyn has articulation agreements with Kingsborough Community College, LaGuardia Community College, Borough of Manhattan Community College, New York City College of Technology, Bergen Community College, and various other two-year regionally accredited colleges.

Residence Requirement

To qualify for an undergraduate degree at LIU Brooklyn, a student must complete in senior residence a minimum of 30 credits, including 15 credits of advanced work in their major.

Students enrolled in LIU Brooklyn programs at branch campuses or off-campus sites must register
Undergraduate Transfer Credit

LIU awards undergraduate transfer credit from accredited colleges and universities. Transfer credits are generally awarded for equivalent academic courses that have been successfully completed prior to enrollment at LIU with grades of C- or better at accredited colleges or universities. In the event that specific LIU programs require grades higher than C- in courses that are prerequisites for admission, that program’s grade transfer credit requirements will apply.

The following additional guidelines apply to the awarding of undergraduate transfer credit:

- Students who have an earned Associates or Bachelor’s degree may be granted credits for courses with grades of D earned, if they were part of the earned degree.
- Students can receive a maximum of 72 credits from two-year institutions.
- Students can receive a maximum of 90 credits from four-year institutions.
- Students who completed higher education coursework in another country must submit official transcripts along with an international credentials evaluation completed by an NACES (National Association of Credential Evaluation Services member organization).
- Courses in which a grade of “P” was earned are not transferrable unless information is provided that indicates that the grade was equivalent to a C- or higher.
- Any awarded transfer credits are not used in the LIU GPA calculation.

Students should refer to the Academic Catalogs for a list of programs that have specific transfer credit requirements.

Military Service and Training Transfer Credit: LIU awards college credits to eligible veterans and active members of the military. The Army, Coast Guard, Marine Corps, and Navy use the centralized Joint Services Transcript (JST) system. Students may receive college credits for military training and specific occupational training. Official Joint Services Transcripts must be submitted LIU.

Life Experience Transfer Credit: Life Experience credits may be awarded in recognition of knowledge obtained in ways other than study at an accredited college. Students must have completed six credits at LIU and demonstrate knowledge equivalent to what would be learned in a specific LIU undergraduate course. There are some specific subject areas that do not award Life Experience credit; please refer to the Life Experience Credit policy.

Advanced Placement; CLEP; International

Transfer Credit; International Baccalaureate: LIU Awards credit to students who achieve minimum required scores for the following:

- Advanced Placement Exams
- CLEP exams
- International Baccalaureate

Non-accredited Institutions Transfer Credit: Students transferring from non-accredited institutions are reviewed on a case-by-case basis to determine eligibility for transfer credits.

International Admissions

Applicants who are not citizens or permanent residents of the United States apply to LIU as international students. Applications for international admission should be submitted to the Office of Admissions by February 1 for fall admission or by September 1 for spring admission.

Applicants should submit the below required material for consideration:

- Original official records of all secondary school and/or university work, including graduation certificate or equivalent. Official certified translations in English are also required if the records are in a language other than English.
- Non-refundable application fee.
- Professional evaluation of their university credits from a NACES-member organization (www.NACES.org), if required.
- Official Test of English as a Foreign Language (TOEFL), International English Language Testing System (IELTS), or Pearson Test of English (PTE) scores.
- Portfolio or video audition (if required for admission into or scholarship consideration for particular programs).

Applicants may submit the below optional material for consideration:

- SAT or ACT scores may be submitted. Test scores may be submitted in lieu of language testing scores.
- Recommendation from one teacher or guidance counselor.

Each applicant is considered through a review of their application and supporting material.

Language Proficiency may be determined based on the criteria below:

- TOEFL score for undergraduate: 75 (Some academic programs may require a higher score or previous university-level academic coursework in the United States.)
- Minimum IELTS score for admission: 6.0
- SAT or ACT
- ELS 112 completion certificate

Admitted students who intend to apply for an F-1 student visa must also submit an I-20 application and supporting documentation showing that the student or sponsor is willing and able to undertake the approximate costs of education and living expenses. A copy of a valid passport is also required. Upon acceptance, eligible students are sent a “Certificate of Eligibility for Nonimmigrant (F-1) Student Status” (also called a Form I-20). This form may be used to apply for an F-1 entrance visa to the U.S. issued by American embassies abroad.

International students are required to submit their LIU tuition deposit in order to receive their I-20. Once students receive their I-20 released by LIU they are able to begin the process of obtaining an F-1 visa to study in the United States.

For detailed information on immigration policy and maintaining F-1 status, international students should familiarize themselves with the LIU International Student Handbook.

Readmission

Any undergraduate student who has not attended the University for one or more regular semesters (fall or spring) and wishes to return must file a readmission form.

Undergraduate students who have attended other colleges since their last attendance at LIU must submit official transcripts before readmission will be approved. Students who have not attended classes for more than five years may reapply to LIU. If readmission is approved, a student’s return to LIU is subject to academic requirements as listed in the catalog in effect at the time of readmission.

Undergraduate students wishing to be readmitted into a new program will be advised through the admissions process and evaluated for eligibility for the new program of study. Readmission into specific programs (i.e., cohort based programs) may require the program director's and/or academic dean’s approval.

Any student who left the University on probation will be readmitted with the same probationary status that was in place during the last term of attendance unless the student provides academic transcripts demonstrating that they have met the requirements of the probation.

If readmission is approved, a student’s return is subject to the academic requirements posted in the catalog in effect at the time of readmission.

Student Academic Forgiveness

Students who have not enrolled for at least five years have the option to be readmitted with the following provisions:

1. The student must follow the bulletin in effect at the time they were readmitted.
2. All courses and grades received prior to the date of readmission will remain on the student’s permanent record, but will not be computed into the student’s academic average.

3. Only courses completed prior to readmission in which a “C” or better was earned will count toward the student’s graduation requirements. However, these grades will not be computed into the student’s academic average.

4. Courses completed prior to readmission in which a “C-” or lower was earned will not count toward graduation requirements nor will they be included in the computation of the student’s academic average.

5. This option, once chosen, cannot be rescinded.

**Visiting Students**

Long Island University permits students to enroll as a visiting student for one (1) academic semester. To enroll for more than one (1) academic semester, visiting students may request an extension of their visiting student status through the Office of Admissions.

Visiting students are expected to adhere to all policies set forth by Long Island University. Financial aid is not available for students who are visiting at Long Island University.

Visiting students seeking to matriculate into an LIU program must submit an application through the Office of Admission.

**New York State Immunization Law**

In accordance with the New York State Department of Health, the following immunizations are required at Long Island University:

**Measles, Mumps, and Rubella (MMR):** In accordance with New York State Public Health Law § 2165, all students born on or after January 1, 1957 and are enrolled for at least six (6) credits or more are required to provide Long Island University with certified proof of vaccination from a health care provider.

**Meningococcal Disease (Meningitis):** In accordance with New York State Public Health Law § 2167 all students enrolled for at least six (6) credits or more are required to provide the University with certified proof of vaccination within the past 10 years from a health care provider.

**Rabies Vaccine:** In accordance with CDC recommendations, all students enrolled in the College of Veterinary Medicine are required to provide the University with certified proof of rabies pre-exposure prophylaxis (PreP) vaccination and proof of continued compliance during their enrollment at the University.

Students may request a medical or religious exemption from any of the vaccination requirements set forth above by submitting documentation in writing to the Center for Healthy Living, the department responsible for the collection and validation of immunization documents.

Proof of immunization, or documentation for exemption, must be submitted on the Immunization Portal prior to the beginning of the first semester of classes.

The University reserves the right to impose additional immunization requirements in collaboration with local and state health directives or recommendations.

**Graduation Rate**

As reported to the U.S. Department of Education and the New York State Education Department in spring 2021, the graduation rate for first-time, full-time, bachelor's degree-seeking undergraduates who enrolled in fall 2015 was 43 percent.
The Long Island University Honors College was inaugurated in 1963 as one of the nation’s first Honors programs. Students in the Honors College take courses designed to broaden their education and engage in interdisciplinary learning and research. Honors College students are granted exceptional privileges including: priority registration, small classes, interdisciplinary courses not offered through regular departments, additional internship, leadership, study-abroad and service learning opportunities, multiple fellowships and external scholarships, dedicated study space, and a Honors designation (Latin honors) on their diploma at graduation. Honors College students have exclusive access to the Honors Lounge, in one of the newest buildings on our NYC campus (Pratt 310).

The Honors College is a community founded on research and committed to its mission statement: “The Honors College at LIU prepares a select group of diverse and highly gifted students to solve society’s greatest challenges. Our mission is to foster tolerance, celebrate diversity, enhance research, and provide students the flexibility necessary to succeed in the workforce of tomorrow. Honors students explore world perspectives through our innovative curriculum that provides research opportunities and interdisciplinary connections. Through opportunities outside the classroom, including internships, joint interdisciplinary sessions and study abroad programs, students become accomplished global citizens who are prepared to balance creativity and analytical skill, and become leaders in their respective fields.”

Honors Program

Students in the Honors College earn 27 or more credits in Honors courses, which replace the General Education (core) requirements. At the most advanced academic level, every student in the Honors College enrolls in Honors Advanced Research Electives, leading up to capstone research papers and/or projects, ultimately intended for publication in conferences, exhibits or research journals, including the LIU Honors Journal. All Honors classes require students to explore their topics in more depth and interdisciplinary breadth than a non-honors course would. Specifically, they each include at least two of the following elements: Research and Creative Scholarship; Service Learning and Leadership; Experiential Learning; Breadth and Enduring Questions.

In the Honors College at LIU student learning is advanced in the following specific areas as approved by the National Collegiate Honors Council:

1. Research and Creative Scholarship - “learning in depth”
   - Includes data analysis, experimentation, measurement, and interpretation
   - Includes specialized, in-depth learning in addition to self-reflective, analytical, and creative activity
   - Produces documented scholarship that leads to new integrations, new knowledge, or new understandings of creative products

2. Service Learning and Leadership
   - Emphasizes community engagement
   - Produces a project or a series of collaborative projects that address real-world problems
   - Participate in philanthropic or humanitarian service

3. Experiential Learning
   - Focuses on hands-on, practical engagement with usable outcomes can also occur
   - Includes international experience and active learning
   - Emphasizes exploration and/or discovery rather than acquisition of specific knowledge sets
   - Involves continuous reflective writing and oral presentation as the students articulate their discoveries

4. Breadth and Enduring Questions - “multi- or interdisciplinary learning”
   - Provides greater depth than a non-honors course?
   - Confronts students with alternative modes of inquiry, exploration, discovery, tolerance of ambiguity, and enduring questions
   - Requires integrative learning: both local and global learning with connections across time, genre, and disciplines
   - Produces creative integrations of evidence from several disciplines with an aggressive emphasis on interdisciplinarity
   - Assessment of the products emphasizes process rather than product, focusing on metacognitive questions.

ADMISSION REQUIREMENTS

Freshmen are admitted with a high-school grade point average of 95 or above, and with a combined SAT score of 1300 or higher, or an ACT score of 28 or higher.

PARTICIPATION REQUIREMENTS

27 or more credits distributed over four years, depending on a student’s major.
Honors Courses

HAR 21 High Impact Art-Make, Do, Effect Social Change
This introductory course covers the arts as well as the methods used to produce, analyze and communicate them in different periods. In addition to traditional assignments, students will use experiential and interdisciplinary methods to approach different artistic disciplines, and to examine art, not as a commodity, but as a change-maker. Students will develop skills to use tools to build structures that are both artful and useful. Students will learn to design imagery and actions that inspire people to question the world as it is, imagine a better future, and work together for the common good.
Student must be part of the Brooklyn Honors Student Group in order to register for the course.
Credits: 3
Annually

HAR 22 High Impact Art-Make, Do, Effect Social Change
The second semester of this course is a deeper analysis of the arts as well as the methods used to produce, analyze and communicate them in different periods. In addition to traditional assignments, students will use experiential and interdisciplinary methods to approach different artistic disciplines, and to examine art, not as a commodity, but as a change-maker. Students will develop skills to use tools to build structures that are both artful and useful. Students will learn to design imagery and actions that inspire people to question the world as it is, imagine a better future, and work together for the common good.
Student must be part of the Brooklyn Honors Student Group in order to register for the course.
Credits: 3
Annually

HEC 21 Introductory Microeconomics and Public Policy
This course provides an introduction to microeconomics, a field which studies how individual behavior shapes socio-economic outcomes. The course will use experiential, interdisciplinary, project-based as well as traditional case studies and assignments to understand and apply microeconomics in business, consulting, industry, and policy. Not open to students who have taken ECO 2.
Student must be part of the Brooklyn Honors Student Group in order to register for the course.
Not open to students who have taken ECO 2
Credits: 3
Every Fall

HEG 21 Honors Literature and Writing Seminar I
Introductory, interdisciplinary course where students will acquire critical skills needed for the evaluation, interpretation and production of written documents and literature. Assigned readings are selected from all genres and reflect literature cultures around the globe. Assignments emphasize high-impact, transferable writing skills. Satisfies English and WAC requirements for graduation.
Student must be part of the Brooklyn Honors Student Group in order to register for the course.
Credits: 3
Every Fall

HEG 22 Honors Literature and Writing Seminar II
Second semester of an introductory, interdisciplinary course where students will acquire critical skills needed for the evaluation, interpretation and production of written documents and literature. Assigned readings are selected from all genres and reflect literature cultures around the globe. Assignments emphasize high-impact, transferable writing skills. Satisfies English and WAC requirements for graduation.
Student must be part of the Brooklyn Honors Student Group in order to register for the course.

Every Spring

HHE 100 - 192 Honors Advanced Elective Research Seminar
This is an interdisciplinary seminar that engages students in the study of current research in natural sciences, life sciences, social sciences, economics, business and art. Topics are proposed by faculty from all schools, departments and programs across the university and from members of the professional world (topics advertised in the class schedule each semester). Honors Advanced Research Elective Seminars are the capstone experience of the Honors College and integrate experiential learning, high-impact practices and non-traditional teaching methods, including visits to NYC business, government offices, NGOs, and museums. Students acquire skills to conduct high-level research in multiple disciplines, and are trained to present their results professionally as preparation for their careers.
Student must be part of the Brooklyn Honors Student Group in order to register for the course.
Credits: 3
Every Semester

HHE 195 Honors Independent Study
A student-initiated research or consulting project undertaken under the supervision with a faculty mentor. Students must submit a written proposal outlining the project objectives, a reading list, and a clear statement of how the student will be evaluated. The proposal requires approval by the faculty mentor and the Director of the Honors College and is intended for students to acquire skills in high-level research, including vetting, locating and summarizing data, mastering critical thinking skills related to the field(s) in question.
Student must be part of the Brooklyn Honors Student Group in order to register for the course.
Credits: 3
Every Fall

HHE 196 Honors Independent Study
A student-initiated research project undertaken under the supervision with a faculty mentor. Students must submit a written proposal outlining the project objectives, a reading list, and a clear statement of how the student will be evaluated. The proposal requires approval by the faculty mentor and the Director of the Honors College and is intended for students to acquire skills in high-level research, including vetting, locating and summarizing data, mastering critical thinking skills related to the field(s) in question.
Student must be part of the Brooklyn Honors Student Group in order to register for the course.
Credits: 3
Every Spring

HHE 197 Honors Independent Study
A student-initiated research project undertaken under the supervision with a faculty mentor. Students must submit a written proposal outlining the project objectives, a reading list, and a clear statement of how the student will be evaluated. The proposal requires approval by the faculty mentor and the Director of the Honors College and is intended for students to acquire skills in high-level research, including vetting, locating and summarizing data, mastering critical thinking skills related to the field(s) in question.
Student must be part of the Brooklyn Honors Student Group in order to register for the course.
Credits: 1 to 3
Every Fall

HHE 198 Honors Independent Study
A student-initiated research project undertaken under the supervision with a faculty mentor. Students must submit a written proposal outlining the project objectives, a reading list, and a clear statement of how the student will be evaluated. The proposal requires approval by the faculty mentor and the Director of the Honors College and is intended for students to acquire skills in high-level research, including vetting, locating and summarizing data, mastering critical thinking skills related to the field(s) in question.
Student must be part of the Brooklyn Honors Student Group in order to register for the course.

Every Spring

HHE 201 University Honors Special Project
A research project tied specifically to a case study, consulting project, or presentation of the student's
work at a conference, including independent research developed from work initiated in an Honors Advanced Elective Seminar, or research developed from another Honors course. Honors special projects must be approved and closely supervised by a faculty member. Requires the approval of the Director of the Honors College.

**Student must be part of the Brooklyn Honors Student Group in order to register for the course.**

**Credits: 1 to 3**

**On Occasion**

**HHE 300 Honors Travel Abroad Seminar**

The Honors College Travel Seminar is designed to engage students in travel-based and site-specific experiential learning. Preparatory work includes readings, critical analysis and vetting of evidence, as well as self-guided exploration of sites relevant to the seminar topic (chosen by faculty each year) to prepare students to apply these skills in their career. Offered during spring break. HHE 300 credit counts toward fulfilling the program’s Honors Advanced Elective requirements and can be taken for repeat credit.

**Student must be part of the Brooklyn Honors Student Group in order to register for the course.**

**Credits: 1**

**Every Spring**

**HHE 301 Service Learning: Honorable Commitments**

Honors Service Learning connects students to an issue facing a particular community or communities locally, nationally or globally and to organizations working to solve it. The course emphasizes experiential learning and high-impact practices, ranging from internships to team and/or community meetings with local or national organizations. Topics and internships are arranged year by year and on a case-by-case basis either by the Director of the Honors College, by faculty, deans, or the students themselves.

**Student must be part of the Brooklyn Honors Student Group in order to register for the course.**

**Credits: 3**

**Annually**

**HHI 21 Perspectives on Human History I**

A study of political, economic, social, environmental and health trends in world history aimed at discovering the nature of historical facts in the Early Modern and Modern world. Students acquire critical thinking skills, learn to recognize change over time, bias in documents, and to apply these skills in their future careers. Taken in conjunction with Honors Literature (HEG 21) and/or Honors Philosophy (HHP 21). Satisfies history and WAC requirements.

**Student must be part of the Brooklyn Honors Student Group in order to register for the course.**

**Credits: 3**

**Every Spring**

**HHP 21 Philosophy and Human Values in Perspective**

An introduction to key problems in ethical and social thought from the classical to the early modern world, as well as an exploration of and texts in the history of philosophy. Using experiential learning and case studies, students acquire skills to reflect on major ethical problems in society, politics, business, and in relation to contemporary social issues. Taken in conjunction with Honors Literature (HEG 21) and/or Honors History (HHI 21). Satisfies the Philosophy and WAC requirements for graduation.

**Student must be part of the Brooklyn Honors Student Group in order to register for the course.**

**Credits: 3**

**Every Fall**

**HHP 22 Philosophy and Human Values in Perspective**

Second half of the introduction to classic texts and problems in the history of philosophy as well as an exploration of the leading traditions of ethical and social thought from the classical to the early modern world. Students acquire skills to reflect on their own values in light of major ethical traditions and in relation to contemporary social issues. Taken in conjunction with Honors Literature (HEG 21) and/or Honors History (HHI 21). Satisfies the Philosophy and WAC requirements for graduation.

**Student must be part of the Brooklyn Honors Student Group in order to register for the course.**

**Credits: 3**

**Every Fall**

**HLS 22 Honors Spanish**

The second half of an introductory speaking, reading, and understanding Spanish course that places a major emphasis on the use of the language in its cultural context as one of the most widely spoken in the world. The course is designed to raise the verbal competency of students with little or no prior exposure to the language through the use of Spanish multi-media and exposure to Spanish-language oriented cultural and artistic events in New York City. Satisfies the language requirement for graduation.

The pre-requisite of HLS 21 or SPA 11 is required and the student must be part of the Brooklyn Honors Student Group in order to register for the course.

**Credits: 3**

**Every Spring**

**HPS 21 Honors Psychology**

An interdisciplinary introduction to psychology that explores its methodologies and development of the discipline and human mind over time. Classes are conducted as seminars, emphasizing experiential and project-based learning, with an emphasis on research and the application of theory to practice. May be used as a prerequisite for advanced courses in psychology.

**Student must be part of the Brooklyn Honors Student Group in order to register for the course.**

**Credits: 3**

**Every Fall and Spring**

**HSM 27 Honors Topics Research Seminar**

This interdisciplinary course teaches students fundamental research skills in one or more fields through experiential learning and high impact practices such as case studies, project-based learning, and research. Faculty and students explore contemporary research topics in fields such as Social Sciences, Natural Sciences, Business, and the Humanities. By studying a topic in depth, students will learn proficiency in accessing and vetting reliable data, writing professional essays, publishable articles, and the tools and confidence necessary for effective presentations. Required course for all Honors College students, except Pharmacy majors who take ENG 178 as a replacement.

**Student must be part of the Brooklyn Honors Student Group in order to register for the course.**

**Credits: 3**

**Every Fall and Spring**

**HSM 112 Honors Science Experiential Methods Seminar**

An interdisciplinary seminar focusing on issues that cut across multiple disciplines. The Honors Experiential Seminar is designed to combine science-based exploration including laboratory and field work in any of the natural sciences, with exploration of the proposed topic through another discipline in the humanities or social sciences.
Topics of inquiry vary from year to year, offered occasionally. HSM 112 credit counts toward fulfilling the programs' Honors Advanced Elective requirements and can be taken for repeat credit. **Student must be part of the Brooklyn Honors Student Group in order to register for the course.**

**Credits:** 4

---

**HSP 21 Political Rhetoric Seminar**

An interdisciplinary, experiential exploration of effective oral communication, with emphasis on analysis of classical and contemporary modes of political rhetoric. Students learn oral communication skills fundamental for their careers, using a variety of media, including speeches, television, advertising and film. Satisfies the speech requirement for graduation.

**Student must be part of the Brooklyn Honors Student Group in order to register for the course.**

**Credits:** 3

**Every Fall and Spring**

---

**HSP 22 Theatre as Social Ritual**

An experiential, interdisciplinary course focusing on effective oral communication, with emphasis on the social role of theatre and performance, with case studies from the pre-modern to the modern period. Student presentations and live productions are geared toward providing fundamental public communication skills for future careers in any field. Satisfies the speech requirement for graduation.

**Student must be part of the Brooklyn Honors Student Group in order to register for the course.**

**Credits:** 3

**Every Spring**

---

**HSS 21 Development and Social Institutions**

An interdisciplinary introduction to social science, this course provides students with an understanding of fundamental methodologies used in a variety of careers and disciplines, including the use of surveys, statistical models, and comparative/cross-cultural analysis. Satisfies 3 of the 6 social science credit requirements for graduation.

**Student must be part of the Brooklyn Honors Student Group in order to register for the course.**

**Credits:** 3

**Every Fall**

---

**HSS 22 Development and Social Institutions**

Second half of an interdisciplinary introduction to social science, this course provides students with an understanding of fundamental methodologies used in a variety of careers and disciplines, including the use of surveys, statistical models, and comparative/cross-cultural analysis. Satisfies 3 of the 6 social science credit requirements for graduation.

**Student must be part of the Brooklyn Honors Student Group in order to register for the course.**

**Credits:** 3

**Every Spring**

---

**UNS 392 Directed Research**

High-level research directed by an active research faculty member. Student engages in research with faculty, completes tasks as necessary. The product of the research is intended for publication. Student has guaranteed co-authorship if the published material is the result of the course. In order to enroll, a student must provide a program of research for the semester, approved by the research faculty sponsor, and request approval from the Director of the Honors College.

**Credits:** 4

**On Occasion**
ACADEMIC POLICY

Please refer to individual department listings in this bulletin for policies that may be specific to each academic discipline and for specific degree requirements.

Undergraduate Degrees

LIU Brooklyn awards the following undergraduate degrees: Bachelor of Arts, Bachelor of Business Administration, Bachelor of Fine Arts, Bachelor of Music, and Bachelor of Science.

Three-quarters of the work for the Bachelor of Arts degree (90 credits) must be in liberal arts and sciences; one-half of the work for the Bachelor of Science degree (minimum of 60 credits) must be in the liberal arts and sciences; one-quarter of the work for the Bachelor of Business Administration, Bachelor of Fine Arts and Bachelor of Music (minimum of 30 credits) must be in liberal arts and sciences as defined by New York State Education Department (NYSED).

Dual Degrees

LIU Brooklyn awards the following dual degrees: Bachelor of Science/Master of Science. These degrees are earned through the School of Health Professions.

Student Academic Standing

In accordance with University regulations, only students who have been admitted to the University, have formally registered, and are in good financial standing, may attend classes.

Full-time undergraduate students in good academic standing may carry 12-18 credits during each fall and spring semester without additional approvals. Undergraduate students may request to take 19 or more credits in the regular semester if they are in good academic standing and if they obtain approval from the Dean of Students or their designee. For any credits taken above 18, students are charged additional tuition at the per-credit rate.

Class standing is determined by the number of credits earned:
- Sophomore: 30 credits
- Junior: 60 credits
- Senior: 90 credits

Undergraduate students must maintain the following overall grade point averages (GPA) in order to be considered in good academic standing:
- 1.8 if they have accumulated up to 29 credits
- 1.9 if they have accumulated 30 to 59 credits
- 2.0 if they have accumulated 60 credits or more

Graduate students must achieve an overall Grade Point Average (GPA) of 3.00 to be considered in good academic standing.

In some departments, requirements for remaining in good academic standing may be higher based on accreditation requirements.

Students in years one or two of the Pharm.D. program may take 12-19 credits during each fall and spring semester. Students in years one or two of the Pharm.D. program are charged additional tuition at the per-credit rate for credits taken above 19.

Pharm.D. students are considered graduate students once they enter the year five curriculum and are enrolled in 500-level classes. Occupational Therapy B.S./M.S. dual-degree students are considered graduate students once they begin taking 500-level classes.

Students with excessive W’s or INC’s (or both) on their records may be considered as failing to make satisfactory progress toward completion of their programs of study and may be ineligible to continue until remedial steps have been taken.

Grading and Grade Point Average

Credits are granted for undergraduate courses completed with the grade of A, A-, B+, B, B-, C+, C, C-, D, or P. A grade of F signifies failure and no credit is awarded.

A grade of Incomplete (INC) may be assigned if a student has failed to complete part of the required course work. An INC is given by the faculty member. It is the student’s responsibility to make specific arrangements with the instructor to complete the course work and to have the grade submitted to the Office of the University Registrar within 2 semesters of the term in which the INC was earned.

INC grades will remain permanently on the record if the work is not completed within 2 semesters. If an unusual extension of time is necessary to complete the work, permission is required from the Vice President of Academic Affairs, and the grade change must be approved by the faculty member, the chairperson, and the dean. Upon completion of the INC grade, the grade date the work was completed is indicated on the transcript.

Students who never attended or stopped attending before the course withdrawal deadline date as defined in the academic calendar and did not properly withdraw by published deadline may be assigned a grade of NC - No Credit earned.

The W grade is automatically assigned when a student officially withdraws from a course by the published deadline dates in the academic calendar. View Withdrawal Policy.

Students who receive grades of W (withdrawal), NC (unauthorized withdrawal), INC (incomplete) or an opted Pass/Fail in the fall or spring semester are ineligible for inclusion on the Dean’s List for that semester.

Students have the option to repeat a course. In the event that individual programs have their own policies on repeating a course, the more restrictive policy will apply. Credits will be earned only once, and although the original grade remains on the student’s permanent record, the second grade (whether higher or lower) will be used in computing the grade point average. No student who has taken a course and received a passing grade in it may repeat that course for credits after he or she has taken a related course containing content of a higher level. A course may not be repeated more than once, except with the prior approval, following procedures contained in the Academic Catalogs. If a course is taken more than twice, all grades after the first grade will be computed into the student’s GPA. To be considered for graduation with honors, the student’s average shall include only the grade given to that student the first time he or she has taken any specific course.

Required courses in which a grade of F was earned should be repeated within one year.

Students are responsible for monitoring their major and cumulative averages to ensure they are meeting their requirements for graduation, as well as the requirements for satisfactory academic progress.

Undergraduate students are permitted to opt for a pass/fail grade in a maximum of one course per semester for a total of eight semesters. Pass/Fail option does not apply to courses in the student’s major, to courses that are prerequisites to or required by the major, or to courses that are used to satisfy the core requirement. The election of the pass/fail grading system must be designated by the 10th week of the semester, as listed in the Academic Calendar. All requirements of examination and work assigned by the instructor must be fulfilled. If a grade of P is assigned, credits are earned for the course but the grade is not calculated into the GPA. If a grade of F is assigned, the F is calculated into the GPA.

The symbol U is not computed in the student’s
average.

A student may receive only one U symbol in any course. On the second enrollment, the student must either satisfactorily complete the course or receive an F.

Students must achieve designated GPAs in order to graduate. Graduate students must achieve an overall Grade Point Average (GPA) of 3.00 to graduate. Undergraduate students must achieve an overall grade point average (GPA) of 2.00 to graduate. In some departments requirements may be higher (see departmental requirements). In the major area, the student must achieve an average of at least 2.00; in certain programs the minimum major average may be higher.

Quality points for a specific course are determined by multiplying the corresponding quality points (see below) for the grade received in the course by the number of credits awarded for the course. Total quality points are determined by adding all quality points for all courses. The grade point average (GPA) is determined by dividing the total quality points by the total number of credits, including those of failed courses. The grades W, NC and P are not counted in the GPA computation nor are the grades for courses taken at another college or university. All courses taken at any LIU campus or offered by LIU at off-site locations will be computed into the student's cumulative and major averages.

* not used for graduate level courses

Undergraduate students must maintain the following quality-point ratios to be in good academic standing:

- 1.8 if they have accumulated up to 29 credits
- 1.9 if they have accumulated 30 to 59 credits
- 2.0 if they have accumulated 60 credits or more

GPAs are computed using the third decimal place from which rounding takes place to the second decimal place. On all official LIU transcripts, a GPA will be displayed to three decimal places with the third decimal place always being zero due to rounding. Major GPAs are calculated using all courses required in a student's major (excluding core and co-related courses).

Grades of “P” are not computed into the overall GPA, but do count towards graduation credits.

Pass/Fail Option
Students may take a maximum of two courses on the Pass/Fail (P/F) basis per academic year (which includes winter, summer, weekend sessions, and all other newly created sessions, for a total of not more than 24 credits in a student’s resident undergraduate program). This restriction does not apply to courses offered only on the P/F basis. A grade of “P” will be posted on the student’s transcript only if the actual grade earned is a “D” or better. Only elective courses may be taken on a Pass/Fail basis. Core courses may not be taken on a Pass/Fail basis. “P” grades are not calculated into the GPA, but credits are earned for the course. “F” grades are calculated into the GPA. Core courses, courses in a student’s major, and co-related courses may not be taken as P/F without the written permission of the major or minor department chair or program director.

Students who opt for a Pass/Fail during the fall or spring semester are not eligible for inclusion on the Dean’s List for that semester. Students may choose the P/F option up to the 10th week of the regular semester as specified in the academic calendar. Changes to grade will not be considered after the deadline date.

To graduate with honors, a student must take at least 54 credits at LIU, not including courses taken on a Pass/Fail basis or Life Experience credits.

Grade Changes
A faculty member may change a grade in situations where it is warranted. All changes from one letter grade to another require instructor, chair and dean approval and must be completed prior to degree conferral. Changes to grades cannot be made once a degree has been conferred. In the event that a graduating student appeals a grade through the formal grade appeal process, a grade may be changed at the conclusion of the appeal process.

Student Grade Appeals
A grade appeal is only available before the student's degree is awarded. The basis for filing a grade appeal in any course is limited to:

- Fundamental fairness in treatment of the student by the instructor, as specified by a syllabus
- grading of the student by the instructor relative to other students in the same course and section. Issues that do not meet these criteria are not appropriate for a grade appeal.

Dean's List
Eligibility for the Dean’s List is evaluated after each fall and spring term and is determined by grades earned in the regular academic semesters (fall and spring). Summer Session grades are not considered.

Degree-seeking matriculated students who complete at least 12 credits and achieve a grade point average of at least 3.50 in any one semester are placed on the Dean’s List for that semester. Students who earn an F, W, NC, U or INC in any semester, even though the symbols are subsequently changed to grades, are not placed on the Dean’s List for that semester. Students who opt for a course Pass/Fail are not eligible for inclusion on the Dean’s List. A student who does not receive an official grade in any semester will not be placed on the Dean’s List until official grade submission, excluding those listed above, that otherwise qualifies the student for the Dean’s List.

Graduation
Students who meet all requirements for their degrees in August or January are considered to be in the graduation class of the following May. Diplomas are dated four times a year: January, May, July, and August. Candidates for graduation should confirm that their graduation term is reflected on MY.LIU at least one month prior to the end of their final term of enrollment.

Students who file a degree application after the conferral date for the term will have their degree awarded at the following conferral if all requirements have been fulfilled, regardless of the date of completion of requirements. Under no circumstances are degrees backdated and conferred for a prior conferral date.

Candidates for all degrees at LIU are expected to know the graduation requirements set forth in the catalog for the academic year in which they were admitted/matriculated. It is the responsibility of the student to draw up an acceptable program of study in consultation with their Success Coach or academic department.

Undergraduate degree requirements: To qualify for a bachelor’s degree, students must complete the core curriculum, all required liberal arts and sciences courses, and all departmental and University requirements listed in the undergraduate catalog for the academic year in which they were matriculated or readmitted. Specific requirements, substitutions, or exemptions, where relevant, are indicated.

The final 30 hours of credit must be earned in academic residence at Long Island University. A minimum of 9 credits of the requirements for a major must be completed in residency at LIU.

The undergraduate requirements for graduation are:

- 2.00 cumulative and major average (higher in some areas as indicated in the catalog)
- Core and major requirements fulfilled
- 120 credits (more in some departments as specified in the catalog)
To graduate with honors, undergraduate students must complete at least 54 graded credits in academic residence at LIU (this excludes courses graded on a pass/fail basis) to qualify for Latin Honors as follows:

- summa cum laude: 3.90 or higher
- magna cum laude: 3.70 - 3.89
- cum laude: 3.50 - 3.69

Note: Please see the LIU Global section for specific graduation requirements for the B.A. in Global Studies program.

Writing Across the Curriculum

The Writing Across the Curriculum (WAC) program is an important component of the LIU Brooklyn core curriculum. The WAC program mission has two goals: (1) to implement and supervise LIU Brooklyn’s writing-intensive requirement, and (2) to manifest and support the faculty’s emphasis on writing, both in the core and across the disciplines.

The LIU WAC program encourages students to recognize that writing is a key to their achieving those goals – common to all disciplines – set forth in the campus’ mission statement: the acquiring of essential literacies, and the development of intellectual curiosity, analytic and reasoning skills, and effective communication skills. To this end, throughout their undergraduate careers, students are expected to produce a substantial body of written work in core courses as well as in upper-division courses offered by all academic departments.

To fulfill their writing-intensive requirement, students must complete nine (9) credits in writing-intensive courses:

- English 16 (3 credits)
- A writing-intensive course from within the Core Curriculum (3 credits)
- A writing-intensive course in their major (3 credits)

Transfer students with the equivalent of one year of college-level composition are required to complete the writing-intensive requirement in their major. See academic advisers for specific writing-intensive courses required in the major.

Attendance

It is expected that students will attend all class sessions scheduled for the courses in which they are enrolled. Responsibility for class attendance rests with the student.

Ordinarily, the work missed through absence must be made up. However, permission to make up such work is not automatic and is given at the discretion of the instructor.

When a student’s attendance in classes is unsatisfactory to their instructors or the dean, the university reserves the right to exclude the student from an examination, course, or program.

Student Absence due to Religious Observance

Students who anticipate being absent because of a religious observance will notify their respective faculty at the beginning of the semester. The University complies with Section 224-a of New York State Education Law–Absence Due to Religious Observation.

Notification of Student Rights Under Section 224-a of New York State Education Law – Absence Due to Religious Observation

Under § 224-a of the NYS Education Law: "Any student in an institution of higher education who is unable, because of his or her religious beliefs, to attend classes on a particular day or days shall, because of such absence on the particular day or days, be excused from any examination or any study or work requirements. It shall be the responsibility of the faculty and of the administrative officials of each institution of higher education to make available to each student who is absent from school, because of his or her religious beliefs, an equivalent opportunity to register for classes or make up any examination, study or work requirements which he or she may have missed because of such absence on any particular day or days. No fees of any kind shall be charged by the institution for making available to the said student such equivalent opportunity."

Academic Good Standing, Probation and Dismissal

The University reserves the right to dismiss at any time students whose academic records are unsatisfactory. To be in good standing, students must make appropriate progress toward fulfilling all requirements of the program in which they are enrolled. Failure to do so will be cause for dismissal.

Students whose scholastic average falls below the following quality point ratios are placed on probation (some programs have higher GPA requirements for good academic standing; please refer to department sections for any additional information):

- 1.8 if they have accumulated up to 29 credits
- 1.9 if they have accumulated 30 to 59 credits
- 2.0 if they have accumulated 60 credits or more

At the discretion of their dean, a probationary student may be required to carry a limited program.

The records of students on probation are subject to review by the appropriate academic committee. Such students may have their probationary periods extended, or they may be dismissed. The committee is the highest authority on questions of probation.

Students with excessive W’s or INC’s (or both) on their records may likewise be considered as failing to make satisfactory progress toward completion of their programs of study. In that event, they may be declared ineligible to continue until they have taken appropriate steps to rectify the situation. The appropriate academic committee is the highest authority on such questions of satisfactory progress.

A student remains in good standing until the committee declares the student ineligible to continue.

Student Conduct

Discipline in the classroom is the responsibility of the faculty member in charge of the class. Misbehavior that interferes with the educational efficiency of a class will be considered sufficient cause for the dismissal of a student from a class. A student who is dismissed from class for disciplinary reasons must first attempt to resolve the problem with the faculty member. If this is not possible, the problem can be referred to LIU Promise or the Dean of Students' Office.

In instances where a faculty member or an academic department requires Department of Public Safety assistance, the faculty member or academic department will report the incident to the Department of Public Safety so that a report can be generated. A faculty member, chair, or dean also has the right to make a formal grievance against a student by filing a written statement with the Dean of Student's office. The information will then be reviewed by the Dean of Students’ designee to determine whether or not any violations of the Ethos Statement and Code of Conduct were committed. When applicable, the student will then proceed through the established Student Conduct adjudication process. The appropriate dean will also be notified of the incident. The final determination as to whether or not the student will be permitted to continue as a member of the class, department, or school would be the decision of the Dean or their designee, subject to appeal by the Vice President for Academic Affairs.

For additional information outlining the Student Conduct disciplinary process, please refer to the Student Handbook, which is updated annually. It is also available on the LIU Post website.

Student Academic Conduct
Proper academic conduct requires that all work submitted for academic purposes be entirely the work of the person or persons who submit it. Actions that violate the standards of academic conduct include:

Plagiarism represents in any academic activity the words or ideas of another as one’s own without proper acknowledgment. Acts of plagiarism include but are not limited to:
- paraphrasing ideas, data, or writing, even if it constitutes only some of one’s own written assignment, without properly acknowledging the source; or
- using someone’s words or phrases and embedding them in one’s own writing without using quotation marks and citing the source; or
- quoting material directly from a source, citing the source on the bibliography page, but failing to mark properly the author’s text or materials with quotation marks and a citation; or
- submitting as one’s own, part of, or an entire work, produced by someone else; or
- transferring and using another person’s computer file as one’s own; or
- obtaining papers, tests, and other assessment material from organizations or individuals who make a practice of collecting papers for resubmission; or
- using visual images, dance performances, musical compositions, theatrical performances, and other digital resources as one’s own without proper acknowledgement.

Cheating is improper application of unauthorized materials, information, or study aids, including but not limited to:
- obtaining unauthorized prior knowledge of an examination or part of an examination; or
- using resources or instruments on academic tasks not explicitly permitted by the supervising instructor (e.g., textbook, notes, formula list, calculator, etc.); or
- using any electronic device in an academic exercise or examination that is not explicitly authorized by the supervising faculty. This includes but is not limited to the Internet, cell phones, beepers, iPods, headphones, PDAs, and other wireless handheld devices; or
- altering an exam or paper after it has been graded and requesting a grade change; or
- collaborating by sharing information or requesting assistance, when such collaboration has been explicitly prohibited by the instructor; or
- making use of another person’s data or work without proper citation in an assignment; or
- allowing another person to take a quiz, exam, or similar evaluation; or
- submitting work with identical or similar content in concurrent courses without permission of the instructors; or
- resubmitting work that has already received credit with identical or substantially similar content in another course without consent of the present instructor.

Facilitating academic dishonesty is assisting another to cheat, fabricate, or plagiarize, including but not limited to:
- allowing another student to copy from one’s own work; or
- providing material or other information to another student with knowledge that such assistance could be used in any of the violations stated above; or
- taking a quiz, exam, or similar evaluation in place of another person; or
- signing on the attendance sheet the name of a student who is not present.

Fabrication is the falsification or invention of any information or citation in an academic activity, including but not limited to:
- crediting source material that was not used for research; or
- presenting results from research that was not performed; or
- altering data to support research; or
- presenting fabricated excuses for missed assignments, tests, or classes; or
- falsifying documents or records related to credit, grades, status, or other academic matters.

Sabotage is understood as stealing, concealing, destroying or inappropriately modifying classroom or other instructional material of another, such as posted exams, library materials, laboratory supplies, or computer programs. Students accused of violating the University’s standards of academic conduct will be subject to disciplinary processes set forth in the Academic Conduct Procedures.

Student Academic Conduct Appeals Procedure

Students at LIU Brooklyn may expect scrupulous regard for their rights as students and individuals and should expect to be treated fairly and with courtesy by all members of the academic community. In any matter in which students feel that their rights have been violated, or in matters of serious dispute with members of the administration or faculty, students may avail themselves of the following formal grievance procedure:

1. The student will write out a clear statement of the grievance.
2. The student may submit this statement to the staff member involved. The student will be given a written response within a reasonable time.
3. If the student is not satisfied with the response the student may submit a statement to the appropriate director or department head. The director will review the matter and provide the student with a written response within a reasonable time.
4. If still not satisfied, the student may institute a formal complaint with the dean of the school in which they are enrolled. The dean will review the matter, hear the student and staff member where appropriate, and see that the proper action is taken.

The foregoing procedure shall be a formal grievance procedure for the resolution of all student grievances, including those alleging actions prohibited by legislation.

Student complaints brought to the Office of Academic Affairs are investigated and responded to only when the complaint has been addressed at the campus level.

Criminal Background and Drug Testing

A criminal conviction and/or the use of illegal drugs may impede or bar your entry into your chosen field of study. Students seeking entrance into many fields of study including counseling, education, and health and human services professions should be aware that a criminal record can result in the refusal of licensing/certification/registration agencies to issue the credential needed to practice in that field of study. Prospective students are urged to contact the pertinent state and/or federal licensing agency to inquire whether a criminal record will have an impact on licensure or certification eligibility.

Many clinical/field experience affiliates now require the completion of criminal background checks and/or drug testing for employees, volunteers, and students affiliated with the site. Therefore, students who plan to participate in a clinical/field experience may be asked to undergo a criminal background check, and/or a drug screen. Students should be aware that our clinical/field affiliates can reject or remove a student from the site if a criminal record is discovered or if a drug test is positive. In the event that a student is rejected from a clinical/field site due to information contained in the criminal background check or drug screen, the student may be unable to complete a required clinical/field experience. In such an event, the student may be advised to withdraw from the program.

Related Curricular Matters

Semester Hour/Unit
The unit of credit is the semester hour. It represents 50 minutes of instruction per week for one semester. Each semester hour requires a minimum of two hours a week of private study or laboratory work.

Majors
Students who wish to change a major may do so
with the written approval of their success coach. In some instances, approval of the academic department is also required.

Change of Major forms are submitted to the University Registrar's office once approved. Changes in major forms submitted after the drop/add period of a term will be reflected in a student's record at the start of the following term. Changes to majors are not made effective mid-semester.

If a student’s cumulative average is less than 2.0, the student may change a major only with the approval of the chair of the new department and the dean.

Double Majors
A student may be granted permission to pursue two academic plans (a primary and a secondary major) at the undergraduate level. The student pursuing two academic plans is required to fulfill the academic plan and correlated requirements for both areas, as well as the core curriculum requirements; however, only one degree will be awarded. In order to receive two separate degrees, students must complete at least 150 credits.

Cross-Referenced Courses
Cross-referenced courses may be applied only once to a student’s program/plan; students may choose under which discipline a cross-referenced course will be listed. The course designation may not be changed once the course appears on the student’s permanent record.

Numbering of Courses
Every course in the curriculum is identified by a number below 100 if it is introductory, above 100 if it is advanced, and above 500 if it is on the graduate level.

**INSTITUTIONAL LEARNING GOALS**

Assessment of student learning demonstrates that Long Island University’s students have accomplished educational goals consistent with their programs of study and institutional expectations. In accordance with Middle States Commission on Higher Education (MSCHE) standards, student learning is assessed at the degree program and institutional level. Student learning goals at the institution and degree program levels are interrelated with one another with relevant educational experiences. Long Island University’s institutional learning goals are:

1. **CREATIVE AND REFLECTIVE CAPACITIES.** Openness to new ideas and appreciation of integrative and reflective thinking, investigation, and synthesis of existing knowledge as a way of creating and critiquing original, innovative work grounded in scientific, humanistic, historical, and/or aesthetic disciplinary knowledge.

2. **HISTORICAL AND INTERCULTURAL.**

AWARENESS. Recognition of oneself as a member of a global community consisting of diverse cultures with unique histories and geographies.

3. **QUANTITATIVE AND SCIENTIFIC REASONING.** Competence in interpreting numerical and scientific data in order to draw conclusions, construct meaningful arguments, solve problems, and gain a better understanding of complex issues within a discipline or in everyday contexts.

4. **ORAL AND WRITTEN COMMUNICATION.** Knowledge and skill in proficiently composing and comprehending complex ideas through a range of media in a variety of contexts and disciplines for specific purposes and audiences.

5. **INFORMATION AND TECHNOLOGICAL LITERACIES.** Cognitive and technical ability to use information and communication technologies to find, evaluate, create, and effectively and responsibly use and share that information.

6. **CRITICAL INQUIRY AND ANALYSIS.** Capacity for reflective assessment and critique of evidence, applying theory, and practicing discernment in the analysis of existing ideas and in the production of new knowledge across a broad array of fields or disciplines.

7. **ETHICAL REASONING AND CIVIC ENGAGEMENT.** Ability to evaluate ethical issues in conduct and thinking, demonstrate ethical self-awareness, and consider various perspectives that foster responsible and humane engagement in local and global communities.

**CORE CURRICULUM**

Core Curriculum: 34 - 35 credits.

The following core curriculum requirements apply to all units of LIU Brooklyn. Consult program models for any additional requirements, changes and exemptions. Core curriculum courses may not be taken on a pass/fail basis.

Any changes in the core curriculum will be required of all students entering subsequently.

**LIU Brooklyn Undergraduate Catalog 2022-2023**
REGISTRATION

Enrollment

Students are eligible to enroll in courses at the University if the following criteria have been met:

- Must be a current/active student
- Must be in good financial standing with the University.
- Must be academically eligible to continue in their program
- Must have satisfied all Admissions requirements

Students must adhere to the following deadlines for enrollment:

- Enrollment should be completed by the end of the drop/add period for each term, as defined in the academic calendar which is published in the enrollment services/registration/academic-calendar. For Fall and Spring full-semester courses, the drop/add period is the first two weeks of the semester.
- If extenuating circumstances exist, permission for late enrollment must be secured by each course instructor, department chair, and dean within 2 weeks following the drop/add period as described above. All required signatures must be secured on an enrollment card and submitted to Enrollment Services.
- Students are not permitted to enroll beyond the fourth week of the term. Students are not permitted to continue attending classes for which they are not enrolled beyond the fourth week of the term. Under no circumstances is retroactive enrollment beyond the fourth week of the term permitted.

Students are eligible to select and register for classes through their My LIU (my.liu.edu) account. Students with academic and financial restrictions may not be able to register online and should meet with their success coach.

The Division of Student Affairs disseminates registration communications to all students via LIU email before the start of the summer/fall and winter/spring semester registration periods. Registration dates are also noted on the academic calendar and My LIU account under "Enrollment Dates."

Students are encouraged to meet with their Success Coach before the start of the registration period to plan their academic semester schedule.

Adding or Dropping Courses

Adding courses: Students may add classes to their schedules through their MyLIU portal during the online registration period. Online registration ends after the second week of classes for the fall and spring terms. Nontraditional terms and sessions will have customized add dates. See the University’s Tuition Liability Policy for additional details. Some classes may be blocked for online registration because they require department approval. If online registration is unavailable, the student must submit a completed Enrollment Change Form to the Office of Enrollment Services with approval signatures. Please see the section on Departmental Consent below for additional information.

Beginning with the third week of classes, course additions require the approval of the following persons and/or departments before the Office of Enrollment Services will process the change:

- Instructor (required)
- Dean or Department Chairperson (required)
- Student Financial Services (for changes in cost of attendance or enrollment status)

All course enrollment for full-semester courses must be completed by the end of the fourth week of the term. Enrollments after that time is not permitted. Retroactive enrollment for courses from a prior term is not permitted under any circumstance.

The following course enrollments require special administrative or departmental consent:

- Restricted Courses: occurs if the department has restricted enrollment in a course. The student must obtain either a course permission code or signature from the instructor, department chair, or dean, as defined by the academic department.
- Credit Overloads: occurs at the career level; when a student would like to add a course(s) that will take him/her over 19 credits for undergraduates and 12 credits for graduates for the semester. Full-time undergraduate students who add credit hours over 18 will be charged additional fees for those excess hours. Students wishing to enroll in an overload must obtain the signature of the advisor and chair as defined by the academic department.
- Closed Courses: occurs when there are no seats available in the course. The student must obtain the signature of the course instructor and department chairperson.
- Time Conflicts: occurs when two courses take place during the same or overlapping time period. The student must obtain the signature of both instructors and the department chairperson for each course.
- Requisite Overrides: occurs when the student does not have the required pre- or co-requisite for the course. The student must obtain the signature of the instructor and department chairperson.
- Service Indicator Overrides: occurs when a student has a hold on their account that prevents them from engaging in an enrollment activity. Students are advised to check for registration holds on their MyLIU portal Student Center page to determine the origin of each hold. The student should contact that office noted and remedy the situation so as to have the hold either removed from their account or obtain approval for the hold to be overridden.

Dropping courses: Students can drop full-semester classes up through the second week of the term with no penalty as follows:

- Drop one or more courses online using their MyLIU portal
- Drop courses at the Office of Enrollment Services
- Drop courses through their Success or Enrollment Services coach.

The drop period for classes that meet for less than the full semester is as follows:

- Sessions meeting 7 or more weeks: courses can be dropped up through the first week
- Sessions meeting 3 to 6 weeks: courses can be dropped up through the 3rd day of the session
- Sessions meeting 2 weeks or less: courses can be dropped up through the 1st day of the session

Students may have their financial aid reduced if the student’s enrollment status changes from full-time to part-time, or from full-time or part-time to below half-time. Students will have their financial aid canceled if the student drops all courses and does not incur any liability, or fails to meet satisfactory academic progress standards as a result of the cancellation of enrollment. Financial aid for future terms will also be canceled. See the Drop and/or Withdrawal from Courses Policy and the Satisfactory Academic Progress Policy for additional details. Students receiving Veterans benefits should meet with the Veteran’s Certifying Official to determine if drops will affect their current and future benefits when they; add or drop any course, withdraw from or terminate enrollment at the University.

Drops that change a student’s enrollment status from full-time to part-time, or from full or part time to below half-time, may have their Federal, State, and/or University aid adjusted. The University may also be required to report the student's change in enrollment status to lenders, which can trigger the repayment of student loans. Students will be notified in these cases via writing.

Drops after the add/drop period must be officially processed as a partial or full withdrawal. Please see Withdrawal Policy and/or Appeals Policy for additional details.

The following course drops may require special administrative or departmental consent as follows:
Withdrawal

Students are able to withdraw from course(s) after the end of the drop/add period. An official withdrawal refers to an action taken by a student to discontinue enrollment in the course. The course is recorded on the transcript with a grade of W.

- Partial Withdrawals. When a student withdraws from one or more classes, but remains enrolled in at least one class.
- Complete Withdrawals. When a student drops or withdraws from all of his/her courses in a current term. This can occur at one time or over a period of time within a term.

An unofficial withdrawal refers to a student who fails to attend or ceases to attend one or more classes before the withdrawal deadline detailed in the academic calendar but doesn't take appropriate action to officially withdraw from the class/university. Since no official withdrawal was completed, faculty can assign a grade of NC (No Credit earned) or F at their discretion.

Students may officially withdraw from one or more courses through the 10th week of the term for full-term courses during the fall and spring semesters.

Students may officially withdraw from Summer Session courses or courses meeting for shorter sessions within regular fall/spring semesters according to the schedule below:
- 12 week sessions – withdrawals permitted through the 8th week
- 10 week sessions – withdrawals permitted through the 7th week
- 7 week sessions – withdrawals permitted through the 5th week
- 6 week sessions – withdrawals permitted through the 4th week
- 5 week sessions – withdrawals permitted through the 3rd week
- 2 week sessions – withdrawals permitted through the 7th day
- 1 week sessions – withdrawals permitted through the 3rd day

The effective date of withdrawal for a student who withdraws is the earlier date of:
- the date the student began the withdrawal process; or
- the date the student otherwise provided the University with official notification of the intent to withdraw; or
- the date the institution becomes aware the student ceased attendance; or
- the midpoint of the payment period or period of enrollment for which Title IV assistance was disbursed if the student ceases to attend without official notification and withdrawal.

Tuition Liability and Refunds: Refunds for room and/or board, tuition and fees will depend on when the student withdraws from courses.
- For official withdrawals, the effective date of the withdrawal will determine the student tuition liability due or refund due to the student.
- For unofficial withdrawals, the student is responsible for all associated tuition charges and fees.

Transcripts and Grades: Transcript grades will depend on when the student withdraws from courses.
- For official withdrawals, a grade of W will be assigned for the course or courses and will appear on the student's transcript
- For unofficial withdrawals, a grade of NC or F will be assigned for the course or courses and will appear on the student's transcript.

For both official and unofficial withdrawals, credits for the course or courses will be considered attempted but not earned.

Withdrawn courses or NC (No credit earned) grades do not affect a student’s grade point average.

Students who change their enrollment status from full-time to part-time, or from full or part-time to below half-time, due to a partial drop or withdrawal, may have their federal, state, and/or University aid adjusted. The University may also be required to report the student's change in enrollment status to lenders, which can trigger the repayment of student loans. Students will be notified in these cases via writing.

Students will have their financial aid canceled if the student drops all courses and does not incur any liability, or fails to meet satisfactory academic progress standards as a result of the withdrawal. Financial aid for future terms may also be canceled. See Appeals for Late Drop or Withdrawal of Courses Policy and Satisfactory Academic Progress Policy for additional details.

The University is required to return funds for students who stop attending all courses before completing 60% of the term. The student will be notified by mail of the unearned amounts returned to the federal financial aid programs. The return of federal funds may result in a balance due to the University, particularly if the student previously received and cashed a refund check. See Return of Federal Funds Policy for additional details.

Students residing in on-campus housing must contact the Office of Residence Life upon withdrawal from the university. Students must follow proper check-out procedures and must vacate their campus housing within 48 hours of the effective withdrawal date. Students who drop or withdraw from a future term must vacate their campus housing after completion of finals. Room and board charges must be cancelled through the Office of Residence Life. Liability for these charges will be assessed at the time of cancellation.

Students who withdraw from all courses may be subject to readmission according to the University’s Readmission Policy. Students who withdraw from the university must be in good financial standing in order to register for future classes or have access to their official and unofficial transcripts.

In accordance with National Collegiate Athletic Association (NCAA) regulations, all intercollegiate athletes must notify the Athletic Department and Office of Admissions when partially or fully withdrawing from the University.

In accordance with the U.S. Department of Veterans Affairs (VA) regulations, students receiving veteran's benefits must notify the VA Certifying Official in Office of Enrollment Services when partially or fully withdrawing from the University.

Appeals for Late Drop or Withdrawals

A student may appeal for permission to drop or withdraw from a course outside of the timeframes establish in the Adding or Dropping Courses Policy. The appeal may be made in person, by fax, or email by submitting a signed and completed Student Appeal Request Form along with the required documentation to Enrollment Services. All appeal requests must be submitted by the student. Appeals submitted by a parent, legal guardian or spouse will be accepted only if the student is incapacitated.

REQUIRED DOCUMENTATION
- A written statement from the student: must clearly state the request, the reason for the request
Any interested student must:

- Apply for admission to the Department Chair and Dean. An undergraduate student may apply for substitution of graduate courses for undergraduate requirements must be approved by the department chairperson, and dean. Approval for the substitution of graduate courses for undergraduate requirements must be approved by the department chair and Dean. An undergraduate student may register for a maximum of 12 graduate credits in total under this policy. Credits earned in graduate courses that are applied to the bachelor's degree may not subsequently be applied to a master's degree. Exemptions to this policy are found in descriptions of accelerated/shared credit programs.

Graduate Courses Open to Undergraduates

A qualified LIU junior or senior student with a minimum cumulative grade point average of 3.25 may complete bachelor's degree requirements by taking graduate courses at the undergraduate tuition rate. Any request for an exception to the 3.25 minimum average requirement must be approved by the appropriate Dean. Requests to register for graduate classes must be approved by the student's success coach, department chairperson, and dean. Approval for the substitution of graduate courses for undergraduate requirements must be approved by the department chair and Dean. An undergraduate student may register for a maximum of 12 graduate credits in total under this policy. Credits earned in graduate courses that are applied to the bachelor's degree may not subsequently be applied to a master's degree. Exemptions to this policy are found in descriptions of accelerated/shared credit programs.

Admission of Undergraduate Students to Graduate Programs

A qualified LIU senior who needs less than a full program to meet their bachelor's degree requirements may concurrently register for undergraduate courses and a limited number of graduate courses, the credits from which may be applied toward his/her situation. Any interested student must:

1. Complete an application for graduate admission;
2. Be provisionally accepted into the department or school;
3. Must notify the Registrar in writing of their intention to take graduate courses and reserve them for a subsequent graduate degree while being concurrently registered for undergraduate courses needed to complete their undergraduate degree;
4. Have their registration card signed by both the undergraduate and graduate success coach and by the appropriate department chairperson and dean.

Maintenance of Matriculation

It is expected that students will fulfill the requirements for the degree by registering over successive semesters (excluding summer sessions), by attending classes, filing for a Leave of Absence, or by maintaining matriculation. A fee must be paid for each term in which a student maintains their matriculation.

Students approved for maintenance of matriculation can avail themselves of campus facilities and services (e.g., computer labs, library privileges). Maintenance of matriculation does not, however, extend the time limits specified under “Requirements for Degrees,” and students should be aware that such status may affect their eligibility for financial aid.

Students must apply to a Success Coach or Enrollment Services representative for maintenance of matriculation prior to or during the registration period in a given semester. This matriculation status will be recorded on students’ records as a “class” for zero credits.

Maintenance of matriculation is generally limited to two semesters. An extension beyond two semesters, due to extenuating circumstances, must be approved by the appropriate academic dean. Students who do not properly maintain their matriculation must apply for readmission to their academic program in accordance with procedures set forth in the academic catalogs.

Leave of Absence

LIU permits students to interrupt their studies when appropriate. If granted, a leave of absence allows a student to continue under the requirements in effect when he/she was initially admitted.

A student who wants to interrupt their studies at the University for a temporary period (up to one year) may maintain degree status and ensure that his/her degree requirements will remain the same by taking a leave of absence. A degree candidate who is granted a leave of absence does not need to be readmitted to the University upon returning to their program of study. Students are not permitted to attend another college or university while on an official leave of absence. No financial aid or additional fees will be assessed during the leave of absence period.

A student must meet the following requirements to be eligible for a leave of absence:

- Be a degree-seeking undergraduate or graduate student.
- Be registered for the semester immediately prior to the beginning of the Leave of Absence.
- Be academically eligible to enroll (i.e., has not been academically suspended or dismissed).
- Have no holds (i.e. disciplinary or financial) which would restrict registration.
- Submit a formal written and signed Leave of Absence application form, which specifies the reason for the student’s leave.
- Graduate students and students in certain cohort-based programs require department/dean approval to be indicated on the Leave of Absence form.

A Leave of Absence Application must be submitted to Enrollment Services prior to the start of the term for which the leave is requested. If a student has already enrolled for the semester for which a leave is being requested, they must drop all courses; if they do not, their courses will automatically be dropped upon approval of the Leave of Absence.

A Leave of Absence Application must be submitted to Enrollment Services prior to the start of the term for which the leave is requested. If a student has already enrolled for the semester for which a leave is being requested, they must drop all courses; if they do not, their courses will automatically be dropped upon approval of the Leave of Absence.

Leaves of Absence are granted for future terms only, and are not granted retroactively or in the middle of a term. In such exceptional cases where unforeseen circumstances occur after the start of a term, students are permitted to officially withdraw from the University according to the University’s Official Withdrawal policy and appeal any charges assessed to their accounts, or receive incomplete grades that can be made up with the instructor(s).

In all such cases where an official leave of absence is not granted, the University is required to perform a return of federal funds calculation for students receiving Title IV federal financial aid.

Federal student loan guidelines mandate that a student must return from an approved leave of absence within 180 days from the start date of the approved leave. When a student fails to return from a leave of absence, the student’s withdrawal date will be reported to the National Student Clearinghouse and NSLDS as the date the student began the leave of absence. Upon returning from a leave of absence, the student may register for classes accordingly.

International students should know that immigration regulations may prohibit those who have been granted such a leave from maintaining their visa status.

Auditing of Courses

Selected classes may be audited on a non-credit basis. Auditing status must be elected at the time of registration for the class. No grade or credit is awarded for courses that are audited. Please note: The laboratory component of all science courses cannot be audited, nor can any independent study/individual instruction classes.
**Life Experience Credit**

Life Experience Credit (LEC) is credit given in recognition of knowledge obtained in some way other than study in a two or four year accredited college. The knowledge must be equivalent to what would be learned in a LIU Post undergraduate course, and the applicant must be able to demonstrate such knowledge. It is the learning, not the experience itself, for which credit is awarded.

LIU undergraduate degree candidates who have completed at least six (6) undergraduate credits may be eligible for LEC. LIU graduate degree candidates may be eligible to apply for undergraduate LEC that is a prerequisite to acceptance in, or graduation from, a program leading to a graduate degree, or required for professional certification in the candidate’s graduate area. To be eligible, a student must have completed six credits in a graduate degree program at LIU.

Student may demonstrate knowledge gained through life experience in the following ways:
- Written examinations given by the department; sometimes in the form of a final examination, typically given in the relevant class.
- Demonstration of skills through performance or presentation of a portfolio. This method could be used in evaluating skills in such areas as foreign language, writing, art, music, and dance.
- Written presentation with documentation. This method may include an essay identifying what the learning is and should demonstrate the relationship of the learning to a particular course at LIU.

Include in the presentation documents and other materials that verify this learning. For example, real estate and insurance brokers, nurses, and medical technicians may have taken in-service courses and been awarded licenses or certificates of proficiency, which may be presented as supporting evidence.

The evaluator who determines LEC is a faculty specialist in the field; the evaluator decides what method of demonstration is appropriate; what evidence is necessary; and how much evidence is required to make a decision.

If Life Experience credit is approved, the student is notified to pay a fee of $250 per credit granted. Once the fee is paid at Enrollment Services, the University Registrar’s office posts the credits to the student's record.

The following additional criteria apply to the awarding of LEC:
- LEC is not awarded for graduate level courses.
- LEC does not count towards the residency requirement for graduation with honors.
- LEC is not awarded for Accounting or English Composition courses.
- A maximum of six (6) LEC credits will be awarded in foreign language.
- Students may not use LEC earned in a foreign language to fulfill a core curriculum requirement.
- The number of credits granted through LEC for a baccalaureate degree may not exceed 60. If a student also earns CLEP credit, the maximum combined LEC and CLEP credits may not exceed 60.

**Transcript Requests**

Official transcripts for professional and graduate schools, prospective employers, and other institutions must be requested and authorized by the student. The university adheres to the Family Education Rights and Privacy Act of 1974. A student's record will not be released without prior consent from the student.

To request an official transcript the following procedures apply:
- Currently Enrolled Students - Login to the My LIU portal and select "Order Transcripts Online." Cost: $15.00 per transcript.
- Alumni or students not currently enrolled can order transcripts online through Parchment at www.parchment.com. You can submit a transcript request 24 hours/day, 7 days/week. Be assured that Parchment uses current web encryption technology and your information is secure. Cost: $15.00 per transcript.
- In-Person "On Demand" transcripts - Students may come to the campus Enrollment Services Office, show picture ID, and official transcripts can be printed on the spot. Cost: $25.00 per transcript.

Students who wish to release their transcripts to a third party for pick up must provide signature authorization for that request. The third party will be required to show a photo id.

**Additional Administrative Matters**

**Changes to Academic Records**

Students have until the time of their graduation to have changes made to their academic records. Once a student has graduated, the academic record is frozen and cannot be changed retroactively.

**Failure to Fulfill All Non-Academic Requirements**

Students failing to fulfill all non-academic requirements (tuition, fees, library obligations, etc.) will be denied subsequent services, including issuance of diplomas.

**Course Cancellations**

The university reserves the right to cancel undersubscribed courses. When it does so, there is no fee charged to the student.

**Policy for Taking Courses at Another Institution**

Matriculated students at LIU Brooklyn may only take courses at another institution and have credits transferred to LIU Brooklyn under the following conditions:
- Students must file an application to take courses at another institution with their respective dean’s office. Students must have the relevant department verify the LIU Brooklyn equivalency and credits. The dean may then grant permission. Note: the dean, not the department, grants permission.
- The other institution must be an accredited institution (two-year community colleges are unacceptable).
- It must not be within the New York City metropolitan area (within a 50-mile radius of LIU Brooklyn) except as noted below.
- Students may be permitted to take specialized courses not offered on campus, e.g., Japanese, or medieval stained glass windows.
- Only credits for courses with grades of C or better may be transferred back to LIU Brooklyn.

A student must report changes of address or phone number to Enrollment Services or by updating the information directly at MyLIU.

### Housing and Meal Plan Schedule

| Fall/Spring Accommodations (per term)    |        |
| Housing Deposit (non-refundable)        | $300   |
| Conolly Hall:                           |        |
| Standard Single                         | 9,437  |
| Standard Double                         | 5,500  |
| Suite Double                            | 5,616  |
| Suite Quad                              | 5,877  |
| Apartment Double                        | 7,500  |
| Apartment Quad                          | 7,051  |
| 490 Fulton Street:                      |        |
| 3-4 Bedroom Apartment                   | 11,984 |
| 5-6 Bedroom Apartment                   | 8,015  |
| Intersession Rate (per week)            | 346    |
| Summer Accommodations (per session)     |        |
| Conolly Hall:                           |        |
| Standard Single                         | 3,775  |
| Standard Double                         | 2,216  |
| Suite Double                            | 2,247  |
| Suite Quad                              | 2,351  |
| Apartment Double                        | 3,000  |
| Apartment Quad                          | 2,821  |
| Fall/Spring Meal Plans (per term)       |        |
| Residential Meal Plan 1 (unlimited meals plus $300 dining dollars) | 2,938 |
| Residential Meal Plan 2 (14 meals per week plus $300 dining dollars) | 2,695 |
| Residential Meal Plan 3 (10 meals per week plus $300 dining dollars) | 2,441 |
| Residential Dining Dollars              | 300    |
| Dining Dollars+ Plan ($200 additional dining dollars) | 200 |
| Commuter Meal Plan 1 (25 meals plus $50 dining dollars) | 260 |
| Commuter Meal Plan 2 (50 meals plus $50 dining dollars) | 416 |

All resident students are required to participate in a meal plan. The Residential Dining Dollars plan is only available to residents in apartments with kitchens. Dining dollars can be used at the point of sale locations across the campus.
## Payment Plans

The University offers students and families the ability to pay your tuition bill in installments using our online payment plan system. These plans can help families budget the cost of tuition and fees by spreading out the cost over a number of payments each term. Enrolling in a payment plan is easy - simply log into the LIU Payment Gateway, enroll in a plan, and make the necessary down payment. You can pay online using a credit card or e-check, knowing your information is secured by industry-leading security features. The payment plan system will automatically notify you if your installments increase or decrease due to changes in your student account.

The University offers the following payment plans each semester:

Refunds are issued to a student’s Student Financial account and are first applied to any outstanding balance before being credited back to a student. Meal plans are not eligible for a refund once the semester begins.

Students who are restricted from the residence halls or removed from housing due to violations of the Student Code of Conduct or other policies of Long Island University are not eligible for a residence hall refund.

Student Billing and Collection Policy

The University takes all necessary and reasonable collection efforts to ensure that outstanding and overdue accounts are accurate and paid in accordance with the following:

• The University deals with all students in a fair and equitable manner and will be professional and accountable in all interactions with our students.
• The University is consistent in its billing and collections actions and the application of University payment policies. The process for the collection of outstanding accounts is standardized and comprised of a series of e-mails, notices, and telephone calls informing students of the status of their accounts.
• Under New York State Law S.5924-C/A.6938-B, the University may not withhold official transcripts from students.
• The University may withhold diplomas or may not allow future registration for students with outstanding accounts receivable.
• The University works with students to resolve all outstanding bills and makes efforts to keep collections in-house.
• The University places difficult to collect accounts with external licensed collection agencies, all of whom are reputable and respectful of applicable legislation, codes of conducts and the privacy of information. Accounts are sent to collections only after all other efforts have been exhausted and the student is no longer in attendance.

The Office of Student Financial Services assumes the following roles and responsibilities with regard to this policy:
• establishes a collection policy and the escalating nature of the collection process.
• clearly articulates and publishes the collections policy on the University’s web site and in student publications and guides so that students and families are informed of the repercussions of non-payment.
• ensures that oversight and monitoring of external collection agency relationships exist and are maintained.
• ensures that collection agency staff do not gather, retain or disclose information about any student in contravention of any federal, state, or local laws or statutes.
• tenders new collection agency services through a competitive bidding process. New placements to collection agencies are based solely upon the successful recovery of outstanding amounts due.

The University is consistent in its billing and collections actions and the treatment of students with outstanding accounts. The University will be professional and accountable in all interactions with students. The University deals with students in a fair and equitable manner and will be professional and accountable in all interactions with our students.

Residence Hall Cancellation Policy

Students who wish to cancel their residence hall room must notify LIU Promise by completing the cancellation form to be eligible for a refund. The effective date for a student’s cancellation is the date on which the student has completed all of the following requirements:

• Submits the Residence Hall Cancellation Form
• Vacates and removes all personal belongings from their assigned room
• Properly checks out with residence hall staff

Refund eligibility for residence halls rooms are determined according to the schedule below:

A refund will be initiated upon completion of the cancellation process.
be made prior to the registration of the semester for which they are enrolling, or students must have completed their financial aid packet and have funds awarded by the payment deadline. If financial aid does not cover the entire semester enrolled, students must pay in full the remaining balance by the payment deadline.

**Student Health Insurance Policy**

Long Island University requires all residential, clinical, intercollegiate athletes, and international students to maintain health insurance. The University sponsors a Student Health Insurance Plan with below-market rates that provides students with health coverage at school, at their permanent residence, and while traveling or studying abroad. The plan is fully compliant with Federal Health Care Reform and provides students access to a network of doctors, hospitals, and pharmacies. All eligible students are automatically enrolled in the University-sponsored Plan, but may waive their participation by providing evidence of coverage under a family plan or other policy that meets or exceeds coverage set forth in the University-sponsored Plan.

Additional information regarding LIU’s Student Health Insurance Plan can be found on the University’s website: https://liu.edu/enrollment-services/tuition-fees/student-health-insurance

**Third Party Payment Policy**

The University allows third-party bill clearance to accommodate delays in receiving payments or for those entities that required the submission of completed grades for the term prior to the release of funds. In order for the University to recognize an anticipated third-party payment for a student’s tuition, fees and/or other charges, written authorization is required on corporate letterhead. All letters are subject to review by the Office of Enrollment Services and must include the following information:

- Student name
- Student ID and/or social security number
- Term or academic year covered
- Number of credits or coursework covered
- Dollar or percentage limit of total charges (if applicable)
- Sponsoring company’s name, billing address, contact name, telephone number and e-mail address.

Students must submit the written authorization described above in person to the Office of Enrollment Services, along with a completed Third-Party Payment Form and payment for any remaining balance.

The University will place a student in good financial standing for the term if the student presents written authorization from a third party or sponsoring company that intends to make payment on their behalf.

**Tuition and Fees Liability and Refund Policy**

By registering for courses at LIU, a student enters into a legally-binding contract to pay all tuition and fees, including any non-refundable fees. A refund of tuition depends on when a student drops classes and whether the student adds other classes. Whether a student withdraws from a single course or withdraws from the University completely, refunds are directly tied to the University Academic Calendar as published on the LIU website.

To be eligible for a refund of tuition, program fees, and mandatory fees, students must drop courses by the specified refund dates published for each semester in the Academic Calendar. Sessions with beginning or ending dates different from the standard term schedule will have refund schedules specific to each session. Class start and end dates will identify the proper refund calendar to follow.

Tuition liability is the amount of money a student owes the University for tuition, fees, room, board, and miscellaneous charges based on the student’s expected presence or participation in University activities. The following criteria apply to tuition liability:

- Zero liability results when a student properly drops or officially withdraws from classes in accordance with University policy prior to the start of the term or during the drop/add period. During zero liability, refunds will be processed and charges removed for tuition and all fees.
- Partial liability results when a student properly drops or officially withdraws from classes after the drop/add period. The amount due to the University will be prorated according to the published session liability schedule, and partial refunds will be processed.
- 100 percent liability results when a student is liable in full to the University for all tuition, fees, room, board, and miscellaneous charges. During 100 percent liability, no refunds will be processed and payment is due in full at the time of withdrawal.

Students are expected to pay for their classes in a timely manner, and must understand and follow the correct procedures to withdraw from classes. Non-attendance and/or non-payment do not constitute official withdrawal from the University. The calculation of tuition and fee liability, if any, is based on the date of the student’s official withdrawal or drop in accordance with University’s Adding or Dropping Courses Policy and Withdrawal from Courses Policy. The University offers tuition insurance for all registered students, which can be purchased directly through the University each term.

Room and board charges must be cancelled through the Office of Residence Life. Liability for these charges will be pro-rated based on occupancy dates and assessed at the time of cancellation. Student health insurance charges cannot be refunded once the policy has been utilized (e.g., a claim has been filed on behalf of the student).

The University develops and publishes tuition liability schedules by term that are clear and consistently applied.

For withdrawals during traditional fall and spring terms:

<table>
<thead>
<tr>
<th>Withdrawal Date</th>
<th>Liability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Week 1</td>
<td>0%</td>
</tr>
<tr>

<td>0%</td>
</tr>
<tr>
<td>Day 2</td>
<td>50%</td>
</tr>
<tr>
<td>Day 3+</td>
<td>100%</td>
</tr>
</tbody>
</table>

Students requesting a review of tuition and fee liability must complete the University’s Student Appeals Form in accordance with University policy and submit all required supporting documentation. Students who withdraw with liability and have purchased tuition insurance can file a claim with the
University after withdrawing to recoup the insured amount.
FINANCIAL AID

Long Island University awards financial aid to help students meet the difference between their resources and the cost of education. All awards are subject to the availability of funds and the student’s demonstrated need. Renewal of assistance depends on the annual reevaluation of a student’s need, the availability of funds, the successful completion of the previous year, and satisfactory progress toward completion of degree requirements. In addition, students must meet the published filing deadlines. Detailed information on financial aid is forward with the admission application and is also available on the Enrollment Services website at www.liu.edu/enrollment-services.

University scholarships or fellowships may be granted by themselves or in conjunction with federal and/or state aid, including scholarships, loans, and work-study. To receive the maximum amount of aid, students must apply for financial aid by the appropriate deadline.

It is the student’s responsibility to supply correct, accurate, and complete information and to notify immediately of any changes or corrections in their financial situation, enrollment status, or housing status, including tuition remission benefits, outside scholarships, grants, and state-sponsored prepaid college savings plans.

A student who has received a financial aid award must inform Enrollment Services if they subsequently decide to decline all or part of that award. Failure to do so may prevent the use of the award by another student. If a student has not secured their award by the close of the drop/add period, the award may be canceled, and the student may become ineligible to receive scholarship or fellowship aid in future years. Determination of financial need is also based on the student’s enrollment status – a change in registration therefore may result in an adjustment to their financial aid.

Applying for Financial Aid

Students must submit the Free Application for Federal Student Aid (FAFSA), and New York State residents must also complete the New York State Tuition Assistance Program (TAP) application. The TAP application is available on the web when a student completes the FAFSA online. The FAFSA (available online at www.fafsa.gov) is the basic form for all student aid programs. Be sure to complete all sections. Students should permit the FAFSA for application data to be sent directly to Long Island University (the LIU federal school code number is 002751 and our New York State code is 0403). Entering freshmen should apply by February 15 for the fall term or by November 1 for the spring term. Returning undergraduates and transfer students should apply no later than March 1. Students requiring summer financial aid must make an appointment with Enrollment Services in addition to completing the FAFSA and TAP application.

To be considered for federal and/or state-based aid, students must be classified either as US citizens or as eligible noncitizens, be officially admitted to LIU, or matriculated in a degree program, and make satisfactory academic progress toward degree requirements. Students in certain certificate or diploma programs may also be eligible for consideration. Generally, University-administered aid is awarded to full-time students. Part-time students (fewer than 12 but at least 6 credits per semester) may be eligible for Federal loans but must also maintain satisfactory academic progress. Part-time undergraduate students may also be eligible for TAP, Aid for Part-Time Study (APTS), or Pell Grants.

RENEWAL ELIGIBILITY

Financial aid awards are not automatically renewed each year. Continuing students must submit a FAFSA each year by the LIU deadline, continue to demonstrate financial need, make satisfactory progress toward degree requirements, and be in good academic standing. For institutional scholarships, students must generally maintain full-time enrollment and a cumulative GPA of 3.2 to have their awards renewed. Any break in enrollment without an approved deferment on file with the Enrollment Services office will result in a loss of your scholarship. Please visit our renewal policy on the web at www.liu.edu/enrollment-services.

WITHDRAWAL

Those receiving federal aid who withdraw completely may be billed for the remaining balances resulting from the mandatory return of funds to the U.S. government. The amount of federal aid “earned” up to that point is determined by the withdrawal date and a calculation based on the federally prescribed formula. Generally, federal assistance is earned on a pro-rata basis. The amount of federal aid “earned” up to that point is determined by the withdrawal date and a calculation based on the federally prescribed formula. Generally, federal assistance is earned on a pro-rata basis.

Awards

UNIVERSITY-SPONSORED AND ADMINISTERED PROGRAMS

Through the generosity of its alumni and other concerned donors, as well as from funds supplied by the federal government, the University can provide an extensive financial aid program for its students. Awards are competitive and based on academic achievement, test scores, and, in most cases, financial need.

SCHOLARSHIPS AND GRANTS

Long Island University maintains an extensive program of scholarships and grants-in-aid based on academic merit and demonstrated financial need. Awards are made during the admissions process. Institutional scholarships may be combined with government-supported grants and loans into a single financial aid package. Scholarships and grants are normally applied to tuition and fees; they can range from $500 to full tuition and fees and do not require repayment.

Long Island University’s scholarship programs are designed to reward students who demonstrate outstanding academic achievement. We are committed to providing you with an affordable, high-quality education. Awards are given to students who demonstrate academic achievement, athletic talent, or strong leadership as well as performers and artists. Aid is also awarded based on financial need.

PART-TIME EMPLOYMENT

Student Career & Job Portal

Many financial aid award packages include work-study. This means that students are eligible to participate in the Federal Work-Study Program and may earn up to the amount recommended in their award package. Work-study wages are paid directly to the student on a bi-weekly basis and are normally used for educational expenses. On-campus and off-campus jobs and internships are available through Handshake at http://handshake.liu.edu. It is not necessary to be awarded work-study earnings to use Handshake.

Resident Assistantships

Resident assistants reside in the residence halls and are responsible for organizing, implementing, and evaluating social and educational activities. Compensation includes a residence hall room. The position information may be obtained from LIU Promise.

ALL OTHER SOURCES OF AID

STATE GRANTS

New York State and other states offer a variety of grants and scholarships to residents. Although the application is made directly to the state and grants are awarded by the state, the amount each student is expected to receive is estimated and taken into account by the University when assembling the student’s financial aid package. LIU’s New York State school code is 0403. For complete information, contact the New York Higher Education Services Corporation (HESC) at 888-697-4372, or visit their website at www.hesc.ny.gov.

New York State Tuition Assistance Program (TAP)

Legal residents of the state of New York who are
enrolled in a full-time undergraduate degree program of at least 6 credits per term, or the equivalent, may be eligible for awards under this program. The award varies, depending on income and tuition cost. Students applying for TAP must do so via FAFSA (see earlier “How to Apply” section). Submit the completed application as instructed. For more information about TAP, visit www.hesc.ny.gov/pay-for-college/apply-for-financial-aid/nys-tap.html.

New York State Enhanced Tuition Awards (ETA)
Enhanced Tuition Awards of up to $6,000 are available for resident students enrolled in a private college in New York State. Awards will be phased in over three years, beginning for New Yorkers making up to $125,000 adjusted gross income. ETA recipients can receive up to $6,000 through a combination of their TAP award, ETA award, and a match from LIU. Students are eligible to get an award for up to four years when pursuing a bachelor’s degree. Students in an undergraduate program of study normally requiring five years (HEOP) are eligible to receive the award for five years. Award recipients need to earn a passing grade to maintain their Enhanced Tuition Awards, provided they earn a total of 30 credits over the course of a year. Students with disabilities under the ADA are allowed to attend on a part-time basis and their award will be prorated.

States Other Than New York
Some students from outside New York State may qualify for funds from their own state scholarship programs that can be used at Long Island University. Contact your state financial aid agency (call the Federal Student Aid Center at 1-800-433-3243 for the address and telephone number) for program requirements and application procedures. When you receive an eligibility notice from your state program, you should submit it to Enrollment Services in advance of registration.

FEDERAL GRANTS AND BENEFITS

Pell Grant Program
The Federal Pell Grant Program assists undergraduate students who demonstrate financial need according to economic criteria and program requirements established by the federal government. To be eligible, you must enroll in a degree or approved certificate/diploma program and be matriculated for your first bachelor’s degree. (You are not eligible if you have already completed a bachelor’s degree.)

Federal Supplemental Educational Opportunity Grants (SEOG)
These federally funded grants are awarded to undergraduates whose financial need is substantial. All FAFSA filers who meet our published deadlines and qualify are automatically considered for this grant. However, funds for this program may be limited and are based on availability. To qualify, students are encouraged to submit their FAFSA by the University’s established priority date.

Veterans Benefits
Various programs provide educational benefits for spouses, sons, and daughters of deceased or permanently disabled veterans as well as for veterans and in-service personnel who served on active duty in the United States Armed Forces after January 1, 1955. In these programs, the amount of benefits varies. Applications and further information may be obtained from the student’s regional office of the Department of Veterans Affairs. The University participates in the Yellow Ribbon Program. Additional guidance may be obtained from Enrollment Services or at the US Department of Veterans Affairs website at www.benefits.va.gov/GIBILL.

SCHOLARSHIPS AND GRANTS FROM OTHER ORGANIZATIONS
In addition to the sources of gift aid described above, students may also be eligible for a private scholarship or grant from an outside agency or organization. Some sources to explore are employers, unions, professional organizations, and community and special interest groups.

FEDERAL LOANS

Federal Direct Student Loan Program
The Federal Direct Student Loan is obtained from the U.S. Department of Education. The total amount borrowed in any year may not exceed the cost of education minus the total family contribution and all other financial aid received that year.

Federal Direct loan payments are co-payable to LIU and the student, and funds are applied first to any outstanding balance on the student’s account. An origination fee will be deducted from the loan funds. Students may qualify for both subsidized and unsubsidized Direct loans. The interest on the Federal Direct Subsidized Loan is paid by the U.S. government while the student is in school and remains enrolled at least half-time. The Federal Direct Unsubsidized Loan terms and conditions are essentially the same as the subsidized loan except the federal government does not pay the interest while the student is in school. Instead, the interest is accrued and added to the principal of the loan. Subsidized Direct loans are based strictly on financial need. During the first year of study, a student may borrow up to a total of $5,500 (combined subsidized and unsubsidized), with no more than $3,500 as the subsidized amount. In subsequent years, the total is increased to $6,500 for sophomores (with no more than $4,500 as the subsidized amount), $7,500 for juniors and seniors (with no more than $5,500 as the subsidized amount), and $20,500 unsubsidized loan for graduate students. For independent undergraduate students and some dependent undergraduate students whose parents do not qualify for a PLUS loan, the Federal Direct Unsubsidized Stafford Loan Program offers yet more borrowing eligibility. For details about additional unsubsidized amounts available and the maximum aggregate limits for all Federal Direct loans combined, visit the US Department of Education website at www.studentaid.ed.gov.

Federal Direct PLUS Loan Program
The PLUS loan enables parents of dependent undergraduate students to borrow up to the full amount of an LIU education less other aid. There is no aggregate loan limit, and individual lenders will evaluate point history. PLUS loan disbursements are made payable to LIU and the parent and funds are applied first to the current term’s outstanding balance on the student’s account. To apply for a PLUS loan, log into www.studentaid.gov.

PRIVATE LOANS
A private (non-federal) loan may be a financing option for students who are not eligible for federal aid or who need additional funding beyond the maximum amounts offered by federal loans. These loans are not guaranteed by the federal government. LIU urges all students and parents to research any lender they are considering for this type of funding and to specifically ask several key questions, including current interest rates; co-signer requirements; repayment options, both in school and out; and whether or not the loan may be sold to another provider.

Each student has the right to select the educational loan provider of their choice. To see your choice of lenders, log onto www.elmselect.com and select Long Island University.

If you have considered applying for a private loan, you may be required to complete the Free Application for Federal Student Aid (FAFSA) (see above for application instructions) for the University to certify your loan eligibility. Private loans that are used to cover prior semesters may require additional information for approval, such as letters certifying indebtedness, attendance verification, official transcripts, etc. As such, when requesting funding for prior terms, be sure to reference the correct academic year on your application.

The basic process involved with securing private loans is the electronic filing of an application, institutional certification, and approval information. The University will assist you in this process and will determine for you the maximum loan amount you will be allowed to borrow based on your estimated cost of attendance and pre-existing financial aid awards.

EMPLOYEE EDUCATION PLANS
Federal Student Aid Credit Balances and Refunds

It is the University’s policy to ensure Federal Student Aid (FSA) credit balances are managed in accordance with Federal and other regulations. When the University disburses Title IV aid to a student’s account and the total amount of all Title IV aid exceeds the amount of tuition and fees, room and board, and other billed charges, the University will pay the resulting credit balance directly to the student or parent via check as soon as possible but:

- no later than 14 days after the balance occurred if the credit balance occurred after the first day of class of a payment period; or
- no later than 14 days after the first day of class of a payment period if the credit balance occurred on or before the first day of class of that payment period.

The Office of Enrollment Services monitors FSA credit balances on a daily basis for all active financial aid years. Refund checks are processed at University Center each day after the receipt of refund lists from the campuses. If PLUS loan funds create the credit balance, the refund will be issued to the parent unless he/she has authorized the University in writing or through studentaid.gov to transfer the proceeds directly to the student for whom the loan is made. The University issues refund checks by mail to the student’s and/or parent’s permanent address on record. Students may also set up direct deposit refunding by adding their domestic bank account of choice to their MyLIU account. Refund checks that are unclaimed after 240 days will be returned to the Department of Education. The University does not require students to take any action to obtain their credit balance. It is the sole responsibility of the University to pay all FSA credit balance within the 14-day regulatory time frame. The University may use current year funds to satisfy prior award year charges for tuition, fees, room and board for a total that does not exceed $200.

Notwithstanding any authorization obtained by the University, LIU will provide students with any remaining FSA credit balances resulting from FSA loan funds by the end of the loan period and any other FSA program credit balances by the end of the last payment period in the award year for which the funds were awarded. Students of parents who receive an FSA refund triggered by the disbursement of Title IV funds may still owe a balance to the University, most often related to a prior term or a subsequent withdrawal from some or all of their classes. Upon receiving a refund, students and/or parents should verify whether any outstanding balance remains on the account and determine how best to satisfy payment obligations so as to avoid any holds or late payment fees being placed on the account. If a student or parent overpays a student’s account, related credit balances will be refunded to the student, regardless of the source of payment. Overpayments resulting from credit card transactions will be refunded to the original credit card from which the payment was made. EFT and wire transfers will be refunded to the original bank account from which the payment was made. All other non-FSA credit balances will be refunded by check or via direct deposit if the student has added their bank account of choice to their MyLIU account.

New York State TAP Waiver

Full time students who are New York State (NYS) residents and have applied for the NYS Tuition Assistance Program (TAP) will receive an award notice from New York State. Each semester, the award must be certified by the University based on certain regulatory and academic requirements. Among the requirements is the obligation of the student to maintain “good academic standing” as defined in NYCCRR §145-2.2 and as it relates to the following:

- Pursuit of Program is defined as receiving an ‘A-F’ letter grade in a certain percentage of courses each semester depending on the number of TAP/State awards the student has received.
- Satisfactory Academic Progress requires students to accumulate a specified number of credits and achieve a specified cumulative grade point average each term depending on the number of TAP/State award payments the student has received.

Students who fail to maintain good academic standing as the result of unforeseen or extraordinary circumstances, and who thus become ineligible for a TAP award, may apply to the University for a TAP Waiver. In certain cases, the requirements regarding Pursuit of Program or Satisfactory Academic Progress may be waived once during a student’s undergraduate enrollment. Waivers are based on an undue hardship that has affected the student’s ability to maintain good academic standing during a particular semester. A waiver may be granted only when there is a reasonable expectation that the student will meet future State requirements. Waivers are based on documented evidence of:

- a death or illness in the student’s family
- serious illness of the student
- other extenuating circumstances beyond the student’s control.

Waiver requests must be made in writing to the Office of Enrollment Services and must include:

- a letter stating the reasons for the student’s failure to meet academic requirements and how conditions have changed so that future academic progress will not be impeded
- pertinent documentation supporting the waiver application (e.g., physician’s written statement, death certificate, etc.)
- a written recommendation from the student’s Dean

Return of Federal Funds

The University returns Federal funds in accordance with Federal regulations.

Students who receive Title IV federal aid and withdraw from all courses prior to completing 60 percent of the academic term will have their federal financial aid pro-rated in accordance with a Return to Title IV (R2T4) calculation. After the 60 percent point of the academic term, students are considered to have earned all of their Title IV aid for the term.

For students who officially withdrawal from the University, the last date of attendance will be either: 1) the date that the student submits to the Office of Enrollment Services a signed Official Withdrawal Application; or 2) the date that the student emails the Office of Enrollment Services requesting to withdraw and providing all required information. In cases where the student partially withdraws from some classes before fully withdrawing for the term, the University will use the latest date as the last date of attendance. Students who are granted an official leave of absence in accordance with the University’s Leave of Absence Policy are not considered to have withdrawn for the term.

For students who unofficially withdraw from the University, the last date of attendance will be the midpoint of the term. For students who receive a combination of W, NC, UW grades and one F, the student will be considered to be in attendance unless the individual who submitted the F grade, upon request by the Registrar, does not change the grade to a NC.

The calculation of the amount of Title IV assistance earned by the student is based on the payment period associated with the term during which the student withdrew from classes. The payment period represents the duration between the start and end date of the term, less any scheduled breaks of five consecutive days or more.

To determine the amount of Title IV aid to be considered, the University will calculate the total amount of disbursed Title IV aid for the term in which the student withdrew. Aid is counted in the
calculation if it has been applied to the student’s account on or before the date the student withdrew or could have been disbursed had the student still been registered for classes. The amount of this Title IV aid earned is calculated on a pro-rata basis using the last date of attendance within the payment period.

The amount of unearned aid to be returned is based on the total institutional charges for the term, which includes tuition, fees, room, and board, less the amount of aid earned by the student. The University will return, in the order specified below, the lesser of the following:
- the total amount of unearned Title IV assistance to be returned; or
- the total amount of unearned institutional charges.

Title IV funds that are not the University’s responsibility to return must be returned by the student. The University will notify each student in writing when they have a responsibility to return funds. In certain cases, the return of unearned aid will result in a balance due to the University, particularly if the student previously received and cashed one or more refund checks.

The portion of federal aid that is not earned by a student will be returned to the appropriate federal student aid program(s) in the following order:
- Federal Direct Unsubsidized Loan
- Federal Direct Subsidized Loan
- Federal Perkins Loan
- Federal Direct Graduate PLUS Loan
- Federal Direct Parent PLUS Loan
- Federal Pell Grant
- Federal Supplemental Educational Opportunity Grant

Once the University determines which federal student aid program(s) are to receive returns, a formal written letter is mailed to the student.

The University will return the amount of Title IV funds for which it is responsible as soon as possible but no later than 45 days after the student’s last date of attendance as defined above. For students who unofficially withdraw from the University, Title IV funds will be returned no later than 45 days after the end of the term.

Returns of Title IV grant funds, other than funds that are being returned to stay in compliance with the excess cash requirements, are offset by a downward reduction in the student’s records at the federal Common Origination and Disbursement (COD) system. Similarly, all returns of Direct Loan funds are offset by downward reductions to a student’s record at COD. In addition, when all or a portion of a Direct Loan is cancelled (either because the borrower requested the cancellation within the regulatory time frames or to comply with statutory or regulatory requirements), the University will make the appropriate adjustment to the student’s record in COD. All returns of FSA Grants and Direct Loan funds previously disbursed are also performed by the University through the federal GS system. If the total amount of Title IV aid that the student earned is greater than the total amount of Title IV aid that was disbursed to the student or on behalf of the student in the case of a PLUS loan, as of the student’s last date of attendance, the difference between these amounts must be treated as a post-withdrawal disbursement.

If outstanding charges exist on the student’s account, the University will obtain written confirmation from the student and/or parent to determine if they wish to have a Title IV post-withdrawal disbursement processed. Upon receipt of written approval, the University will apply the funds directly to the outstanding balance due. If the student and/or parent does not respond, no post-withdrawal disbursement will occur.

The criteria below outline the progress that is required for a full-time undergraduate student to be considered in good standing:

<table>
<thead>
<tr>

standing:
• Completion Rate Requirement: All students must earn at least 67 of their attempted hours. Students may not receive federal aid for coursework that exceeds 150 percent of their degree requirements.
• GPA Requirement: Students must maintain a 2.0 GPA

Federal SAP requirements also include the following criteria:
• Progress standards for part-time students are prorated based upon the criteria above.
• Qualifying transfer credits are counted as both attempted and earned credits but have no effect on the GPA.
• Grades of W (Withdrawal), UW (Unofficial Withdrawal), NC (No Credit Earned), INC (Incomplete), and IF (Incomplete Fail) are counted as credits attempted but not completed, and do not affect the GPA.
• Repeated classes will count only once towards credits completed. A student may receive aid for a repeated class that has been successfully completed once.
• Students may not receive Federal aid for coursework that exceeds 150 percent of their degree requirements.
• Any departmental requirements that exceed these standards must be adhered to for the purposes of evaluating SAP.

Standards for New York State Awards
To receive financial aid awards from New York State, including undergraduate Tuition Assistance Program (TAP) funding, students must meet academic standing requirements as defined by the New York State Education Department. These requirements are different from those set forth by the Federal government, and are applicable only to New York State awards.

The basic measures for good academic standing for TAP Awards include the following:
• Pursuit of Program: A student must receive a passing or failing grade (A-F) in a certain percentage of courses each term.
• Satisfactory Academic Progress: A student must accumulate a specified number of credits and achieve a specified cumulative grade point average (GPA).

The requirements for meeting these standards increase as the student progresses, and are based upon the number of State awards that the student has already received. Students failing to meet the required criteria are eligible to request a one-time waiver of the academic and/or “C” average requirement(s) if extenuating circumstances played a factor in their academics.

Waivers may be granted in accordance with NYCCRR 8 §145-2.2.

The chart below outlines the progress that is required for an undergraduate student to be considered in good standing:

</table>

New York State SAP requirements also include the following criteria:
• Students must be registered for a minimum of 12 credits per semester.
• Students may not receive a New York State award for repeating a class that they have already successfully completed (i.e. the credits for a repeated class for which the student has already received a satisfactory grade will not count towards the full-time requirement).
• The standards that students must meet are dependent upon when they first received an award from NY State, as well as their remedial status.
• Students are evaluated according to their total TAP points received, including any awards received at previous institutions.
• Students must complete a minimum number of credits each term, as well as on a cumulative basis, to continue to receive TAP funding.
• Students who have accrued 60 credits are required to declare a major to maintain their TAP eligibility.
• Students must maintain a minimum grade point average (GPA) prior to being certified for a TAP payment. This average increases as students progress in payment points.
• All students must have a cumulative GPA of 2.0 or better after accumulating 24 or more payment points (e.g., four full time semesters).
• Students who are not making progress, and/or not meeting the “C” average requirement may request a one-time waiver if extenuating circumstances affected their academic performance.

Enhanced Tuition Awards (ETA)
Award recipients selected by New York State must meet the following criteria to remain eligible for ETA awards. Failure to meet these requirements will also result in the conversion of the state portion of your grant into a loan.
• Must meet annual income requirements ($125,000 or below).
• Must earn a passing grade in your coursework.
• Must be registered for at least 12 credits in the Fall to receive the first payment and earn at least 30 credits by the end of Spring to receive the second payment.
• Must continue to meet New York State residency requirements.
• Students in an undergraduate program of study normally requiring five years (HEOP) are eligible to receive the award for five years. Students with disabilities under the ADA are allowed to attend on a part-time basis and their awards will be prorated.

Student Loan Counseling
The University follows federal regulations 34 CFR 685.304 governing federal direct loan programs and 42 CFR Part 57 governing the HRSA health professions student loan program.

In accordance with these provisions, LIU manages the loan counseling process by identifying:
• students who require entrance and exit counseling;
• methods by which the University communicates with students regarding entrance and exit counseling;
• process by which students will receive counseling; and
• procedures to be followed by students who do not complete the loan counseling process.

Verification of Financial Aid Information
There is a process for verifying application information and making corrections on a student’s Free Application for Federal Student Aid (FAFSA) with the Department of Education’s Central Processing System (CPS). The regulations in 34 CFR Part 668 Subpart E govern institutional verification of information submitted by applicants for federal student financial assistance.

In accordance with the provisions of Subpart E, LIU has established verification procedures that address the following:
• the time period within which an applicant must provide any documentation requested by the University;
• the consequences of an applicant’s failure to provide the requested documentation within the specified time period;
• the method by which the University notifies an applicant of the results of its verification if, as a result of verification, the applicant’s Expected Family Contribution (EFC) changes and results in a change in the amount of the applicant’s assistance under the Title IV, Higher Education Act (HEA) programs;
• the procedures the University will follow or the procedures the University will require an applicant to follow to correct FAFSA information determined to be in error; and
• the procedures the University will follow for making referrals to the Office of Inspector General.

Institutional Responsibility: The University must require an applicant whose FAFSA information is selected for verification to submit supporting documentation to verify specified data elements of the FAFSA, unless the applicant qualifies for a federal exclusion.

Applicant Responsibility: If the University requests documents or information from an applicant under this Subpart E, the applicant must provide the specified documents or information.
STUDENT LIFE

Long Island University is an exciting and vibrant community that provides students with opportunities to become engaged on-campus, make life-long friendships, explore professional and career interests, or enhance their leadership skills and complement their in-the-classroom experience.

Through the Division of Student Affairs and LIU Promise, students can participate in over 70 student organizations, join national fraternities and sororities, and attend over 1,000 events held each year. In addition, our robust Division I Athletic program is at the heart of Shark Nation. Residence halls also provide students the opportunity to live on campus while they complete their degree.

Students can be informed on various campus life programs and opportunities through EXPERIENCE | Shark Nation, the University’s student engagement platform. To learn more, visit liu-post.presence.io/events

Experience Shark Nation

Experience | Shark Nation is the University-wide student engagement platform. Powered by Presence, the engagement platform serves as the hub for student life and engagement at the University. Each student has access to Experience | Shark Nation and is encouraged to visit frequently for updates regarding campus events, programs, and activities. The platform is how students will join student organizations, learn about campus events, and mark their attendance using the Shark Points system.

In addition, a full listing of events is sent via email from LIU Promise each week that highlights the opportunities students can take advantage of and shares the student engagement calendar. To access the platform, visit www.liu.edu/campus-life.

Division I Athletics

LIU is home to an accomplished and proud Division I athletics program that represents Shark Nation. Fielding 38 athletic teams on two campuses, LIU’s NCAA Division I program builds on a foundation of tradition and excellence. In LIU’s history, its teams have a combined 24 national championships, 248 conference championships, and 380 All-Americans. For more information on Athletics, visit liuathletics.com.

Student Organizations

LIU seeks to educate, challenge, and cultivate students by providing services and promoting programs that encourage student involvement, and offer both personal and academic support for student growth. With nearly 100 active student organizations, there is an opportunity for every student. Students may also start a new student organization by working with LIU Promise and the Student Government Association.

Students may participate in academic, social, media, leadership, and special interest organization. In addition, many honor societies recognize outstanding student accomplishments. For a full list of student organizations, visit www.liu.edu/campus-life.

Greek Life

Fraternity and Sorority Life represents a large part of the campus life experience at LIU. Fraternities and sororities promote scholarship, leadership, and service. Greek life also provides members with the opportunity to forge life-long friendships, network with alumni, and enhance their academic and leadership endeavors through the Greek honor societies. LIU is one of the fastest-growing Greek communities in the region and is home to many of the nation's largest fraternities and sororities. Students can join a fraternity or sorority at any time during their career by participating in “Meet the Greeks” and by registering for the fall or spring recruitment process.

Student Government Association

The Student Government Association is the representative body of all students at Long Island University. SGA serves as an outlet for student voices to be heard by working closely with the administration and faculty to enhance the overall campus experience. All members share the common goal of bettering the campus community. SGA elections take place twice a year and include an executive board, class presidents, commuter senators, resident senators, transfer senators, international senators, and at-large senators to represent all students.

SGA has weekly general meetings that are open for all students to attend.

LIU Cares

LIU students give back to the local and global communities through service organizations, charity events, and social awareness initiatives throughout the year. The LIU Cares initiative connects our students, faculty and staff, and alumni to the power of service through volunteerism and community engagement.

Students can support a cause that is important to them or join one of the many opportunities that already exist.

Students typically perform more than 150,000 service hours and fundraise thousands of dollars for various charities each year. For more information on service opportunities, contact liucares.org or visit LIU Promise.

Diversity, Equity and Inclusion

Long Island University is committed to inclusive excellence and a sense of belonging for all members of the University community. Our community is built upon a foundation of diversity, equity, inclusion, access, opportunity, innovation, confidence, trust, respect, caring, and relationship-building. The University’s educates the country and the world, drawing students from over 67 countries. The University is recognized as a top 100 national university for social mobility (U.S. News and World Report Best Colleges, 2021).

Diversity, Equity, and Inclusion (DEI) at the University, is facilitated by the Chief Diversity Officer and is supported by a University-wide DEI committee and a student-run council on Diversity. Programs and initiatives are held throughout the year to fulfill the University’s mission. Visit the DEI page at www.liu.edu/diversity-equity-and-inclusion to become engaged.

Residential Life

Resident students are part of an exciting college community that attracts students from all over the world. Residence halls are tailored to individual needs, from honors college housing to semi-private suites. Living on campus allows students to become totally immersed in college life. Students will enjoy the freedom of living on their own while meeting new people and making lasting friendships.

Living at LIU offers:

- Options for singles, doubles, triples, apartments, and suite-style
- All utilities, WiFi, and laundry included
- Convenient online housing and roommate selection process
- Late-night access to Fitness Center, Library, and other facilities
- Affordable housing rates
- Several meal plan options and dining locations
- Lounges in each building with TVs and computers
- Professional and peer staff in each residence hall for 24/7 assistance
- ID access and evening security for all buildings
- Floor and Hall programming

Residence Halls

- Conolly Hall (on-campus)
- Fulton Hall (off-campus, nearby)

To learn more about residential life, visit https://liu.edu/campus-life/residence-life.

Campus Recreation and Intramurals

University Recreation and Intramurals serves as an integral part of campus life. University Recreation provides engaging programs and state-of-the-art
facilities and equipment to enrich the student experience and foster a lifetime appreciation of and involvement in wellness and recreational sports. Campus Recreation offers student and community membership, open gym and pool hours, access to the fitness center, opportunities for club sports and intramural events, and health and wellness programs for students. To learn more about University Recreation, visit www.liu.edu/university-recreation.

**Student Code of Conduct**

Long Island University students are expected to abide by the five principles of the Student Code of Conduct: respect for oneself, respect for others, respect for property, respect for authority, and honesty. Students who violate the policies of Long Island University may be subject to appropriate disciplinary action.

Student Affairs, through designated hearing officers, oversees the enforcement of the Student Code of Conduct. The University recognizes that disciplinary jurisdiction may extend to off-campus activities. The University has the discretion to exercise jurisdiction over off-campus behavior if it: 1) adversely affects the health, safety, or security of any member of the University community; or 2) adversely affects the interests of the University.

In determining whether to exercise off-campus jurisdiction, the University will consider the seriousness of the alleged harm, the risk of harm involved, whether the victim(s) are members of the University community or whether the off-campus conduct is part of a series of actions which occurred both on and off campus.

Students are accountable for adhering to all regulations in the LIU Student Handbooks. As noted under item “U”, “Violation of University policies’ in “Respect for Authority” in the Code of Conduct, students must understand that they are subject to “all policies communicated elsewhere in this Handbook, University publications, verbal directives by University officials or as posted by any department.”

Students enrolled in specific schools or colleges may be subject to the code of conduct established within that school or college and as overseen by the academic dean or an applicable accreditation body. If there is a conflict the more restrictive code applies.

To read the full Student Code of Conduct, please see the LIU Student Handbook or visit www.liu.edu/policy.

**FACILITIES**

---

**Career Bar**

Located on the third floor of the Library Learning Center, the Career Bar offers a central location for students to access computers, print, and study. The Career Bar serves as the host for many Career Success workshops and events throughout the academic year.

**Dining and Food Service**

Aramark is the official food service and dining provider for Long Island University. Food service is provided at several locations throughout the campus. Food may be purchased using meal plans, credit cards, or cash.

To view food options, locations, and hours of operations, students should visit https://liu.campusdish.com.

**Downtown Brooklyn Speech-Language-Hearing Clinic**

The Downtown Brooklyn Speech-Language-Hearing Clinic, located in the Fort Greene/Downtown Brooklyn community, is a vital part of LIU Brooklyn’s graduate program in communication sciences and disorders. Our state-of-the-art center employs speech-language pathologists who serve as clinical faculty and supervisors to our graduate interns. The clinical staff is licensed by the NY State Office of the Professions and certified by the American Speech-Language-Hearing Association (ASHA) and the New York State Department of Education. The graduate program is accredited by the Council on Academic Accreditation of ASHA.

If you believe that you, or someone you know, has a speech-language, swallowing, or hearing problem, call us at 718-488-3480. Our fees for services are affordable. We also have a reduced fee schedule, if needed, and offer friends and family rates to LIU Brooklyn students and staff.

**Esports Arena**

The Esports Arena is a state-of-the-art facility that houses the University’s Division I Esports program. The arena, located in Conolly Hall, has been recognized as one of the top facilities in the region. The 5,600 square foot venue is equipped with over 50 computer stations, large-screen viewing televisions, gaming stations, and custom game-day lighting.

**Kumble Theater for the Performing Arts**

Kumble Theater for the Performing Arts at LIU Brooklyn is a dynamic, state-of-the-art performance venue serving one of the most diverse campuses and communities in the country. It is designed to nourish artistic exploration and development by students and other emerging artists while providing the entire community with greater access to an exciting range of quality classical and cutting-edge professional performances from around the world.

Impeccably crafted for the dramatic and technical demands of dance, music, and theatrical productions, this elegant, 320-seat theater provides finely tuned acoustics and top-tier lighting, projection, and other electronic capabilities. With a stage featuring a “sprung” floor extending to the seating area, the theater fosters intimacy between performers and their audiences.

This extraordinary theater was made possible through the generosity of former LIU Trustee Steven J. Kumble. It is part of an ambitious campus renovation that created an extensive performing arts complex also featuring a black box theater, dance studios, and a glass-enclosed art gallery. Among other major supporters of the performing arts complex is the EAB/Citigroup Foundation, through former LIU Board of Trustees Chair Edward Travaglianti, LIU trustee emeritus Donald H. Elliott, former LIU trustee Bruce C. Ratner, the City of New York, and the Independence Community Foundation.

**Psychological Services Center**

At our Psychological Services Center, free and confidential personal counseling is offered to students by supervised doctoral candidates in clinical psychology. Students experiencing stress in relation to academic, social or family situations, or students who simply feel they are not living up to their full potential for various reasons may benefit from speaking to someone at the center. Whether stress is interfering with a student’s ability to do their best at school or is affecting the student’s family or social life, talking can help. No one in or outside the university knows who comes to the center, except in the rare case of danger to self or others.

The Psychological Services Center is located on the fifth floor of the Pratt Building, Room 510. Please call 718-488-1266 to make an appointment.

**Wellness, Recreational & Athletic Center (WRAC)**

This 112,000 square foot facility supports LIU's Division I athletic teams, provides a state-of-the-art workout facility and swimming pool for the campus community, and offers a broad array of health and wellness services to our students, faculty, and administrators, as well as the members of the Brooklyn community at large.
Steinberg Wellness Center (previously called Wellness, Recreational & Athletic Center (WRAC)) features a 2,500 seat arena, which hosts the campus’ Division I basketball and volleyball games, high school athletic events, and a variety of other special events. The fitness center includes state-of-the-art cardio and strength equipment, and a group exercise studio that includes free classes such as Pilates, yoga, hip hop dance, total body conditioning, Salsa, Zumba and abs-workout classes. The facility also includes a 25-yard, eight-lane swimming pool, and a rooftop track and tennis courts.

Steinberg Wellness Center encompasses the Health and Wellness Institute which provides activities and programs that promote good health and wellness behaviors that reduce health disparities and improve the quality of life for members of the campus community and the community at large. The Health and Wellness Institute houses one of New York City’s only state-of-the-art HydroWorx 2000 therapeutic pool, which includes an elevator floor to allow for easy access and varying water levels, an underwater treadmill with speeds up to 8.5 mph, an underwater video camera and viewing monitors, body weight-support harness system, adjustable temperature control, and jets that propel water and can be used to resist movement and to challenge a person’s balance.

**Student-Run Businesses**

LIU students learn what it takes to run a business by running a business. Students are involved in every facet of operations, from product selection and marketing to sales management and bookkeeping. Profits from LIU’s student-run businesses support student scholarships, along with new business initiatives to create real-world business experiences for more students.

**Browse**

Browse offers a selection of popular technology brands and products, and is an authorized Apple campus store, Dell University store, and recently, a Microsoft Surface education store. Students will find all the tools they need to power their LIU Brooklyn experience from tablets and notebooks to all-in-one desktop computers and gaming consoles, as well as accessories. Students will benefit from the IT help desk, which they can use as a resource for technological needs and questions. In addition, students working in the store will gain expertise as they work alongside certified Apple service help desk technicians.

Special discounts are available for LIU community members for personal purchases or gifts.

**Canteen**

Canteen is the official spirit store of the Roc Nation School of Music, Sports, and Entertainment. Canteen sells Roc Nation school and Shark Nation apparel, gifts, and items to students and community members. All proceeds from canteen store sales benefit Roc Nation Hope Scholars. The Roc Nation Hope Scholarship program provides tuition to 25% of enrolled students at the Roc Nation School of Music, Sports & Entertainment. Roc Nation School students work in canteen allowing them to earn work-study funds for their education.

**Trading Floor**

Featuring Bloomberg Terminals, the global benchmark for financial data and analysis, the Trading Floor gives students the tools to analyze financial markets, assess economic scenarios and interpret the key news developments that impact the global economy. All students in the school are encouraged to get Bloomberg Certified, a credential that can give them an advantage in the competitive job market.

**STUDENT SERVICES AND RESOURCES**

LIU offers a variety of support services to aid students in achieving their personal and professional goals and making the most of their educational experience. This includes programs designed to serve a diverse variety of students at various stages of their development and address a broad range of individual needs and challenges.

LIU Promise primarily works with first-year students as well as some transfer students and continues to provide guidance and support through graduation. Graduate students and some upper-class students are served through the Office of Enrollment Services as well as advisors within their home departments. Working in concert, LIU Promise and Enrollment Services strive to accommodate the entire LIU student body and promote student retention.

Using the My LIU portal at https://my.liu.edu, you can view your financial aid status and account activity, make online payments, schedule appointments with LIU Promise Success Coaches or Enrollment Services Coaches, and view “to do” items and “holds” that need to be resolved to continue the enrollment process. Additionally, LIU Promise Success Coaches and Enrollment Services Coaches will provide both you and your family continuous support and service throughout your time as an LIU student.

**Division of Student Affairs**

The Division of Student Affairs is a collaborative and innovative division dedicated to providing highly individualized holistic student support and education that fosters student success, retention, and persistence; cultivates a community of belonging; encourages life-long learning; and develops global citizenship and future leaders.

The Division is comprised of several student support services including LIU Promise, Enrollment Services, the Learning Center, and the Center for Healthy Living. In addition, Student Affairs supports several programs including International Student Services and the Student Veteran Resources Center. The Division is led by the Dean of Students that can be reached at 718-488-1200 or studentaffairs@liu.edu. For more information on key resources, visit https://liu.edu/student-success.

**Student Success**

Student Success Coaching is housed in LIU Promise and Enrollment Services. Student Success is our commitment to ensuring students have the right tools, guidance, and support to achieve their goals. When students apply to LIU, they will be assigned a Success Coach who will be there for them through graduation. The coach will be the point of contact for everything they need—from academic and career counseling to campus activities to financial aid. It’s our promise to help each student chart their success!

Success Coach will work with students one-on-one to:

- Fast-track the enrollment process
- Help them select the right major
- Find the right scholarships for them
- Construct a financial plan to fund their education
- Introduce them to our vibrant campus life
- Identify internships and study-abroad opportunities
- Launch their career, connecting them with employers before graduation

**The Learning Center**

The Learning Center at Long Island University provides students with support services, strategies, information, and opportunities to help them achieve their personal, academic, and career goals through its individualized programs: Writing Program, Peer-Tutoring, Academic Success Workshops, and Disability Support Services. Please visit https://liu.edu/student-success/learning-center or call 718-488-1095.

**Tutoring Program**

The Tutoring Program provides trained, qualified peer tutors, to work with students in need of academic assistance. Tutoring is available free of charge both individually and in small groups. The LIU Tutoring Program is internationally certified by the College Reading and Learning Association. The tutoring schedule is disseminated at the beginning of each academic semester.
Writing Program
Writing is a powerful tool not only for communicating existing ideas but also for discovering new ones. The Writing Program is staffed by trained undergraduate and graduate students who work collaboratively with LIU students on a one-to-one basis to help them develop the strongest texts possible. Students come to the Learning Center because all writers can improve their writing through feedback. The Program can help students to brainstorm, plan, edit, revise and proofread their texts. Tutors work with students at all stages of the writing process: understanding an assignment, drafting an essay, learning more effective reading strategies, developing and supporting arguments, and learning how to proofread and edit papers.

Disability Support Services
Disability Support Services (DSS)
Disability Support Services, housed in the Learning Center, provides advocacy and coordination services at no charge to students with all types of disabilities including physical, neurological, emotional, social, specific learning disability, attention deficit disorder, and students with temporary impairments. Students are assisted in arranging reasonable accommodations as mandated by federal/state laws, Section 504 of the Rehabilitation Act, and the Americans with Disabilities Act As Amended (ADAAA).

Policy for Students with Disabilities
In compliance with federal and state laws, LIU is committed to providing qualified individuals with disabilities the opportunity to participate in all university programs and activities, curricular and extracurricular, which are available to non-disabled individuals.

Students with disabilities who desire accommodations must submit appropriate documentation of their disability to the office of Disability Support Services (DSS) located in the Learning Center. Professional staff will review and evaluate this documentation, interview the student, and provide the student with completed accommodations forms for presentation to the teaching faculty. Campus departments will be notified, as necessary, of the need for additional accommodations noted in the student’s documentation. Accommodations forms must be obtained each semester before the semester begins. All disability-related files are confidential.

Accommodations
Academic accommodations are provided to students with disabilities by their individual professors within the academic departments. Accommodations will be made by other campus departments as required for non-academic matters. Accommodations will be considered reasonable when they do not fundamentally alter the nature of a program, course, or service or present an undue administrative burden on the university. Students requesting accommodations are required to submit documentation to verify eligibility under the Americans with Disabilities Act, As Amended, and Section 504 of the Rehabilitation Act of 1973. Appropriate documentation of the disability must be provided so that DSS can: 1) determine the student’s eligibility for accommodation; and 2) if the student is eligible, evaluate appropriate academic and/or non-academic accommodations. Disability documentation must include a written evaluation from a physician, psychologist, or other qualified specialists that establish the nature and extent of the disability and includes the basis for the diagnosis and the dates of testing. The documentation must establish the current need for accommodation.

Determining Eligibility
Accommodations are determined on a case-by-case basis, taking into account the needs of the student, and the course standards. The determination of appropriate and reasonable accommodation is based on approved documentation and through interaction with the student. Specifically, accommodations are determined by the Learning Center in consultation with the student and with input from the faculty and staff, as needed.

In reviewing the specific accommodation requested by the student or recommended by the physician/evaluator, DSS may find that while a recommendation is clinically supported, it may not be the most appropriate accommodation. In addition, Disability Support Services may propose clinically supported accommodations that would be appropriate and useful for the student, but which neither the student nor the evaluator has requested.

Denial of Accommodations
The University reserves the right to deny services or accommodations in the event the request is not clinically supported. If the documentation provided by a student does not support the existence of a disability or the need for a requested accommodation, the student will be so advised. Students will be given the opportunity to supplement the initial documentation with further information from a physician, psychologist, or other specialists.

The University is not required to provide an accommodation that compromises the essential requirements of a course or program, that is unreasonable, or that poses a direct threat to the health or safety of the student or others.

Student Appeal
A student who disagrees with the Learning Center determination of eligibility or accommodation is encouraged to meet with an administrator to resolve the matter informally. Students may appeal the denial of the DSS determination to the dean of students.

Student Veterans Resource Center
Long Island University has a proud and distinguished history of serving its nation’s military veterans, active duty service members, and their families. The Long Island University Student Veterans Resource Center (SVRC), provides the resources that veterans need to pursue their education while balancing the demands of life both inside and outside the classroom.

For additional information and resources for veterans, please visit https://liu.edu/student-success/learning-center/veteranservices. The Veterans School Certifying Official can be reached at 718-488-1200 or by email at veteran@liu.edu.

Study Abroad
Students who wish to study abroad may do so during a summer session, academic semester, or entire academic year. Students may take part in one of the LIU Global programs. Students receive direct credits for courses and can apply most of their financial aid toward program costs.

Students who have completed at least two consecutive full-time semesters at LIU and have a minimum grade point average of 3.0 at the time of their application are eligible to apply for study abroad programs. Students are encouraged to work with their success coach to explore Study Abroad opportunities and complete the application.

Career Success
Preparation for jobs and internships begins as soon as a student starts at the University. Students will work with their success coach to build their resume, practice job, and interview skills, and apply for various opportunities. LIU Promise holds dozens of career-related workshops each semester and hosts Career Weeks that provide individual appointments with coaches to review resumes, cover letters, and LinkedIn Profiles.

As part of student success coaching, students will complete the following with their coach:
• Explore majors and career options
• Plan your curriculum
• Prepare for the job search
• Write résumés and cover letters
• Identify internships and jobs in your field
• Build a network and find mentors
• Research and apply for graduate school

Handshake
Students are encouraged to utilize Handshake, the
University’s job and internship portal. Students have access to thousands of positions, can upload their resumes, and begin their career search while at LIU. Each student automatically has an account and can log in using their MyLIU credentials.

Big Interview
The University’s Big Interview platform provides students with the tools to conduct video interviewing to prepare for jobs and internships. Big Interview introduces students to essential life skills needed to excel in the interview process including, communication skills, self-confidence, negotiation, and other vital workplace-readiness competencies.

To access all Career Success resources, visit liu.edu/career-success.

English Language Institute
The English Language Institute offers both intensive and part-time English language programs for international students, visitors and tourists, immigrants, and refugees who wish to improve their English language skills. Classes include Conversation and Listening, Grammar, Reading and Vocabulary, and Writing. Full- and part-time exam preparation courses for the TOEFL (Test of English as a Foreign Language) and IELTS (International English Language Testing System) are also offered, as well as elective classes in Pronunciation Practice, Job Preparation, and Idiomatic Expressions and Phrasal Verbs, among others. Half-Semester, Quarter-Semester, and University Preparation programs are also available, as well as classes for Au Pairs. Classes are taught mornings, afternoons, and evenings, Monday-Thursday, throughout the year, F-1 (student) visas and financial aid are available for qualified students. The English Language Institute is located in the Library Learning Center, 4th Floor.

International Student Services
The University is home to international students from countries around the globe. Student Affairs is committed to providing a supportive and exceptional student experience for all international students. International Student Services, housed within Enrollment Services, coordinates international student orientation, programming, and resources. The Primary Designated School Official (PDSO) and Designated School Officials (DSOs) work with each international student on all immigration and related matters during their time enrolled as a student. These staff members are also a source of reference for international students on F-1, M-1, and J-1 visas.

To view a copy of the International Student Handbook for information on maintaining F-1 Visa status, visit liu.edu/student-success.

Bookstore
The Official Bookstore of Long Island University is powered by Barnes and Noble. The University Bookstore is conveniently located on campus where students can purchase or rent their textbooks. In addition, the store carries Long Island University and Shark Nation apparel, gifts, accessories, supplies, and electronics.

Textbook requirements can be viewed via the online ordering system. Students may choose to purchase their textbooks through this system or take the International Standard Book Number (ISBN) and purchase their books from a different vendor. Textbooks purchased through the LIU online bookstore are delivered to LIU bookstore.

Visit the bookstore at https://liunet-brooklyn.bncollege.com

Public Safety
Emergencies: 718-488-1078
Non-Emergencies: 718-488-1078

The Department of Public Safety at LIU Brooklyn is located at the rear of the Metcalfe building, opposite the Pharmacy building. The department has a full-time staff that consists of a director, three tour commanders, three lieutenants, three desk sergeants, 45 public safety officers, and an administrative assistant. Public safety officers are licensed by the State of New York and are trained, certified and registered pursuant to the New York State Security Guard Act of 1992. The department serves the campus 24 hours a day, 7 days a week year-round, and may be reached by dialing 1078 on campus telephones (add prefix 488 when using outside lines).

The Department of Public Safety is concerned with the welfare and safety of all members of the campus community and their guests. The activities of the Department of Public Safety are enhanced by its close relationship with the 84th and 88th Precinct, which shares the responsibility of maintaining law and order on the campus. This precinct often notifies the department of any off-campus arrest involving members of our campus community if there is a perceived threat to the welfare of the other members.

Public safety officers are not peace officers, but they do handle criminal acts and crime scenes until the police department arrives. Suspects are identified and detained for action by the arriving police personnel.

Annual Campus Security Report
In accordance with the provisions of the Jeanne Clery Act, LIU Brooklyn’s annual security report includes statistics for the previous three calendar years concerning reported crimes that occurred on campus; in certain off-campus buildings or property owned or controlled by LIU Brooklyn; and on public property within, or immediately adjacent to and accessible from, the campus. The report also includes institutional policies concerning campus security issues, such as those concerning alcohol and drug use, crime prevention, the reporting of crimes, sexual assaults, hate crimes, and other relevant matters.

The Advisory Committee on Campus Safety will provide upon request all campus crime statistics as reported to the United States Department of Education.

Emergency Management
LIU Brooklyn’s Department of Public Safety offers comprehensive services in emergency response and management to ensure the safety of our students, faculty and staff. Through several initiatives, the campus is prepared for a wide array of emergency situations, ensuring prompt notification and protection of the campus community whether the event is commonplace or extraordinary. In the event of an emergency, LIU Brooklyn’s Emergency Notification System is enabled to instantly and simultaneously contact LIU Brooklyn students, faculty and staff via Long Island University email, Web site notifications and text messaging to those who register their cell phones with the university. Emergency building managers assist the Department of Public Safety in disseminating information in their designated building and have been trained in “Evacuation” and “Shelter-in-Place” procedures. LIU Brooklyn employs an outdoor siren warning system.

An efficient snow and emergency school closings system is in place to ensure our students are informed of closings immediately via the LIU Brooklyn homepage, our emergency closings hotline (718-488-1000 or 718-488-1078), as well as local radio and television stations.

Information Technology
Information Technology’s (IT) role includes academic and administrative computing services that facilitate and fosters technology innovations across the institution - moving the university ahead of the technology curve to build a competitive edge in higher education and to offer modern tools to our students, faculty, staff members and administrators.

The Office of Information Technology is responsible for managing all aspects of the university’s information technology operations, including academic and administrative systems and computing, databases, dashboards, networking, audiovisual, video and telecommunications infrastructure, academic
Information Technology also provides oversight for university-wide information systems, compliance, and security in accordance with policies set forth by University Counsel. Information Technology collaborates with Academic Affairs to implement a unified, comprehensive learning management system and online education initiatives. Information Technology also manages business process improvement initiatives across the university. Each residential campus has a fully-staffed Information Technology helpdesk centralized through Browse, LIU's technology store.

**Instructional Technology Centers**
LIU's Instructional Technology Resource centers promote excellence in teaching throughout the university. This includes face-to-face, online, and blended settings. Our mission is to provide pedagogical support for every situation across campus. The instructional design team provides faculty training on a wide variety of pedagogical issues, curriculum design consultation, and one-on-one support for anyone looking to build or improve outstanding courses. Also, the staff is available to facilitate the utilization of the e-learning management system along with other teaching and learning tools. We also collaborate with administrative offices to create an exceptional teaching and learning environment at LIU.

**My LIU**
MyLIU is the university's portal that provides students with convenient access to information about their records. By logging into https://My.LIU.edu, students may view the schedule of classes, register for courses, obtain their grades, and request transcripts. They may also view financial aid awards, billing information, make online payments, accept and decline Federal Loans and Federal College Work-Study, and make an appointment to see counselors.

**Student Email**
Each student is assigned a university email address to use for corresponding with university faculty and staff. Students can check their email by logging into https://My.LIU.edu. If you have any trouble accessing your MyLIU account, please check with the helpdesk at Browse.

**Helpdesk Support**
If you have any questions regarding your technology support services at LIU or have a request requiring helpdesk support, please contact IT at ITserviceDesk@LIU.EDU. Visit https://it.liu.edu.

**Alumni Engagement**
Long Island University has an active network of over 285,000 alumni across the globe. Whether students graduate from Brooklyn, Post, or the regional campuses in Riverhead and Hudson, to the former Southampton campus, the Alumni and Employer Engagement Team continue to support LIU students after their graduation. Find out more regarding Alumni and Employer Engagement and alumni benefits by visiting liu.edu/alumni.
LIU Brooklyn

HONOR SOCIETIES

Department Honor Societies

Biology
Alpha Epsilon Delta
The premedical and pre-dental honor society founded in 1928 as the Lancet Society became on May 4, 1957, the New York Delta Chapter of Alpha Epsilon Delta, a national premedical honor society. Its purpose is to encourage high standards of scholarship in premedical and allied studies, to stimulate an appreciation of the fields of education in the study of medicine, and to bind together similarly interested students. Requirements for membership include classification as a junior or a senior and a 3.00 grade point average overall and in science.

Phi Sigma Society
The biology honor society, organized in 1928 as Anaphy, was the first science society at the university. On April 27, 1957, Anaphy became Beta Gamma Chapter of Phi Sigma Society, an international biology honor society. Its purpose is to promote interest in research in the biological sciences. Undergraduate candidates for membership must have a 3.00 grade point average in biology for four semesters or a 4.00 grade point average in biology for two semesters, in addition to a 3.00 overall grade point average. Graduate students in biology are eligible for membership.

Business
Sigma Beta Delta
In 1999, the LIU chapter of Sigma Beta Delta, the international honor society in business, management, and administration was established. Membership is the highest national recognition a business student can receive at a college or university with a chapter. Sigma Beta Delta encourages and recognizes scholarship and achievement among students of the School of Business, Public Administration and Information Sciences. To be eligible for membership, students must rank in the upper 20 percent of their junior, senior, or master’s class, must attain a minimum 3.65 cumulative grade point average, and must be invited to membership by the faculty officers of the chapter.

Chemistry
Student Affiliate of the American Chemical Society
In 1956 the American Chemical Society granted a charter authorizing the establishment of a student affiliate group of the American Chemical Society at LIU Brooklyn. The purpose of this national society is to encourage high standards of scholarship in chemistry and allied studies, stimulate interest in the chemical profession, and promote association with students of similar interests in neighboring institutions. Requirements for senior membership: 16 credits of chemistry with a 3.00 grade point average.

Economics
Omicron Delta Epsilon
The Sigma Chapter of Omicron Delta Epsilon (international honors society in economics) was installed in spring 1971. Its purpose is to recognize and encourage high standards of scholarship in economics and allied sciences and stimulate interest in the economics profession. Election to membership is recognized as the highest academic honor conferred on students of economics in American universities at both the undergraduate and graduate levels of study. Superior scholarship, particularly in economics, integrity of character, and promise of professional development are requisite factors for election.

English
Sigma Tau Delta
In 1957 the Omicron Zeta Chapter of Sigma Tau Delta, an international national honor society for students of English, was organized at LIU Brooklyn. The purpose of the chapter is to encourage advanced study in literature and writing and to honor outstanding students in the field by election to membership. To become a full member, a student must be an English major or minor who has completed six advanced credits in English at LIU Brooklyn with at least a 3.30 grade point average in English and an overall grade point average of 3.00. Students are invited to join by the faculty advisor and inducted in the spring semester.

Health Professions
Alpha Eta
The Alpha Eta Society is the National Scholastic Honor Society for the Allied Health Professions. The Society was chartered in Florida in 1975, and re-chartered in Georgia in 1998. It has 80 chapters and over 25,000 initiated members. The purpose of the society is the promotion and recognition of significant scholarship, leadership, and contributions to the allied health professions. The motto is "Together We Serve" because it represents all of the allied health professions. The society was named for the Greek letters equivalent to the first letters of Allied Health, which were Alpha Eta.

History
Phi Alpha Theta
A history honor society was organized in the fall of 1950. Its purpose was to give history majors an opportunity to learn the techniques of independent research and to acquire skills in oral presentation. In the spring of 1956, that honor society was admitted as a sister chapter, Epsilon Omega, to Phi Alpha Theta, the interuniversity national honor society for history students. Requirements for membership: 12 credits of history with a 3.00 grade point average and a 3.00 grade point average in two-thirds of the remainder of the member’s courses.

Journalism
Kappa Tau Alpha
Kappa Tau Alpha is the national honor society founded in 1910 to encourage and recognize scholarship in journalism. The campus chapter welcomes as members those students who have achieved high academic standing in their major subjects and university-wide studies. No more than 10 percent of the junior and senior journalism classes may be admitted.

Society of Professional Journalists
Sigma Delta Chi
A chapter of the Society of Professional Journalists, Sigma Delta Chi was established at LIU Brooklyn in 1962. National in scope, SPJ is dedicated to advancing the purposes and ethics of journalism, as well as to helping members express their aspirations and achieve their career objectives. The current unit works closely with The Deadline Club, an organization of professional media journalists in the New York area. Journalism students are eligible for admission to the society provided they achieve satisfactory grades in their major and sign a pledge indicating intention to practice journalism as a profession.

Nursing
Harriet Rothkopf Heilbrunn School of Nursing Honor Society
Organized in 1999, the purposes of the Honor Society are to recognize superior achievement, recognize the development of leadership qualities, foster high professional standards, encourage creative work and strengthen commitment to the ideals and purposes of the nursing profession. To be eligible for membership, students must have completed half of the nursing curriculum with a 3.0 GPA. Undergraduate students must rank in the top 35% of their class. All candidates must meet expectations of academic integrity and must be endorsed by at least two faculty members who hold membership in Sigma Theta Tau International, the honor society of nursing. Application materials are available through the nursing community Blackboard sites.

Occupational Therapy
Pi Theta Epsilon
The LIU Brooklyn Pi Theta Epsilon-Gamma Eta Chapter was established in May 2006. Pi Theta Epsilon is the national honor society for occupational therapy students and alumni. It was
first established at the University of New Hampshire in 1958. The purposes are to recognize and encourage scholastic excellence of occupational therapy students; to contribute to the advancement of the field of occupational therapy; and to provide a vehicle for students to exchange information and collaborate regarding scholarly activities.

**Physician’s Assistant**

*Pi Alpha*

Pi Alpha is the national Physician Assistant honor society organized for the promotion and recognition of both PA students and graduates. Membership signifies the inductees’ significant academic achievement and honors them for their leadership, research, community/professional service and other related activities. The society also encourages a high standard of character and conduct among students and graduates.

**Political Science**

*Pi Sigma Alpha*

The Nu Chapter of the National Political Science Honor Society was chartered to recognize and encourage outstanding candidates who have studied political science. Candidates for membership must be in the upper third of their class and have completed at least three advanced courses in political science with a grade point average of approximately 3.20 in all political science courses taken.

**Psychology**

*Psi Chi*

Psi Chi is the international honor society in psychology. A minimum of nine completed credits in psychology is required for membership. In addition, undergraduate candidates must have completed at least 3 semesters or equivalent of full-time college coursework and be in the top 35% of their class. Undergraduates must also have a minimum 3.0 GPA average for psychology courses. Graduates must have an overall GPA of at least 3.0 in all graduate courses including psychology courses.

**Social Work**

*Phi Alpha*

The social work honor society, Phi Alpha, fosters a bond among social work students, faculty, and practitioners by promoting excellence in scholarship and service. The local chapter, Iota Chi, accepts applicants who are declared social work majors, have completed a minimum of nine hours of required social work courses, have achieved an overall GPA of 3.0, and have achieved a 3.5 GPA in social work courses.

**Speech**

*Speech-Language-Hearing Society*

In 1970 the Epsilon Phi Chapter of Sigma Alpha Eta, the Speech Pathology and Audiology honor society, was established at LIU Brooklyn. It is a local chapter of the National Student Speech-Language-Hearing Association. The purpose of Sigma Alpha Eta is to create and stimulate interest among students in Speech-Language Pathology and Audiology. Membership is open to all students majoring in Speech Language Pathology.

---

**Academic Honor Societies**

**Alpha Lambda Delta**

The LIU Brooklyn chapter of Alpha Lambda Delta was installed in 1995. Students of all majors with 24 to 36 core credits and a minimum grade point average of 3.5 can join. Members can apply for grants in the sophomore year and for graduate study. Applications for travel grants are available. Chapter leaders attend national training conferences. All inductees are lifetime members.

**Alpha Chi**

Alpha Chi National College Honor Society (AX) is a member of the Association of College Honor Societies (ACHS). The campus chapter, New York Sigma, was established in 1998. AX invites juniors and seniors from all majors who have a minimum cumulative GPA of 3.5 to join the society. Members are eligible to apply for scholarships for graduate and professional study, participation in national conferences, and other awards. All inductees are lifetime members and have their names added to the national membership registry.

**Phi Kappa Phi**

Phi Kappa Phi, founded in 1897, is a national honor society and member of the Honor Society Caucus whose mission is to promote academic excellence and engage a community of scholars in service to others. The Long Island University chapter was installed in 2017. The top 7.5% of second-term juniors and 10% of seniors and graduate students are invited to join. Fellowships for undergraduate study abroad and graduate study are available.
SPECIAL PROGRAMS

Outreach Programs

Liberty Partnerships Program (LPP)
Roland H. Robinson
S Building, Room 301
718-488-3399
Email: roland.robinson@liu.edu

History
The Liberty Partnership Program (LPP) was established in 1988 under Section 6 of the Education Law to address the significant dropout rate among New York’s youth. The legislation stated, “The failure of many young New Yorkers to complete their secondary education limits their opportunity for a life of fulfillment, prevents them from advancing into postsecondary education and hinders the state’s efforts to provide a well-trained workforce for business and industry in New York.” LPP is funded by the New York State Education Department.

LPP at LIU Brooklyn
LPP at LIU Brooklyn is a dropout prevention and college and career readiness program for New York City high school students. Programming is comprised of a college and career readiness course, SAT and Regents Prep, discussions groups and project-based learning.

Programming
LPP coordinates day school, after-school and summer programming. Day school and after-school programming occur at New York City high schools beginning in early September and concluding in early June. Summer programming occurs on the campus of LIU Brooklyn beginning in early July and concluding in mid-August. Please contact the LPP office regarding student enrollment.

Jumpstart Program
Joery Francois, Volunteer Manager,
joery.francois@jstart.org

Jumpstart is a national non-profit organization that engages college students to work towards the day every child in America enters school prepared to succeed. Jumpstart volunteers work with children in local preschools on beginning reading, writing and socialization skills. LIU Brooklyn students work in teams to implement educational lessons and receive both pre-service and ongoing training in early teaching. Students also develop leadership and professional skills that serve as a foundation for career success. The program is open to students in all majors. Students who complete 300 hours of service receive an educational stipend. The program is also a Federal Work-Study site. Students also have the opportunity to engage in short-term community service opportunities throughout the academic year. Apply online at application.jstart.org!
LIBRARY

The LIU Libraries serve a combined total of over 15,000 students, more than 500 full-time faculty members, and over 1,000 part-time faculty across residential and regional campuses, as well as the university’s international sites. The university’s libraries share many online resources that can be accessed from anywhere at any time via remote access including subscriptions to more than 338,000 online journals, 230 online databases, 287,000 electronic books, and 17,700 files of streaming media.

Collectively, the university’s libraries house approximately 627,000 print books and more than 13,600 non-print media items. The collections of all LIU libraries are listed in LIUCAT, the library catalog. Books, journal articles, and other library materials owned by LIU’s libraries, but not available at a particular campus, can be requested through LIUCAT and supplied via LIU’s intralibrary loan service. Items not available at the LIU libraries can be obtained through interlibrary loans and sent to the campus or delivered electronically. In addition, the LIU Libraries administer the Digital Commons @ LIU, an open-access online repository that preserves, promotes, and disseminates the academic work of LIU students and faculty.

As the intellectual center of each campus, the LIU Libraries prepare LIU students for academic success, lifelong learning, and being responsible global citizens. The LIU Libraries are committed to supporting the mission of the University, and to learning and inquiry, as well as the creation of new knowledge and its dissemination.

The LIU Libraries provide a reference, instruction, research, circulation, reserves, and interlibrary loan services. The LIU Libraries have computers for student use, wireless access, a variety of seating options, including individual study carrels, quiet and group study space, and copy and scanning facilities. These computers and other computers in the library are also equipped with productivity software such as word processing, spreadsheet, and presentation programs. The university’s libraries also have instructional labs, equipped with computers that provide access to databases, the library catalog, and the Internet as well as up-to-date word processing, spreadsheet, presentation, and database programs. Printing and scanning facilities are available for student use.

Archives and Special Collections are available at the LIU Brooklyn and LIU Post libraries. Highlights of the Special Collections at the LIU Brooklyn Library include the Artist Books Collection, the New York African Society for Mutual Relief Collection, the Robert C. Weinberg Collection, and the Seawanahaka Student Newspaper Collection. The LIU Post Library houses more than 30 distinguished rare book collections and 75 major archival collections. Highlights include the pre-eminent American Juvenile Collection; the Archives of LIU and LIU Post; the Original Movie Poster Research Collection; Theodore Roosevelt Association Collection and Cedar Swamp Historical Society Collection (Long Island); the Eugene and Carlotta O’Neill Personal Library; and the Winthrop Palmer Collection: French & Irish Literature. The Digital Initiatives (DI)/Art Image Collection at the LIU Post Library has a collection of slides in multiple formats, a growing collection of digital images, including the William Randolph Hearst Archive.

The LIU Libraries also have a media collection at each campus library. The multimedia collections and media equipment are available to support curricular needs. The Instructional Media Center (IMC) is the multimedia resource center and the K-12 curriculum center for LIU Post. In addition, the LIU Brooklyn Library’s Cyber Lab, a “green” lab, its “smart” instructional labs, and the LIU Post Library’s Instructional Lab.

The LIU Libraries provide remote access 24/7 and offer specialized tools such as Journal Finder and LibGuides to support the teaching, learning, and research requirements of the faculty and students. In addition, the university’s libraries are members of several consortia, providing additional resources and services to LIU users.

In addition to information literacy classes and curriculum-integrated instruction, the LIU Libraries provide a wide range of reference services including drop-in, telephone, email, chat, and text reference services. Research consultations by appointment are also available to users. Library faculty and staff are available to help students and faculty with reference questions and research strategies.
The program is designed to prepare students to program in one of the following two tracks:

- Nursing

Students have the opportunity to complete the program in one of the following two tracks:

- Full-time day track
- The full-time 15 or 16-month accelerated 2nd-degree track, for students who currently hold a baccalaureate degree in another discipline.

The program is designed to prepare students to develop the competencies essential for professional nursing practice and to build a foundation for graduate study.

Undergraduate Nursing Program Goals

The goals of the Harriet Rothkopf Heilbrunn School of Nursing baccalaureate program are to prepare professional nurses who:

- provide high-quality, safe care.
- evaluate client changes and progress over time.
- design/manage/coordinate care as part of an interprofessional team.
- identify system issues, manage care transitions, and delegate, prioritize and oversee care.
- are members of the nursing profession who continually evaluate their practice and support the profession.
- are prepared for graduate study in nursing.

Undergraduate Program Outcomes

Upon completion of the program graduates are prepared to:

- Integrate knowledge from the liberal arts and sciences when providing professional nursing care to diverse individuals, families, groups, communities, and populations throughout the life span and across the continuum of healthcare settings.
- Identify principles of leadership and management for quality improvement and patient safety to the delivery of high-quality professional nursing care within current cultural, economic, organizational, and political perspectives.
- Integrate evidence-based best practices into professional nursing practice to improve patient outcomes.
- Use information technology ethically to support evidence-based practice, decision-making, and demonstrate competence using patient care technology in the delivery of quality patient care across the continuum of care.
- Examine healthcare, financial, and regulatory policies that influence the practice of professional nursing and access to care and promote advocacy for consumers and the profession.
- Collaborate with members of the interprofessional team to improve communication to provide patient-centered care.
- Provide population-based professional nursing care that integrates concepts of demographics, social determinants of health, health promotion, disease and injury prevention, risk assessment, genetics/genomics, equity, and resource utilization in the delivery of quality and safe care.
- Demonstrate professionalism and accountability in nursing practice applying professional values of altruism, autonomy, human dignity, integrity, and social justice.
- Apply knowledge, skills, and attitudes using clinical reasoning to develop nursing interventions that recognize culture, spirituality, ethnicity, socioeconomic status, gender, and sexual orientation in the delivery of professional nursing care to all consumers across the lifespan.

The full-time program is designed to be completed in four years for first-time freshmen and in 2 years for transfer students. If a student requires proficiency and skills courses, however, the course of study may be lengthened.

Generic Nursing Program Admissions Requirements:

Applications to the Generic BS in Nursing program are accepted twice a year in the Fall and the Spring Semester.

For acceptance as a nursing major:

Admission Criteria for acceptance from High School into the Nursing Major requires the following:

- High School GPA of 85% or higher
- High School Science (specifically Biology & Chemistry) and Math (specifically Algebra) grades B or higher (85% or higher in each of these math and science courses).

Admission Criteria for acceptance for transfer students into the Nursing Major requires the following:

- College GPA of 85%/3.0 or higher
- College Science (specifically Chemistry, Anatomy & Physiology I & II and Microbiology) and Math (specifically Algebra and Statistics) grades B or higher (85%/3.0 or higher in each of these math and science courses),
- College Math and Science courses must be completed within 5 years from the term enrolled.

Accelerated Program Admissions Requirements:

Admission to the Accelerated program requires a previous bachelor's degree. Applications are accepted three times a year, Spring, Summer, and Fall.

For Acceptance as an Accelerated nursing major:

- College GPA of 88%/3.3 or higher
- College Science (specifically Microbiology, Chemistry, Anatomy & Physiology I & II) and Math (specifically Algebra and Statistics) grades B+ or higher (88%/3.3 or higher in each of these math and science courses).
- College Math and Science courses must be completed within 5 years from the term enrolled.

Progression Criteria:

- A grade of C or higher in all nursing courses, a
C+ or higher in all science courses, and a minimum nursing and overall GPA of 2.75 are required to progress through the generic nursing program.

- Students will be subject to background checks and are required to undergo drug testing.

**Accelerated BS Nursing Program**
- A grade of C or higher in all nursing courses, a C+ or higher in all science courses, and a minimum nursing and overall GPA of 2.75 are required to progress through the accelerated nursing program.
- Students will be subject to background checks and are required to undergo drug testing.

**Criteria for eligibility to participate in clinical rotations:**
1. Satisfactorily complete the required health forms – including titers, health clearance, and vaccines
2. Pass a background check
3. Pass a drug screen
4. Complete HIPAA and OSHA certification courses
5. Obtain American Heart Association Basic Life Support (BLS) for Healthcare Provider certification
6. Comply with criminal background checks and drug screening as required for eligibility to access entrance into specific clinical agencies as related to clinical course objectives.

All students taking a nursing course with a clinical/laboratory component are required to have health insurance and to have satisfactory yearly physical examination reports. The completed health form and all clinical clearance documentation must be submitted to Castlebranch by August 1 for the fall semester, December 1 for the spring semester, and May 1 for the summer semester. It is the responsibility of students to obtain specific laboratory tests at their own expense. Failure to submit the aforementioned documentation within the specified time limit automatically denies admittance of students to nursing courses with clinical components.

Furthermore, students in all clinical/laboratory courses are required to purchase, at their own expense, the uniforms, and other equipment appropriate to or required by the agency to which they are assigned.

Nursing courses taken in baccalaureate programs at other institutions will not be accepted for transfer.

*Pending review by the New York State Education Department, Office of the Professions, persons who have been convicted of a crime other than a minor traffic violation could be ineligible for Registered Nurse Licensure in the State of New York, even though they have completed the program.

**B.S. Nursing**  
(Program Code: 00098) (HEGIS: 1203.0)

**Graduation Requirements**
Students must satisfy the placement, proficiency, and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:

**Core Curriculum Requirements (34-35 credits)**

**Humanities**
- English Composition - ENG 16 3.00
- English Literature: ENG 61, 62, 63 or 64 3.00
- Philosophy: PHI 60 3.00
- Foreign Language 3.00

**Social Sciences**
- History 1 or 2 3.00
- Anthropology or Sociology 3.00
- Psychology - PSY 3 3.00

**Science and Mathematics**
- Mathematics: MTH 16 3.00
- Laboratory Science: BIO 3 4.00

**Communication, Visual & Performing Arts**
- Oral Communications: SPE 3 3.00
- Art, Dance, Journalism, Music, Theatre, Media Arts 3.00

**Ancillary Requirements**

**Must take all of the following courses and earn C+ or higher:**

- BIO 101 Microbiology 4.00
- BIO 137 Anatomy & Physiology I 4.00
- BIO 138 Anatomy & Physiology II 4.00
- CHM 1 Chemistry for Health Sciences I 4.00
- PSY 31 Lifespan Developmental Psychology 3.00
- FYS 1 First Year Seminar 1.00
- Free Electives (2) 6.00

**Must take one of the following courses and earn C+ or higher:**

- MTH 100 Introductory Statistics 3.00
- PSY 150 Statistics for the Social Sciences 3.00

**Major Requirements**

**Must take all of the following courses and earn C or higher:**

- NUR 210 Contemporary Topics in Nursing 2.00
- NUR 211 Informatics for Nurses 2.50
- NUR 220 Health Assessment and Health Promotion (Lecture & Lab) 3.50
- NUR 321 Principles of Nursing Practice - Lecture 3.00
- NUR 321C Principles of Nursing Practice - Clinical 1.00
- NUR 321L Principles of Nursing Practice - Lab 2.00
- NUR 330 Pathophysiology for Nursing Practice 3.00
- NUR 340 Pharmacology for Nursing Practice (Lecture & Lab) 4.00
- NUR 362 Introduction to Health Care Systems and Policy 3.00
- NUR 363 Research/Evidence for Nursing 3.00
- NUR 410A Maternity/OB Nursing (Lecture, Lab & Clinical) 3.00
- NUR 410B Pediatric Nursing (Lecture, Lab, & Clinical) 3.00
- NUR 420 Behavioral and Mental Health Nursing (Lecture & Clinical) 4.00
- NUR 430 Nursing Leadership and Management (Lecture & Clinical) 3.50
- NUR 440 Medical Surgical Nursing I (Lecture, Lab & Clinical) 6.00
- NUR 450 Medical Surgical Nursing II (Lecture, Lab & Clinical) 7.00
- NUR 460 Community/Population Health Nursing (Lecture & Clinical) 5.50

**Credit and GPA Requirements**
Minimum Total Credits: 122
Minimum Liberal Arts and Sciences Credits: 61
Minimum Major Credits: 59
Minimum Nursing Major GPA: 2.75
Minimum Overall GPA: 2.75

**Accelerated B.S. Nursing Track**

**Major Requirements**

- Must complete all courses below with a grade of C or higher.
- NUR 210 Contemporary Topics in Nursing 2.00
- NUR 211 Informatics for Nurses 2.50
- NUR 220 Health Assessment and Health Promotion (Lecture & Lab) 3.50

Nursing Courses

NUR 210 Contemporary Topics in Nursing
The focus of this course is to introduce students to concepts and topics that are important to contemporary nursing practice and professional development of the nurse. Selected concepts and topics are explored and include professionalism, clinical judgment, communication and collaboration, informatics, the interprofessional health care team, licensure, health care law and ethics, evidence-based practice, safety, health and wellness, quality and health promotion.
Pre requisite: Student must be in Nursing plan code; ENG 16 or HEG 21/22
Credits: 2
Every Fall, Spring and Summer

NUR 211 Informatics for Nurses
This course examines information management and technological advances for practice of professional nursing care, using the concepts of technology and information, professionalism, communication, health care law/policy, health care ethics, and patient education. Background information, informatics applications, health care information systems, patient privacy considerations, costs and consequences are reviewed. This course explores future directions in computerized integrated health care delivery.
Pre requisite: Student must be in Nursing plan code
Credits: 2.50
Every Fall, Spring and Summer

NUR 220 Health Assessment and Health Promotion
This course provides pre-licensure nursing students with beginning skill development to perform a comprehensive health and physical assessment of adults and older adults. Students will acquire the requisite knowledge and cognitive, psychomotor, and affective skills related to interviewing techniques, history taking, general survey, physical assessment, cultural assessment, health promotion, risk assessment, documentation, and communication of findings required for beginning nursing practice. The importance of culturally sensitive and linguistically appropriate care and evidence-based practice are integrated into all aspects of patient assessment. Emphasis is placed on the acquisition, processing, analysis, and interpretation of subjective and objective data, physical examination, documentation, and communication of assessment findings that provide accurate information from which to form valid nursing diagnoses and integrated plans of care. This course is taken concurrently with NUR 220 lab.
Pre requisite: Student must be in Nursing plan code, BIO 3, 101, 137, 138, CHM 1
Co requisite: NUR 330 & 340
Credits: 3.50
Every Fall, Spring and Summer

NUR 321 Principles of Nursing Practice
This course focuses on concepts and exemplars essential to safe, quality nursing care of patients with basic health care needs, particularly the older adult. Classroom discussions and activities will focus on knowledge essential to developing competencies and the core values associated with professional nursing practice and focuses on the Quality and Safety Education in Nursing (QSEN) competencies. Core principles include safety and infection control, health and wellness, comfort and care, the nursing process, principles of medication administration, therapeutic communication, teaching and learning, and cultural and spiritual care of the patient. This will provide the theoretical basis for nursing skills taught in the laboratory and simulation settings. Skills related to the physiologic health process such as mobility, hygiene and comfort, infection control, vital sign monitoring, oxygenation, skin and wound care, nutrition and elimination will be taught and practiced in a laboratory/simulation setting. This course is taken concurrently with NUR 321L and NUR 321C.
Pre requisite: NUR 220, 330, 340
Co requisite: NUR 321L, NUR 321C
Credits: 3
Every Fall, Spring and Summer

NUR 321C Principles of Nursing Practice Clinical
Onsite clinical and simulation lab experiences provide opportunities for students to deliver safe, evidence-based nursing care to patients with basic health care needs, particularly the older adult. Each clinical experience includes a pre and post conference and simulation lab experiences include a debriefing session. This course is taken concurrently with NUR 321 and NUR 321L.
Co requisite: NUR 321, NUR 321L
Credits: 1
Every Fall, Spring and Summer

NUR 321L Principles of Nursing Practice Lab
Skills Lab experiences provide opportunities for students to apply knowledge they learn in lecture. Students practice the skills they need in order to prepare them to provide evidence-based nursing care to patients with basic health care needs, particularly the older adult. This lab is taken concurrently with NUR 321 and NUR 321C.
Co requisite: NUR 321, NUR 321C
Credits: 2
Every Fall, Spring and Summer

NUR 330 Pathophysiology for Nursing Practice
This course introduces students to basic principles and processes of the concepts of pathophysiology and altered health states in relation to normal body functioning aspects of physical and physiologic changes occurring in disease processes. These include descriptions of cellular biology, genetics and genetic diseases, forms of cell injuries, fluids and electrolytes and acids and bases; immunity; and tumor biology. Knowledge of these processes is applied to the pathophysiology of common diseases based upon selected concepts. The presentation of each disease/disorder entry includes relevant risk factors, pathophysiology, clinical manifestations and a brief review of treatment. Clinical reasoning will be augmented by applying models for nursing clinical judgment to clinical case studies. The course provides a foundation for future study in examining responses to illness in subsequent courses.
Pre requisite: Student must be in Nursing plan code, BIO 3,101, 137,138, BIO 101, CHM 1
Co requisite: NUR 220 & 340
Credits: 3
Every Fall, Spring and Summer

NUR 340 Pharmacology for Nursing Practice
The purpose of this course is to explore core concepts and scientific basis of pharmacotherapeutic agents used in the treatment of illness and the promotion, maintenance and restoration of wellness in diverse individuals across the lifespan. Emphasis is on the principles of pharmacokinetics, pharmacodynamics and pharmacogenetics in the treatment of selected illnesses including therapeutic and toxic effects, dosage calculations, and challenges related to drug therapy. The focus is safe administration and monitoring the effects of pharmacotherapeutic agents through the application of selected concepts important in nursing practice. Prototypes of the major drug groups are emphasized including evidence for best practice and critical thinking. Legal and ethical principles and regulatory guidelines and standards of practice will be discussed as they affect the role of the nurse generalist in delivering varied drug therapies. This course is taken concurrently with NUR 340L Pharmacology for Nursing Practice lab.
Pre requisite: BIO 3, 101, 137, 138, CHM 1, and MTH 16
Co requisite: NUR 220, 330
Credits: 4
Every Fall, Spring and Summer

NUR 362 Introduction to Health Care Systems and Policy
This course provides an overview of the health care system and the policy, political, economic and social factors that shape it. The course includes particular emphasis on how these factors affect the nursing profession and nursing practice. It also examines the roles that nurses, other health professionals, and consumers play in shaping health policy. This is a writing-intensive course that fulfills LIU Brooklyn’s writing-intensive requirement. For graduation, all students are required to take nine credits of writing-intensive courses. These courses include English 16 and a writing-intensive course in the major.
Pre requisite: Student must be in Nursing plan code, ENG 16 or HEG 21/22
Credits: 3
Every Fall, Spring and Summer
NUR 363 Research/Evidence for Nursing
This course introduces nursing students to the processes and methods of research and evidence-based practice. Focus is placed on identifying clinical questions, searching and appraising the evidence for potential solutions/innovations, and identifying additional gaps in nursing knowledge. Students explore the research process and critique research studies for quality and application to professional nursing practice. Ethical and legal implications in research are explored.
Pre requisites: MTH 100 or PSY 150; Student must be in Nursing plan code
Pre or Co requisite: NUR 321
Credits: 3
Every Fall, Spring and Summer

NUR 410A Maternity/OB Nursing
This seven week course focuses on the nursing care of the childbearing woman and newborn within the context of family-centered care. The course provides a global perspective and will explore social, economic, and political factors that impact the health of the maternal newborn population and the role of the registered nurse in caring for the childbearing and neonatal population. This course explores health promotion and maintenance behaviors across the lifespan in relation to maternal and newborn health. Clinical, lab, and simulation experiences provide opportunities for students to use clinical reasoning and the nursing process to provide quality nursing care to mothers, newborns, and families.
Pre requisites: PSY 31, NUR 321 NUR 321L, NUR 321C;
Co requisites: NUR 420, NUR 440, NUR 410B
Credits: 3
Every Fall, Spring and Summer

NUR 410B Pediatric Nursing
This seven week course focuses on the knowledge and skill acquisition needed to care for children and adolescents across the continuum of care. Emphasis is placed on family-centered care through transitions in the illness and recovery phases. The course accentuates family-centered strategies for optimizing health and maintaining individuality, promoting optimal developmental, physiological, and psychological functioning, and enhancing strengths within the context of family. Preventing disease through healthy environments: an assessment of the burden of disease from environmental risks social, economic, and political contexts affecting children bears examination. Clinical, lab, and simulation experiences provide opportunities for students to use clinical reasoning and the nursing process to provide quality nursing care to infants, children, adolescents, parents, and families.
Pre requisites: PSY 31, NUR 321, NUR 321L, NUR 321C;
Co requisites: NUR 420, NUR 440, NUR 410A
Credits: 3

NUR 420 Behavioral and Mental Health Nursing
This clinical course focuses on promotion, maintenance, and restoration of behavioral health across the lifespan. Emphasis is placed on therapeutic communication, critical thinking, and nursing interventions with clients in acute care and outpatient settings. Behavioral Health Nursing includes the School of Nursing (SON) core concepts, scope and standards of practice, basic mental health concepts, including developmental theories, issues related to client advocacy, therapeutic relationships, psychopharmacology, milieu management, models and theories related to individual, group, and family therapy, and clinical disorders from a nursing perspective. Cultural influences are discussed as they relate to communication and behavior. Students are introduced to principles of evidence-based practice as they relate to health promotion, prevention and treatment of mental illness across the lifespan. This course is taken concurrently with NUR 420C.
Pre requisites: NUR 321, 321L, 321C & PSY 3
Co requisites: NUR 410A, 410B & 440
Credits: 4
Every Fall, Spring and Summer

NUR 430 Nursing Leadership and Management
This course examines leadership concepts, including communication, evidence, ethics, law/policy, quality, and professionalism in the health care delivery system. Theories regarding leadership, management, power, chaos, change, influence, delegation, communication and empowerment are analyzed. Strategies for effective multidisciplinary collaboration are explored. Through a mentorship with a nursing leader, students apply leadership and management theory, plus participate as members of the healthcare team with a commitment to health equity in partnership with communities and other health professionals. This course is taken concurrently with NUR 430C.
Pre requisites: NUR 321, 321L & 321C
Co Requisite: NUR 450 & 460
Credits: 3.50
Every Fall, Spring and Summer

NUR 440 Medical Surgical Nursing I
This is the first of two courses, which focus on the health care needs for adults across their life span using selected concepts as a framework for study. Building on the foundations of previous nursing courses and the nursing process, students will examine the impact of altered health states including social determinants that integrate physiologic, sociocultural and behavioral alterations throughout. Emphasis is on prevention of complications, caring, empowerment, and critical thinking to promote optimal wellbeing in the patient and family. The clinical experience provides students with opportunities to apply the nursing process in acute care settings. This course is taken concurrently with NUR 440L and NUR 440C.
DEPARTMENT OF
HUMANITIES

The Humanities Department offers a wide range of courses to meet the needs of a diverse student body. The department serves the core curriculum by developing skills in reading, writing, critical thinking, knowledge of global cultures, and linguistic competence. The three combined disciplines offer classes in topics that provide a thorough grounding in the humanities and liberal arts.

English writing courses provide training in textual analysis, interpretive skills and writing proficiency, skills that are crucial to success in college and beyond — as well as to the exercise of democracy and global citizenship.

Philosophy familiarizes students with the basic concepts at work in areas of intellectual inquiry and provides skills in constructing and evaluating arguments. Philosophy asks “big” questions, concerning the nature of reality.

In our increasingly multilingual world, the ability to communicate with people from other cultures enriches individual experience. An acquired language raises cultural awareness, fosters intellectual inquiry, and bridges differences that divide us.

SCHOOL OF HUMANITIES
AND SOCIAL SCIENCES

The School of Humanities and Social Sciences comprises departments and programs that explore the human condition and the world through cultural, social, political, and philosophical lenses. The disciplines within the school attempt, in one way or another, to capture, explain, or reframe the human experience of the world. Each department and program is distinguished by its specific focus (e.g., written texts, social institutions) and approaches, but they overlap in using quantitative and qualitative methods, experimental, experiential, and interpretive knowledge, for better comprehending how humans interact with one another and the world to shape lived experience in different historical, cultural, and social settings. The school thus incorporates traditional disciplines such as English, history, philosophy, languages, sociology, anthropology, and political science, as well as an array of interdisciplinary approaches. Studies in the school prepare students for a host of future pursuits by giving them transferable skills in communications, problem solving, creative thinking, argumentation, deep analysis, and more.

English Courses

ENG 14 English Composition
In English 14, students develop their reading, writing and formal rhetorical skills. Not only do students learn to read and write about a variety of texts, they also learn to compose rhetorically sophisticated essays that take into account purpose, context, and audience. Students learn strategies for creating effective written arguments. This course has an additional fee. Six classroom hours per week. Letter grades and U.
One of the following prerequisites is required: ENG 13, Placement Exam or High School GPA and English grade review.
Credits: 3
Every Semester

ENG 14X English Composition for Nonnative Speakers
English 14X is a course parallel to English 14 for nonnative speakers who need additional work in English as a Second Language. Like English 14, English 14X meets six hours per week. Letter grades and U. This course has an additional fee.
The pre-requisite of ENG 13X or the placement exam is required.

ENG 16 English Composition
English 16 seeks to initiate a dialogue among students that leads them to write with more than their own “personal” position in mind: the readings and classroom discussions give the sense that they are entering an ongoing conversation of consequence. To this end, students in English 16 are required to integrate the thoughts and words of other writers into their own essays, thus learning how to articulate and develop a sophisticated argument within a specific rhetorical situation. Part of Core requirement.
One of the following prerequisites is required: ENG 14, Placement Exam, or High School GPA and English grade review.
Credits: 3
Every Semester

ENG 16C English Composition
English 16C is an accelerated class for students who place into English 14 but whose academic profile qualifies them to enroll in English 16C with additional support. Students in English 16C will enter into an ongoing conversation of consequence through research, readings, and classroom discussions, thus learning how to develop a persuasive argument within a specific rhetorical situation. Three classroom hours per week, three laboratory hours per week. Part of core requirement. This course has an additional fee. Prerequisite: Placement.
Credits: 3
Every Semester

ENG 16H Honors English Composition
This accelerated composition course will help students develop their reading, writing and rhetorical skills. Students learn strategies for creating effective written arguments by organizing their own understanding of the material and then incorporating the thoughts and works of other writers into their essays. This course is designed to hone the reading, writing, and critical thinking skills of Honors students before entering the first-year sequence.
Credits: 3
Every Fall

ENG 16X English Composition for Nonnative Speakers
English 16X is a course parallel to English 16 for nonnative speakers who need additional work in English as a Second Language. Three hours per week. Letter grades and U. This course has an additional fee.
The pre-requisite of ENG 14X or the placement exam is required.

ENG 61 European Literatures I
An examination of significant works of literature from Ancient Greece and Rome and Medieval and Renaissance Italy, France, Germany and England. Intensive readings from epics, sacred books, poems, plays and tales - arranged chronologically or thematically. All texts read in English.
The prerequisite of ENG 16 is required.
Credits: 3
Every Semester

ENG 62 European Literatures II
An examination of significant works of European literature, from the 18th Century to the present. Intensive readings from a wide representation of texts - novels, poems, plays and essays - arranged chronologically or thematically. All texts read in English.
The prerequisite of ENG 16 is required.
Credits: 3
Every Semester

ENG 63 American Literatures
A survey of the literatures and traditions of the United States from Colonial times to the present, with attention paid to the larger context of literary traditions across all the Americas - North America, the Caribbean, Latin America. Arranged chronologically or thematically. All texts read in English.
The prerequisite of ENG 16 is required.
Credits: 3
Every Semester

ENG 64 Global Literatures
Drawing primarily from the literatures of Africa and Asia, each section focuses on at least two geographical areas, such as Western Africa, China, India, Japan, Southeast Asia or the Pacific Islands. Broad sweeps of time may be covered or specific periods of high cultural achievements such as the...
HEG 21 or HEG 22.
required: ENG 61, ENG 62, ENG 63, ENG 64,
Prerequisite: One of the following courses is
in Premodern Literature, or Heroic Identities
semester and may include topics such as the
Shakespeare. Themes vary from semester to
years and includes texts by Chaucer and
course focuses on a period of at least two hundred
British literature from its beginnings to 1800. The
ENG 128 Early British Literatures
Credits: 4
Requisites: English 16 or Department Permission
practice applying professional standards such as
content, organization, form, and style. Students
model news stories to assess the effectiveness of
their work, and think like an editor. They examine
integrate visual elements, proofread copy, revise
ideas, gather information, write engaging leads,
diverse audiences. Students learn to develop story
ENG 126 Writing for News Media
Every Spring
Explores the creation of journalistic stories for
diverse audiences. Students learn to develop story
ideas, gather information, write engaging leads,
increase visual elements, proofread copy, revise
their work, and think like an editor. They examine
model news stories to assess the effectiveness of
content, organization, form, and style. Students
practice applying professional standards such as
Associated Press style to their writing.
Requisites: English 16 or Department Permission
Credits: 4
Every Fall and Spring
ENG 128 Early British Literatures
An exploration of significant texts and topics in
British literature from its beginnings to 1800. The
course focuses on a period of at least two hundred
years and includes texts by Chaucer and
Shakespeare. Themes vary from semester to
semester and may include topics such as the
Monstrous and the Fantastic, Sexuality and Gender
in Premodern Literature, or Heroic Identities
before 1800.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
On Occasion
ENG 129 Later British Literatures
An exploration of significant texts and topics in
British literature between 1800 and the present.
Themes vary from semester to semester and may
include topics such as the Age of Revolution,
Writing Empire, or (Re)Writing Religion in
Modern British Literature.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
Every Semester
ENG 102 History of Literary Theory
Readings survey the history of literary theory from
Plato to the present. A wide variety of critical
approaches are discussed, including Classicism,
Neo-Classicism, Romanticism, Marxism, New
Criticism, Structuralism, Psychoanalytic Criticism,
Feminism, Queer Theory, Post-Structuralism,
Ethnic Studies, New Historicism, and Cultural
Studies.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
On Occasion
ENG 104 Introduction to Creative Writing
An introductory creative writing workshop.
Students begin to learn and experiment with the art
of writing in various genres, such as poetry, fiction
and playwriting. Although readings are included,
emphasis is on class discussion of student
manuscripts and individual conferences with the
instructor.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
On Occasion
ENG 105 Creative Nonfiction Writing
An intensive workshop in which students explore
genres that include the essay, memoir, experimental
fiction, zine writing, and digital storytelling.
Focus is on extending students’ own experiences
into distinct and challenging forms. Students will
also be required to read selected essays and poems
by published authors. Class time will be spent
critiquing each other’s writing and discussing
traditional and experimental forms and approaches.
May be taken twice for credit.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
Annually
ENG 113 Shakespeare
The greatness of Shakespeare explored through the
intensive study of selected plays and poems.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
On Occasion
ENG 129 Later British Literatures
An exploration of significant texts and topics in
British literature between 1800 and the present.
Themes vary from semester to semester and may
include topics such as the Age of Revolution,
Writing Empire, or (Re)Writing Religion in
Modern British Literature.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
On Occasion
ENG 137 Shakespeare
The greatness of Shakespeare explored through the
intensive study of selected plays and poems.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
On Occasion
ENG 159 Literatures of the United States Since 1865
In this course, texts and themes are drawn from American
literature from the Civil War to the
present. Themes vary from semester to semester and may include:
Country and City, Representing the Nation, Literature of a Multicultural
United States.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
On Occasion
ENG 158 Early Literatures of the United States
An introduction to texts and themes in pre-Civil
War American literature. Themes vary from
semester to semester. Areas of exploration may include:
Examining the Frontier, Slavery and Freedom, American Myths and U.S. Realities.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
On Occasion
ENG 129 Later British Literatures
An exploration of significant texts and topics in
British literature between 1800 and the present.
Themes vary from semester to semester and may
include topics such as the Age of Revolution,
Writing Empire, or (Re)Writing Religion in
Modern British Literature.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
On Occasion
ENG 145 Writing Empires
An intensive workshop devoted to writing history.
Focus is on extending students’ own experiences
into distinct and challenging forms. Students will
also be required to read selected essays and poems
by published authors. Class time will be spent
critiquing each other’s writing and discussing
traditional and experimental forms and approaches.
May be taken twice for credit.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
Annually
ENG 163 Explorations in Nonfiction Writing
A nonfiction workshop in which students explore
genres that include the essay, memoir, experimental
nonfiction, zine writing, and digital storytelling.
Emphasis on discussion of student manuscripts and
individual conferences with instructor. May be
taken twice for credit.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
On Occasion
ENG 164 Explorations in Creative Writing
A creative writing workshop in which students
explore topics in writing including spoken word
poetry, experimental fiction, poet’s theater, short
story writing, and dramatic storytelling. Emphasis on
discussion of student manuscripts and presentations and individual conferences with
instructor. May be taken twice for credit.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
Annually
ENG 165 Poetry Workshop
An intensive workshop devoted to writing poetry.
Students will also read selected poetry from
published writers. Class time will be spent
critiquing each other’s writing and discussing
traditional and experimental forms and approaches.
May be taken twice for credit.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
Annually
ENG 166 Fiction Workshop
An intensive workshop devoted to writing fiction.
Students will also read selected fiction by published
writers. Class time will be spent critiquing each other’s writing and discussing
traditional and experimental forms and approaches. May be taken twice for credit.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
Annually
ENG 167 Playwriting Workshop
An intensive workshop devoted to writing plays.
Students will also read selected plays from
published playwrights. Class time will be spent
critiquing each other’s writing and discussing
traditional and experimental forms and approaches.
May be taken twice for credit.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
On Occasion
ENG 168 Creative Non-Fiction Workshop
An intensive workshop devoted to writing literary
essays. Students will also be required to read
selected essays by published authors. Class time will be
spent critiquing each other’s writing and discussing
experimental forms and approaches.
Counts as creative writing course when taught by writing and rhetoric
faculty. Counts as writing and
rhetoric course when taught by writing and rhetoric
instructor. May be taken twice for credit.
Prerequisite: One of the following courses is
required: ENG 61, ENG 62, ENG 63, ENG 64,
HEG 21 or HEG 22.
Credits: 3
On Occasion
ENG 169 Non-Western or Post-Colonial Literature
This course focuses on works, in English and in translation, emerging from non-Western cultures, including the cultures of Asia, Africa and South America. Courses in this category span a geographical region and a period of time adequate to address the historical context of the literature. Themes vary from semester to semester and may include topics such as: Voices of the African Diaspora, Buddhism in Asian Literatures, or Postcolonial Literature and the Atlantic World. Counts as a literature course.
Prerequisite: One of the following courses is required: ENG 61, ENG 62, ENG 63, ENG 64, HEG 21 or HEG 22.
Credits: 3
On Occasion

ENG 170 Literary Periods and Movements
A concentrated study of a particular period or movement in literary history. The focus may be on a specific national literature (American or British) or on the theoretical underpinnings of a movement. Topics vary from semester to semester and may include Colonial Encounters, Romanticism, the Victorians, Realism and Naturalism, Modernism, or Post-Modernism. Counts as a literature course. May be taken twice for credit.
Prerequisite: One of the following courses is required: ENG 61, ENG 62, ENG 63, ENG 64, HEG 21 or HEG 22.
Credits: 3
On Occasion

ENG 171 Introduction to Classical Rhetoric
An introduction to the systematic study of persuasion through the key figures, texts, and concepts in the classical rhetoric traditions. Course activities emphasize applying classical rhetoric concepts to understand the persuasive strategies underlying argumentation involving contemporary issues. Counts as a writing and rhetoric course.
Prerequisite: One of the following courses is required: ENG 61, ENG 62, ENG 63, ENG 64, HEG 21 or HEG 22.
Credits: 3
On Occasion

ENG 172 Topics in Contemporary Rhetoric
An exploration of the roles of verbal, visual, and multimodal discourses in constituting contemporary society and culture. Course activities emphasize applying perspectives of contemporary rhetoric to analyze discourse in such fields as the mass media, advertising, politics, law, religion, art, literature, film, health, science, and technology. Counts as a writing and rhetoric course.
Prerequisite: One of the following courses is required: ENG 61, ENG 62, ENG 63, ENG 64, HEG 21 or HEG 22.
Credits: 3
On Occasion

ENG 173 Writing in the Community
A writing workshop in which students study the rhetoric and writing of community-based and other advocacy organizations. Topics vary from semester to semester and may include rhetorical analysis of community-based texts and strategies for the production of a range of writing, such as oral histories, grant proposals and pamphlets. Counts as a writing and rhetoric course.
Prerequisite: One of the following courses is required: ENG 61, ENG 62, ENG 63, ENG 64, HEG 21 or HEG 22.
Credits: 3
On Occasion

ENG 175 Writing for the Professions
A writing workshop in which students study rhetorical strategies for professional and technical writing. Topics vary from semester to semester and may include writing grant proposals, reports, news releases, editorials, brochures, technical manuals, Web sites and a range of public documents. Counts as a writing and rhetoric course.
Prerequisite: One of the following courses is required: ENG 61, ENG 62, ENG 63, ENG 64, HEG 21 or HEG 22.
Credits: 3
On Occasion

ENG 176 Writing in the Sciences
The focus of this course is scientific writing for the health professions. Students will learn and practice the conventions for writing scientific material for a variety of audiences. This writing workshop involves writing and research assignments, presentations, and peer review. Students will learn to prepare abstracts, conduct bibliographic database searches, review scholarly and popular scientific literature, and complete a scientific research paper. Additional genres include cover letters, personal statements, and poster presentations.
Prerequisite: One of the following courses is required: ENG 61, ENG 62, ENG 63, ENG 64, HEG 21 or HEG 22.
Credits: 3
Every Semester

ENG 177 Introduction to Literature
A study in a single semester.

ENG 178 Writing in the Thesaurus
This course is designed to give outstanding students an opportunity to do independent work in their major under the guidance of a member of the faculty. To be eligible, students must have upper-junior or senior status, a cumulative GPA of 3.00, a GPA of 3.25 in their major subject, the permission of the Chair of the Department, and the permission of the Dean. A total of six credits of Honors Study is the maximum allowed. The student may take only three credits of Honors Study in a single semester.

ENG 184 Modern Drama
A study of selected nineteenth- and twentieth-century playwrights, focusing on their investigation of contemporary issues and problems.
Prerequisite: One of the following courses is required: ENG 61, ENG 62, ENG 63, ENG 64, HEG 21 or HEG 22.
Credits: 3
On Occasion

ENG 190 Senior Thesis in Literature
English majors may elect to write a thesis, depending on their intellectual interests and future academic plans. The decision whether to write a thesis should be made in consultation with the student's English Department faculty mentor. Ideally, students seeking to write literary theses will prepare for the project by concentrating on literature in their major coursework (see prerequisites below). Prerequisites: 12 credits in upper division literature courses and permission of Department Chair. Offered as a tutorial.
Of the following prerequisites one course is required: ENG 61, ENG 62, ENG 63 or or ENG 64, or HEG 21 and 22. Permission from the Departmental Chair is also required.
Credits: 3
On Demand

ENG 191 Senior Thesis in Creative Writing
English majors may elect to write a thesis, depending on their intellectual interests and future academic plans. The decision whether to write a thesis should be made in consultation with the student's English Department faculty mentor. Ideally, students seeking to write creative writing theses will prepare for the project by concentrating on creative writing in their major coursework (see prerequisites below). Prerequisites: 12 credits in upper division creative writing courses and permission of Department Chair. Offered as a tutorial.
Of the following prerequisites one course is required: ENG 61, ENG 62, ENG 63 or or ENG 64, or HEG 21 and 22. Permission from the Departmental Chair is also required.
Credits: 3
On Occasion

ENG 192 Senior Thesis in Writing and Rhetoric
English majors may elect to write a thesis, depending on their intellectual interests and future academic plans. The decision whether to write a thesis should be made in consultation with the student's English Department faculty mentor. Students seeking to write theses in writing and rhetoric will prepare for the project by concentrating on writing and rhetoric in their major coursework (see prerequisites below). Prerequisites: 12 credits in upper division writing and rhetoric courses and permission of Department Chair. Offered as a tutorial.
Of the following prerequisites one course is required: ENG 61, ENG 62, ENG 63 and or ENG 64, or HEG 21 and 22. Permission from the Departmental Chair is also required.

ENG 193 Honors Study
Honors Study is designed to give outstanding students an opportunity to do independent work in their major under the guidance of a member of the faculty. To be eligible, students must have upper-junior or senior status, a cumulative GPA of 3.00, a GPA of 3.25 in their major subject, the permission of the Chair of the Department, and the

ENG 194 Honors Study
Honors Study is designed to give outstanding students an opportunity to do independent work in their major under the guidance of a member of the faculty. To be eligible, students must have upper-junior or senior status, a cumulative GPA of 3.00, a GPA of 3.25 in their major subject, the permission of the Chair of the Department, and the permission of the Dean. A total of six credits of Honors Study is the maximum allowed. The student may take only three credits of Honors Study in a single semester.
listen to crashing waves, or have the urge to throw experience of those who just mess about in boats, whalers, and merchantmen, and consider the sailors on war ships, pirate ships, slave ships, Patrick O'Brian. We will learn about the lives of Robert Louis Stevenson, Elizabeth Bishop, and Melville's perceptions) where social, psychological, adventure are all associated with the sea, and the literatures. Sublime beauty, mystery, terror, and intensity. Melville and Joseph Conrad are at the heart of the sea and seafaring has been essential in the histories of both Britain and the United States, and it is an essential theme in their writings. The experience of the sea and seafaring has been captured on the printed page.

The gothic as a literary genre emerged during the European Enlightenment and flourished in the U.S. from the early 19th century to the present. American literature is rife with ghosts, freaks and criminals, representing pasts, desires and fears that just wouldn't stay hidden in the attic, basement or closet. Drawing on theories of race, class, and gender, this course explores how Americans have wrestled with the legacies of slavery, criminality, unruly bodies, mass culture, and the perceived fragmentation of modern life.

Pre-requisite: One of the following courses is required: ENG 61, ENG 62, ENG 63, ENG 64, HEG 21 or HEG 22.

Credits: 3

On Occasion

ENG 203 Starting From Paumanok

This one-credit course is coordinated to take advantage of the annual lecture on American literature and culture, "Starting from Paumanok." Named after Walt Whitman's great poem, which invokes the Native American name for Long Island, the Paumanok lecture acknowledges Long Island University's geographic and cultural connection with one of Brooklyn's foremost literary figures. Students taking the course will read works by the visiting lecturer, attend the lecture, and complete a short writing assignment.

Pre-requisite: One of the following courses is required: ENG 61, ENG 62, ENG 63, ENG 64, HEG 21 or HEG 22.

Credits: 1

Cross-Listings: ENG 203, HUM 203

On Occasion

ENG 207 Existence in Black: Black Existentialism in American Literature and Philosophy

This course will examine Black existentialism, a modern American intellectual tradition that is perhaps best summed up in a single question posed by philosopher Lewis Gordon: What is to be done in a world of nearly a universal sense of superiority to, if not universal hatred of, black folk? Born from the soil of the actual historical experience of blacks, black existentialism stands at the intersection of three distinct philosophical and literary forces: first, the European tradition of existentialism; secondly, the work of Afro-Caribbean psychiatrist Frantz Fanon; finally black American social thought. Pre-requisites: ENG 16 and PHI 60, or HEG 21 or HEG 22 and HHP 21 or HHP 22

Credits: 3

Cross-Listings: HUM 180, PHI 180

On Occasion

ENG 238 British Modernism

This course will cover British Literature between 1880-1945. This period is known for its aesthetic innovations of interiority and fracturing of consciousness that reflect contemporary traumas and their aftermaths such as World Wars I and II and the impending decline of the British Empire. Authors such as Virginia Woolf, D.H. Lawrence, Ford Madox Ford, and T.S. Eliot exploded received conceptions of form and genre. The little magazines of the era transformed expectations of what could be captured on the printed page.

Pre-requisite: One of the following courses is required: ENG 61, ENG 62, ENG 63, ENG 64, HEG 21 or HEG 22.

Credits: 3

On Occasion

ENG 245 American Gothic

The gothic as a literary genre emerged during the European Enlightenment and flourished in the U.S. from the early 19th century to the present. American literature is rife with ghosts, freaks and criminals, representing pasts, desires and fears that just wouldn't stay hidden in the attic, basement or closet. Drawing on theories of race, class, and gender, this course explores how Americans have wrestled with the legacies of slavery, criminality, unruly bodies, mass culture, and the perceived fragmentation of modern life.

Pre-requisite: One of the following courses is required: ENG 61, ENG 62, ENG 63, ENG 64, HEG 21 or HEG 22.

Credits: 3

On Occasion

HUM 101 Introduction to Gender Studies

Taught with either a US or global focus, this interdisciplinary course explores how social, cultural, and psychological forces shape women's lives. Issues and topics such as women's health, reproductive rights, family, work equity, education, and gender violence will be investigated as students are introduced to the basic concept of feminist history, thought, and practice. Consistent attention will be paid to the differences among women based on race, national identity, class, ethnicity, sexuality, able-bodiedness, and age. Readings are supplemented by films and guest speakers. Pre-requisite: ENG 16 or HEG 21 or HEG 22.

Credits: 3

Every Fall

HUM 102 Theories of Feminism

An attempt to define what feminism is by exploring different analyses of the roots of women's subordination and the strategies that have been proposed for redressing it. Readings from Enlightenment/liberal, Marxist/socialist, existentialist, radical, women-of-color, and postmodern feminists, among others. Pre-requisite: PHI 60 (PHI 61 or 62) or HHP 21 or HHP 22

Credits: 3

Cross-Listings: HUM 102, PHI 102

Every Spring

HUM 103 Cross-Cultural Perspectives on Gender and Sexuality

An introduction to issues involved in the social and historical construction of gender and sexuality using cross-cultural and interdisciplinary approaches. Topics include the uses and limits of biology in explaining sex/gender differences, varieties of sexual experience, supernumerary genders, hetero-/bi-/homo-sexualities, gender politics and social change, and the intersection of gender, race and class. Pre-requisite: ENG 16 or HEG 21 or HEG 22.

Credits: 3

Every Fall
HUM 104 Gender and Knowledge
In this course students will explore theories about the relationship of women to knowledge and rationality, as well as feminist critiques of traditional views of knowledge. Students will develop a deeper understanding of the complexities of gender, and how traditional accounts of knowledge often contain hidden assumptions about gender.
Prerequisite: PHI 60 (PHI 61 or 62) or HHP 21 or HHP 22.
Credits: 3
Cross-Listings: HUM 180, PHI 180
On Occasion

HUM 117 Psychology of Women
An examination of the relevance of gender to the experiences of the individual and the overall functioning of society. Theories that come from all major areas of psychology - physiological, comparative, cognitive, developmental, personality - provide insight into the position of women in culture. The primary objective is to use historical, theoretical and comparative information to understand current gender relations.
PSY 101 and 103 (or 150), and 9 credits in 100+ level electives.
Credits: 3
Cross-Listings: HUM 217, PSY 217
Every Spring

HUM 158 Sex, Sexuality, and Gender Studies
This course examines the social construction of gender and sexuality throughout history and across cultures. From the historical shifts in the organization of marriage and reproduction, social mores about homosexuality and gender variance, and cross-cultural narratives of sex taboos and allowances, we examine theories and examples to understand gender and sexuality. Our coursework will blend historical analysis, current events, and guest speakers on topics such as the history of the gay and lesbian experience in New York City, the policing of domestic violence, gender roles and parenting, the movement for transgender rights, and public health and HIV/AIDS.
Prerequisite: ENG 16 or HEG 21 or HEG 22.
Credits: 3
On Occasion

HUM 180 Existence in Black: Black Existentialism in American Literature and Philosophy
This course will examine Black existentialism, a modern American intellectual tradition that is perhaps best summed up in a single question posed by philosopher Lewis Gordon: What is to be done in a world of nearly a universal sense of superiority to, if not universal hatred of, black folks? Born from the soil of the actual historical experience of blacks, black existentialism stands at the intersection of three distinct philosophical and literary forces: first, the European tradition of existentialism; secondly, the work of Afro-Caribbean psychiatrist Frantz Fanon; finally black American social thought.
Prerequisites: ENG 16 and PHI 60, or HEG 21 or HEG 22 and HHP 21 or HHP 22.
Credits: 3
Cross-Listings: HUM 180, PHI 180
On Occasion

HUM 189 Gender and Communication
This course examines the communication behaviors of women and men in same sex and gender contexts. It introduces students to current theories on gender role play and communication, and examines the function of communication in gender role development. Topics may include gender as politics, gender discrimination, gender stereotyping in language usage, and gender across culture, age and ethnicity.
Credits: 3
Cross-Listings: HUM 189, SPE 182
On Occasion

HUM 197 Independent Study
Independent Study is designed to give students the opportunity to do independent work under the supervision of a faculty member. To be eligible for independent study, students must propose a topic in the humanities to a faculty member in the Department of English, Philosophy, and Languages, and get the approval of the faculty member, Department Chair, and Dean. The student and faculty member will negotiate the readings and main project to be completed during the independent study. Usually, but not always, this project takes the form of a long research paper submitted at the end of the semester.
Credits: 1 to 3
On Demand

HUM 198 Independent Study
Independent Study is designed to give students the opportunity to do independent work under the supervision of a faculty member. To be eligible for independent study, students must propose a topic in the humanities to a faculty member in the Department of English, Philosophy, and Languages, and get the approval of the faculty member, Department Chair, and Dean. The student and faculty member will negotiate the readings and main project to be completed during the independent study. FRE 197 Independent Study
Independent work for students in French. Offered under the guidance of a Faculty Member. Permission of the Department and Dean required.
Credits: 3
On Demand

ITL 11 Introductory Italian I
Introductory speaking, reading and understanding Italian with emphasis on contemporary culture. Credits: 3 Every Fall

ITL 12 Introductory Italian II
Introductory speaking, reading and understanding Italian with emphasis on contemporary culture. Pre-requisite of ITL 11 is required. Credits: 3 Every Spring

ITL 31 Intermediate Italian I
Continued emphasis on speaking, reading and understanding Italian through modern readings. Pre-requisite of ITL 12 is required. Credits: 3 On Demand

ITL 32 Intermediate Italian II
Continued emphasis on speaking, reading and understanding Italian through modern readings. Prerequisite: Italian 31 or the equivalent. Credits: 3 On Demand

ITL 197 Independent Study
Independent work for students of Italian offered under the guidance of a Faculty Member. Department permission required. Credits: 3 On Demand

SPA 11 Introductory Spanish I
Introductory speaking, reading, writing and understanding Spanish. Credits: 3 Every Fall, Spring and Summer

SPA 12 Introductory Spanish II
Introductory speaking, reading, writing and understanding Spanish. Prerequisite: SPA 11, HLS 21 or its equivalent. The pre-requisite of SPA 11 or HLS 21 is required. Credits: 3 Every Fall, Spring and Summer

SPA 31 Intermediate Spanish
Continued emphasis on speaking, reading, writing and understanding Spanish. Prerequisite: Spanish 12. Pre-requisite of SPA 12 is required. Credits: 3 On Demand

SPA 32 Intermediate Spanish
Continued emphasis on speaking, reading, writing and understanding Spanish. Prerequisite: Spanish 12 or permission of the Department. Credits: 3 On Demand

SPA 100 Spanish Conversation
Intensive practice in the spoken language based on contemporary Spanish and Latin American texts and current publications. Placement exam required or permission of the Department. Credits: 3 On Demand

SPA 103 Advanced Conversation and Composition
Intensive oral and written work to develop ease and style in writing and speaking Spanish. Credits: 3 On Demand

SPA 105 The Hispanic World
A study of the ethnic, social, political and artistic development of the Spanish-speaking world. Conducted in Spanish. Credits: 3 On Demand

SPA 150 Advanced Spanish Grammar
A study of Spanish grammar with an emphasis on contemporary usage. Special attention will be given to the use of agreement, tense, mood, and aspect with an eye toward both proficiency and idiomaticity. Conducted in Spanish. Credits: 3

SPA 190 Special Seminar
Intensive study of an author, period, movement, genre and/or topic in Spanish-language literatures and cultures. Conducted in Spanish or English. Credits: 3 On Demand

SPA 197 Independent Study
Independent work for students in Spanish offered under the guidance of a Faculty member. Department permission required. Credits: 3 On Demand

PHI 60 Philosophical Explorations
PHI 60 is an integrated core course that introduces students to the basic concepts and methods of elementary logic and philosophical inquiry, while emphasizing the critical intellectual skills needed both in philosophical reflection and in coping with the many practical challenges of modern living. Students will learn to distinguish good from bad reasoning generally, and to engage in general problem solving, productive dialogue, and effective communication. They will also become acquainted with some major traditions of ethical thought and the central problems of contemporary moral philosophy, while sharing, examining, and refining their own ethical sensibilities and values. The course as a whole will aid them in becoming more informed, methodical, and incisive thinkers, better able to exercise their voices as active citizens in the public sphere. Credits: 3 Every Semester

PHI 102 Theories of Feminism
An attempt to define what feminism is by exploring different analyses of the roots of women’s subordination and the strategies that have been proposed for redressing it. Readings from Enlightenment/liberal, Marxist/socialist, existentialist, radical, women-of-color, and postmodern feminists, among others. Pre-requisite: PHI 60 (PHI 61 or 62) or HHP 21 or HHP 22 Credits: 3 Cross-Listings: HUM 102, PHI 102 Every Spring

PHI 103 Formal Logic
Formal symbolic logic studies the most basic principles of logical reasoning. This course introduces students to the uses of translating natural language arguments into a formal language for logical analysis. Students will learn to use truth tables, truth trees, and give logical proofs to assess the validity of arguments in both sentential and predicate logic. Pre-requisite: PHI 60 (PHI 61 or 62) or HHP 21 or HHP 22 Credits: 3 On Occasion

PHI 105 Health Care Ethics
This seminar explores ethical dimensions of the health care professions, including nursing, medicine, pharmacy, occupational therapy, physical therapy, and others. Students learn to identify problems in the health care system, to analyze these problems from multiple perspectives, and to propose ways of resolving the ethical conflicts encountered. This course emphasizes active learning, small group discussions, peer review and in-class writing. Pre-requisite: PHI 60 (PHI 61 or 62) or HHP 21 or HHP 22 Credits: 3 Every Fall and Spring

PHI 102 Theories of Feminism
An attempt to define what feminism is by exploring different analyses of the roots of women’s subordination and the strategies that have been proposed for redressing it. Readings from Enlightenment/liberal, Marxist/socialist, existentialist, radical, women-of-color, and postmodern feminists, among others. Pre-requisite: PHI 60 (PHI 61 or 62) or HHP 21 or HHP 22 Credits: 3 Cross-Listings: HUM 102, PHI 102 Every Spring
PHI 169 Philosophy of Religion
A course with these objectives: to consider the nature of religious belief and the concepts of truth and meaning in religion; to examine reasons for and against some crucial religious beliefs, such as the existence of God, immortality and freedom of the will; to understand key elements in the major world religions, such as ritual, symbol, myth, conversion, revelation and faith; and to encourage the student to become more thoughtful and articulate about his or her views regarding the meaning of religion for human life.
Pre-requisite: PHI 60 (PHI 61 or 62) or HHP 21 or HHP 22
Credits: 3
On Occasion

PHI 171 Philosophy of Law
An examination of the structures and functions of legal systems. Topics include the nature and limits of law, the distinction between positive and natural law, liberty, responsibility, rights, interests, justice, the social contract, property, sovereignty, and crime and punishment. Readings selected from traditional and contemporary sources, with special attention to the history of American civil rights legislation and judicial interpretation.
Pre-requisite: PHI 60 (PHI 61 or 62) or HHP 21 or HHP 22
Credits: 3
On Occasion

PHI 180 Existence in Blacks: Black Existentialism in American Literature and Philosophy
This course will examine Black existentialism, a modern American intellectual tradition that is perhaps best summed up in a single question posed by philosopher Lewis Gordon: What is to be done in a world of nearly a universal sense of superiority to, if not universal hatred of, black folk? Born from the soil of the actual historical experience of blacks, black existentialism stands at the intersection of three distinct philosophical and literary forces: first, the European tradition of existentialism; secondly, the work of Afro-Caribbean psychiatrist Frantz Fanon; finally black American social thought.
Pre-requisites: ENG 16 and PHI 60; or HEG 21 or HEG 22 and HHP 21 or HHP 22
Credits: 3
Cross-Listings: HUM 180, PHI 180
On Occasion

PHI 190 Special Seminar
An intensive study of one or two great philosophers or of a single complex issue in contemporary philosophy. Authors and problems selected vary from year to year. May be repeated in subsequent semesters if subject matter is different.
Pre-requisite: PHI 60 (PHI 61 or 62) or HHP 21 or HHP 22
Credits: 3
On Occasion

PHI 195 Honors Study
Honors Study is designed to give outstanding students an opportunity to do independent work in their major under the guidance of a member of the faculty. There are no regular class meetings. To be eligible, students must have upper-junior or senior status, a cumulative quality-point ratio of 3.00 and a 3.25 ratio in their major subject, and the permission of the Chair of the Department and the Dean. Three credits satisfy the WAC requirement for Philosophy majors. A total of six credits of Honors Study is allowed.
Pre-requisite: PHI 60 (PHI 61 or 62) or HHP 21 or HHP 22
Credits: 3
On Occasion

PHI 197 Independent Study
Independent Study offers students of philosophy an opportunity to do concentrated work on issues that interest them, according to a design of study worked out in collaboration with a member of the faculty. Meeting times and writing requirements are mutually agreed upon prior to the beginning of the semester. To be eligible, students must have a cumulative quality-point ratio of 3.00 and a quality-point ratio of 3.00 in their major subject, and the permission of the Chair of the Department and the Dean. A total of six credits of Independent Study is allowed.
Pre-requisite: PHI 60 (PHI 61 or 62) or HHP 21 or HHP 22
Credits: 3
On Demand

PHI 198 Independent Study

Credits: 3
On Demand

PHI 208 Gender and Knowledge
In this students will explore theories about the relationship of women to knowledge and rationality, as well as feminist critiques of traditional views of knowledge. Students will develop a deeper understanding of the complexities of gender, and how traditional accounts of knowledge often contain hidden assumptions about gender.
Pre-requisite: PHI 60 (PHI 61 or 62) or HHP 21 or HHP 22
Credits: 3
Cross-Listings: HUM 104, PHI 208

PHI 230 Environmental Philosophy
This course will examine the main issues in environmental philosophy, including the moral obligations that humans have to natural objects and future generations; environmental justice and racism, ecofeminism; and the future of the Earth with, or without, human inhabitants. Students will gain a deeper understanding of the environmental problems that face humanity, examine some proposed solutions to these problems, and develop their own approach to the environmental issues that face us.
Pre-requisite: PHI 60 (PHI 61 or 62) or HHP 21 or HHP 22
Credits: 3
Cross-Listings: HUM 230, PHI 230
On Occasion
DEPARTMENT OF SOCIAL SCIENCES

The Department of Social Sciences is where you come to learn about the World! Our most basic questions about ourselves revolve around issues that we explore in the Social Sciences. Who are we? What are the problems of our time and how can we solve them? What lessons can we learn from others, past and present, that will help us achieve these goals? Our department faculty, whose teaching and research interests span a wide range of economic, social, cultural, and historical topics and global perspectives in the disciplines of Economics, History, Political Science, Sociology, and Anthropology, can help you find the answers to those questions. Students from all programs will begin their study of these disciplines through the core curriculum. Through these classes, students will develop skills in critical thinking, logical reasoning, reading, writing, and oral communication as they learn the foundational knowledge in each of these disciplines. Following completion of the core, we welcome students into our advanced courses, which are designed to appeal to students from a variety of majors, including those in other Liberal Arts fields, as well as in Journalism, Business, Education, Social Work, and Health Professions.

The Bachelor of Arts in Political Science is the ideal opportunity for students looking to become more informed about the political reality of the world around them and enter the job market with the outstanding qualifications necessary to a career path in top tier corporate and public sector institutions. Politics is everything. It is our identity, our society, and our government. Politics is our constitution, our democracy, and our foreign policy. Politics is the White House, the Capitol Building, and the United Nations. But political decisions are not just about who we vote for; the choices we make as individuals – about our schools and our environment, about the movies we watch, and the music we listen to – are inherently political.

Students majoring in political science must complete a 30-credit course of study. The subfields of political science include American politics, political philosophy, comparative politics, international relations, and a host of related fields such as policy studies, political geography, political economy, popular culture and the media, and studies of particular countries or regions. There is also considerable room for student choice within the major, as the department offers ample opportunities for independent study, honors theses, and internships.

Located at the hub of global diplomacy and finance, Long Island University, Brooklyn, the most diverse campus in New York, represents and reflects a universe of history and perspectives from around the world. Under the guidance of experienced and award-winning faculty, the BA program empowers students to develop proficiency in research and writing, confidence in public speaking, debate, and presentation, cultural awareness, analytic proficiency, and networking skills and connections necessary for advanced academic or professional study and entering a highly competitive job market around the world.

Students eligible to graduate as political science majors with honors must be accepted into the Senior Honors Thesis Program.

B.A. Political Science

B.A. Political Science

[Program Code: 06958] [HEGIS: 2207.0]

Graduation Requirements

Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:

Orientation

FYS 01 First Year Seminar 1.00

Core Curriculum Requirements

(34-35 credits)

Humanities

English Composition - ENG 16 or 16 X 3.00
English Literature: ENG 61, 62, 63 or 64 3.00
Philosophy: PHI 60 (PHI 61 or 62) 3.00
Foreign Language 3.00

Social Sciences

History 3.00
Anthropology, Economics, History, 3.00
Political Science, Psychology, or Sociology
Anthropology, Economics Political 3.00
Science, Psychology, Sociology

Science and Mathematics

Mathematics: MTH 15 or 16 (3-4 credits) 4.00
Laboratory Science: BIO, CHM, PHY 4.00

Communication, Visual & Performing Arts

Oral Communications: SPE 3 3.00
Art, Dance, Journalism, Music, Theatre, Media Arts

Distribution Requirement

To satisfy this requirement, majors must complete two courses numbered 100 or above in one of the following subjects: Economics, History, Psychology, Sociology, Anthropology.

Major Requirements - 30 credits

The following one (1) course is required:

POL 11 Power and Politics 3.00

One (1) Course from the following:

POL 150 World Politics 3.00
POL 151 American Foreign Policy 3.00

The following one (1) course is required:

POL 185 Seminar: Political Inquiry 3.00

Additional Requirements:

• One (1) course required from American Institutions and Political Practices: POL 120-149
• One (1) course required from International Relations-Foreign Policy: POL 152-159
• One (1) course required from Foreign Political Systems Comparative Politics: POL 160-169
• Students are encouraged to take additional theory courses from POL 170-179
• One (1) course from the Social Science (SSC) 223, 224 Capstone Series is required in the Senior year.

Credit Requirements

Major Required Credits: 30
Major Distribution Credits: 6
Minimum Total Credits: 120
Minimum Liberal Arts and Sciences Credits: 90
Anthropology Courses

ANT 4 Physical Anthropology
The most recent findings of primate ethology are combined with fossil discoveries by physical anthropologists and archaeologists, and pertinent data from genetics, for a comprehensive survey of human origins in Africa and human prehistoric development from six million years ago to recent times.
Credits: 3
Every Fall and Spring

ANT 5 Cultural Anthropology
An introduction to the anthropological concept of culture as species-specific behavior: the invention and use of symbols; cultural processes such as innovation, diffusion, tradition and boundary-maintaining identity mechanisms; the use of the comparative method in examining cross-cultural commonalities and differences; the problem of cultural relativism. Case studies are drawn from a variety of cultures worldwide. Selected topics include subsistence strategies, language and communication, political systems, ethnicity and race, gender, marriage, family and kinship, religion and mass media.
Credits: 3
Every Semester

ANT 112 Race and Ethnicity
An exploration of the variety of meanings of race and ethnicity in the social, political and economic life of America and other societies. Special emphasis is placed on the experience of African-Americans, Latinos and immigrant groups of color, especially the effects of racism on personal, institutional and societal levels. The goal is to enhance students' awareness of the subtlety of stigmatizing and stereotyping attitudes in order to build a foundation for culturally sensitive social interaction and effective interventions.
Credits: 3
Cross-Listings: ANT 112, SOC 112
Every Semester

ANT 125 Globalization
The course takes a multicultural approach to analyzing the global impact of nationalism, capitalism, communism, technology, and world religions on societies and cultures of varying scale. The role played by developed countries and international financial institutions in promoting global interdependence between the underdeveloped and developed regions of the world is explored.
Credits: 3
Cross-Listings: ANT 125, SOC 125

ANT 128 Criminology
Different types of crime in modern society are examined including petty crime, white-collar crime, hate crime, organized crime, terrorism and a more recent one, cybercrime. The extent and social cost of crime, and the accuracy of crime statistics as well as crime prevention and punishment are also considered.
Credits: 3
Cross-Listings: ANT 128, SOC 128
Alternate Years

ANT 133 African Cultures and Societies
An analysis of African cultures and societies is examined emphasizing basic ways of life, including subsistence strategies, kinship and marriage, power, gender, religion and arts. The effects of European colonialism on African politics and belief systems and the emergence of independent nation-states are explored in detail.
Credits: 3
Cross-Listings: ANT 133, SOC 133

ANT 137 Ethnography
An in-depth look at the methods, theory and data involved in the production of ethnographic texts by cultural anthropologists. Along with cross-cultural comparison of societies with respect to economy, social organization, political structure, gender relations and similar topics, discussion focuses on the anthropologist's role as collector, translator and interpreter and the ways in which social scientific research reflects both the politics of its time and the ethics of doing fieldwork.
Credits: 3
On Occasion

ANT 141 Archaeology An Introduction
An analysis of the methods and techniques employed by archeologists to discover, reconstruct and date prehistoric and historic cultures and to link human life with its recent and remote past.
Credits: 3
On Occasion

ANT 181 Africa Forum Event
The annual Africa Forum is a one-day conference that brings special speakers and events to LIU Brooklyn. Its goal is to enable students to learn more about the African continent, its people and its role in world affairs. Information about event scheduling as well as assignments required by the associated one-credit course can be obtained in advance from the Department of Social Sciences. Topics change each year and the course may be retaken for credit.
Credits: 1
Cross-Listings: ANT 181, SOC 181
On Occasion

ANT 197 Independent Study
Students undertake rigorous, semester-long independent work under the supervision of a faculty member. The topic and specific assignments to be completed must be agreed upon in advance and approved by the Department Chair and the Dean.
Credits: 3
Cross-Listings: ANT 125, SOC 125
On Occasion

Sociology Courses

SOC 3 Introduction to Sociology
This course provides us with the language to understand what we experience in our lives and how we are connected to others. Students will be introduced to key concepts, theories and methods involved in what is called "the sociological imagination." They will put these ideas to work investigating contemporary social trends and current events. Important topics include: social change; social structures; culture; city life; economy and technology; deviance and social conflict; inequality; the social causes and consequences of human behavior in local and global terms.
Credits: 3
Every Fall and Spring

SOC 112 Race and Ethnicity
An exploration of the variety of meanings of race and ethnicity in the social, political and economic life of America and other societies. Special emphasis is placed on the experience of African-Americans, Latinos and immigrant groups of color, especially the effects of racism on personal, institutional and societal levels. The goal is to enhance students' awareness of the subtlety of stigmatizing and stereotyping attitudes in order to build a foundation for culturally sensitive social interaction and effective interventions.
Credits: 1 to 4
Cross-Listings: ANT 112, SOC 112
Alternate Years

SOC 125 Globalization
The course takes a multicultural approach to analyzing the global impact of nationalism, capitalism, communism, technology, and world religions on societies and cultures of varying scale. The role played by developed countries and international financial institutions in promoting global interdependence between the underdeveloped and developed regions of the world is explored.
Credits: 3
Cross-Listings: ANT 125, SOC 125
On Occasion

The pre-requisite of ANT 4, or ANT 5, or HSS 21, or HSS 22 is required.

The pre-requisite of ANT 4, or ANT 5, or HSS 21, or HSS 22 is required.

The pre-requisite of ANT 4, or ANT 5, or HSS 21, or HSS 22 is required.
And the emergence of independent nation-states are consequences of colonialism on African politics and belief systems. The effects of European contact are examined emphasizing basic ways of life, including topics such as gender, religion and arts. The analysis of African cultures and societies is designed to help students understand the interplay of social, economic and political forces in shaping contemporary African societies.

**SOC 127 Deviant Behavior**  
Answers the following questions: How do certain behaviors come to be defined as deviant? What are the political implications of defining deviance? What are the social processes by which individuals come to engage in deviant acts? How are social control mechanisms used to promote conformity? Topics may include sexual behavior, drug use, alcoholism, suicide and mental illness.

**Credits: 3**  
Cross-Listings: ANT 127, SOC 127  
Alternate Years

**SOC 127 Deviant Behavior**  
Answers the following questions: How do certain behaviors come to be defined as deviant? What are the political implications of defining deviance? What are the social processes by which individuals come to engage in deviant acts? How are social control mechanisms used to promote conformity? Topics may include sexual behavior, drug use, alcoholism, suicide and mental illness.

**Credits: 3**  
Cross-Listings: ANT 127, SOC 127  
Alternate Years

**SOC 128 Criminology**  
Different types of crime in modern society are examined including petty crime, white-collar crime, hate crime, organized crime, terrorism and a more recent one, cybercrime. The extent and social cost of crime, and the accuracy of crime statistics as well as crime prevention and punishment are also considered.

**Credits: 3**  
Cross-Listings: ANT 128, SOC 128  
Alternate Years

**SOC 129 Crime and Social Justice**  
In this course students will study the connections between the processes of the criminal justice system and the broader structure of society. By employing the ‘learning through cases’ method, students become involved in the cases that raise critical questions rather than provide set answers. As students become engaged in the dramatic narrative, the critical-thinking questions allow students to view the administration of justice through various lenses and to raise significant questions concerning social justice in the broad sense and about events connected to their own lives.

**Credits: 3**  
Cross-Listings: ANT 129, SOC 129  
Alternate Years

**SOC 133 African Cultures and Societies**  
An analysis of African cultures and societies is examined emphasizing basic ways of life, including subsistence strategies, kinship and marriage, power, gender, religion and arts. The effects of European colonialism on African politics and belief systems and the emergence of independent nation-states are explored in detail.

**Credits: 3**

**Economics Courses**

**ECO 1 Introduction to Economics**  
After an elementary introduction to the role of markets in allocating economic resources, this course focuses on the factors that determine aggregate income, employment and price level from a macroeconomic perspective. It examines the interaction of markets for aggregate output, labor and money, addressing the role of the government in short-run stabilization and the factors that determine long-run economic growth.

**Credits: 3**  
Every Fall and Spring

**ECO 2 Introduction to Economics**  
This course provides an introduction to microeconomics, focusing on the role of markets in allocating economic resources. In some idealized perfectly competitive markets, the behavior of firms and consumers, which can be represented in terms of supply and demand curves, leads to “socially efficient” equilibrium outcomes. However, market outcomes may not necessarily be efficient in many realistic economic environments, justifying a role for the government in promoting economic efficiency. The course also examines the government’s role in promoting “equity” through taxation, stressing the possibility of a trade-off between efficiency and equity.

**Credits: 3**  
Every Fall and Spring

**ECO 101 Microeconomic Analysis**  
This course provides a detailed analysis of rational consumer and firm behavior, examining the relationship between such behavior and the efficient allocation of resources in the economy under different market structures.  
The pre-requisite of ECO 2 is required.

**Credits: 3**  
On Occasion

**ECO 102 Macroeconomic Analysis**  
This course examines the factors that influence the level of national income and the unemployment rate, focusing on the role of aggregate real and financial markets in determining the overall performance of the economy. The course also examines the government’s role in mitigating the effect of supply and demand shocks, and in promoting long-run economic growth.  
The pre-requisite of ECO 1 is required.

**Credits: 3**  
On Occasion

**ECO 105 Money and Banking**  
This course provides a systematic study of the monetary and financial institutions of a modern economy. Emphasis is placed on how various monetary factors affect real economic activity, and on the government’s role in conducting monetary policy and regulating the financial system.  
The pre-requisite of ECO 1 or permission of Instructor is required.

**Credits: 3**  
On Occasion

**ECO 114 Game Theory and Economic Applications**  
This course provides an introduction to game theory, exploring the analysis of static and dynamic interactions under a variety of informational assumptions. The course will focus on selected applications of game theory to economics, including topics in Bargaining and Bidding Procedures, Industrial Organization and Regulation, and the Internal Organization of the Firm, as well as some problems that arise in Law,
Political Science, Military Strategy and Parlor Games.
Credits: 3
On Occasion

**ECO 115 Industrial Economics**
This course provides an introduction to Industrial Organization, a field that focuses on how firms, interacting through markets, attempt to exploit opportunities for profit. The standard models of perfect and imperfect competition are examined, emphasizing the strategic behavior of the firms. Topics include pricing models and other strategic aspects of business practice, including entry deterrence, patent races and collusion. Pre-Requisite of ECO 2 or Permission of Instructor is required. Credits: 3
On Occasion

**ECO 116 Government Regulation of Business**
This course provides an introduction to industrial regulation, a field that focuses on how government policy can improve market performance. The role of economic and social regulation is examined, focusing on environments that exhibit market failure due to economies of scale, externalities and imperfect information. Topics include multi-product monopoly pricing and price discrimination, incentive regulation in presence of informational asymmetries and imperfect commitment, regulatory reform and deregulation, environmental regulation and regulation of the financial sector. Pre-Requisite of ECO 2 or Permission of Instructor is required. Credits: 3
On Occasion

**ECO 120 Financial Economics**
This course provides an introduction to modern financial economics, relying on foundational decision theoretic and equilibrium methods to examine some of the central themes in modern finance, including inter-temporal investment decision making under uncertainty, the capital asset pricing model, arbitrage pricing theory, the valuation of bonds, equities, and derivative securities, and the firm’s financial structure. The course attempts to bridge the gap between the more descriptive-institutional focus of introductory business-finance courses and the more technical focus of econophysics courses. Pre-Requisite of ECO 2 or Permission of Instructor is required. Credits: 3
On Occasion

**ECO 125 International Economics**
This course provides an introduction to international trade, an area of economics that focuses on the causes and consequences of the presence of trade among nations. It examines such fundamental topics as the concept of comparative advantage in the context of the Ricardian model, the connection between factor mobility and income distribution, the role of trade policy and protectionism in industrialized and developing economies, the presence of imperfect competition in international markets, and the globalization debate (same as International Business 125). Pre-Requisite of ECO 2 or Permission of Instructor is required. Credits: 3
Cross-Listings: ECO 125, IBU 125
On Occasion

**ECO 126 International Finance**
This course provides an introduction to open-economy macroeconomics, focusing on the flow of capital across international financial markets and the effects of exchange rate and monetary policy on those flows. It surveys a variety of topics, including purchasing power parity and exchange rate determination in foreign exchange markets, the Mundell-Fleming model of output and exchange rate determination under fixed and flexible exchange rates, speculative attacks and the causes and consequences of international financial crises. The course will also discuss various recent policy debates, the role of global imbalances in the recent financial crisis, and several recent proposals to reform the international financial system. The pre-requisite of ECO 1 is required or Permission of Instructor is required. Credits: 3
On Occasion

**ECO 127 Industrial Organization**
This course provides an introduction to open-economy macroeconomics, focusing on the flow of capital across international financial markets and the effects of exchange rate and monetary policy on those flows. It surveys a variety of topics, including purchasing power parity and exchange rate determination in foreign exchange markets, the Mundell-Fleming model of output and exchange rate determination under fixed and flexible exchange rates, speculative attacks and the causes and consequences of international financial crises. The course will also discuss various recent policy debates, the role of global imbalances in the recent financial crisis, and several recent proposals to reform the international financial system. The pre-requisite of ECO 1 is required or Permission of Instructor is required. Credits: 3
On Occasion

**ECO 128 Public Finance and Economic Policy**
This course provides an introduction to the microeconomic analysis of the public sector. It examines the government’s role in a market economy, focusing on the regulation of externalities, the provision of public goods and social insurance, and the redistribution of income. In particular, it examines the major expenditure programs, including Social Security, Medicare, Education and Defense, as well as the generation of government revenues through taxation and deficit financing, addressing efficiency and equity considerations. Pre-Requisite of ECO 2 or Permission of Instructor is required. Credits: 3
On Occasion

**ECO 170 Current International Economic Problems**
This course examines some of the central international economic problems, including the consequences of globalization, instability in the Eurozone, fast growth in China and other emerging economies, poverty and the challenges of economic development, the management of climate change, and the effects of technological innovation on the international division of labor. Credits: 3
On Occasion

**ECO 197 Independent Study**
Independent reading and research in the chosen field of economics. Training is provided in techniques of critical analysis and independent research. Permission of the Chair and the Dean. Credits: 3
On Demand

**History Courses**

**HIS 1 Perspectives in Premodern World History**
A thematic approach to topics in World History that examines content from the history of civilization in at least two geographical regions (Africa, the Americas, Asia, the Middle East or Europe) up to the Modern Era (c. 18th century). All courses are aimed at discovering the nature of historical inquiry, including both an examination of historical facts, and also the importance of perspective, content, and causality in the creation of a historical argument. Topics will be chosen by the faculty member. Credits: 3
All Sessions

**HIS 2 Perspectives in Modern World History**
A thematic approach to topics in World History that examines content from the history of civilization in at least two geographical regions (Africa, the Americas, Asia, the Middle East or Europe) up to 1500. All courses are aimed at discovering the nature of historical inquiry, including both an examination of historical facts, and also the importance of perspective, content, and causality in the creation of a historical argument. Topics will be chosen by the faculty member. Credits: 3
All Sessions

**HIS 100 American Civilization I**
A survey of the growth and development of the United States from the establishment of the British colonies in North America through the Civil War. This course will examine the evolution of American political, economic, and social institutions and values, as they were created, challenged, and changed throughout this period of history and will analyze the varying perspectives of people of different races, classes, religions, genders, and regions. This is a designated Writing Across the Curriculum (WAC) course, and all students will complete a research paper. Pre-requisites - One of the following: HIS 1, HIS 2, HHI 21 or HHI 22
Credits: 3
On Occasion

**HIS 104 Topics in Nineteenth Century American History**
An examination of a particular topic focusing on some aspect of political, social, cultural, and economic history of the United States in the nineteenth century. Specific topics will be
determined by the faculty member.  
Pre requisites - One of the following: HIS 1, HIS 2, HHI 21 or HHI 22  
Credits: 3  
On Occasion

**HIS 108 American Civilization II**
A survey of the history of the United States from the end of the Civil War to the present. This course will examine the evolution of American political, economic, and social institutions and values, as they were created, challenged, and changed throughout this period of history and will analyze the varying perspectives of people of different races, classes, religions, genders and regions. This is a designated Writing Across the Curriculum (WAC) course, and all students will complete a research paper.  
Pre requisites - One of the following: HIS 1, HIS 2, HHI 21 or HHI 22  
Credits: 3  
On Occasion

**HIS 116 African-American History**
This survey course examines the complex and varied histories of Africans and their descendants in the United States from the emergence of the transatlantic slave trade to the present. Although the course focuses primarily on the African experience in the United States, it also provides a hemispheric perspective so as to demonstrate the ways in which the lives of displaced Africans throughout the Americas have been bound together by a common past.  
Pre requisites - One of the following: HIS 1, HIS 2, HHI 21 or HHI 22  
Credits: 3  
On Occasion

**HIS 120 The Middle Ages**
A survey of the History of Europe from the last centuries of the Roman Empire through the fourteenth century. The course covers the origin and development of attitudes and institutions characteristic of the Medieval period, including feudalism and the emergence of centralized government, the organization and spiritual mission of the church, commerce and the guild system, the place of women and children in society, and art and architecture.  
Pre requisites - One of the following: HIS 1, HIS 2, HHI 21 or HHI 22  
Credits: 3  
On Occasion

**HIS 144 East Asia: The Modern Period**
Traces the history of China, Japan and Korea from the period of extended Western contact from 1650 to the present. Includes such topics as the rise of nationalism and communism, the entry of East Asia into the family of nations, and the transformation of the traditional social structures that has accompanied the process of modernization.  
Pre requisites - One of the following: HIS 1, HIS 2, HHI 21 or HHI 22  
Credits: 3  
On Occasion

**HIS 157 History of Latin America**
Through an emphasis on the major forces that shaped and continue to shape the region of Latin America, this survey course will present historical information that will help you to understand better the issues surrounding contemporary Latin America. Among the themes covered will be the affect of implanted Iberian institutions, the challenges to those institutions, the notion of modernization, the contradictions between economic growth and development, and the struggles for and against change.  
Pre requisites - One of the following: HIS 1, HIS 2, HHI 21 or HHI 22  
Credits: 3  
On Occasion

**HIS 158 American Foreign Relations Since 1789**
A survey of U.S. diplomatic history from 1789 to the present, covering the rise of the United States from thirteen Atlantic states into a transcontinental nation and global superpower. In addition to the traditional topics such as national security and economic interests, the course also examines the ways that the Americans engaged with the rest of the world, and how others interacted with the Americans from the Revolutionary War to the present.  
Pre requisites - One of the following: HIS 1, HIS 2, HHI 21 or HHI 22  
Credits: 3  
On Occasion

**HIS 164 Special Topics in Women's History**
The course will focus on a topic related to the roles and actions of women or to an issue related to the treatment of women in history. The specific topics, including both historical and geographic scope, will be chosen by the faculty member. May be repeated if subject matter differs.  
Pre requisites - One of the following: HIS 1, HIS 2, HHI 21 or HHI 22  
Credits: 3  
On Occasion

**HIS 175 The Social History of Sports: A Search for Heroes**
A study of the way in which Americans and others have played over time; an analysis of how athletes have mirrored the values and reflected the values and fantasies of their times.  
Pre requisites - One of the following: HIS 1, HIS 2, HHI 21 or HHI 22  
Credits: 3  
On Occasion

**HIS 190 Special Topics in World History**
Reading and group discussion of a special topic in World History. Emphasis on new scholarly fields and interpretations. May be repeated for credit if subject matter differs.  
Pre requisites - One of the following: HIS 1, HIS 2, HHI 21 or HHI 22  
Credits: 3  
On Occasion

**HSS 223 Capstone Seminar in the Social Sciences**
The Capstone Seminar in the Social Sciences (either SSS 223 or SSS 224) is required of all Social Science, Political Science, and Psychology majors in their junior or senior year. The seminar is an exploration and analysis from an interdisciplinary perspective of select critical issues, problems and frontiers in the social sciences that allows students to apply skills and analytical tools developed throughout their years of involvement in social science disciplines. The seminar promotes experimentation and provides a culminating academic focus for majors in all social science disciplines. Course topics and themes vary from year to year and course may be retaken for credit as long as the content differs.  
Allow Junior and Senior Level enrollment only  
Credits: 3  
Every Fall and Spring

**HSS 224 Capstone Seminar in Social Sciences**
The Capstone Seminar in the Social Sciences (either SSS 223 or SSS 224) is required of all Social Science, Political Science, and Psychology majors in their junior or senior year. The seminar is an exploration and analysis from an interdisciplinary perspective of select critical issues, problems and frontiers in the social sciences that allows students to apply skills and analytical tools developed throughout their years of involvement in social science disciplines. The seminar promotes experimentation and provides a culminating academic focus for majors in social science disciplines. Course topics and themes vary from year to year and the course may be retaken for credit as long as the content differs.  
Credits: 3  
Every Fall and Spring

**SSC 231 Honors Advanced Elective Research Seminar**
This is an interdisciplinary seminar that engages students in the study of current research in natural sciences, life sciences, social sciences, economics, business and art. Topics are proposed by faculty from all schools, departments and programs across the university and from members of the professional world (topics advertised in the class schedule each semester). Honors Advanced
Research Elective Seminars are the capstone experience of the Honors College and integrate experiential learning, high-impact practices and non-traditional teaching methods, including visits to NYC business, government offices, NGOs, and museums. Students acquire skills to conduct high-level research in multiple disciplines, and are trained to present their results professionally as preparation for their careers. Student must be part of the Brooklyn Honors Student Group in order to register for the course.

Student Credits: 3
Every Semester

SSC 234 Non-Western or Post-Colonial Literature
This course focuses on works, in English and in translation, emerging from non-Western cultures, including the cultures of Asia, Africa and South America. Courses in this category span a geographical region and a period of time adequate to address the historical context of the literature. Themes vary from semester to semester and may include topics such as: Voices of the African Diaspora, Buddhism in Asian Literatures, or Postcolonial Literature and the Atlantic World. Counts as a literature course.
Prerequisite: One of the following courses is required: ENG 61, ENG 62, ENG 63, ENG 64, HEG 21 or HEG 22.
Credits: 3
On Occasion

Political Science Courses

POL 11 Power and Politics
An introduction to the world of politics and power, from the workplace to the United States Supreme Court. Topics include the family, the community, the evolution of the nation-state, forms of political organization, state and federal governments, the Constitution, Congress, the presidency, and other political institutions and formations.
Credits: 3
Every Fall and Spring

POL 12 America and the World
This class explores the origins and evolution of American politics and government and how America interacts with the wider world. Students will investigate the inner workings of the American constitutional order and the political culture in which it is based. Issues and institutions under consideration will include presidents and parties, identity and representation, civil liberties and civil rights. With an enhanced understanding of America, students will then focus on the challenges of contemporary international power politics, from globalization to climate change, and the role the United Nations plays in mediating disputes and advancing collective action.
Credits: 3
Every Fall and Spring

POL 13 International Relations
This course serves as an introduction to what drives the political world and to political science as a field of study. The course introduces students to the systematic study of politics and to crucial concepts in the discipline including: collective action, democracy, government, justice, power and the state. Course material consists of philosophical and theoretical texts, case studies, political analyses and documentaries. Upon completion, students will better understand the practice of politics at the local, national and international level.
Credits: 3
Every Fall and Spring

POL 120 Power in America
What is the nature of power in American society? How is it distributed? How is it used? An examination of the different theories of social, economic and political power; the interrelationships among those types of power; the role of race and culture; and the effective use of power.
Pre requisite - One of the following: POL 11, POL 12, Pol 13, HSS 21, HSS 22.
Credits: 3
On Occasion

POL 123 Political Parties and Political Behavior
A study of the role of political parties in American government, including problems with respect to organization, finance, campaigns, issues and candidates; their relationship to the citizen-voter; and trends in recent studies on political leadership, election research and political behavior.
Pre requisite - One of the following: POL 11, POL 12, Pol 13, HSS 21, HSS 22.
Credits: 3
Alternate Years

POL 124 The Media and American Politics
An evaluation of the role of the media in American political life. Emphasis is on the effect of the media on leading domestic and foreign policy issues. Media personalities who helped shape the national conscience are also examined.
Pre requisite - One of the following: POL 11, POL 12, Pol 13, HSS 21, HSS 22.
Credits: 3
Alternate Years

POL 125 The American Presidency
A study of executive powers and decision making; leadership and the electoral process; and the relationship of the President to pressure groups, political parties and the states.
Pre requisite - One of the following: POL 11, POL 12, Pol 13, HSS 21, HSS 22.
Credits: 3
Alternate Years

POL 135 The United Nations Theory
This course will study the role and influence of the United Nations (UN) in a global context, evaluating its record in diplomacy, disaster relief, human rights and democracy promotion, and international peacekeeping. Analysis will focus on the institutions of the UN, from operating systems to funding. Students will undertake a field trip to UN headquarters during the semester to meet with UN executives and personnel.
Pre requisite - One of the following: POL 11, POL 12, Pol 13, HSS 21, HSS 22.
Credits: 3
Cross-Listings: IR 135, POL 135
Alternate Spring

POL 136 The United Nations Participation
This course will focus on training students for competition in a National Model United Nations (NMUN) conference. Training will incorporate immersion in role-playing, research and writing of position papers, debate preparation, and familiarization with NMUN rules and procedures. At the end of the semester, students will participate as a team in a NMUN conference at an overseas venue. Students must have in their possession a valid passport for international travel.
Pre requisite - One of the following: POL 11, POL 12, Pol 13, HSS 21, HSS 22.
Credits: 3
Cross-Listings: IR 136, POL 136
Every Fall

POL 137 The Politics of Popular Culture
An examination of the political content and implications of selected areas of contemporary popular culture.
Pre requisite - One of the following: POL 11, POL 12, Pol 13, HSS 21, HSS 22.
Credits: 3
On Occasion

POL 141 Future Politics - Utopia or Dystopia?
Drawing on a range of approaches, from historical analogy to scientific analysis and speculative fiction, this course will assess the critical debates that will shape the politics of the future. Issues under consideration will include environmental factors, from resource depletion to global pandemic; challenges to the sovereignty of the state by non-state actors, from corporate to theocratic alternatives; the prospects for human rights in an increasingly post-human future, and the trajectory of exploring and colonization beyond Earth.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>POL 150</td>
<td>International Relations</td>
<td>Introduction to the systematic study of international relations. The nature of state behavior in the international system - its parameters, major actors, forces and patterns of conflict and cooperation - are reviewed. The major theories of international relations are examined. Cycles of hegemonic leadership and the origins, scope and future direction of the international system are considered. Pre-requisites - One of the following: POL 11, POL 12, POL 13, HSS 21 or HSS 22. Credits: 3 Alternate Years</td>
</tr>
<tr>
<td>POL 152</td>
<td>Conflict Resolution</td>
<td>An examination of the theories and methods of conflict resolution in a variety of settings, such as labor relations, criminal justice, community and the international arena. Pre-requisite - One of the following: POL 11, POL 12, POL 13, HSS 21, HSS 22. Credits: 3 Alternate Years</td>
</tr>
<tr>
<td>POL 154</td>
<td>Human Rights in International Politics</td>
<td>A study of the role of human rights in international politics and the impact of human rights considerations on foreign and domestic policies of states; the study of conceptual and historical issues, including the struggle between human rights claims and state sovereignty, the Cold War and the politicization of human rights, the significance of grassroots human rights movements in the world; and the role of the United Nations and non-governmental organizations. An analysis is made of case studies of human rights abuses and reactions of the international community. Pre-requisite - One of the following: POL 11, POL 12, POL 13, HSS 21, HSS 22. Credits: 3 On Occasion</td>
</tr>
<tr>
<td>POL 155</td>
<td>The Politics of Globalization</td>
<td>This course studies the phenomenon of both globalization and the Age of Globalization that has characterized geopolitics since the early 1990s. While serving as a class for contemporary world politics and challenges, it examines global affairs through economics and technology, consumerism, popular culture, and democracy and good governance. This class will also examine the contemporary state of political affairs since the 2008 economic recession and the rise of national populist political movements to power throughout the developed and developing world. Credits: 3 On Occasion</td>
</tr>
<tr>
<td>POL 159</td>
<td>Geopolitics</td>
<td>This course will introduce the basic principles behind the concept of geopolitics in order to help students gain a better understanding of the environmental and geological forces that have shaped the political, economic and social trajectories of human societies throughout recorded history. It will examine how our ongoing interaction with these forces continues to shape our world today and ask whether modern science and technology has altered this balance or if the same patterns are simply repeating themselves on a larger scale. Pre-requisite - One of the following: POL 11, POL 12, POL 13, HSS 21, HSS 22. Credits: 3 Alternate Years</td>
</tr>
<tr>
<td>POL 161</td>
<td>Concepts and Theories in Comparative Politics</td>
<td>A review of the basic theoretical frameworks, concepts, approaches and methodologies in comparative politics. The study of major authors, key texts and theories, including modernization, political culture, corporatism, dependency, bureaucratic authoritarianism, rational choice, democratic transition theory and others is conducted. Comparative analysis is made of distinctive political systems and their development. Pre-requisite - One of the following: POL 11, POL 12, POL 13, HSS 21, HSS 22. Credits: 3 On Occasion</td>
</tr>
<tr>
<td>POL 160</td>
<td>The Politics of Development</td>
<td>A study of the process of modernization and development, with examples from Latin America, Africa and Asia. The relationship between politics and economics, socialism and capitalism, and peasant, intellectual and bureaucracy are examined. Pre-requisite - One of the following: POL 11, POL 12, POL 13, HSS 21, HSS 22. Credits: 3 On Occasion</td>
</tr>
<tr>
<td>POL 162</td>
<td>Islam and Democracy</td>
<td>An examination of the relationship between different schools of Islam and political democracy. Pre-requisite - One of the following: POL 11, POL 12, POL 13, HSS 21, HSS 22. Credits: 3 On Occasion</td>
</tr>
<tr>
<td>POL 175</td>
<td>Comparative Democratic Theory</td>
<td>A contextual and theoretical study of the development and maturation of modern democratic theory. Focus is on the development and critique of rights-based democratic theory and the problems associated with theories of justice, communitarianism, feminism and others. Pre-requisite - One of the following: POL 11, POL 12, POL 13, HSS 21, HSS 22. Credits: 3 On Occasion</td>
</tr>
<tr>
<td>POL 178</td>
<td>Politics and Culture</td>
<td>This course examines how political activity and behavior are shaped by culturally specific meanings and social codes, and discusses how the various aspects of culture affect social relations and political decision-making. Credits: 3 On Occasion</td>
</tr>
</tbody>
</table>
POL 185 Seminar: Political Inquiry
An analysis of the different ways political scientists ask questions and study politics. Emphasis is on understanding the major theoretical frameworks in the study of politics and the application of those theories to an important research problem in politics. Open to juniors and seniors only. Required for all Political Science majors. This is a designated Writing Across the Curriculum (WAC) course, and all students will complete a research paper.
Pre requisite - One of the following: POL 11, POL 12, Pol 13, HSS 21, HSS 22.
Credits: 3
Alternate Spring

POL 190 Senior Honors Thesis
A year long program of work with a faculty mentor in shaping a thesis idea, developing a methodology, and writing a research thesis. To be eligible, students must be seniors with a major grade point average of 3.25 or better and an overall cumulative grade point average of 3.00 or better and have approval of the Political Science Department. Required for students wishing to graduate with honors as a Political Science major. Political Science 190 and 191 must be completed.
Pre requisite - One of the following: POL 11, POL 12, Pol 13, HSS 21, HSS 22.
Credits: 3
On Demand

POL 195 Honors Study
Honors study is designed to give outstanding students an opportunity to do independent work in their major under the guidance of a member of the faculty. There are no regular class meetings. To be eligible, students must have upper-junior or senior status, a cumulative quality-point ratio of 3.00 and a 3.25 ratio in their major subject, and the permission of the Chair of the Department and the Dean. A total of six credits of Honors Study is the maximum allowed.
Credits: 3
On Demand

POL 197 Independent Study/Internship
Research associated with working assignments closely related to the student's specific courses. Students may develop internships. Requires approval of the Departmental Chair and the Dean.
Pre requisite - One of the following: POL 11, POL 12, Pol 13, HSS 21, HSS 22.
Credits: 3
Every Fall and Spring

POL 198 Independent Study/Internship
Research associated with working assignments closely related to the student's specific courses. Students may develop internships. Requires approval of the Departmental Chair and the Dean.
Pre requisite - One of the following: POL 11, POL 12, Pol 13, HSS 21, HSS 22.
Credits: 3

Every Fall and Spring

POL 201 International Organizations
An examination of the United Nations and associated international institutions.
Credits: 3

Alternate Years

POL 207 The United Nations Experience
The United Nations Experience combines the theory and practice of international relations. Students learn theory through an immersion in the history of the United Nations, with a focus on diplomacy, NGOs, and international relations, broadly speaking. Key to this course, however, is a practical training element that teaches students how to prepare for and compete in National Model UN competitions. Students will train for and compete in NMUN competition against each other.
Credits: 3
On Occasion
**Cooperative Education Courses**

**COOP 1 Career Readiness**
The main objective of the Coop 1: Career Readiness course is to empower students to begin to understand the career development process in order to successfully plan, prepare, and manage their careers. In this course, students learn and practice the various elements needed to build a strong foundation to obtain and succeed in an internship or job in any profession. The curriculum includes self-assessment, career research, internship and job-search strategies, resume writing, interview skills, networking and LinkedIn, 21st-century workplace competencies, and professionalism. This class can be used to satisfy internship credit requirements. Open to upper-Freshmen through upper-Senior.
The prerequisites of FYS 1 and ENG 16 or the equivalents are required, or permission of the Director.
*Credits: 1*
*Every Fall and Spring*

**COOP 99 Field Placement**
Participation of students in internships or cooperative education positions related to their academic major or career goals enables integrated classroom learning with practical hands-on work experience. Enrolled students receive a notation on their transcript. May be repeated in subsequent semesters. Pass/Fail only. Non-credit.
*Prerequisite: COOP 1 or permission of the Director, Employer Relations.*
*Credits: 0*
*Every Fall, Spring and Summer*

**First Year Seminar Courses**

**FYS 1 First Year Seminar**
The First Year Seminar is designed to help first-time freshmen students and transfer students with fewer than 30 credits transition into successful members of the LIU Community. This includes developing critical thinking, reading and reflective writing skills through the incorporation of the Common Read and the creation of a digital portfolio. The course is also meant to refine students’ approach to college learning and instill respect and appreciation for the value of a liberal arts and science education.

**FYS 1H First Year Seminar**
FYS 1H is a specially designated First Year Seminar class for students in the Honors College. This one credit class is interactive and discussion-oriented, and designed to exercise key academic skills and provide students with knowledge of campus resources that help them to thrive in college. Students meet once a week to engage in workshops, field trips, and collaborative projects. Emphasis is placed on discussion of the Common Read, the creation of an e-portfolio, and facility with library research. Pass/Fail only.
*Credits: 1*
*Every Fall*

**FYS 1S First Year Seminar**
FYS 1S is a specially designated FYS 1 class designed for NCAA Division 1 student-athletes. Meeting once a week for 50 minutes, students engage in lively workshops that help develop the academic, professional and life skills necessary for success in their first year at LIU Brooklyn. Extending beyond the classroom setting, FYS 1 instructors serve as personal guides and mentors for students throughout their entire first year of college. Pass/Fail only.
*Credits: 1*
*Every Fall*

**FYS 1T First Year Seminar**
FYS 1T is a specially designated FYS 1 class designed for transfer students with fewer than 30 credits. This is an interactive and informative course that is designed to provide students with the foundation necessary to thrive in their academic ventures. Meeting once a week for 50 minutes, students engage in lively workshops that help develop the academic, professional and life skills necessary for success in their first year at LIU Brooklyn. Extending beyond the classroom setting, FYS 1 instructors serve as personal guides and mentors for students throughout their entire first year of college. Required for transfer students with fewer than 30 credits. Pass/Fail only.

GEORGE POLK SCHOOL OF COMMUNICATIONS

Named for CBS correspondent George Polk, the George Polk School of Communications builds on the extraordinary history and unparalleled reputation of the prestigious George Polk Awards in Investigative Journalism. Graduates of the Polk School will carry forth the highest standards of professionalism and integrity represented by the extraordinary Polk Laureates, a list that includes Bob Woodward and Carl Bernstein, Walter Cronkite, Edward R. Morrow, Christine Amanpour, Peter Jennings, Dian Sawyer, Norman Mailer, Seymour Hersh, Jane Ferguson, Glenn Greenwald, Anna Deavere Smith, and other journalists of distinction.

Led by faculty and practitioners who excel in the professional world and/or who are accomplished scholars, the Polk School innovates on the cutting edge of media, communications, film, broadcast, public relations, and journalism.

The Polk School attracts students from around the globe to the heart of the media capital of the world, New York City. Students engage in experiential learning opportunities that maximize the enriching environment.

DEPARTMENT OF JOURNALISM AND CREATIVE WRITING

The study of communications is vital for our public life as a nation, for individual professional careers, and for interpersonal relations. The Department of Journalism and Creative Writing helps students to master a broad range of theories and skills through news-editorial and production programs leading to a Bachelor of Arts in Journalism. These programs prepare students for exciting careers in print, broadcast, digital, and multimedia media, as well as public relations, advertising, and corporate communications.

B.A. Journalism

The Bachelor of Arts in Journalism capitalizes on LIU’s location in the media capital of the world as it prepares students for a wide variety of media careers. Our program helps students develop their talents in writing, reporting, and multimedia production for print and online publications as well as broadcast news outlets. Students can customize their coursework to focus on areas such as arts and culture reporting, public relations and social media, and/or multimedia journalism.

Journalism majors at LIU Brooklyn can develop their portfolios and their leadership abilities by working with the campus newspaper. They can get invaluable experience as interns for news organizations like NY1, The New York Times, CNN, People, NBC Universal, Vibe, ESPN, Def Jam, BET Networks, Sirius XM, The Travel Channel, and CBS Sports. Journalism majors have traveled to Russia, South Africa, England, Sweden, Mexico, Canada, India, and other countries to perform foreign internships funded by the department's Kruglak Fellowship.

B.A. Journalism

[Program Code: 06901] [HEGIS: 0602.0]

Graduation Requirements

Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin.

Orientation (1 credit)

FYS 01 First Year Seminar 1.00

Core Curriculum Requirements (34-35 credits)

Humanities

English Composition - ENG 16 or 16 X 3.00

English Literature: ENG 61, 62, 63 or 64 3.00

Philosophy: PHI 60 3.00

Foreign Language 3.00

Social Sciences

History 3.00

Anthropology, Economics, History, Political Science, Psychology, or Sociology 3.00

Anthropology, Economics Political Science, Psychology, Sociology 3.00

Science and Mathematics

Mathematics: MTH 15 or 16 (3-4 credits) 4.00

Laboratory Science: BIO, CHM, PHY 4.00

Communication, Visual & Performing Arts

Oral Communication: SPE 3 3.00

Art, Dance, Journalism, Music, Theatre, Media Arts 61 3.00

Major Requirements (25 credits)

Must complete all of the following courses:

JOU 100 Journalism History 3.00

JOU 101 Communications Law 3.00

JOU 119 Writing for News Media 3.00

JOU 120 Mass Communication in a Digital Age 3.00

JOU 135 News Reporting 3.00

Ancillary Requirements (3 credits)

Choose one course from the following:

JOU 111 Photojournalism 3.00

MA 106 Video Workshop I 3.00

MA 115 Introduction to Photography 3.00

MA 118 Digital Photo 3.00

MA 124 Computer Graphics I 3.00

MA 125 Digital Publishing I 3.00

Credit Requirements

Major Required Credits: 37

Minimum Total Credits: 120

Minimum Liberal Arts and Sciences Credits: 90

Ancillary Course Requirements: See above
**Journalism Courses**

**JOU 61 Journalism, Social Media & You**
Examines a wide range of news shared through social media and other sources with attention to the political, economic, democratic, and satirical motives of diverse media creators. Explains and compares the role of new technologies and the proliferation of fake news, propaganda, hoaxes, rumors, and advertising on the Internet. Explores and compares principles and practices of credible journalism, such as objectivity and balance. Students develop news-literacy skills and learn to evaluate and curate their social-media newsfeeds. Satisfies the Arts core requirement.

Credits: 3  
Every Fall and Spring

**JOU 100 History of the Press**
Provides an overview of the development of print journalism in the U.S., especially the response of newspapers and magazines to changes in social conditions and communication technologies. Examines the role of the press from the American Revolution to the present, with special attention to coverage of military conflict in the Spanish-American War, two World Wars, Vietnam, The Gulf War, Iraq and Afghanistan. Scrutinizes a wide range of mainstream and dissident publications. Also explores the growing importance of news aggregators, bloggers, and social news-feeds.

Credits: 3  
Alternate Fall

**JOU 101 Communications Law**
Reviews debates over the First Amendment and the protection it affords the press and other mass-media institutions. Examines concepts and landmark cases in such areas as defamation, copyright, privacy, obscenity, protection of news sources, secrecy in government, regulation of advertising, broadcasting, and anti-trust law. Emphasizes how social and technological changes require us to reconsider First Amendment protections. Gives special attention to legal problems posed by communication technologies such as cable television, communication satellites, computers, and the Internet.

Credits: 3  
Alternate Spring

**JOU 103 Public Opinion and Advocacy Journalism**
Examines the formation, measurement and effects of public opinion relating to mass communication and other forms of collective behavior. Examines points of view in mainstream and alternative media, public access to mass and interactive media, and techniques of persuasion and propaganda.

Credits: 3  
On Demand

**JOU 107 International Newsgathering Systems**
Examines the concepts, development and practices of both the foreign press and international communications. Topics include: consideration of various structures and their roles in the press systems of developing countries; history of media in authoritarian systems; existing techniques of control; political, economic, legal and cultural barriers that inhibit freedom of expression and dissemination of information; and, review of communication channels and interactive media that open or restrict the information flow in the global telecommunication grid.

Credits: 3  
On Occasion

**JOU 109 Mass Media and Culture**
Examines how mass media portray and are influenced by popular and folk cultures. Surveys historical, theoretical, and empirical data concerning the relationships between media and artifacts of mass culture. Looks at cultural manifestations such as supermarket tabloids, tabloid television, and blogs that cater to sensationalism. Also considers rumor cycles to examine how mass media and social media both initiate and circulate the expressions of various publics.

Credits: 3  
On Occasion

**JOU 110 Mass Communication in a Digital Age**
Examines how mass media and strategic communications in American culture during this digital age, the evolution of new communication technologies and their impact on daily life and society. Examines the democratic functions of journalism and First Amendment issues, the economics of media, and the persuasive uses of mass communication in politics, advertising, and public relations. Introduces students to mass-communication theories, critical approaches, media-effects research, and free-speech issues.

Credits: 3  
Every Fall and Spring

**JOU 111 Photojournalism**
A production-based course exploring the uses of digital photography. Topics include photo essays, photo documentaries, ethical uses of images in mass media, and the human condition in photography. Students complete weekly photographic and written narrative assignments, and a final documentary project. Students will review the photographic entries submitted for the George Polk Investigative Journalism Award.

Pre-requisite of MA 115/ART 115 is required or permission of the Department.

Credits: 3  
Cross-Listings: JOU 111, MA 111  
On Demand

**JOU 118 Media Management**
Concentrates on the business structure and management of media organizations from large to small, with special attention to career opportunities in global and local media firms. Focuses on new management concepts and solutions to the complex problems facing media organizations today. Addresses specific issues such as administrative services, start-ups, management planning systems, marketing strategy, and collective bargaining.

Credits: 3  
On Occasion

**JOU 119 Writing for News Media**
Explores the creation of journalistic stories for diverse audiences. Students learn to develop story ideas, gather information, write engaging leads, integrate visual elements, proofread copy, revise their work, and think like an editor. They examine model news stories to assess the effectiveness of content, organization, form, and style. Students practice applying professional standards such as Associated Press style to their writing.

Pre-requisite of JOU 119 / ENG 126 or permission of the Department.

Credits: 3  
Every Fall

**JOU 120 Principles of Advertising**
An introduction to advertising with emphasis on effective creative strategies. Students gain insight into all phases of the business including print, Web, radio, television, agency operations, and research.

Credits: 3  
Cross-Listings: JOU 126, MA 126  
On Occasion

**JOU 126 News Reporting**
Develops fundamental skills of news gathering, analysis, interviewing, and research. Students learn to cover a variety of news beats and write breaking news stories for print and online publication. Introduces students to investigative reporting techniques. They gain insight to professional journalism by talking with guest speakers and covering stories outside the classroom.

Pre-requisite of JOU 119 / ENG 126 or permission of the Department.

Credits: 3  
Every Fall

**JOU 136 Journalism Capstone**
Students advance their reporting skills through preparation of longer, more complex stories that provide interpretation and analysis. They explore real-world newsroom problems, investigative journalism, and reporting practices for different media platforms. The class engages in field work to produce off-campus stories, in addition to on-campus assignments.

**Pre-requisite of JOU 135 or permission of Department.**

**Credits:** 3  
**Every Spring**

**JOU 139 Multimedia Journalism**

Students plan and execute multimedia journalism projects that incorporate photos, audio and video elements. They develop skills in writing and storytelling across platforms, designing multimedia packages and creating information graphics. They collaborate on team reporting projects and improve user experience with effective content management, navigation and interactivity.

**Credits:** 3  
**On Occasion**

**JOU 141 Online Journalism**

An introduction to writing, reporting, and editing for news websites, blogs, and more. Topics include interactivity, linking, RSS, podcasting, and citizen journalism. Provides hands-on instruction in digital news-gathering and multimedia presentation. Also addresses issues of social responsibility, credibility, law, and ethics as they relate to online journalism.

**The pre-requisite of JOU 119/ENG 126 or MA 150 or equivalent is required or permission of the Department.**

**Credits:** 3  
**On Occasion**

**JOU 143 Visual Communication**

Introduces key concepts and practices of graphic communication as they relate to print and online publications: magazines, newsletters, blogs, websites, and more. Students explore and apply principles such as typography, color, balance, proportion, emphasis and unity. Class projects help students develop editing and design skills using page-layout software to produce individual or group projects.

**Credits:** 3  
**Rotating Basis**

**JOU 144 Entertainment Journalism**

Provides a historical overview of the rise of entertainment journalism in the U.S. Examines case studies of celebrity coverage in various fields, from entertainment to sports to politics. Considers the impact of paparazzi and bloggers on journalism. Students practice reviewing popular culture and preparing for celebrity interviews and reporting.

**The pre-requisite of JOU 119/ENG 126 or MA 150 is required or permission of the Department.**

**Credits:** 3  
**Cross-Listings:** JOU 144, MA 144  
**On Occasion**

**JOU 145 Introduction to Public Relations and Strategic Communication**

Introduces principles and practices of public relations, with attention to its historical development, trends, and socio-cultural impact. Familiarizes students with PR goals, theories, ethics, research, planning, and strategies. Explores PR issues across a range of organizations, including corporations, government agencies, healthcare, education, and nonprofit groups. Offers a foundation in strategic communication for students who aspire to managerial careers.

**Credits:** 3  
**Cross-Listings:** JOU 145, MA 1531  
**On Demand**

**JOU 147 Sports Information and Public Relations**

This course examines the techniques of sports publicity, promotion, and marketing for both amateur and professional athletics. Students learn to produce sports statistics, press releases, press kits, and marketing strategies for print, digital, and broadcast media. Sports information professionals meet with students to develop projects.

**The pre-requisite of JOU 119/ENG 126 is required or permission of the Department.**

**Credits:** 3  
**Rotating Basis**

**JOU 148 Public Relations Writing**

Introduces students to principles and practices of PR writing, including how it differs from objective news writing. They learn and apply professional standards such as Associated Press style as they practice writing press releases and other strategic-communication materials. The class studies various examples of PR writing to analyze its organization, form, style, and effectiveness in informing and persuading audiences.

**The pre-requisite of JOU 119/ENG 126 or permission of the Department.**

**Credits:** 3  
**Cross-Listings:** JOU 148, MA 146  
**On Demand**

**JOU 151 Sports Writing and Reporting**

This course addresses all aspects of sports writing and reporting, including deadline coverage, game description, feature stories, column writing, and fantasy sports. Students compare print, digital, and broadcast sports coverage to evaluate trends and effectiveness. Students develop skills in crafting leads, reporting ethically, writing clearly, researching, cultivating sources, and conducting interviews. Guest speakers working in sports journalism are an integral part of the class.

**The pre-requisite of JOU 119/ENG 126 or MA 150 is required, or permission of the Department.**

**Credits:** 3  
**Rotating Basis**

**JOU 157 Creative Aspects of Copywriting**

Introduces copywriting techniques for print media, Web, radio, and television as well as the creation of complete promotion packages for direct marketing. Students develop practical skills by creating advertising letters, brochures, commercials, and other materials.

**The pre-requisite of JOU 119/ENG 126 or MA 150 is required, or permission of the Department.**

**Credits:** 3  
**Cross-Listings:** JOU 157, MA 157  
**On Occasion**

**JOU 160 Journalism Internship**

Provides academic credit to journalism majors who engage in off-campus internships and on-the-job projects under the supervision of the Journalism department. Students submit reports about their experiences as interns and provide evaluations from their onsite supervisors. May be taken up to four times. Pass/Fail only.

**Credits:** 1  
**Every Fall, Spring and Summer**

**JOU 161 Campus News Media Internship**

Journalism majors work as editors/managers on Seawanhaka and other campus news media with emphasis on advancing their portfolios and leadership skills. Permission of the Department Chair and supervising faculty member are required.

**The pre-requisite of JOU 119/ENG 126 is required and permission of the Department Chair.**

**Credits:** 3  
**Every Fall**

**JOU 162 Campus News Media Internship**

Journalism majors work as editors/managers on Seawanhaka and other campus news media with emphasis on advancing their portfolios and leadership skills. Permission of the Department Chair and supervising faculty member are required.

**The pre-requisite of JOU 119/ENG 126 is required and permission of the Department Chair.**

**Credits:** 3  
**Every Spring**

**JOU 177 Superheroes: Comics to Hollywood**

Explores the place of superheroes and superheroines in American popular culture from the golden age of comic books to blockbuster Hollywood films. Focuses on the emergence and evolution of figures such as Superman, Batman, Wonder Woman, Captain America, Green Lantern, and Black Panther. Also considers less mainstream superheroes representing racial, ethnic and other minorities. Examines superheroes from a historical and sociological perspective, emphasizing their role in affirming and challenging enduring myths and motifs in American culture.

**Credits:** 3

JOU 198 Independent Study
Students conduct research on mass-media topics or perform intensive professional internships under the supervision of a Journalism faculty member. Prerequisite: Permission of the Department Chair and the Dean. Credits: 3 Every Fall and Spring

JOU 196 Honors Study
Gives outstanding students an opportunity to pursue independent work in their major under the guidance of a faculty member. No regular class meetings. To be eligible, students must have upper-junior or senior status, a cumulative GPA of 3.0, a 3.25 GPA in their major, and permission of the Department Chair and the Dean. A maximum of six credits of Honors Study is allowed. Credits: 3 Every Fall and Spring

JOU 204 The Globalization of Sports Origins and Prospects
Explores the rising phenomenon of internationalism in sports. Examines themes such as the growing popularity of soccer in the U.S., the professionalization of the Olympics, and the presence of players from around the world on the roster of every major team sport—from baseball to basketball to American football to hockey. Every Fall and Spring

JOU 1561 Video Journalism I
An introductory course that trains students to work as video journalists, integrating TV production with news-writing skills. Using a digital camcorder and nonlinear editing equipment, students learn the technical and aesthetic aspects of news shooting while applying journalism principles in the field. The pre-requisite of SPE 3 or HSP 21 or HSP 22 is required. Credits: 3 Every Fall

JOU 196 Honors Study
Gives outstanding students an opportunity to pursue independent work in their major under the guidance of a faculty member. No regular class meetings. To be eligible, students must have upper-junior or senior status, a cumulative GPA of 3.0, a 3.25 GPA in their major, and permission of the Department Chair and the Dean. A maximum of six credits of Honors Study is allowed. Credits: 3 Every Fall and Spring

JOU 204 The Globalization of Sports Origins and Prospects
Explores the rising phenomenon of internationalism in sports. Examines themes such as the growing popularity of soccer in the U.S., the professionalization of the Olympics, and the presence of players from around the world on the roster of every major team sport—from baseball to basketball to American football to hockey. Every Fall and Spring

JOU 1561 Video Journalism I
An introductory course that trains students to work as video journalists, integrating TV production with news-writing skills. Using a digital camcorder and nonlinear editing equipment, students learn the technical and aesthetic aspects of news shooting while applying journalism principles in the field. The pre-requisite of SPE 3 or HSP 21 or HSP 22 is required. Credits: 3 Every Fall

Speech Courses

SPE 3 Oral Communication
An introduction to communication theory and interpersonal skills. Students develop oral presentation techniques, including public speaking, group discussion and oral readings. Evaluation of individual student speech through analysis of verbal and nonverbal communication is conducted. Credits: 3 Every Semester

SPE 3X Oral Communication for Nonnative Speakers
A course parallel to Speech 3 for non-native speakers who need special attention in the production of oral communication, including voice, and diction. Satisfies the core. Credits: 3 Every Fall and Spring

SPE 100 Voice and Diction
Students discover their vocal facility and capacity by exercising and practicing the sounds and symbols of the International Phonetic Alphabet (IPA). They develop intelligent, effective communication skills for business and professional advancement in competitive workplaces by learning standard American English. Students learn to speak clearly and more effectively in their daily lives, to let go of bad habits, and to free the power of their natural voices. The pre-requisite of SPE 3 or HSP 21 or HSP 22 is required. Credits: 3 Every Fall and Spring

SPE 105 Public Speaking
The study and practice of public speaking provides students with specific communication principles and skills for effective public presentations in a variety of formal and informal public, social, business and professional settings. Topics include learning techniques for overcoming fears, improving self-image, developing a personal communication style, observing the symbioses between speakers and audience, verbal and non-verbal communication, outlining, and composing and presenting professional speeches. The pre-requisite of SPE 3 or HSP 21 or HSP 22 is required. Credits: 3 Every Fall

SPE 119 Language, Speech and Thought
A consideration of three topics that have held much philosophical attention in the twentieth century: the nature of language, the actions human beings perform through speech, and the relation of language to thought. An introduction is made to the philosophy of language relevant to the work of psychologists, linguists, educators and others. Topics include types of speech acts, meaning, truth, language acquisition, and the relationship of philosophy to the cognitive sciences. Pre-requisite: PHI 60 (PHI 61 or 62) or HHP 21 or HHP 22 Credits: 3 Cross-Listings: PHI 119, SPE 119

**SPE 182 Gender and Communication**
This course examines the communication behaviors of women and men in same sex and gender contexts. It introduces students to current theories on gender role play and communication, and examines the function of communication in gender role development. Topics may include gender as politics, gender discrimination, gender stereotyping in language usage, and gender across culture, age and ethnicity.

*Credits: 3*

*Cross-Listings: HUM 189, SPE 182*

**SPE 203 Interpersonal Communications**
Uses an experiential approach to developing effective interpersonal communication skills in both private and professional settings. Focuses on heightened self-awareness of how communication is influenced by social conditioning, assumptions, bias, misuse of language and hierarchical social systems. Applies group dynamics, simulations, and communication techniques used by corporate trainers. Students examine why these approaches are successful and how individuals can implement these strategies in their own personal and professional relationships.

*The prerequisite of SPE 3 or HSP 21 or HSP 22 is required.*

*Credits: 3*

**SPE 222 Social Media in Theory and Practice**
Examines best practices in social networking from the perspective of writers, journalists, media professionals, and other communicators. Students learn to write, edit, and research for blogs and news-feeds, gaining familiarity with current platforms. Requires active collaboration in online discussions and digital projects, in addition to class meetings.

*Credits: 3*

*Cross-Listings: JOU 222, MA 222, SPE 222*

*Rotating Basis*
SCHOOL OF NATURAL AND LIFE SCIENCES

The School of Natural Sciences provides students with fundamental and applied knowledge of key physical science disciplines, including but not limited to chemistry, earth sciences, mathematics, and physics. Our goal is to develop future leaders with skills needed to launch careers in STEM fields, with an emphasis upon the intersections amongst different scientific disciplines. Students engage in meaningful research, with opportunities to actively contribute to scientific learning, with the potential for new breakthroughs and scientific publications. Given the many challenges for future improvement intimately linked with climate change, diseases (new and old) and opportunities to translate fundamental knowledge into new innovations, a degree in Natural Sciences offers many paths to future success and the ability to make meaningful contributions to the planet and to society. Degrees offered include a Bachelor of Science in Biology or Mathematics.

DEPARTMENT OF NATURAL SCIENCES

The Department of Natural Sciences offers a wide range of courses to meet the needs of a diverse student body by providing the core curriculum in Chemistry, Physics and Math as well as a Bachelor of Science in Biochemistry.

The Core Curriculum requires four (4) credits in a Laboratory Science and either three (3) or four (4) credits in Math. All Math courses will fulfill the core requirement. Physical Science Core requirements may be satisfied by any Chemistry or Physics courses offered by the department. All courses offered in the department which may satisfy the Core require proper evaluation and placement upon admission and satisfactory completion of any pre-requisites.

Biochemistry

The undergraduate program leading to the degree of Bachelor of Science in Biochemistry connects the ever-growing important interface between biology and chemistry. Training emphasizing advanced experimental and theoretical principles is provided in both the biological and chemical sciences, as a foundation for a variety of career paths, including further training in biology, chemistry, or biochemistry; molecular biology; and medical or dental school. Students completing the biochemistry curriculum may have their degrees certified by the American Chemical Society. Biochemistry majors are urged to consult with advisers from both the Biology Department and the Chemistry and Biochemistry Department to formulate appropriate programs of study and to explore the numerous career paths available.

B.S. Biochemistry

{Program Code: 22696} {HEGIS: 0414.0}

Graduation Requirements

Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:

Orientation

FYS 01 First Year Seminar 1.00

Core Curriculum Requirements (34-35 credits)

Humanities

English Composition - ENG 16 or 16 X 3.00
English Literature: ENG 61, 62, 63 or 64 3.00
Philosophy: PHI 60 (PHI 61 or 62) 3.00
Foreign Language 3.00

Social Sciences

History 3.00

Anthropology, Economics, History, Political Science, Psychology, or Sociology 3.00
Anthropology, Economics Political Science, Psychology, Sociology 3.00

Science and Mathematics

Mathematics: MTH 30 4.00
Laboratory Science: BIO 1 4.00

Communication, Visual & Performing Arts

Oral Communications: SPE 3 3.00
Art, Dance, Journalism, Music, Theatre, Media Arts 3.00

Distribution Requirements

The following courses are required:

BIO 1 General Biology 4.00
BIO 2 General Biology 4.00
CHM 3 General Chemistry I 4.00
CHM 4 General Chemistry II 4.00
PHY 31 General Physics 4.00
PHY 32 General Physics 4.00

Ancillary Requirements

The following courses are required:

CHM 113 Quantitative Analysis 4.00
CHM 121 Organic Chemistry 4.00
CHM 122 Organic Chemistry 4.00
CHM 135 Physical Chemistry I 4.00
MTH 40 Calculus I 4.00

Major Requirements

The following courses are required:

BIC/B 128 The Basis of Cell Function 4.00
BIC/C 153 Biochemistry 4.00
BIC/C 154 Biochemistry 4.00
BIC/B 160 Molecular Biology 2.00
BIC/B 161 Introductory Molecular Biology 3.00
BIC/C 186 Senior Research 3.00
CHM 136 Physical Chemistry II 4.00

Choose two (2) out of the following:

BIC/B 125 Physiology 4.00
BIC/B 126 Principles of Genetics 4.00
BIC/C 187 Senior Research 3.00
BIC/B 508 The Biology of Cancer 3.00
BIC/C 514 Bioanalytical Chemistry 3.00
BIC/C 531 Neurochemistry 3.00
BIC 541 Special Topics in Biochemistry 3.00

Credit Requirements

Major Required Credits: 30
Major Ancillary and Distribution Credits: 52
Minimum Total Credits: 120
Minimum Liberal Arts and Sciences Credits: 60
Biochemistry Courses

BIC 126 Principles of Genetics
A molecular approach to classical genetics, with the implications of current events in DNA research on human problems. The laboratory, which integrates exercises with Drosophila, bacteria and computer simulations, requires weekly reports. Two lecture hours, two two-hour laboratory periods per week. Prerequisites of BIO 2 or BIO 4; 4 credits
Pre-requisite of BIO 2 or BIO 4 is required. Credits: 4
Cross-Listings: BIC 126, BIO 126
Alternate Fall

BIC 128 The Basis of Cell Function
An introduction to the structure and function of the eukaryotic cell and its organelles, stressing the underlying similarities among cell types. The laboratory includes microscopy, cell fractionation, chromatography, electrophoresis, DNA restriction analysis and computer research to study the interdependence of cellular structure and function. Two lecture hours, two two-hour laboratory periods per week. Prerequisite of BIO 2 or BIO 4; 4 credits
Pre-requisite of BIO 2 or BIO 4 is required. Credits: 4
Cross-Listings: BIC 128, BIO 128
Alternate Fall

BIC 153 Biochemistry
The first semester of a two semester sequence. An in-depth study of modern biochemistry, including the conformation and dynamics of biomolecules, the design and regulation of metabolic pathways, and the storage, transmission and expression of genetic information. The laboratory emphasizes biochemical instrumentation. Two lecture hours, one four-hour laboratory. This course has an additional fee. Same as BIC 153. The pre-requisite of CHM 122 and the pre-requisite of BIC 135 are required.

BIC 154 Biochemistry
The second semester of a two semester sequence. An in-depth study of modern biochemistry, including the conformation and dynamics of biomolecules, the design and regulation of metabolic pathways, and the storage, transmission and expression of genetic information. The laboratory emphasizes biochemical instrumentation. Two lecture hours, one four-hour laboratory. Same as BIC 154. Credits: 4
Cross-Listings: BIC 154, CHM 154
Every Spring

BIC 160 Molecular Biology
An introduction to molecular biology laboratory techniques. The laboratory emphasizes the techniques and applications of recombinant DNA technology; laboratories include molecular cloning, blotting, DNA sequencing and PCR, genomic and plasmid DNA isolation, and purification and labeling of DNA. This course imparts the basic laboratory techniques needed for advanced degrees and employment. Two two-hour laboratory periods per week. Prerequisite of CHM 4 is required; 2 credits
Pre-Requisite of CHM 4 is required. Credits: 2
Cross-Listings: BIC 160, BIO 160
Alternate Spring

BIC 161 Introductory Molecular Biology
A study of advanced molecular biology emphasizing gene structure and regulation in both prokaryotes and eukaryotes. Detailed biochemistry of DNA structure and replication, RNA transcription and its regulation and processing, protein synthesis, and the mechanisms of genetic engineering are reviewed. Three lecture hours per week. The pre-requisite of BIO 2 or 4; 3 credits
The pre-requisite of BIO 2 or 4 is required. Credits: 3
Cross-Listings: BIC 161, BIO 161
Alternate Spring

BIC 186 Senior Research
Laboratory and library research on a special problem, written report required. Pass/Fail only. Open only to qualified students with the permission of the Department Chair and the faculty research adviser. Credits: 3
Every Semester

BIC 187 Senior Research
Laboratory and library research on a special problem, written report required. Pass/Fail only. Open only to qualified students with the permission of the Department Chair and the faculty research adviser. Credits: 3
Every Semester

BIC 196 Honors Research
Honors study is designed to give outstanding students an opportunity to do independent work in their major under the guidance of a member of the faculty. There are no regular class meetings. To be eligible, students must have upper-junior or senior status, a cumulative quality-point ratio of 3.00 and a 3.25 ratio in their major subject, and the permission of the Department Chair and the Dean. A total of six credits of Honors Study is the maximum allowed. Not open to students who have successfully completed Biochemistry 186, 187. Credits: 3
Every Semester

Chemistry Courses

CHM 1 Chemistry for Health Science I
CHM 1. Chemistry for Health Sciences. An examination of the fundamentals of chemistry and biochemistry, with a general application to everyday living and health. Fulfills the science core requirement for nonscience majors. Two lecture hours, one recitation period and three hours of laboratory per week. Not open to majors in Biology, Bioinformatics, Chemistry or Biochemistry. Credits: 4
Every Semester

CHM 2 Chemistry for the Health Science II
A study of the fundamentals of biochemistry as it pertains to everyday living, health and nutrition. This course will focus on the biochemical components of living organisms and how diet can influence the metabolism and physiology of humans. Fulfills the science core requirement for nonscience majors. Three hours of lecture and three hours of laboratory per week. Not open to majors in Biology, Bioinformatics, Chemistry or Biochemistry. Pre-requisite of CHM 1 is required. Credits: 4
Every Semester

CHM 3 General Chemistry I
A modern course in general chemistry, stressing the fundamental principles of atomic and molecular structure, stoichiometry, states of matter, and thermodynamics. Laboratory experiments supplement the lecture material. Two lecture hours, one recitation period and a three-hour laboratory period. For Science majors. The corequisite or pre-requisite of Math 30 is required. Students in the PHR3 and PHR6 Student group are not allowed to register for this course. Credits: 4
Every Semester

CHM 4 General Chemistry II
A modern course in general chemistry, stressing the fundamental principles of chemical equilibria, rates of reactions, nuclear chemistry, coordination compounds, thermodynamics and electrochemistry. This course also emphasizes descriptive inorganic chemistry, the theory and practice of semi-micro qualitative analysis and an introduction to organic chemistry. Laboratory experiments supplement the lecture material. Two lecture hours, one recitation period and a three-hour laboratory period. For Science majors. Pre-requisite of CHM 3 is required. Students in the PHR3 and PHR6 Student group are not allowed to register for this course. Credits: 4
Every Semester

CHM 21 Environmental and Health Science
An introduction to fundamental chemical principles, which are applied to sustainability, environmental issues, energy, biochemical components of living organisms, nutrition, pharmaceuticals and the molecules of life. Three hours of lecture and three hours of laboratory each week. Course not open to science majors. Credits: 4
On Occasion

CHM 113 Quantitative Analysis
A survey of the theories and techniques of traditional volumetric and gravimetric analysis, plus treatment of instrumental techniques, i.e., spectrophotometry and chromatography. Designed for Chemistry, Biochemistry and Biology majors who may continue their studies either in graduate programs or in professional schools. Two lecture hours, one recitation period, one three-hour laboratory period.
Pre-requisite of CHM 4 is required.
Credits: 4
Every Fall

CHM 121 Organic Chemistry I
A modern course in organic chemistry, stressing the principles of naming organic compounds, chemical bonding and functional groups, chemical reactivity and reaction mechanisms. The course emphasizes the study of the properties and reactivities of alcohols, alkyl halides and alkenes. Substitution and elimination reactions, radical reactions and additions reactions are introduced. Two lecture hours, one quiz period and a three-hour laboratory period.
The pre-requisite of CHM 4 is required. Students in the PHR3 Student group are not allowed to register for this course.
Credits: 4
Every Fall

CHM 122 Organic Chemistry II
Overview of the main spectroscopic methods used in the identification of organic compounds with a particular emphasis on the study of nuclear magnetic resonance and infrared spectroscopy. Alcohol functional groups, synthesis of alcohols by means of reduction reactions and reactivity of alcohols in oxidation reactions. Synthesis and reactivity of the carbonyl group. Reactivity of enols and enolates, study of the reactions of carboxylic acids and their derivatives, the acid chlorides, anhydrides, esters, amides and nitriles. Study of amines, aryl halides and phenols and the introduction to organometallic chemistry. Two lecture hours, one recitation hour and a three-hour laboratory period.
The pre-requisites of CHM 4 and CHM 121 are required. Students in the PHR3 Student group are not allowed to register for this course.
Credits: 4
Every Semester

CHM 135 Physical Chemistry I
A study of thermodynamics, solution equilibria, chemical kinetics, and electrochemistry and their application to biological systems. Three lecture hours, one three-hour laboratory. Open only to Chemistry and Biochemistry majors and to qualified students in other majors with the permission of the Department Chair.
The pre-requisites of CHM 113, CHM 122, PHY 32 and MTH 40 are all required.
Credits: 4
Every Fall

CHM 136 Physical Chemistry II
A study of the physical changes of states, statistical thermodynamics, elementary quantum mechanics, atomic and molecular structure, spectroscopy, and the solid state. Three lecture hours, one three-hour laboratory. Open only to Chemistry and Biochemistry majors and to qualified students in other majors with the permission of the Department Chair.
The pre-requisites of CHM 135 and MTH 101 are required.
Credits: 4
Every Spring

CHM 137 Biochemistry
The first semester of a two semester sequence. An in-depth study of modern biochemistry, including the conformation and dynamics of biomolecules, the design and regulation of metabolic pathways, and the storage, transmission and expression of genetic information. The laboratory emphasizes biochemical instrumentation. Two lecture hours, one four-hour laboratory. This course has an additional fee. Same as BIC 153.
The pre-requisite of CHM 122 and the pre- or co-requisite of CHM 135 are required.

CHM 154 Biochemistry
The second semester of a two semester sequence. An in-depth study of modern biochemistry, including the conformation and dynamics of biomolecules, the design and regulation of metabolic pathways, and the storage, transmission and expression of genetic information. The laboratory emphasizes biochemical instrumentation. Two lecture hours, one four-hour laboratory. Same as BIC 154.
Credits: 4
Cross-Listings: BIC 154, CHM 154
Every Spring

CHM 156 Biochemistry
An in-depth study of modern biochemistry, including the conformation and dynamics of biomolecules, the design and regulation of metabolic pathways, and the storage, transmission and expression of genetic information. The laboratory emphasizes biochemical instrumentation. Two lecture hours, one four-hour laboratory. Same as BIC 154.
Credits: 4
Cross-Listings: BIC 156
Every Spring

CHM 186 Senior Research
Laboratory and library research on a special problem; written report required. Pass/Fail only. Open only to qualified students with the permission of the Department Chair and the Faculty Research Adviser or advisers. Prerequisite: CHM 136. Offered every semester.
The pre-requisite of CHM 136 is required.
Credits: 3
Every Semester

CHM 187 Senior Research
Laboratory and library research on a special problem; written report required. Pass/Fail only. Open only to qualified students with the permission of the Department Chair and the Faculty Research Adviser. Prerequisite: CHM 136. Offered every semester.
Credits: 3
Every Semester

CHM 195 Honors Research
Honors Study is designed to give outstanding students an opportunity to do independent work in their major under the guidance of a member of the faculty. There are no regular class meetings. To be eligible, students must have upper-junior or senior status, a cumulative quality-point ratio of 3.00 and a 3.25 ratio in their major subject, and the permission of the Department Chair and the Dean. A total of six credits of Honors Study is the maximum allowed. (Not open to students who have successfully completed CHM 186, 187.)
The pre-requisite of CHM 136 is required.
Credits: 3
Every Semester

CHM 196 Honors Research
Honors Study is designed to give outstanding students an opportunity to do independent work in their major under the guidance of a member of the faculty. There are no regular class meetings. To be eligible, students must have upper-junior or senior status, a cumulative quality-point ratio of 3.00 and a 3.25 ratio in their major subject, and the permission of the Department Chair and the Dean. A total of six credits of Honors Study is the maximum allowed. (Not open to students who have successfully completed CHM 186, 187.)
The pre-requisite of CHM 136 is required.
Credits: 3
Every Semester

Mathematics Courses

MTH 10 Basic Mathematics
College algebra. Algebraic operations; quadratic, exponential and logarithmic functions; basic geometric topics; right triangle trigonometry.
One of the following prerequisites is required:
DSM 09
MW 9
Placement Exam
500 or higher on MATH SAT
22 or higher on ACT Assessment
Credits: 3
All Sessions

MTH 112 Fundamentals of Modern Mathematics
Elementary logic, sets and numeration; the development of number systems; natural numbers, integers, rational numbers, real numbers and complex numbers; functions, equations and inequalities; classical and modern geometries; measurement and mensuration; permutations, combinations, probability, and elementary statistics.
The pre-requisite of MTH 10 is required.
Credits: 3
On Occasion

MTH 15 Mathematical Tools and Their Use
Inductive reasoning, proportions, elementary set theory and its applications; integers, rational numbers, irrational numbers and real numbers; rules of exponents and scientific notation; linear
equations and inequalities; quadratic functions and their graphs; consumer mathematics; basic probability; selected topics in statistics. Calculator use is emphasized. Students are required to use a calculator specified by the instructor. Students who have taken MAT 16 or 11Y are exempt from MAT 15. 

One of the following prerequisites is required: 

- DSM 09
- Placement Exam
- 500 or higher on MATH SAT
- 22 or higher on ACT Assessment

Credits: 4

All Sessions

MTH 10 Calculus I 
Limits and continuity; analytic geometry; theorems on derivatives and definite integrals; and various applications of such theorems involving exponential, logarithmic, trigonometric and hyperbolic functions. 

Prerequisite of MTH 30 is required. 

Credits: 4

All Sessions

MTH 101 Calculus II 
Methods of integration; limits, indeterminate forms; approximations; parametric and polar equations, infinite series. 

Prerequisite of MTH 40 is required. 

Credits: 4

Every Fall

MTH 102 Calculus III 
Partial differentiation; multiple integration; center of mass, moments of inertia; vectors, solid analytic geometry, line integrals and Green's Theorem; elementary differential equations. 

Prerequisite of MTH 101 is required. 

Credits: 4

Every Spring

MTH 103 Calculus IV 
Vector-valued functions, functions of several variables, integration in two and three dimensions. 

Prerequisite of MTH 102 is required. 

Credits: 4

Every Fall

MTH 105 Introduction to Analysis 
Real numbers; sequences and series; continuity and differentiability; the derivation of the fundamental theorem of calculus. 

Prerequisite of MTH 40 is required. 

Credits: 4

Every Fall and Spring

MTH 106 Introduction to Complex Analysis 
Complex numbers; complex integration; residue calculus; geometric and physical interpretations. 

Prerequisite of MTH 101 is required. 

Credits: 4

Every Fall and Spring

MTH 107 Introduction to Topology 
Point-set topology; connectedness, compactness; separation axioms; quotient spaces; product spaces; infinite products. 

Prerequisite of MTH 101 is required. 

Credits: 4

Every Fall and Spring
DEPARTMENT OF LIFE SCIENCES

The Department of Life Sciences offers the Bachelor of Science in Biology (with an optional concentration in Molecular Biology) and a BS in Health Science.

Biology
The goal is to provide a challenging and stimulating curriculum that fosters critical thinking and promotes scientific curiosity on current topics in the biological sciences. Biology majors are encouraged to develop specific career objectives while pursuing undergraduate studies. Departmental advisers will assist students in exploring career possibilities and in devising a personalized plan of study that will best prepare them for their career goals.

Molecular Biology Concentration
Students majoring in Biology can opt to specialize in Molecular Biology. Those considering the Molecular Biology concentration should have a high school average of at least 90 and a combined Scholastic Aptitude Test (SAT) scores of 1200 on the reading and math portions. The Molecular Biology program gives students a basic knowledge of biochemical principles and practical training in cell and molecular biology laboratory techniques. Emphasis is given to developing experimental skills used in biological research, including current recombinant DNA technologies. In their senior year, students undertake 11 credits of independent research and submit a written thesis for graduation.

Health Science
The B.S. in Health Science offers a strong foundation of coursework and practicum experience in the sciences, health and wellness. The B.S. in Health Science will prepare students for graduate study in a number of areas related to the health professions. The program is designed for students seeking entry-level positions in the health field, as well as those interested in advancing their education and career opportunities in the health professions such as nursing, public health, physical therapy, occupational therapy, physician assistant, social work, medicine, health administration, psychology, exercise science, nutrition and epidemiology.

B.S. Biology

B.S. Biology
(Program Code: 06885) [HEGIS: 0401.0]

Graduation Requirements
Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:

Orientation
FYS 01 First Year Seminar 1.00

Core Curriculum Requirements
(34-35 credits)

Humanities
English Composition - ENG 16 or 16 X 3.00
English Literature: ENG 61, 62, 63 or 64 3.00
Philosophy: PHI 60 (PHI 61 or 62) 3.00
Foreign Language 3.00

Social Sciences
History 3.00
Anthropology, Economics, History, Political Science, Psychology, or Sociology 3.00

Science and Mathematics
Mathematics: MTH 10 3.00
Laboratory Science: BIO 1 4.00

Communication, Visual & Performing Arts
Oral Communications: SPE 3 3.00
Art, Dance, Journalism, Music, Theatre, Media Arts 3.00

Ancillary Requirement
The following courses must be fulfilled:

CHM 3 General and Inorganic Chemistry 4.00
CHM 4 General and Inorganic Chemistry 4.00
MTH 30 Pre-Calculus Mathematics 4.00
MTH 40 Calculus I 4.00
PHY 31 General Physics 4.00
PHY 32 General Physics 4.00

Distribution Requirement
The following courses must be fulfilled:

CHM 121 Organic Chemistry 4.00
CHM 122 Organic Chemistry 4.00

Major Requirements
The following courses must be fulfilled:

BIO 1 General Biology 4.00
BIO 2 General Biology 4.00

In addition, a total of 22 credits of advanced biology credits (numbered >100 and not including BIO 101, 131, 132, 137, 138) are required.

Molecular Biology
The following courses must be fulfilled:

BIO 126 Principles of Genetics 4.00
BIO 160 Molecular Biology 2.00
BIO 161 Introductory Molecular Biology 3.00
BIO 193 Honors Research 5.00
BIO 194 Honors Research 6.00
BIO 550 Molecular and Cell Biology 2.00
BIO 551 Molecular and Cell Biology Laboratory 2.00
CHM 135 Physical Chemistry I 4.00
BIC 153 Biochemistry 4.00
BIC 154 Biochemistry 4.00

Credit Requirements
Major Required Credits: 30
Major Ancillary and Distribution Credits: 32
Minimum Total Credits: 120
Minimum Liberal Arts and Sciences Credits: 60

B.S. Health Science

B.S. Health Science
(Program Code: 89168) [HEGIS: 1201.0]

Graduation Requirements
Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:

Orientation
FYS 01 First-Year Seminar 1.00

Core Curriculum Requirements
(34-35 credits)

Humanities
English Composition - ENG 16 or 16X 3.00
English Literature: ENG 61, 62, 63 or 64 3.00

BIC 153 Biochemistry 4.00
BIC 154 Biochemistry 4.00

Credit Requirements
Major Required Credits: 30
Major Ancillary and Distribution Credits: 32
Minimum Total Credits: 120
Minimum Liberal Arts and Sciences Credits: 60
Laboratory Science: BIO 1 or 3 4.00

Communication, Visual & Performing Arts
Oral Communications: SPE 3 3.00
Art, Dance, Journalism, Music, Theatre, Media Arts

Ancillary Course Requirements (15 credits):
Must complete all the following Biology courses.
BIO 137 Anatomy & Physiology I 4.00
BIO 138 Anatomy & Physiology II 4.00

Choose one of the following Chemistry courses.
CHM 1 Chemistry for Health 4.00
Science I
CHM 3 Principles of Chemistry I 4.00

Choose one of the following Mathematics courses.
MTH 100 Introductory Statistics 3.00
PSY 150 Statistics in Psychology 3.00

Major Requirements
All courses listed below must be completed (27 credits). Students must earn grades of C and higher in all major courses.
HS 300 Introduction to Health 3.00
Professions
HS 325 Current Issues in Urban Health 3.00
HS 340 Nutrition and Wellness 3.00
HS 355 Diversity and Health Disparities 3.00
HS 410 Healthcare Organizations and Delivery 3.00
HS 430 Research in the Health Professions 3.00
HS 460 Ethical and Legal Aspects of Health Care 3.00
HS 471 Health Program Planning 3.00
HS 490 Practicum 3.00

Credit and GPA Requirements
Minimum Total Credits: 120
Minimum Liberal Arts and Sciences Credits: 60
Minimum Major Credits: 27
 Ancillary Course Requirements: See Above

ACCELERATED SHARED CREDIT PROGRAM

B.S. Health Science and M.P.H. Public Health

This 120-credit accelerated shared credit program allows students to complete both the undergraduate degree of Bachelor of Science in Health Science and the graduate degree of Master of Public Health (MPH) coursework in five years, rather than the typical six years. Students apply to the MPH program in their third (junior) year. Students in the 3 + 2 BS and MPH program receive each degree upon completing the requirements.

Application Requirements for the MPH phase:
3 + 2 B.S. HS and MPH Acceptance Criteria

1) Guaranteed Acceptance
ALL of the following criteria must be met for acceptance:
• Meet with a health science advisor
• Apply in the junior year
• Complete at least 24 liberal arts and science (core) credits at LIU
• Complete all required health science core courses (as shown on the 3+2 course sequence sheet under Year 3) are taken at LIU
• Achieve an overall undergraduate GPA of 2.8 or higher and a health science major GPA of 3.0

2) Competitive Acceptance
• Students in the 3+2 track who do not meet all of the requirements for acceptance may apply to the MPH program as a "Competitive Acceptance" candidate/applicant for review as a "non-guaranteed acceptance" candidate/applicant.

B.S. Health Science and M.P.H. Public Health
(Program Code 89168 and 33024)
(HEGIS: 1201 and 1214)

Graduation Requirements
Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:
Oriention
FYS 01 First Year Seminar 1.00

Core Curriculum Requirements
(34-35 credits)

 Humanities
English Composition - ENG 16 3.00
English Literature: ENG 61, 62, 63 or 64 3.00
Philosophy: PHI 60 3.00
Foreign Language 3.00
Social Sciences
History 3.00

Anthropology, Economics, History, Political Science, Psychology, or Sociology
Anthropology, Economics Political Science, Psychology, Sociology

Science and Mathematics
Mathematics: MTH 15 or 16 (3-4 credits) 3.00
Laboratory Science: BIO 1 or 3 4.00

Communication, Visual & Performing Arts
Oral Communications: SPE 3 3.00
Art, Dance, Journalism, Music, Theatre, Media Arts

Ancillary Course Requirements:
Must complete one of following (4 credits):
BIO 2 General Biology 4.00
BIO 4 Life: Its Origin, Maintenance and Future 4.00
CHM 1 Chemistry for Health Science I 4.00
CHM 3 General Chemistry I 4.00

Must complete all the following Biology courses (8 credits):
BIO 137 Anatomy and Physiology I 4.00
BIO 138 Anatomy and Physiology II 4.00

Choose one of the following Mathematics courses (3 credits):
MTH 100 Introductory Statistics 3.00
PSY 150 Statistics in Psychology 3.00

Complete 10 additional liberal arts and science credits to reach the 60 credits needed for the bachelor of science degree

Major Requirements
Must Complete All Undergraduate Courses Below:
HS 300 Introduction to Health Professions 3.00
HS 325 Current Issues in Urban Health 3.00
HS 340 Nutrition and Wellness 3.00
HS 355 Diversity and Health Disparities 3.00
HS 410 Healthcare Organizations and Delivery 3.00
HS 430 Research in the Health Professions 3.00
HS 460 Ethical and Legal Aspects of Health care 3.00
The following are the course requirements for the Master of Public Health plan. A minimum of 42 graduate credits are required (see below).

**Must Complete All Graduate Courses Below:**

**Credit Requirements**

- Minimum Total Credits: 150
- Minimum Liberal Arts and Sciences Credits: 60
- Minimum Major Credits Undergraduate: 27
- Minimum Major Credits Graduate: 42
- Ancillary Course Requirements: 15

---

**B.S. Health Science/D.P.T. Physical Therapy**

The B.S/D.P.T. is a shared credit program with a total of 215 credits. The 3 + 3 BS in Health Science (HS)/ Doctor of Physical Therapy (DPT) is an accelerated program that enables students at Long Island University to complete both their undergraduate degree in Health Science and their Physical Therapy doctoral degree in just six years, rather than the typical seven years. Students must complete all undergraduate HS requirements within three years to be considered for acceptance into the DPT program. The first year in the DPT program counts as both the fourth year of undergraduate and the first year of graduate study. After completion of the Bachelor of Science in Health Science requirements (typically in the fourth year), students will graduate with the Bachelor of Science degree, and the DPT will be awarded once the student has successfully completed all course requirements for the graduate PT degree (typically the sixth year).
### Biology Courses

**BIO 1 General Biology**
First semester of a two-semester sequence (BIO 1, BIO 2). A biochemical and molecular approach to the study of concepts of general biology. Topics include the biochemical foundation of life and the basic concepts of cell biology, genetics and molecular biology. Open only to Science and Pharmacy majors and University Honors Students. Two hours of lecture and two two-hour laboratory periods per week. 4 credits.
Credits: 4  
Every Fall, Spring and Summer

**BIO 2 General Biology**
Second semester of a two-semester sequence (BIO 1, BIO 2). This writing-intensive course explores the biodiversity of all life forms and provides an introduction to key concepts in the fields of ecology, evolution and animal form and function. Labs build on lecture topics and feature case studies, interactive exercises, microscopy and animal dissections. The course provides students with foundational knowledge needed for advanced coursework, and develops key skills in scientific communication, laboratory technique, and the process of scientific inquiry, which are all relevant for science- and health-related professions. Two hours of lecture and two two-hour laboratory periods per week. Open only to Science and Pharmacy Majors and University Honors Students. 4 credits
Credits: 4  
Every Fall, Spring and Summer

**BIO 3 Life Is In Origin, Maintenance and Future**
First semester of a two-semester sequence (BIO 3, BIO 4). A presentation of the nature of living systems and the fundamental principles governing their creation in relation to current problems affecting the maintenance of life on earth. Special emphasis is placed on the interaction of biological and cultural evolution and the alternatives to extinction that challenge contemporary human beings. Two hours of lecture and two two-hour laboratory periods per week.
Credits: 4  
Every Fall

**BIO 4 Life Is Origin, Maintenance and Future**
Second semester of a two-semester sequence (BIO 3, BIO 4). A presentation of the nature of living systems and the fundamental principles governing their creation in relation to current problems affecting the maintenance of life on earth. Special emphasis is placed on the interaction of biological and cultural evolution and the alternatives to extinction that challenge contemporary human beings. Two hours of lecture and two two-hour laboratory periods per week. 4 credits
Credits: 4  
Every Fall and Spring

**BIO 25 The Science of Sustainability**
This course, for the Science and Mathematics Core Curriculum for non-science majors, covers the key concepts of environmental science and explores sustainability issues for both natural and man-made ecosystems, including biodiversity loss, climate change, urbanization, and food insecurity. Lecture topics are revisited in labs through field excursions, computer exercises, and interactive group work. Skills gained in this course, including scientific literacy and fluency in sustainability topics, will be beneficial for any career path, especially in a "greening" economy. Two hours of lecture and four hours of laboratory per week. 4 credits
Credits: 4  
Every Fall

**BIO 26 DNA and Human Life**
A course for the Science and Mathematics Core Curriculum that is offered by Biology Department for non-science major students. Topics include what is DNA, how DNA makes who we are, DNA and diseases, microbial organisms among us and human immune system. Students will gain understanding and insights about various aspects of modern life science that are closely related to our lives. Two hours of lecture and four hours of laboratory per week. 4 credits
Credits: 4  
Every Spring

**BIO 101 Microbiology**
An examination of the prevention and control of disease and the basic principles of microbiology, immunology and epidemiology as applied to personal and community health. The course teaches the basic concepts in preparation for health professional fields. Two and one-half hours of lecture and one two-hour laboratory period per week. Not open to Biology majors. Prerequisite of BIO 2 or BIO 3. 4 credits
Pre requisites: BIO 2 or BIO 3  
Credits: 4  
Every Fall, Spring and Summer

**BIO 102 Marine Biology**
An examination of the physical attributes of sea water and its organisms, extending from the invertebrates, including corals, to fish and other vertebrates. The major approach is ecological, with the physical and biotic factors of different habitats. Laboratory sessions include dissections. Some field trips are included for observation and sample collections. Two hours of lecture and two two-hour laboratory period per week. Prerequisites of BIO 2 or BIO 4. 4 credits
Pre-requisite of BIO 2 or BIO 4 is required.  
Credits: 4  
On Occasion

**BIO 104 Human Functional Anatomy**
This course examines the structure and function of the human body using regional and systemic approaches. The topics will be taught through lectures, discussions of clinical cases and laboratory sessions that include microscopy, state of the art virtual cadaver dissections and simulations of physiology experiments. Students will be introduced to basic clinical concepts to develop the observational skills and logical thought patterns relevant to health/medical professions. Prerequisite of BIO 2 or BIO 4. Two three-hour combined lecture laboratory periods per week. 4 credits
The pre-requisite of BIO 2 or BIO 4 is required, or permission of the Instructor.  
Credits: 4  
Alternate Fall

**BIO 106 Ecology**
This course covers the fundamental principles in ecology across the scale of biological organization, from individuals to populations, communities, ecosystems, and the biosphere. Lecture topics include adaptations to the environment, population dynamics, species interactions, biodiversity, and ecosystem processes, which are reinforced through interactive labs (often field-based) that allow students to participate in the entire process of scientific inquiry. In addition to ecological knowledge, this course focuses on skills related to design of experiments, data analysis and interpretation, scientific communication, and critical thinking, all of which are important for careers in the sciences. Two hours of lecture, one hour recitation and one three-hour laboratory period per week. 4 credits
Pre-requisite of BIO 2 or BIO 4 is required.  
Credits: 4  
Alternate Fall

**BIO 108 Molecular Biology of Plants**
An advanced biology course that studies molecular aspects of plant biology. Topics include how plants respond to the environment, regulate their growth, develop flowers and other structures, and how to make genetically modified plants. Students will gain in depth understanding how genes and proteins regulate developmental processes, and molecular biology tools to study plant biology. Two hours of lecture and two, two-hour laboratory periods per week. Prerequisites of BIO 2 or BIO 4; 4 credits
Pre-requisite of BIO 2 or BIO 4 is required.  
Credits: 4  
Alternate Fall

**BIO 109 Bacteriology**
An introduction to the biology of Bacteria and Archaea with consideration of the principles and practices of bacteriological techniques. Bacterial pathogenesis and the immune response are also studied. Two hours of lecture and two two-hour laboratory periods per week. Prerequisites of BIO 2 or BIO 4; 4 credits
Pre-requisites of BIO 2 or BIO 4; CHM 4 are required.  
Credits: 4  
Alternate Spring
BIO 111 Virology
An exploration of the nature of viruses, viral genetics, structure, infectivity and transmission.
Designed to acquaint students with all aspects of virology, the course examines viral transcription, classification/nomenclature of viruses, the origin/evolution of viruses, as well as the role of viruses in cancer progression and vaccine development. Laboratory exercises explore techniques in virology including the isolation, purification and growth of bacteriophage, and the detection and analysis of viral nucleic acid with PCR, RT-PCR. Two hours of lecture and two two-hour laboratory periods per week plus collateral reading.
The pre-requisite of BIO 2 or 4; 4 credits
The pre-requisite of BIO 2 or BIO 4 is required.
Credits: 4
Alternate Spring

BIO 112 Immunobiology
A study of cellular and humoral immunology. Topics covered include antigen and antibody structure, the genetic control of antibody formation, cell-cell interactions, hypersensitivity, histocompatibility immunogenetics, transplantation, tumor immunology, autoimmune disorders and immune deficiency disorders. Two hours of lecture and two two-hour laboratory periods per week.
Prerequisites of BIO 2 or BIO 4; 4 credits
Pre-requisite of BIO 2 or BIO 4 is required. Credits: 4
On Occasion

BIO 115 Histology
This course examines the microscopic anatomy of mammalian cells, tissues and organs with emphasis on the correlation between structural adaptations and function. The course includes lectures, class discussions, and laboratory sessions. Students learn about technical aspects of tissue preparation, use of modern methods of microscopy as a scientific tool while developing observational skills for interpretation of specimens. These skills prepare students in biomedical sciences for subsequent science courses such as pathology, graduate research or jobs as lab technicians. Two hours of lecture and two two-hour laboratory periods per week plus collateral reading.
Pre-requisite of BIO 2 or BIO 4 is required; 4 credits
Pre-requisite of BIO 2 or BIO 4 is required. Credits: 4
Every Spring

BIO 117 Animal Development
An advanced biology course that studies the fundamental questions of developmental biology – how single-celled zygotes develop into multicellular organisms. Topics include fertilization, early embryogenesis, cell fate determination, pattern formation, epigenetics, stem cells and cell-cell communication. Students will gain in depth understanding about how developmental processes are regulated by genes and their products, proteins. Two hours of lecture and two two-hour laboratory periods per week plus collateral reading.
Prerequisites of BIO 2 or BIO 4; 4 credits
Pre-requisite of BIO 2 or BIO 4 is required. Credits: 4
Alternate Spring

BIO 119 Principles of Evolution
This course provides a comprehensive introduction to modern evolutionary biology, an exciting, dynamic and important field of scientific investigation that constitutes the central theme unifying all biology. Laboratory exercises and discussions of relevant literature are used to reinforce the concepts learned during lectures. Topics include the fundamental concepts of evolutionary genetics, natural selection, adaptation, molecular evolution and systematics, the origins of biological diversity, paleobiology and macroevolution. Two hours of lecture, one hour of recitation and three hours of laboratory per week plus term paper.
Prerequisites of BIO 2 or BIO 4; 4 credits
Pre-requisite of BIO 2 or BIO 4 is required. Credits: 4
On Occasion

BIO 126 Principles of Genetics
A molecular approach to classical genetics, with the implications of current events in DNA research on human problems. The laboratory, which integrates exercises with Drosophila, bacteria and computer simulations, requires weekly reports. Two lecture hours, two two-hour laboratory periods per week.
Prerequisites of BIO 2 or BIO 4; 4 credits
Pre-requisite of BIO 2 or BIO 4 is required. Credits: 4
Cross-Listings: BIC 126, BIO 126
Alternate Fall

BIO 128 The Basis of Cell Function
An introduction to the structure and function of the eukaryotic cell and its organelles, stressing the underlying similarities among cell types. The laboratory includes microscopy, cell fractionation, chromatography, electrophoresis, DNA restriction analysis and computer research to study the interdependence of cellular structure and function. Two lecture hours, two two-hour laboratory periods per week.
Prerequisite of BIO 2 or BIO 4; 4 credits
Pre-requisite of BIO 2 or BIO 4 is required. Credits: 4
Cross-Listings: BIC 128, BIO 128
Alternate Fall

BIO 129 The Biological Basis of Human Variation
This course explores the biological foundations of human genetic and phenotypic variability using a genomic perspective. Discussions of relevant literature are used to reinforce the concepts learned during lectures. Three hours of lecture per week.
Pre requisites: BIO 2 or BIO 4
Credits: 4
Alternate Fall

BIO 137 Anatomy and Physiology I
This is the first part of a two-semester sequence on Human Anatomy and Physiology. Body structure and function of the integumentary, skeletal, muscular and nervous systems will be studied. The topics will be taught through lectures, class discussions, and laboratory sessions that include microscopy, virtual dissections and simulations of physiology experiments. Students will acquire an in depth knowledge of the relationship between structure and function, while developing the observational skills and logical thought patterns as a basis for application in future science courses and also in clinical real-life situations. Six hours of laboratory/lecture time per week.
The pre-requisites of BIO 2 or BIO 3; and CHM 3 and CHM 1 or CHM 3; 4 credits
Pre requisites: BIO2 or BIO3 and CHM1 or CHM 3
Credits: 4
Every Fall, Spring and Summer

BIO 139 Neuroanatomy
This course will examine the structure and function of the central and peripheral nervous systems. Students will be introduced to basic concepts in neuroanatomy including gross and microscopic organization of the central and peripheral nervous systems, as well as their functional relationships. Special topics will be studied such as learning and memory, attention, perception, language, and executive functions, with a principal focus on applying this knowledge to clinical situations. Two hours lecture, 4 hours laboratory per week.
Pre requisites: BIO 2 or 3 and BIO 137; 4 credits
Pre requisites: BIO2 OR BIO3 and BIO137
Credits: 4
Every Fall, Spring and Summer
This course gives an introduction to bioinformatics, an interdisciplinary field, that uses computer technology to study biological data, with an emphasis on applications in genomics. The course will start with an overview of molecular evolution in DNA and proteins, the databases and tools that are used for their analyses, then graduate to the use of the next-generation sequencing. Students will also learn how to analyze data looking at genetic diversity. Three hours of lecture per week.

Pre-requisites of BIO 160 or BIO 161 or BIO 126; 3 credits

**BIO 194 Honors Research**
Honors Research is designed to give students in the Molecular Biology program an opportunity to do research under the guidance of the faculty. To be eligible, students must have senior status. Open to science majors who have completed BIO 160 and have the permission of the instructor. Ten hours of laboratory per week.

The prerequisite of BIO 160 is required.

Credits: 5

Every Fall

**BIO 196 Honors Study**
Honors Study is designed to give outstanding students an opportunity to do independent work in their major under the guidance of a member of the faculty. There are no regular class meetings. To be eligible, students must have upper-junior or senior status, a cumulative quality-point ratio of 3.25 and a 3.25 ratio in their major subject, and the permission of the Chair of the Department and the Dean. Students are required to have had an advanced Biology elective with the faculty member teaching the class. A total of six credits of Honors Study is the maximum allowed.

Credits: 3

Every Spring and Summer

**BIO 198 Independent Study**
Prerequisite: Student must have had at least one upper-level course in the area of interest as well as permission of the Chair of the Department and the Dean.

Credits: 1 to 4

Every Fall and Summer

**BIO 199 Biology Internship**
During their senior year, Biology majors can undertake one internship within the area of biology/clinical research. Consultation with the Chairperson and approval of the Department is required.

A minimum of 64 credits must be completed prior to registering for this course and Departmental approval.

Credits: 1 to 3

On Demand

---

**Health Science Courses**

**HS 141 Emergency Medical Technician (EMT) Certification Preparation**
Upon successful completion of this course students are eligible to take the New York State and the National Registry of Emergency Medical Technicians examinations to become an EMT.

Both certifications allow EMTs to work in New York as well as other states. This course covers basic principles of Anatomy, Cardiology, Pathophysiology, Pharmacology and Neurology as it applies to emergency care. Theoretical knowledge and clinical skills will be utilized in the required clinical rotations prior to the end of the course 3 credits.

Pre-Requisite of SPS 140

Credits: 3

Cross-Listings: ESW 141, HS 141

All Sessions

**HS 300 Introduction to Health Professions**
This course will provide an introduction to various professions in the health care field. Students will be exposed to an overview of health care systems and major aspects of health care delivery. Students will understand health care priorities on the national and local levels. Various health careers will be reviewed to gain an understanding of their associated roles and responsibilities along with an overview of the professional behavior, related values, interests, and ethics expected for a health professional. Students will explore health career options based on an understanding of the professional tasks, skills, tools and technology, abilities, work activities, work context/environment, and educational, training, and legal requirements. In addition, the course will provide an introduction to medical terminology, as well as library skills.

Credits: 3

Every Fall, Spring and Summer

**HS 305 Communications in Health Care**
This course will provide an introduction to various health care professions in the health care field. Students will be exposed to an overview of health care systems and major aspects of health care delivery. Students will understand health care priorities on the national and local levels. Various health careers will be reviewed to gain an understanding of their associated roles and responsibilities along with an overview of the professional behavior, related values, interests, and ethics expected for a health professional. Students will explore health career options based on an understanding of the professional tasks, skills, tools and technology, abilities, work activities, work context/environment, and educational, training, and legal requirements. In addition, the course will provide an introduction to medical terminology, as well as library skills.

Credits: 3

Every Fall, Spring and Summer

**HS 309 Medical Terminology**
This course introduces students to the language of medicine. This course
### HS 325 Current Issues in Urban Health
This course will introduce students to the impact of city life on health and health care in the United States. This course will provide a detailed look at the advantages and disadvantages of urbanization on both physical and mental health and the root causes of racial and ethnic disparities in health. A thorough investigation will trace the interaction between specific aspects (e.g., housing, transportation, food outlets, crime) of the urban environment and their impact on health, discuss quality measurement, evaluate strategies for designing healthy communities, and develop recommendations for systems and policy change.

**Credits: 3**  
**Every Fall and Spring**

### HS 326 Human Diseases I
This course will focus on the pathophysiology of human diseases that commonly affect the major human body systems. The diseases that will be covered in this course will be reviewed and studied in greater detail. Topics include etiology of diseases, epidemiology, diagnosis, and treatment. This course will also include the basic physiology of the human body systems and how the immune system plays a role in targeting diseases. This course will provide a strong foundation in the physiology of human diseases for those students who are pursuing a career in the clinical health professions.

**Credits: 3**  
**Every Fall and Spring**

### HS 327 Human Diseases II
This course will focus on the pathophysiology of human diseases that commonly affect the major human body systems. The diseases that will be covered in this course will be reviewed and studied in greater detail. Topics include etiology, epidemiology, diagnosis, and treatment of diseases. This course will also include the basic physiology of the human body systems and how the immune system plays a role in targeting diseases. This course will provide a strong foundation in the physiology of human diseases for those students who are pursuing a career in the clinical health professions. This course is a continuation of Human Diseases I and will cover the second half of the body systems that were not covered in Human Diseases 1.

**Credits: 3**  
**Every Fall and Spring**

### HS 331 Adapted Aquatics for Children with Autism
This course is designed to enable children with Autism to experience water, fun, safety and success. Students will assist children with autism, under faculty supervision, in a one-to-one teaching ratio using a developmental skill progression model from acclimatization to water, to movement exploration in water, to floating and pre-beginner swim skills. Through lecture, laboratory, and hands-on experience, students will also learn about autism and how to adapt aquatic activities to meet each child's needs. The application of principles of safety in the aquatic environment is always emphasized.

**Credits: 3**  
**Every Fall**

### HS 332 Health Advocacy and Wellness for People with Intellectual Disabilities
This course introduces principles of health advocacy and wellness into an adult day habilitation environment at LIU for adults with intellectual disabilities. Through lectures, simulations, laboratory, and hands-on experiences, students learn about intellectual disabilities and how to organize, adapt and present wellness activities such as healthy eating, stress reduction, basic first aid, relaxation, exercise, and socialization to meet each individual's needs. Students will support participants with intellectual disabilities in the wellness classes and develop knowledge and leadership skills in co-leading sessions. Students will learn principles of safety and how to assist people in becoming more independent.

**Credits: 3**  
**Every Fall, Spring and Summer**

### HS 333 Health Advocacy and Wellness for People with Intellectual Disabilities
This course introduces principles of health advocacy and wellness into an adult day habilitation environment at LIU for adults with intellectual disabilities. Through lectures, simulations, laboratory, and hands-on experiences, students learn about intellectual disabilities and how to organize, adapt and present wellness activities such as healthy eating, stress reduction, basic first aid, relaxation, exercise, and socialization to meet each individual's needs. Students will support participants with intellectual disabilities in the wellness classes and develop knowledge and leadership skills in co-leading sessions. Students will learn principles of safety and how to assist people in becoming more independent.

**Credits: 3**  
**Every Fall, Spring and Summer**

### HS 339 Health and Wellness
This course provides a holistic approach of what it really means to be healthy today. It explores the positive mind and body relationship to achieve a healthy and active lifestyle. Topics include managing stress, wellness principles, nutrition guidelines, aging and disease prevention, spiritual perspectives and physical activity and exercise protocols.

**Credits: 2**  
**Cross-Listings: ESW 339, HS 339**  
**Every Fall and Spring**

### HS 340 Nutrition and Wellness
This course introduces students to basic concepts of nutrition. Students will learn about the structure and roles of both macronutrients (protein, carbohydrates, and fat) and micronutrients (vitamins and minerals), and the important roles they serve. Through the course, students will develop an understanding of the role of nutrition in optimizing health, and maximizing human performance and longevity.

The essential outcomes include the acquisition of knowledge and development of skills and tools necessary for making educated and positive nutrition decisions, for health, wellness and performance.

Topics covered include: nutrient characteristics, requirements, roles, and food sources, energy balance, weight control, dietary guidelines, and diet planning, nutrition requirements for exercise, and the social and economic factors that affect food production and consumption.

**The pre-requisites of BIO 3, and CHM 3 or CHM 1 are required.**

**Credits: 3**  
**On Occasion**

### HS 341 Life Cycle Nutrition
This course explores the relationship between nutrition and growth, development, and normal functioning of individuals through each stage of life from infancy to senior adults. It covers the physiological, biochemical, sociological, and developmental factors that affect nutrient requirements, deficiencies, and recommendations at various stages of the life cycle. In order to address nutritional needs, the course also provides specific community nutrition methods for planning, developing, and implementing healthy eating interventions. Special topics include heart disease, diabetes, pregnancy, and lactation, food habits of children, and those associated with aging.

**Credits: 3**  
**Every Spring**

### HS 350 Health Behavior Change
This course seeks to heighten understanding of the social and behavioral factors that contribute to health decisions and behaviors, with an ultimate goal of learning how to utilize these factors in improving public health efforts. Students will learn to apply the science of health behavior change in their own lives and the lives of people in the community, home, school, or work setting. The course is appropriate for students interested in
HS 355 Diversity and Health Disparities
This course will explore the disparities in health status, life expectancy and healthcare in the United States. Important factors such as diversity, culture, socio-economic status, gender, geography, and access will be analyzed. Students will learn a systematic approach to the process of achieving culture competence and skills necessary to deliver health programs and services with a diverse population.
Credits: 3
Every Fall and Spring

HS 361 Health Coaching Certification Preparations
This course is designed to provide theoretical knowledge and practical skills in preparation for the well-recognized American Council of Exercise (ACE) national certification exam in Health Coaching. Topics include effective coach-client communication techniques, understanding behavioral, nutritional, and physiological sciences (particularly as they relate to the client with obesity), health screening and assessment, guidelines for designing and implementing safe and effective exercise, wellness, and health programs. In addition, students will learn about the legal professional responsibilities and roles of the health coach. This course requires additional fees.
Credits: 3
Cross-Listings: ESW 193, HS 393
Every Fall

HS 375 Basic Skills in Health and Exercise Psychology
Basic Skills in Health and Exercise Psychology will teach students the necessary interviewing skills and strategies to build healthy, supportive, and therapeutic working relationships with the athlete(s) and/or exerciser(s). In addition, using evidenced-based counseling, health, and exercise psychological principles, theories, and techniques, students will develop the foundational skills needed to communicate within health and/or exercise settings. This course will be taught in a blended environment which will include online activities and in-class workshops that will require students to apply and practice course material in both traditional and online classroom environments.
Credits: 3

HS 393 Exercise Training for Individuals With Parkinson’s Disease
Through lecture and clinical study students will learn to design exercise training programs for individuals with Parkinson’s disease in a group setting by implementing cardiovascular and resistance training to improve and maintain physical function and quality of life. Students will become familiar with the role of community-based support groups and how to build a relationship as health professionals with support group members. Students will observe functional assessments of individuals with Parkinson’s performed by faculty and staff of the program and will learn about ethical and safety standards during evaluation and exercise. The lecture portion of the class will provide basic information about the causes, presentation, progression, and treatment of Parkinson’s disease with special emphasis on the role of exercise as a non-medical treatment. The role of government funding and advocacy will also be considered for conditions like Parkinson’s disease that require significant long-term financial, health, and socio-emotional support.

Cross-Listings: ESW 193, HS 393
Every Fall and Spring

HS 400 Introduction to Health Care Management
This course is designed to provide students with the knowledge, skills, and competencies needed to obtain entry-level positions in various areas of health care delivery settings, including hospitals, medical group practices, government agencies, home health care agencies, long-term care facilities, private and group practice settings, insurance institutions, and various clinical and nonclinical settings. Students will explore important issues in health care such as cost management, ethics, marketing, strategic planning, information technology, case management, and human resources. The prerequisite of HS 300, 325, 355 or 410 is required.
Credits: 3
Every Fall and Spring

HS 410 Healthcare Organizations and Delivery
This course is designed to help students understand the complexities of the US healthcare delivery system. American health care delivery will be presented in the context of current developments in health reform with references to specific provisions of the Affordable Care Act of 2010. Specific topics will include components of the US Health Care systems, health promotion and disease prevention, Medicaid, Medicare, inpatient facilities and services, managed care and integrated organizations, long-term care, financing health services for special populations, cost, access, and quality care, health policy, Healthy People 2020 as well as the future of health services delivery.
Credits: 3
Every Fall and Spring

HS 420 Essentials of Health Care Marketing
This course provides students with the knowledge of the principles of marketing and their application in healthcare. Students will examine the major environmental changes in healthcare as they relate to key areas of marketing. Topics include influencing health promotion and healthcare through marketing, issues and value to the customer, new health care delivery models, increasing competition and linking theory with actual marketing strategies. Real life examples, case studies, simulations and group presenters from the field will enhance the presentation of course content.
The prerequisite of HS 400 is required.
Credits: 3
Every Fall and Spring

HS 430 Research in the Health Professions
In this course, you will study the basic methods used in health science research and learn how to interpret the findings from this research. You will be introduced to the scientific method, research ethics using human subjects, causation theory, hypothesis formation, measurement theory, quantitative and qualitative research methods, evaluation research and descriptive statistics. This course will be writing intensive and include a variety of class activities to help develop your methodological skills: critiquing research articles, using the World Wide Web, analyzing social data, writing, discussions, and working on a research project. This course fulfills the writing across the curriculum (WAC) graduation requirement. As such, writing assignments are a major component of the course grade.
The prerequisite of MTH 100 or PSY 150 is required.
Credits: 3
Every Fall and Spring

HS 460 Ethical and Legal Aspects of Healthcare
This course will focus on the ethical and legal dilemmas facing health professionals and administrators in planning and delivering quality healthcare and prevention services. Basic principles and practices of health ethics and law will be presented and applied through the use of case studies and role play. Topics covered included: patient rights, government regulations, HIPPA requirements and confidentiality, ethics of quality care, incident reporting, protecting health information, precedent-setting court cases, financing healthcare and prevention services, tort reform and culture of compassion and truth telling. Students will develop critical thinking skills needed for the ethical decisions they will confront in the health care environment.
Credits: 3
Every Fall and Spring

HS 464 Healthcare and Human Resource Management
This course will provide an introduction to Human Resource Management (HRM). Students will be exposed to an overview of human resource policies, applications and competencies used within the healthcare field. Students will gain an understanding of the role of Human Resources, aspects of healthcare management, and discover strategies used by organizations, and mandated...
The pre-requisite of HS 400 is required.  
Credits: 3  
Every Spring

**HS 471 Health Program Planning**
Health promotion initiatives are planned, developed, and implemented to prevent illness, diseases, and injuries. Comprehensive, evidence-based, and cost-effective health promotion initiatives, including strategies, policies, and programs, are designed to increase the longevity and quality of life in Americans, while reducing health care costs on individuals, families, their employers, and the government. In this course, students receive an overview of the planning, development, and implementation of health promotion programs. This course will also be writing intensive and include a variety of class activities to help develop your writing and analytic skills.  
The pre-requisite of HS 430 is required.  
Credits: 3  
Every Fall and Spring

**HS 474 Autism Spectrum Disorders and Other Developmental Disabilities**
This course is designed to provide an overview of Autism Spectrum Disorders and Intellectual Disabilities, characteristics, causation, screening techniques, diagnosis and treatments of autism from medical and neurological perspective. Issues such as classification, diagnostic instruments, communication assessments and skill development will be addressed. The student will gain understanding of the cognitive and social functioning of the person with ASD with a particular emphasis on style of learning, theory of mind, role of executive functioning, over selectivity, joint attention, generalization difficulties and health issues. Normal human growth and development in comparison to atypical development stages will be addressed in the cognitive, motor, and language developmental areas. Students who complete this course will have an understanding of ASD and Intellectual Disabilities and the role of the family during diagnosis and treatment.  
Credits: 3  
Every Fall

**HS 477 Applied Behavior Analysis and Program Design**
This course will provide students with the understanding of Applied Behavior Analysis both in theory and practice. Students will learn the principles of ABA such as positive reinforcement, fixed schedules of reinforcement, task analysis, prompt fading, functional behavioral analysis, positive behavior support, self reinforcement, modeling, discrete trial, picture activity schedules, picture rehearsal and token economies while applying these principles in the wellness, leisure, habilitation and residential programs. The unique needs and characteristics of each individual with a developmental disability will be explored from infancy into adulthood to develop instructional strategies and behavior management programs. Various program models will be investigated throughout the individual's life cycle in various settings.  
Credits: 3  
Every Fall

**HS 478 Case Management Services**
This course will examine concepts and principles of case management practice with special populations. The core functions of case management practice in a range of settings are addressed in relationship to perspectives of people with disability, person-centered planning, the inclusion movement, politics of reasonable accommodation, Americans and Disabilities Act, self-empowerment, communication and collaborate planning and other factors facing people with disability, as well as the fields of professional practice.  
Credits: 3  
Every Spring

**HS 479 Case Managements Practice with Populations at Risk**
This course provides students the opportunity to hear case managers present actual cases based on "case of the week model." Students will develop hands on experience through presentations from experts in the varied fields in which case management is practiced. Students will build on their case management knowledge by applying theories to real work case management situations.  
The pre-requisite of HS 478 or SWK 134 is required  
Credits: 3  
Every Spring

**HS 480 Stress Management**
An analysis of the sources and consequences of stress and stress reaction in a variety of daily living settings; examination of a variety of instruments used to measure stress levels. Exploration of personal lifestyle with regards to present stress levels and coping abilities; Practical application of intervention techniques designed to enhance adjustment to the demands of stress. This course will be helpful to all students for their personal and professional lives. Offered online.  
Credits: 3  
Every Fall and Spring

**HS 490 Practicum**
The student, in consultation with the instructor will complete a minimum of 120 hours of fieldwork at a medical, social service or public health agency/organization. This is a culmination course designed to integrate theory and application acquired throughout the Health Science Curriculum. The student is required to attend scheduled course sessions on campus and satisfactorily complete all assignments as outlined in course syllabus.  
The student must be active in the Health Science or Public Health major, have taken HS 471 and must be a Senior in order to register for this course.  
Credits: 3  
Every Fall and Spring

**HS 497-499 Independent Study**
Students taking the Independent Study are expected to research an aspect of Health Science under the supervision of a faculty advisor. Included in this research can be a practicum/internship experience of a minimum of 30 hours. Alternatively, a student is able to produce a study of
an approved topic, including a thorough literature review and assessment of the topic. With both options, a final summary project, pre-approved by the faculty advisor, will be presented at the end of the experience.

Credits: 1

On Occasion
LIU Brooklyn

SCHOOL OF ENGINEERING, COMPUTER SCIENCE AND ARTIFICIAL INTELLIGENCE

The School of Engineering, Computer Science and Artificial Intelligence provides students with fundamental and applied knowledge of computer and digital sciences. Our goal is to develop future leaders with skills and experience sufficient to launch careers in rapidly-expanding fields, including but not limited to data acquisition, analysis and communication. Given the predominance of data in today’s world, we emphasize intersections of digital engineering, computers science and artificial intelligence with other scientific and real-world disciplines and applications. Students engage in meaningful research, with opportunities to actively contribute to scientific learning, with the potential for new breakthroughs and publications. A degree from the School of Engineering, Computer Science and Artificial Intelligence can offer many paths to future success and the ability to make meaningful contributions to the planet and to society. The degrees offered include a Bachelor of Science and Master of Science in Artificial Intelligence or Computer Science.

DEPARTMENT OF DIGITAL ENGINEERING

B.S. Artificial Intelligence

The Bachelor of Science degree program in Artificial Intelligence is one of the first degrees of its kind in the country. Students of this program will build the foundational knowledge necessary to design computational systems that exhibit “human-like intelligence” such as the ability to interpret sensory input, learn from experience, understand human language, and support intelligent decision-making. Graduates will have the skill-set necessary to meet industry demand for workers able to contribute to research and development in Artificial Intelligence across all industry sectors. The program begins with introductory courses in programming, computer science, mathematics, and statistics that provide a firm technical foundation. The curriculum then introduces core artificial intelligence concepts and techniques including state-space search, game-playing, machine learning, neural networks, and deep learning with applications to various domains (e.g. computer vision, natural language processing and understanding).

The program is supported by a cutting-edge learning and design center which will provide students with the opportunity to develop research projects and prototypes with the same big data and artificial intelligence platforms used in cutting-edge industry applications.

Artificial Intelligence, B.S. Requirements

Graduation Requirements

Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin.

Orientation

FYS 01 First Year Seminar 1.00

Core Curriculum Requirements (30 Credits):

- **Humanities**
  - English Composition - ENG 16 or 16 X 3.00
  - English Literature: ENG 61, 62, 63 or 64 3.00
  - Philosophy: PHI 60 3.00
  - Foreign Language 3.00
  - Power and Politics: POL 11 3.00

- **Social Sciences**
  - History (HIS 2 required) 3.00
  - Economics (ECO 2 required) 3.00
  - Psychology (PSY 3 required) 3.00

- **Science and Mathematics**
  - See Required Math and Science courses below

- **Communication, Visual & Performing Arts**
  - Oral Communications: SPE 3 3.00
  - Art, Dance, Journalism, Music, Theatre, Media Arts (ART 61 required)

- **Required Math and Science Courses (30 credits)**
  - BIO 26 DNA and Human Life 4.00
  - MTH 40 Calculus I 4.00
  - MTH 100 Introductory Statistics 3.00
  - MTH 101 Calculus II 4.00
  - MTH 102 Calculus III 4.00
  - MTH 122 Linear Algebra 3.00
  - PHY 31 General Physics 4.00
  - PHY 32 General Physics II 4.00

Artificial Intelligence, B.S. Requirements

All of the following are required (59 Credits):

- AI 102 Object Oriented Programming I 4.00
- AI 117 Object Oriented Programming II 4.00

Artificial Intelligence Courses

AI 102 Object Oriented Programming I
This course introduces the fundamental concepts of programming from an object-oriented perspective. Topics are drawn from classes and objects, abstraction, encapsulation, data types, calling methods and passing parameters, decisions, loops, strings, arrays and collections, documentation, testing and debugging, design issues, and inheritance. The course emphasizes modern software engineering and design. Three hours lecture, one hour laboratory.
Credits: 4
Every Fall and Spring

AI 117 Object Oriented Programming II
This course covers the most advanced features of the C++ programming language that are essential to the creation of complex structures and their applications in design and developing programs using software engineering concepts: structures, objects and classes, function and operator overloading, collections, strings, recursion, file and string streams, pointers and dynamic data structures, inheritance and dynamic polymorphism, templates, exception handling, Standard Template Library (STL), and advanced C++ topics. Three credits; one-hour laboratory.
A pre requisite of AI 102 is required.
Credits: 4
Every Fall and Spring

AI 130 Algorithms and Data Structures
A study of the design and representation of information and storage structures and their associated implementation in a block-structured language; linear lists, strings, stacks, queues, multi-linked structures, representation of trees and graphs, iterative and recursive programming techniques; storage systems, structures and allocation; file organization and maintenance; and sorting and searching algorithms. Three hours lecture, one hour laboratory.
A pre requisite of AI 117 is required.
Credits: 3
Every Fall

AI 132 Discrete Structures
A study of the treatment of discrete mathematical structures and relevant algorithms used in the programming and computer science. Topics include the list, tree, set, relational and graph data models and their representation and use in searching, sorting and traversal algorithms; also, simulation, recursive algorithms and programming, analysis of running time of algorithms, and an introduction to finite state machines and automata. Three hours lecture, one hour laboratory.
A pre requisite of AI 130 is required.
Credits: 3
Every Fall

AI 148 Database Systems
The course is designed to impart the concepts and the practical aspects of database management systems and to provide an understanding of how data resources can be designed and managed to support information systems in organizations. Topics covered include: database system functions, Entity-Relationship (E-R) modeling, and relational database model, basic normalization techniques, data integrity, and SQL query language.
Three credits; one-hour laboratory.
Credits: 3
Every Fall

AI 162 Introduction to Artificial Intelligence
The course covers the basic principles of artificial intelligence. You will learn some basic AI techniques, the problems for which they are applicable, and their limitations. The course content is organized roughly around what are often considered to be three central pillars of AI: Search, Logic, and Learning. Topics covered include basic search, heuristic search, game search, constraint satisfaction, knowledge representation, logic and inference, probabilistic modeling, and machine learning algorithms. Three credits; one hour laboratory.
A pre requisite of AI 117 or CS 117 is required.
Credits: 3
Every Spring

AI 164 Software Engineering
A study of software project management concepts, software cost estimation, quality management, process involvement, overview of analysis and design methods, user interface evaluation, and design. Also considered are dependable systems - software reliability, programming for reliability, reuse, safecritical systems, verification and validation techniques; object-oriented development; using UML; and software maintenance. Three hours lecture, one hour laboratory.
A pre requisite of AI 130 and AI 162 is required.
Credits: 3
Every Fall

AI 166 Data Mining and Business Intelligence
The study of advanced PROLOG programming, including advanced topics in knowledge representation and reasoning methods, which include semantic networks, frames non-monotonic reasoning and reasoning under uncertainty. A study is made of concepts and design techniques in application areas, such as natural-language processing, expert systems and machine learning. Introduction is made to genetic algorithms and neural networks. Three hours lecture, one hour laboratory.
A pre requisite of AI 130 and AI 162 is required.
Credits: 3
Every Fall

AI 168 Theory of Computation
The course investigates two fundamental questions about computing: 1) computability: can a problem be solved using a given abstract machine? And 2) complexity: how much time and space are required to solve the problem? The course explores these questions by developing abstract models of computation and reasoning about what they can do and cannot do efficiently. The abstract models include finite automata, regular languages, context-free grammars, and Turing machines. Additional topics covered include solvable and unsolvable problems, complexity classes P and NP, and NP-completeness.
Three credits; one-hour laboratory.
The pre requisite of AI 230 is required.
Credits: 3
Every Fall

AI 231 Natural Language Processing
This course serves as an introduction to natural language processing (NLP), the goal of which is to enable computers to use human languages as input, output, or both. NLP is at the heart of many of today's most exciting technological achievements, including machine translation, automatic conversational assistants and Internet search. The course presents the variety of ways to represent human languages as computation systems, and how to exploit these representations to write programs that do useful things with text and speech data in the areas of translation, summarization, extracting information, question answering, and conversational agents. The course will connect some central ideas in machine learning (e.g. discrete classification) to linguistics (morphology, syntax, semantics).
Three credits; one-hour laboratory.
A pre requisite of AI 162 is required.
Credits: 3
Every Spring

AI 232 Artificial Intelligence Language Understanding
The central focus of the course is to enable robust and effective human-computer interaction between humans and machines without supervision. To infer intent and deal with human language ambiguities in in text and speech, the course
combines advanced concepts of Natural Language Processing, Neural Networks and Deep learning. Using core NLP technologies, the course takes an experimental approach to develop prototypes of chat and speech enabled intelligent agents that can effectively interact with the public without supervision.

Three credits; one-hour laboratory.  
A pre requisite of AI 233 is required.  
Credits: 3  
Every Fall

**AI 248 Introduction to Big Data Computing**

This course provides an in-depth coverage of various topics in big data from data generation, storage, management, to data analytics with focus on the state-of-the-art technologies, tools, architectures and systems that form today’s leading edge big data computing solutions in various industries. The course will focus on the mathematical and statistical models that are used in learning from large scale data processing the modern systems for cluster computing based on Map-Reduce pattern such as Hadoop MapReduce and Apache Spark; the implementation of big data solutions, including student projects on real cloud-based systems such as Amazon AWS, Google Cloud or Microsoft Azure.

Three credits; one-hour laboratory.  
A pre requisite of AI 163 or CS 163 is required.  
Credits: 3  
Every Spring

**AI 250 Machine Learning**

Machine learning systems process large volumes of data at high speed to make predictions or decisions without human intervention. Machine learning as a field is now incredibly pervasive, with applications spanning from business intelligence to homeland security, from analyzing biochemical interactions to structural monitoring of aging bridges, from automated manufacturing to autonomous vehicles, etc. This class will familiarize students with a broad cross-section of models and algorithms for machine learning and their applications in various domains.

Three credits; one-hour laboratory.  
A pre requisite of AI 162 is required.  
Credits: 3  
Every Spring

**AI 255 Cloud Computing Concepts**

The course presents a top-down view of cloud computing, from applications and administration to programming and infrastructure. Its main focus is on parallel programming techniques for cloud computing and large scale distributed systems which form the cloud infrastructure. The topics include: overview of cloud computing, cloud systems, parallel processing in the cloud, distributed storage systems, virtualization, security in the cloud, and multicores operating systems. Students will study and apply state-of-the-art solutions for cloud computing developed by Google, Amazon, Microsoft, Yahoo, VMWare, etc. Three credits; one-hour laboratory.  
A pre requisite of AI 248 is required  
Credits: 3  
Every Fall

**AI 260 Deep Learning**

This course is an introduction to deep learning where algorithms extract layered high-level representations of data that maximizes performance on a given task. Topics covered include basic neural networks, convolutional and recurrent network structures, deep unsupervised and reinforcement learning, and applications to various problem domains (e.g. speech recognition, computer vision, hand writing recognition, etc). Three credits; one-hour laboratory.  
A pre requisite of AI 250 is required.  
Credits: 3  
Every Spring

**AI 265 Introduction of Modern Cryptography**

Cryptography is the formal study of the notion of security in information systems. The course will offer a thorough introduction to modern cryptography focusing on models and proofs of security for various basic cryptographic primitives and protocols including key exchange protocols, commitment schemes, digital signature algorithms, oblivious transfer protocols and public-key encryption schemes. Applications to various problems in secure computer and information systems will be briefly discussed including secure multiparty computation, digital content distribution, evoting systems, digital payment systems, and cryptocurrencies.

Three credits; one-hour laboratory.  
Credits: 3  
Every Spring

**AI 300 Artificial Intelligence Capstone Project**

The capstone project course is an integrative and experiential opportunity for students to apply the knowledge and skills that they have gained across the program curriculum. Students who select applied projects participate in the identification of an artificial intelligence problem or challenge, develop a project proposal outlining an approach to the problem’s solution, implement the proposed solution, and test or evaluate the results. Students who select a theory-based project conduct original research (e.g. develop a new algorithm or new heuristics) and evaluate its strengths and limitations. Three credits; one-hour laboratory.  
A co requisite of AI 260 is required.  
Credits: 3  
Every Spring
B.S. Computer Science

The B.S. in Computer Science program provides students with the knowledge and technical skills necessary to design, develop and understand a variety of software systems and real-world applications.

The job prospects for B.S. Computer Science majors is very good. According to the Bureau of Labor Statistics (BLS), the computer and information technology field is expected to grow at 11%—which is faster the national average and the pay is competitive.

B.S. Computer Science

Liberal Arts Elective Requirements: 22 Credits

| Introductory Arts & Sciences Electives (1) | 19 credits |

Advanced Arts & Sciences Electives (2) 3 credits

(1) Any introductory or advanced course offered by Conolly College
(2) Any advanced course (numbered over 100) offered by Conolly College

Advanced Credit Requirement

Minimum of 48 Advanced Credits is Required: Courses numbered above 100 with the exception of School of Business, Public Administration and Information Science courses numbered 101, 110, 111, 200, and 201 are considered advanced courses and must be taken to meet the advanced credit requirement.

Major Requirements

Computer Science Courses: 35 Credits

| CS 101 | Fundamentals of Computer Science and Information Sciences | 3.00 |
| CS 102 | Programming I                                             | 4.00 |
| CS 117 | Programming II                                            | 4.00 |

Advanced Computer Science Electives: 13 Credits

Any computer science course numbered over 102.

Business or Computer Science Electives: 9 Credits

Any introductory or advanced course offered by the School of Business, Public Administration and Information Sciences.

Credit and GPA Requirements

Minimum Total Credits: 120
Minimum Liberal Arts and Sciences Credits: 60
Minimum Major Credits: 60
Computer Science Courses

BUS 110 Foundations of Business Information Systems
This course focuses on the key components of information systems—people, software, hardware, data, and communication technologies—and how these components can be integrated and managed to create competitive advantage. The course helps students develop practical competencies in the use of various computer systems and software and provides a theoretical and practical introduction to systems development concepts, technology acquisition, and various types of application software which are essential to be competitive.
Credits: 4
Every Fall and Spring

BUS 330 Business Analytics
This course introduces students to the fundamental concepts of data analytics that are most relevant to businesses today. Topics covered include, but are not limited to, data management, data mining, visualization, descriptive analytics, predictive analytics, optimization, and simulation. Students analyze real-world business data using various business analytics techniques. Three lecture hours, one-hour lab.
Pre-requisites: CS 103 or CS 102 and BUS 211
Credits: 4
Every Spring

CS 101 Fundamentals of Computer Science and Information Sciences
Course topics include computer organization, information processing, algorithms, and programming. Operating Systems, Databases, and Computer Networks, along with current views on the theory and practice of Software Engineering, and the basics of Artificial Intelligence are also explored. Three lecture hours, one-hour lab.
Credits: 3
Every Fall and Spring

CS 102 Object Oriented Programming I
This course introduces the fundamental concepts of programming from an object-oriented perspective. Topics are drawn from classes and objects, abstraction, encapsulation, data types, calling methods and passing parameters, decisions, loops, strings, arrays and collections, documentation, testing and debugging, design issues, and inheritance. The course emphasizes modern software engineering and design. Three hours lecture, one-hour laboratory. (4 Credits)
The pre-requisite of CS 101 is required.
Credits: 4
Every Fall and Spring

CS 103 Programming I for Business
Problem solving, algorithmic design, and implementation using the Python programming language are presented. Topics include fundamental data types and associated array types, I/O processing, conditional and loop constructs, use and implementation of functions. Non-primitive data structures are introduced. A brief overview of object-oriented programming (OOP) concepts is given. Throughout the course, good programming styles and sound program construction are emphasized. Three lecture hours, one-hour lab. Not open to computer science or technology management majors.
The pre-requisite of CS 101 is required.
Credits: 4
Every Fall

CS 117 Object Oriented Programming II
This course covers the most advanced features of the C++ programming language that are essential to the creation of complex structures and their applications in designing and developing programs using software engineering concepts: structures, objects and classes, function and operator overloading, collections, strings, recursion, file and string streams, pointers and dynamic data structures, inheritance and dynamic polymorphism, templates, exception handling, Standard Template Library (STL), and advanced C++ topics. Three lecture hours, one-hour laboratory. (4 Credits)
The pre-requisite of CS 102 is required.
Credits: 4
Every Fall and Spring

CS 118 Computer Architecture
The course provides a comprehensive study of computer architecture and organization. Boolean algebra is introduced to teach digital devices. The operational units and their interconnections that realize the architectural specification of a computer are studied and their overall performance is analyzed. The design and implementation of a simple processor is an integral part of the course. Programming at different levels is also introduced.
The pre-requisite of CS 102 is required.
Credits: 3
Every Fall

CS 120 Web Development
Web page and Common Gateway interface (CGI) application development. Topics include HTML, Web browser and server communication using HTTP and HTTPS, browser state tracking, basic web server configuration settings, Client Side Java Scripting, back end database connectivity, and CGI application development using common tools and languages. Students are required to develop and complete several web based applications such as a shopping cart style website. Three lecture hours, one-hour laboratory. (4 Credits)
The pre-requisite of CS 102 is required.
Credits: 3
Every Fall and Spring

CS 128 Information Systems Analysis and Design
A comprehensive introduction to the fundamental concepts of systems analysis and design: industrial perspective of information technology; software process models, human factors, project management; requirements of engineering and analysis; and system modeling techniques, design methodologies, post-implementation analysis, and CASE tools support. Three lecture hours, one-hour laboratory.
The pre-requisite of CS 117 is required.
Credits: 4
Every Spring

CS 130 Algorithms and Data Structures I
A study of the design and representation of information and storage structures and their associated implementation in a block-structured language; linear lists, strings, stacks, queues, multi-linked structures, representation of trees and graphs, iterative and recursive programming techniques; storage systems, structures and allocation; file organization and maintenance; and sorting and searching algorithms. Three lecture hours, one-hour laboratory.
The pre-requisite of CS 117 is required.
Credits: 3
Every Fall

CS 132 Discrete Structures in Computer Science
A study of the treatment of discrete mathematical structures and relevant algorithms used in the programming and computer science. Topics include the list, tree, set, relational and graph data models and their representation and use in searching, sorting and traversal algorithms; also, simulation, recursive algorithms and programming, analysis of running time of algorithms, and an introduction to finite-state machines and automata. Three lecture hours, one-hour laboratory.
The pre-requisite of CS 130 is required.
Credits: 3
Every Spring

CS 135 Compiler Theory and Design
An examination of fundamental compiler organization. Topics include lexical analysis, syntax analysis, abstract syntax trees, symbol table organization, code generation and code optimization. Students are expected to implement a compiler for a given language, using tools such as LEX and YACC. Three lecture hours, one-hour laboratory.
The pre-requisite of CS 130 is required.
Credits: 3
On Occasion

CS 150 Operating Systems
An introduction to the fundamental concepts of operating systems: architectural support and operating systems interface; system calls; and process structure, concepts, management, interprocess communication, threads, memory management and virtual memory, file system interface and its implementation. Case studies from UNIX and Windows NT are examined. Three lecture hours, one-hour laboratory.
The pre-requisite of CS 117 is required.
Credits: 4
Every Spring
CS 156 Internet Programming
A study of application programming for the Internet. Emphasis is on Java programming and object-oriented programming using the Java language. Java topics include classes, interfaces, polymorphism, threads, database-access, and applets. Students are required to complete projects that run on a web server. Three hours lecture, one hour laboratory. Pre-requisite of CS 117 is required. Credits: 3 On Occasion

CS 161 Object-Oriented Programming
Comprehensive treatment of object-oriented programming design techniques in C++. Specific topics include encapsulation, object classes, inheritance, polymorphism and genericity. Templates and the Standard Template Library (STL) are thoroughly presented and used in program construction. Run-Time Type Identification (RTTI) is also covered. Three hours lecture, one hour laboratory. Pre-requisite of CS 130 is required. Credits: 3 On Occasion

CS 162 Artificial Intelligence I
An introduction to the processes by which machines simulate intelligence. Topics include knowledge-representation techniques, including the predicate logic, state space problem formulation, logical reasoning methods, exhaustive and heuristic search strategies, rule-based production systems and examples of expert systems. PROLOG programming explained comprehensively. Each student is required to implement a small rule-based system in PROLOG. Three hours lecture, one hour laboratory. The pre-requisite of CS 117 is required. Credits: 3 Every Spring

CS 163 Data Mining and Business Intelligence
The study of advanced PROLOG programming, including advanced topics in knowledge representation and reasoning methods, which include semantic networks, frames non-monotonic reasoning and reasoning under uncertainty. A study is made of concepts and design techniques in application areas, such as natural-language processing, expert systems and machine learning. Introduction is made to genetic algorithms and neural networks. Three hours lecture, one hour laboratory. Pre-requisites of CS 130 and CS 162 are required. Credits: 3 Every Fall

CS 164 Software Engineering
A study of software project management concepts, software cost estimation, quality management, process involvement, overview of analysis and design methods, user interface evaluation, and design. Also considered are dependable systems - software reliability, programming for reliability, reuse, safety-critical systems, verification and validation techniques; object-oriented development; using UML; and software maintenance. Three hours lecture, one hour laboratory. Pre-requisite of CS 130 is required. Credits: 3 Every Spring

CS 165 Component-based Software Development and Reusability
The course provides an in-depth introduction to reusability and Component-Based Software Engineering (CBSE). The basic concepts of components, interfaces, contracts, design patterns and frameworks are presented. Topics covered include: current Component specification techniques such as UML and the Object Constraint Language (OCL); Component Models and Technology such as COM, DCOM, .NET; and Component composition and Integration. Pre-requisite of CS 128 or CS 164 is required. Credits: 3 On Occasion

CS 166 Special Topics in Computer Science
Discussion of topics of current interest in computer science in the area of the instructor's specialty. Topics include: ASP Dot-Net Programming, E-commerce Developments and Applications, Web Animation, iPhone applications, and other topical developments in the field. One hour laboratory may be included, depending on the topic. Credits: 3 On Occasion

CS 168 Special Topics in Computer Science
Discussion of topics of current interest in computer science in the area of the instructor's specialty. Topics include: ASP Dot-Net Programming, E-commerce Developments and Applications, Web Animation, iPhone applications, and other topical developments in the field. One hour laboratory may be included, depending on the topic. Credits: 3 On Occasion

CS 169 Special Topics in Computer Science
Discussion of topics of current interest in computer science in the area of the instructor's specialty. Topics include: ASP Dot-Net Programming, E-commerce Developments and Applications, Web Animation, iPhone applications, and other topical developments in the field. One hour laboratory may be included, depending on the topic. Credits: 3 On Occasion

CS 170 Computer Science Internship
An opportunity to extend classroom knowledge and gain direct practical experience in the computer field as an intern with a New York City government agency or with a major corporation in the metropolitan area. Students receive meaningful internship assignments and are directed by professionals in the normal working environment. Each student is required to schedule meetings with a faculty adviser, who provides academic supervision. May be taken twice for up to six credits. Completion of sophomore year and recommendation of the Department Chair are required. Credits: 3 On Demand

CS 172 Information Systems Analysis and Design
A comprehensive introduction to the fundamental concepts of systems analysis and design: industrial perspective of information technology; software process models, human factors, project management; requirements of engineering and analysis; and system modeling techniques, design methodologies, post-implementation analysis, and CASE tools support. Three hours lecture, one hour laboratory. The pre-requisite of CS 117 is required. Credits: 3 Every Fall

MIS 300 Strategic Information Technology
This course provides students with insights and knowledge they need to become active participants in the implementation and management of strategic information technology. The course demonstrates how IT relates to competition and even survival of today's corporations. Students learn how to recognize opportunities for companies and in the work environment and apply current technologies in innovative ways. The pre-requisites of MAN 353, CS 148 and CS 158 are required. Credits: 3 On Demand
ROOSEVELT SCHOOL

The Roosevelt School provides students with a foundation in international relations and diplomacy with the goal to develop future leaders with proficiency in advancing policy solutions around the globe. Students engage in transformational research, in conjunction with diplomacy and policy, to advance global progress. As the world becomes increasingly connected, there exists a need for professionals who possess cross-cultural capabilities in technology, management, and government relations; as such, the B.A. in International Relations & Diplomacy with an MBA option and Ph.D. in Information Studies are offered under the Roosevelt School to prepare students for a variety of international careers. The Roosevelt School is also the home of the Steven S. Hornstein Center for Policy, Polling, and Analysis. Through independent polling, the Center supports empirical research and analysis on a wide range of public issues. The Global Service Institute is also under the umbrella of the Theodore Roosevelt School.

DEPARTMENT OF INTERNATIONAL RELATIONS AND DIPLOMACY

B.A. International Relations & Diplomacy

The Roosevelt School at Long Island University offers immersive studies in international relations and diplomacy, public policy, administration, and leadership through a comprehensive range of degree programs. The Roosevelt School experience is defined by the excellence of the Roosevelts' legacy.

The prestigious Roosevelt School’s Bachelor of Arts in International Relations & Diplomacy prepares graduates for domestic and international leadership positions. The International Relations and Diplomacy’s vibrant curriculum engages students in a comprehensive examination of international politics, negotiation and leadership. Coursework is supplemented by internships at renowned institutions, including the United Nations, for a richer understanding of international affairs. These educational and occupational experiences will prepare you for positions with multinational corporations, private foundations, think tanks, non-profit organizations and government agencies, and are excellent preparation for graduate study.

B.A. International Relations

Program Code: 39895 / HEGIS: 2210

Graduation Requirements

Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:

Orientation

FYS 01  First-Year Seminar  1.00

Core Curriculum Requirements

(34-35 credits)

Humanities

English Composition - ENG 16 or 16 X  3.00
English Literature:  ENG 61, 62, 63 or 64  3.00
Philosophy: PHI 60  3.00
Foreign Language  3.00

Social Sciences

History  3.00
Anthropology, Economics, History, Political Science, Psychology, or Sociology  3.00
Anthropology, Economics Political Science, Psychology, Sociology  3.00

Science and Mathematics

Mathematics: MTH 15 or 16 (3-4 credits)  4.00
Laboratory Science: BIO, CHM, PHY  4.00

Communication, Visual & Performing Arts

Oral Communications: SPE 3  3.00
Art, Dance, Journalism, Music, Theatre, Media Arts  3.00

Ancillary Requirement

To satisfy this requirement, majors must complete two courses numbered 100 or above in one of the following subjects: Economics, History, Psychology, Sociology, Anthropology.

Major Requirements - 36 Credits

The following courses are required:

POL 11  Power and Politics  3.00
IR 101  Great Power Politics  3.00
IR 111  Theories of International Relations  3.00
IR 135  United Nations - Theory  3.00
IR 136  United Nations - Participation  3.00
POL 150  World Politics  3.00
POL 185  Seminar Political Inquiry  3.00
IR 210  International Political Economy  3.00

Electives (three courses, 9 credits)

Capstone (one of the following):

Credit and GPA Requirements

Minimum Total Credits: 120
Minimum Liberal Arts and Sciences Credits: 90
Minimum Major Credits: 36
Ancillary Course Requirements: See above
### International Relations Courses

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Description</th>
<th>Credits</th>
<th>Alternate Years</th>
<th>On Occasion</th>
</tr>
</thead>
<tbody>
<tr>
<td>IR 101</td>
<td>Great Power Politics</td>
<td>This course offers an overview of the dynamics of strategic interaction between great powers, including the causes of conflict, origins of alliances, logic of coercion, sources of order, and definition of national interests. In a broad historical narrative, the course will discuss how the balance of power and the nature of relations between great powers have shifted from the pre-World War II era to the Cold War (bi-polarity), the post-Cold War period (uni-polarity), and the contemporary world system (multi-polarity). A prerequisite of IR 101 is required.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>IR 111</td>
<td>Theories of International Relations</td>
<td>This course analyzes the role of international relations theory, from ideology to history and mythmaking, in the historical, contemporary, and future implementation of policy. Important theoretical approaches to international relations under discussion include Realism, Liberalism, Nationalism, Marxism, and Democratic Peace. A prerequisite of IR 101 is required.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>IR 123</td>
<td>The Geopolitics of the Middle East</td>
<td>This course will focus on critical issues in the geopolitics of the Middle East region, broadly defined as extending from Libya to Iran. Students will be introduced to the forces structuring state relations in the post-Ottoman period, including pan-Arabism, Zionism, Baathism, nationalism, terrorism, democracy, and the Sunni-Shia divide. Critical junctures including Israeli independence, the Six-Day War, the Iran-Iraq War, The Gulf War, Operation Iraqi Freedom, the Arab Spring, and the rise of ISIS will be discussed. A prerequisite of IR 101 is required.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>IR 140</td>
<td>Global Languages Cross-Cultural Engagement</td>
<td>Understanding difference with a focus on nonverbal and highly differentiated cultural encounters, emphasizing self-awareness, awareness of customs, and a desire for understanding of the other. A prerequisite of IR 101 is required.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>IR 201</td>
<td>Non-State Actors</td>
<td>The established model of geopolitics is predicated upon the existence of, and interactions between states in the global system. This course will assess the impact of non-state actors such as religions, transnational corporations, human and environmental rights organizations, criminal networks, and terrorists on this model. Students will discuss whether the state system ever truly monopolized the terms of the debate in international relations, and the extent to which the contemporary state system has been compromised by the rise of increasingly salient non-state actors. Students will focus on what actions can be defined as terrorism, who uses them, why, and under what circumstances, as well as the determinants of their effectiveness. A prerequisite of IR 101 is required.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>IR 210</td>
<td>International Political Economy</td>
<td>IPE seeks to advance knowledge of how political institutions, processes, and actors influence economic interactions, and conversely, how economic institutions, processes, and actors affect political interactions. Students will investigate the role of domestic drivers in shaping global politics as well as the influence of global drivers on domestic politics. Institutions this course will focus on include: international and regional regimes, private authority structures, welfare policies, social and environmental policies, monetary and exchange rate policies, global integration, international trade, international development and equity, international finance, multinational corporations, NGOs, and corporate social responsibility. A prerequisite of IR 101 is required.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>IR 234</td>
<td>The Geopolitics of South Central, and East Asia</td>
<td>This course will focus on critical issues in the geopolitics of East Asia in the post-World War II era, with particular attention paid to decolonization, development, national identity, sovereignty, and regional hegemony. Case studies under consideration will include the transition from Apartheid to democracy in South Africa, civil war in Liberia and Sierra Leone, the collapse of state authority in the Congo, and the persistence of anarchy in Somalia. A prerequisite of IR 101 is required.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>IR 301</td>
<td>Race, Nationalism and Identity</td>
<td>This course will analyze the role of identity politics in international relations. Students will explore how the interplay between national and transnational cultural identities has driven foreign policy initiatives including support for imperialist, revanchist, and secessionist agendas. A prerequisite of IR 101 is required.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
<tr>
<td>IR 321</td>
<td>Technology and International Relations</td>
<td>This course provides an overview of the role advances in technology have played in forcing changes to traditional assumptions about international relations. Students will focus on how breakthroughs in transportation technologies (e.g., the railroad, flight, space travel) and communications technologies (e.g., radio, TV, the Internet) have enhanced social and economic interactions globally, and how the rise of weapons of mass destruction (e.g., chemical, biological, nuclear) have altered the balance of power militarily. Students will learn about how these weapons work, why states (and increasingly, non-state actors) seek to develop them, and attempts to prevent proliferation. A prerequisite of IR 101 is required.</td>
<td>3</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
### B.F.A. Acting for Theatre, Film & Television

This B.F.A. program is designed for students interested in rigorous conservatory studio training in acting on stage in a theatre, and on-camera in film and television. The comprehensive sequence of study has a practical, professional application, preparing students for the modern acting industry. Classes in stage acting, voice & speech and movement are offered in partnership with The New Group, a renowned theatre company in New York City. At The New Group, students will study with accomplished professionals and seasoned actors. By studying under the studio model at a professional theatre company, our students will immerse themselves in the art of acting and performance, get to network with industry experts, and participate in masterclasses and talkbacks with actors performing in The New Group’s works. The on-camera component of the program will be taught by LIU faculty in our on-campus TV studio.

### Graduation Requirements

Students must satisfy the placement, proficiency, orientation and the core curriculum outlined in the Graduation Requirements section of this bulletin.

### Workshops/Production Requirement

One of the following:

- MA 102 Television Production I: 3.00
- MA 106 Video Workshop I: 3.00

### Required Writing Course

One of the following:

- MA 152 Screenplay: 3.00
- MA 1481 Introduction to Playwriting: 3.00
- THE 1221 Introduction to Playwriting: 3.00

### Required Directing Course

One of the following:

- MA 155 Directing The Moving Image: 3.00
- MA 1601 Directing I: 3.00
- THE 1201 Directing I: 3.00

### Credit Requirements

- Major Required Credits: 87
- Minimum Total Credits: 120
- Minimum Liberal Arts Credits: 30

### B.F.A. Film and Television

The LIU Brooklyn BFA in Film and Television is a comprehensive degree that prepares students for careers in the film and visual effects industries. The program provides a hands-on experiential learning approach enabling students to become involved in production projects spanning multiple genres. Starting in their first semester, students enrolled in the program will work with state-of-the-art equipment, hardware and software, and be mentored by industry professionals.

The BFA combines 36 credits in foundational and theory courses, providing students with a practical
understanding of the history, technology, and aesthetics undergirding the film and visual effects industries. Class instruction will be strengthened and supported by immersion into the creative process allowing students to work on film projects each semester. In the 5th and 6th semesters, students begin taking Filmmaking Studio (A, B, C, D). This sequence is designed as 12 credits of pure production. In addition, each student must take 21 credits of specialized electives to develop a particular area of skill in the areas of directing, cinematography, screenwriting, producing, editing and/or visual effects. Before students graduate, they will also complete at least one internship assignment at one of the many media companies, post-production companies or sound stages in the NYC area. In their final year students, will create their thesis project, (total of 6 credits) developed in conjunction with a mentor/ advisor. This thesis project will be exhibited as part of their thesis review in their final semester.

**B.F.A. Film and Television Graduation Requirements**

Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin.

### Credit Requirements

- Major Required Credits: 36
- Minimum Total Credits: 120
- Minimum Liberal Arts and Sciences Credits: 90
Acting/Theatre Courses

DNC 61 Dance Through Time
A look at dance in its time and place, with an eye to simultaneous development of corresponding art forms, lifestyles and government involvement in the arts. A survey is offered of the many forms that dance encompasses through an understanding of style, content, and time and place of origin, most lectures will be accompanied by videos, studio work or any of the previous combination. Satisfies the core art 61 requirement.
Credits: 3
Every Fall and Spring

TFT 100 Theatre History and Play Analysis
An orientation to the nature of theatre, students will examine the history of theatre and how to analyze play text including the five elements that make up the theatre: the playwright, the director, the actors, the designers, and the audience. Students will attend live performances and view videotaped performances to analyze the components that theatre is comprised of.
Credits: 3
Every Fall

TFT 120A Studio I - Acting, Voice and Movement
Rigorous training in voice, movement, and acting will take place in professional acting schools in New York City for six semesters.
Credits: 2
Every Fall

TFT 120B Studio 1 1 Voice
Rigorous training in voice will take place in professional acting schools in New York City. 2
Credits Offered every Fall

TFT 124C Studio 5 Movement
Rigorous training in movement will take place in professional acting schools in New York City. 2
Credits Offered on demand.

TFT 131 Business of Theatre, Film and Television
In this course, students are guided to approach the business as an "actorpreneur" ready to develop self-created works or artistic ventures in collaboration with partners. Students begin to understand the process of generating creative 'start-ups' and getting work out into the world to be recognized. Topics covered include pitching projects, accessing funding bodies, applying for grants, collaborating with the industry, promoting and producing independent theatre, and driving Film and TV projects.
Credits: 3
On Demand

TFT 130 The Contemporary Performance Industry
Students learn how to navigate the business side of the performance industry and market themselves as actors. They will learn how to prepare headshots, resumes, reels, develop websites, and how to build an online presence through social media. Furthermore, students will learn how to connect with industry professionals such as agents, managers, and casting directors and insures their information is in the proper industry databases. Students prepare and deliver challenging film/TV

TFT 144 On-Camera Performance IV
For this on-camera scene study class, students seek out robust, challenging material to improve their rehearsal and performance skills in front of the lens. Instructors support, guide, and rigorously challenge students and their character choices. Some work is in front of a camera, in close up, as students apply all of the skills they have developed. Students prepare and deliver challenging film/TV
scenes with a scene partner over the course of the term.
Credit: 3
On Demand

TFT 151 Introduction to Dance
A studio survey course that offers the tools with which to participate in and appreciate dance and music in relation to dance. Students come to appreciate the body as an instrument capable of many forms of expression while they build strength, flexibility and control through the kinesthetic understanding of a basic movement vocabulary.
Credit: 1
Not Set

TFT 160 Television Production I
Introduction to the principles and practice of multicamera TV studio production. This course covers the basic production roles and techniques including producing, directing, switching, scripting, shooting, audio, electronic graphics and on-camera performance. Students apply the skills learned in class to producing and directing a TV talk show and musical production.
Credit: 3
On Occasion

TFT 180 Performance in 21st Century Theatre and Media
Students study how live performance is shaped by the integration of digital technologies and how digital media is becoming more and more the platform of choice for streaming live performance. Through screenings, site visits and experimentation, student actors explore unconventional spaces and experiences that can be used for staging, composing, improvising and inventing new drama.
Credit: 3
On Demand

TFT 187 Film and Television Studies
A survey of the history and development of world cinema and television. Through screenings and discussions, students study this twentieth-century art form as developed by various countries, individuals and movements. The development of cinema and television as an industry and a part of the larger economy; as a series of technical innovations, as a history of aesthetic forms, as a social, cultural and political force and as a reflection of the ideas of its society are explored.

TFT 197 Production Lab VIII
This course offers a wide range of practical experience in a theatre production, both on stage and backstage. Students who are cast in the play get credit in this course for their work. Students who
want to work backstage are assigned to the following areas of production: technical and stage craft, such as set construction and painting, costumes, props, lighting; managerial, including box office, house and stage management, and advertising. Students, instructed by theatre professionals, are involved in each step of production, from the initial planning process through rehearsal and performance. Performers are required to work backstage to gain experience in technical theatre.

Credites: 3
Every Spring

TFT 199 Internship
This course provides students with an opportunity to gain field experience in theater, film, television and entertainment organizations. Examples of appropriate organizations are BAM, St. Ann’s Warehouse, Mark Morris Dance Group, Creative Artist Agency, Dreamworks, FOX Studios, Mtv, Nickelodeon, and Sony Pictures Studio.

Credites: 3
On Demand

TFT 200 Capstone I
Students begin to create final projects in their chosen fields of theatre, film or television or any combination thereof. Mentors will guide students through the process of creating the outline for their projects so that by the end of the semester they are ready to go into production in Capstone II.

Credites: 3
On Demand

TFT 201 Capstone II
Students go into production on their final projects guided by their mentors. This project is the culmination of their studies in the BFA program and prepares them for the field of their choice in the professional realm.

Pre-req: TFT 200
Credites: 3
On Demand

TFT 220 Showcase
Students will perform monologues and scenes in front of a panel of invited industry casting directors.

Credites: 3
On Demand

THE 1201 Directing I
The study and practice of directing for the theatre, emphasizing play selection and analysis, casting, rehearsal procedure, and the relationship of the director to the actor. Students learn staging in different performance environments. (Same as MA 160.1.) Prerequisite: At least one Theatre course or permission of the instructor.

Credites: 3
Cross-Listings: MA 1601, THE 1201
Every Fall

THE 1221 Introduction to Playwriting
The writing and structuring of monologues, scenes, one-act plays and, possibly, full-length plays. Emphasis is on particular limitations, possibilities and specific techniques of writing for the stage. Students may be given the opportunity to see their writing produced in workshops.

Credites: 3
Cross-Listings: MA 1481, THE 1221
On Occasion

THE 1391 On-Camera Performance I
An introduction to the practice and principles of on-camera performance for broadcast and moving image media. Students work on writing and creating characters, auditioning skills (commercial vs dramatic), teleprompter news reading, improvisation and scene study. Using closed-circuit television interactively, students see their work each class.

Credites: 3
Cross-Listings: MA 1581, THE 1391
Rotating Basis

THE 1393 On-Camera Performance III
An advanced workshop designed to enable a small group to work collaboratively on mastery of techniques learned in MA 1582. Emphasis is on audition technique and creating monologues. The pre-requisite of MA 1582 / THE 1392 is required or permission of the Department.

Credites: 3
Cross-Listings: MA 1583, THE 1393
Rotating Basis

THE 1394 On-Camera Performance IV
An upper level workshop designed to enable a small group to work collaboratively on mastery of techniques learned in THE 1393. Continued work on audition techniques with additional focus on practical On-Camera techniques employed on film and television sets.

Credites: 3
Every Spring

Film Courses

FIL 101 Early Films 1900-1950 - History
This course studies the silent film and the birth and development of film as an art form in the United States, Germany, Russia, and France 1900-1950.

Credites: 3
Every Fall

FIL 102 American Film History II (1950–present)
The course covers post World War II films, American New Wave in the 1960s and 1970s, the emergence of the age of American auteurs, and the consolidation of the industry into a global phenomenon. Topics include feminism, black liberation and the student movement; the rise of the blockbuster; and the independent challenge to dominant cinema that has become part of mainstream cinema today.

Credites: 3
Every Spring

FIL 103 Major Figures in the Cinema
The personal styles and influences of major directors are covered in this course. Subject changes each semester. May be taken for a maximum of three semesters. This course fulfills the Ethics, Self, and Society thematic cluster requirement in the core curriculum.

Credites: 3
Rotating Basis

FIL 104 Major Figures in the Cinema
The personal styles and influences of major directors are covered in this course. Subject changes each semester. May be taken for a maximum of three semesters. This course fulfills the Ethics, Self, and Society thematic cluster requirement in the core curriculum.

Credites: 3
Rotating Basis

FIL 105 Film Theory
The course acquaints the student with the multitude of theories that together constitute Film Theory. The course traverses the multiple disciplines that have been used to examine the film, including psychology, linguistics, history and sociology and aesthetics. The course traces the broad outlines in the evolution of each branch of Film Theory including psychoanalysis, semiotics, feminism and theories of ideology. Considerable attention is also paid to students developing a sense of how to place the film object in its historical and cultural context.

Credites: 3
Every Fall

FIL 106 Production I
The introductory concepts of visual storytelling are taught with HD production techniques. This is a hands-on course where students learn the basic of shooting, directing and editing through working on projects.

Credites: 3
Every Fall

FIL 107 Production II
This course continues from Film Production I to develop their skills and working in small crews; as they deepen their understanding of the medium through experiential learning.

Credites: 3
Every Spring
FIL 108 Advanced Motion Picture Production
This course develops further exploration into the techniques of filmmaking and application of professional practice. Prerequisites of FIL 106 and 107 are required.
Credits: 3
Rotating Basis

FIL 108 Screenwriting I
This course includes an intensive program of screenwriting techniques, focusing on writing a short form screenplay.
Credits: 3
Every Spring

FIL 110 Screenwriting II
This course includes an intensive program of screenwriting techniques, focusing on the development of a feature length screenplay. This course fulfills the Creativity, Media, and the Arts thematic cluster requirement in the core curriculum. Prerequisite FIL109, or permission of instructor are required.
Credits: 3
Rotating Basis

FIL 112 Intro to Editing and Sound Acquisition
This course is designed to give students basic skills in digital picture and sound editing, sound recording, and sound mixing.
Credits: 3
Rotating Basis

FIL 113 Intermediate Editing & Sound
This course is designed to give students intermediate skills in digital picture and sound editing, sound recording, and sound mixing. Prerequisite of FIL 112 is required.
Credits: 3
Rotating Basis

FIL 113A Advanced Motion Picture Editing
An advanced understanding of the practice of motion picture editing using digital tools.
Credits: 3
Rotating Basis

FIL 114 Directing the Moving Image I
This course begins to breakdown the job of the Director in narrative filmmaking. One of the mysteries of filmmaking is what a director does. We will seek to understand the process that is directing by exploring the role they play as they interface with the crew, producer, production designer and cinematographer. How is the vision for script developed and nurture throughout the process of filmmaking? How does a director work, through all of the stages of film production, development, preproduction, production, post production and distribution?
Credits: 3
Rotating Basis

FIL 115 Cinematography
This course is an intensive study of the motion picture camera and lighting technology.
Credits: 3
Rotating Basis

FIL 116 Intermediate Cinematography
This course covers intermediate camera, lighting and field production, theory and technique. A series of location and studio set scenes demonstrate techniques used to create and control the "look" of moving images. Related issues from camera and set preparation to post production considerations are covered. Prerequisite of FIL 115 is required.
Credits: 3
Rotating Basis

FIL 117 Advanced Screenwriting
This course is an advanced workshop for Film Majors devoted to writing and developing the original full-length screenplay.
Credits: 3
Rotating Basis

FIL 118 Production Management
This course examines the nuts and bolts of production management in film, television, and contemporary media. Topics include entertainment and copyright laws, operations, scheduling, hiring, budgeting, and media management. Students complete and entire Production Handbook as their semester long assignment.
Credits: 3
Rotating Basis

FIL 120 Introduction to Special Effects
This course covers special effects pipelines and workflows for digital filmmaking. Working with CG assets & basic tracking, students will learn and work with basic workflows and production pipelines for 3d, 2d, and live action integration and composting for effects.
Credits: 3
Not Set

FIL 121 Directing the Moving Image II
This course will take a deeper dive into the realm of directing. The Directors Prospective viewing a variety of styles and genres this course will dig into the analysis of films, their structure and the choices that directors made that creates the mise en scene. The pre-requisites of FIL 101, 102, 105, 106, 109, and 114 are required.
Credits: 3
Rotating Basis

FIL 122 Independent Producing
A hands-on approach to the production management tasks of the independent producer of film, video, or multimedia. Topics include, script breakdown, scheduling, budgets, writing the business plan, marketing, and distribution.
Students will complete a Production Handbook and mock Business Plan as their final projects
Credits: 3
Rotating Basis

FIL 123 Documentary Workshop I
Students learn the basics of producing a short documentary film, including research, interviewing, budgeting, shooting styles and organizing footage for editing.
Credits: 3
Rotating Basis

FIL 124 Making of a Documentary II
Students learn the next stage is documentary producing in a medium to long form documentary film, including research, interviewing, budgeting, shooting styles and organizing footage for editing.
Credits: 3
Rotating Basis

FIL 125 Animation Comp Graphics & Visual Effects I
An introductory level class to Special Effects pipelines and workflows for digital filmmaking. Working with basic computer graphics software and editing compositing suites, students will work on real world production projects in special effects. Special emphasis is placed on basic composting, matting and 2d solutions to production effects.
Credits: 3
Every Fall

FIL 126 Animation Comp Graphics & Visual Effects II
An intermediate level class in Special Effects pipelines and workflows for digital filmmaking. Working with CG assets & basic tracking, students will learn and work with basic workflows and production pipelines for 3d, 2d, and live action integration and composting for effects.
Credits: 3
Not Set

FIL 127 Animation Comp Graphics & Visual Effects III
An advanced special effects class in digital filmmaking using state of the arts 2d and 3d CG integration with live action. Students will work with complex tracking, 2d and 3d tracking, PBR rendering for film, matched lighting, shooting elements reels for SFX, and the latest techniques from the field.
Credits: 3
Rotating Basis

FIL 128 Components of Visual Storytelling I
This course is designed to explore and impact of visual elements that control the audiences experience of film and other forms of 2D imagery. We will look at Space, Line, Shape, Tone, Color, Rhythm and Movement. Breaking down these visual components then combining them into a dynamic project in which the story components in the script are matched by the visual elements making an emotionally engaging work. The Film project is structured in the preproduction stage, with storyboards, computer graphics, story and component graphs integrated into Production Design and Cinematography that can shape the audience's response.
Credits: 3
Rotating Basis

FIL 129 Directing the Moving Image II
This course will take a deeper dive into the realm of directing. The Directors Prospective viewing a variety of styles and genres this course will dig into the analysis of films, their structure and the choices that directors made that creates the mise en scene. The pre-requisites of FIL 101, 102, 105, 106, 109, and 114 are required.
Credits: 3
Rotating Basis

FIL 130 Film Festivals, Markets and Platforms
Now that you've made a film what next? This course will delve deeply into advertising, selling, and marketing films in the current television and film industry. How do films make money? How are they bought and how are they sold, who are the entities...

Every Fall

FIL 136 Filmmaking Studio B
This course is an intensive practicum in motion picture production where teams of students with develop and produce a film project that covers advanced cinematography, advanced sound, research, budgeting, production and postproduction practices. Prerequisites of FIL 101, 102, 105, 106 & 109 and co-requisite of FIL 138 are required.
The co-requisite of FIL 138 is required. The prerequisites of FIL 101, 102, 105, 106, and 109 are required.
Credits: 3
Every Spring

FIL 137 Filmmaking Studio C
This course is an intensive practicum in motion picture production where teams of students with develop and produce a film project that covers advanced cinematography, advanced sound, research, budgeting, production and postproduction practices. Prerequisites of FIL 101, 102, 105, 106 & 109 and co-requisite of FIL 135 are required.
The co-requisite of FIL 135 is required. The prerequisites of FIL 101, 102, 105, 106, and 109 are required.
Credits: 3
Every Fall

FIL 138 Filmmaking Studio D
This course is an intensive practicum in motion picture production where teams of students with develop and produce a film project that covers advanced cinematography, advanced sound, research, budgeting, production and postproduction practices. Prerequisites of FIL 101, 102, 105, 106 & 109 and co-requisite of FIL 136 are required.
The co-requisite of FIL 136 is required. The prerequisites of FIL 101, 102, 105, 106, and 109 are required.
Credits: 3

Every Spring

FIL 144 Directing the Screen Actor I
Hands-on workshop exploring how to direct an actor. This in turn will help students write dialogue for actors to speak and learn to meet the creative demands of their projects as a producer. Students learn how an actor creates a part and drops into that internal place on camera that makes the viewer really believe he/she is that character. A crucial element of narrative film/television production is understanding the process and requirements of performance. Students learn techniques and insights which give directors confidence and develop that "eye", help writers take dialogue and structure to another level, and are given guidance and incentive to do pre-production and script analysis.
Credits: 3
Rotating Basis

FIL 150 Pitches, Treatments, Grants and Funding
In this course students will develop and understanding and the facility to market their ideas as intellectual property. They will develop pitches with the corresponding documents and treatments. While understanding the dynamics of grants, methods of fundraising and the filmmaker's relationship to investors. They will also look at the niche markets covered by cable TV venues as well as the major platform markets.
Credits: 3
Rotating Basis

FIL 151 The Business of Freelance
The film industry is dominated by freelance entrepreneurs. This includes artist like Directors, Cinematographers, Production Designers, Editors, Special Effects Artist, Pproducers and the other positions covered under the word "crew". Students will understand the question: "what is your rate", as well as where to go to find employment. This course will also delve into individual financing, LLC/ corporations and 1099 income. In this course they will learn how to organize themselves financially so that they can maximize their entrepreneurial careers.
Credits: 3
Rotating Basis

FIL 187 Film Capstone
Students will meet as a class with their selected capstone advisor weekly for the semester as they plan and develop the pre-production for their thesis project. Generating all of the various elements of production culminating in the finalization of the pre-production process for their thesis Film. This will include casting, crewing, location scouting and budgeting. At the completion of the class the students should be ready to be greenlighted by the capstone advisor so the production of their Thesis film can begin the next semester.
Credits: 3
Rotating Basis

FIL 188 Film Thesis
Students work with a professor to create an original work that showcases their main areas of interest in film.
Credits: 3
Rotating Basis

FIL 199 Film Internship
This is an opportunity for the student to work in a professional venue and be directly and meaningfully involved in the day-to-day operations with an emphasis in an area of their special interest.
Credits: 3

Media Arts Courses

MA 61 Media Arts & Technology
This course introduces students to the artistic and technological histories and developments of a variety of interrelated media, including photography, film and television, video arts, electronic music and computer arts. Through class lectures, discussions, screenings and readings, students will explore the basic concepts and methods of various Media Arts forms and related technological developments.
Credits: 3
Every Fall and Spring

MA 100 Media Aesthetics
This required foundation course introduces students to the fundamentals of media arts and visual literacy - light, color, composition, perspective, time, motion, sound - and discusses how they are applied in contemporary media. In a workshop environment, using media objects as texts, students also explore narrative form, art history, philosophy of media, theories of perception and their own creativity.
Either the pre-requisite of ENG 16 is required or the prerequisites of HEG 21 and 22 are required.
Credits: 3
Every Fall and Spring

MA 101 Audio Production I
An introduction to the art and science of audio production. Topics include basic sound theory, audio aesthetics, acoustics, sound reproduction and recording, the sound studio, remote sound recording, editing and mixing, the development of new audio technology, and creating audio for visual media. Students work individually and in teams on a variety of studio and field projects.
Credits: 3
Every Fall and Spring

MA 102 Television Production I
This course is an introduction to the principles and practice of multi-camera TV studio production. The course covers basic multicamera production roles and techniques including producing, directing, scripting, shooting, switching, audio engineering, electronic graphics and on-camera
performance. Students apply the skills learned in class to produce TV talk show and multi-camera musical productions.

**Credits: 3**
**Every Fall and Spring**

**MA 103 Television Production II**
An intermediate level course expanding on the techniques and applications of TV studio production covered in MA 102. Students focus on producing and directing scripted studio productions such as TV news programs and televised dramas. Basic lighting and set construction techniques are also covered.
Pre-requisite of MA 102 is required.

**Rotating Basis**

**MA 106 Video Workshop I**
An introduction to the principles and practice of portable digital video production. Working in crews on field projects, students explore the techniques and aesthetics of single-camera videography, sound recording, location lighting, and video editing.

**Credits: 3**
**Every Fall and Spring**

**MA 107 Introduction to Music Production I**
An introduction to the technology and aesthetics of digital composition, sound design, multi-track recording and production using digital software including Logic and/or Pro Tools on state-of-the-art hardware. Weekly individual access to studios is provided.
Pre-requisite of MA 101 is required or permission of the instructor.

**Credits: 3**
**Cross-listings: MA 107, MUS 175**
**Every Fall and Spring**

**MA 110 Music Production II**
An intermediate-level continuation of MA 107 in a workshop environment. Weekly individual access to studio facilities is provided.

Pre-requisite of MA 107/MUS 175 is required or permission of the instructor.

**Credits: 3**
**Cross-listings: MA 110, MUS 176**
**Rotating Basis**

**MA 111 Photojournalism**
A production-based course exploring the uses of digital photography. Topics include photo essays, photo documentaries, ethical uses of images in mass media, and the human condition in photography. Students complete weekly photographic and written narrative assignments, and a final documentary project. Students will review the photographic entries submitted for the George Polk Investigative Journalism Award.

Pre-requisite of MA 115/ART 115 is required or permission of the department

**Credits: 3**
**Cross-listings: JOU 111, MA 111**
**On Demand**

**MA 113 Media Arts in the Twenty-first Century**
This required course is a survey of interrelated contemporary media art forms and technologies.

MA 113 is a Writing Across the Curriculum (WAC) course. Students will be required to write multi-draft papers and to maintain a portfolio of their class essays to be submitted at the end of the semester.

Pre-requisites: MA 107 and MA 150

**Credits: 3**
**Every Fall and Spring**

**MA 118 Digital Photography I**
An introductory class using digital cameras and computers to record and print photographic imagery. The class focuses on photography as art, using new approaches and techniques. Course requirements include weekly assignments, midterm and final portfolio. All students are required to purchase a compact flash card. The department will supply digital cameras.

**Credits: 3**
**Cross-listings: ART 118, MA 118**
**Every Fall, Spring and Summer**

**MA 119 Business of Media Arts**
A required course that covers media business practices, strategies, operations and organizations. Topics covered include: media entrepreneurship, financing, intellectual rights management, content creation, strategic business practices, professional development, human resource management and career advancement strategies. Media professionals are invited as guest lecturers.

A minimum of 64 units must be completed prior to registering for this course.

**Credits: 3**
**Annually**

**MA 122 Digital Photography II**
A workshop-oriented intermediate level digital photography course. The focus is on advanced digital photographic camera skills and digital print output using alternative and archival media methods. Emphasis is on a digital portfolio and personal artistic statements. Students produce a portfolio of thematic presentation using both traditional film scanned images and digital media capture. Students are provided with a digital camera for the semester.

Pre-requisite of MA 118/ART 118 is required.

**Credits: 3**
**Cross-listings: ART 122, MA 122**
**Rotating Basis**

**MA 123 Studio Photography**
An in-depth study of studio photography, using a variety of lighting techniques and setups. Students cover such topics as tungsten lights, reflected and direct lights, strobes, advanced metering, exposure, portraiture and different tabletop setups.

The pre-requisite of MA 115/ART 115 or MA 118/ART 118 is required or permission of instructor.

**Credits: 3**
**Cross-listings: ART 115, MA 118**
**Rotating Basis**

**MA 124 Computer Graphics I**
An introductory level class in two-dimensional computer graphics using Adobe Photoshop. Students learn and work with basic digital illustration and graphics, scanning of images, image editing, image manipulation, photo manipulation, typography and image composition.

**Credits: 3**
**Every Fall, Spring and Summer**

**MA 126 Principles of Advertising**
An introduction to advertising with emphasis on effective creative strategies. Students gain insight into all phases of the business including print, Web, radio, television, agency operations, and research.

**Credits: 3**
**Cross-listings: JOU 126, MA 126**
**On Occasion**

**MA 132 Computer Graphics II**
An intermediate-level class covering professional studio techniques in the production of computer-based graphics and imaging projects for screen and print. Special emphasis is placed on digital design principles for still imaging.

Pre-requisite of MA 124 is required.

**Credits: 3**
**Cross-listings: ART 125, MA 132**
**Rotating Basis**

**MA 137 Social Media Content Design**
An introductory level design class in content design for social media. Students work with static and time-based designs for social channels as either self-promotional, entertainment, branded, or viral content. Additionally, students learn and work with aesthetic, experiential, and technical requirements for social media content design in addition to current trends.

**Credits: 3**
**Rotating Basis**

**MA 139 Digital Design I**
An introduction to Principles of Digital Design using the Adobe Creative Suite for Communications, Advertising, Branding, Digital Content Creation, and Entertainment. Students will learn and work with hands-on tutorials and assignments involving real world Design projects for Print, Web, Broadcast Video, NFTs, XR, and Metaverse projects. Students will learn the basics of still and time-based design, color, composition, layout, and effective visual communication for these media based on contemporary aesthetic and technical standards.

Pre-requisites: MA 124

**Credits: 3**
**Every Fall**

**MA 140 Sports Information and Public Relations**
This course examines the techniques of sports publicity, promotion, and marketing for both amateur and professional athletics. Students learn to produce sports statistics, press releases, press kits, and marketing strategies for print, digital, and broadcast media. Sports information professionals meet with students to develop projects. The prerequisite of JOU 119 / ENG 126 is required or permission of the Department. 

**MA 144 Entertainment Journalism**

Provides a historical overview of the rise of entertainment journalism in the U.S. Examines case studies of celebrity coverage in various fields, from entertainment to sports to politics. Considers the impact of paparazzi and bloggers on journalism. Students practice reviewing popular culture and preparing for celebrity interviews and reporting. The prerequisite of JOU 119 / ENG 126 or MA 150 is required or permission of the Department. 

**MA 145 Video Workshop III**

A capstone course in digital imaging acquisition, production and editing. This course will put together the skills you have acquired in Video Production I & II. Students work as a team to produce broadcast quality work. Topics include: advanced lighting, cinematography, editing, producing, marketing & distribution. Students work together using HD workflow to edit a class project, create their own PSA/commercial and a 5-10 min narrative story. The prerequisite of MA 1081 is required or permission of the Instructor. 

**MA 146 Public Relations Writing**

Introduces students to principles and practices of PR writing, including how it differs from objective news writing. They learn and apply professional standards such as Associated Press style as they practice writing press releases and other strategic-communication materials. The class studies various examples of PR writing to analyze its organization, form, style, and effectiveness in informing and persuading audiences. The prerequisite of JOU 119 / ENG 126 or permission of the Department. 

**MA 147 Studio Recording for the Music Producer**

This course focuses on music production and the fundamentals of studio recording, including the experience of producing and creating music in a state-of-the-art recording studio with live musicians. Topics include an overview of prominent music producers and their techniques, musical form and structure, the basics of sound and hearing, microphone technology and design, the art of microphone placement and mixing multi-track audio. 

**MA 150 Writing for Media**

Students in this required foundation class explore the many tools media artists use to get from creative concept to media production; from initial idea to final expression. In a workshop environment students practice: creative thinking and writing, treatments, project proposals, artist statements. Students create a portfolio of media writing samples as their final assignment. The prerequisite of MA 150 is required and 3 credits from ENG 61, ENG 62, ENG 63, ENG 64, HEG 21 or HEG 22 is required or permission of the instructor. 

**MA 151 Sports Writing and Reporting**

This course addresses all aspects of sports writing and reporting, including deadline coverage, game description, feature stories, column writing, and fantasy sports. Students compare print, digital, and broadcast sports coverage to evaluate trends and effectiveness. Students develop skills in crafting leads, reporting ethically, writing clearly, researching, cultivating sources, and conducting interviews. Guest speakers working in sports journalism are an integral part of the class. The prerequisite of JOU119/ENG 126 or MA 150 is required, or permission of the Department. 

**MA 155 Directing The Moving Image**

This is an advanced course in single camera style film and television production. We will explore the role of the director in modern digital filmmaking. Students will participate in projects that will develop a language for talking with actors, communicating with the director of photography and production designer. We will look at the importance of casting, script notes and how to create a dynamic shot list and shot diagrams. This class will utilize all that they have learned in previous production classes and develop new skills that will deepen the student's understanding of how to read a script, how to apply visual components to their story and how to transform these blueprints into a powerful film. 

**MA 157 Creative Aspects of Copywriting**

Introduces copywriting techniques for print media, Web, radio, and television as well as the creation of complete promotion packages for direct marketing. Students develop practical skills by creating advertising letters, brochures, commercials, and other materials. 

Pre-requisite of JOU119/ENG 126 or MA 150 is required, or permission of the Department. 

**MA 175 Superheroes Comics to Hollywood**

Explores the place of superheroes and super-heroes in American popular culture from the golden age of comic books to blockbuster Hollywood films. Focuses on the emergence and evolution of figures such as Superman, Batman, Wonder Woman, Captain America, Green Lantern, and Black Panther. Also considers mainstream superheroes representing racial, ethnic and other minorities. Examines superheroes from a historical and sociological perspective, emphasizing their role in affirming and challenging enduring myths and motifs in American culture. 

**MA 187 Film and Television Studies**

A survey of the history and development of world cinema and television. Through screenings and discussions, students study this twentieth-century art form as developed by various countries, individuals and movements. The development of cinema and television as an industry and a part of the larger economy; as a series of technical innovations, as a history of aesthetic forms, as a social, cultural and political force and as a reflection of the ideas of its society are explored. 

**MA 197 Independent Study**

This course is designed to give students in their junior or senior year an opportunity to do independent work under the guidance of a member of the Media Arts faculty. There are no regular class meetings. Students may undertake either a production (video, screenplay, photography, graphic design or Audio Production) or a research paper. 

**MA 198 Independent Study**

This course is designed to give students in their junior or senior year an opportunity to do independent work under the guidance of a member of the Media Arts faculty. There are no regular class meetings. Students may undertake either a production (video, screenplay, photography, graphic design or Audio Production) or a research paper. 

**MA 199 Media Arts Internship**

During their junior and senior years, Media Arts majors are strongly recommended to undertake an internship with a media industry organization in New York City. Consultation with the Department...
MA 204 Short Form Media Making I
Short Form Media Making emphasizes making, and serves as a weekly creative gym where students get hands on time to develop, create and complete short, fun creative works in various mediums and styles, including commercials, music videos, personal short documentary profiles, Prezies, experimental and found footage works, short animations, and web based artworks. The course includes screenings, media skill sessions, group exercises and individual student projects they choose, create and output. The goals of this class are to give students an opportunity to create something weekly, to try new forms of media making they have not experiences (such as podcasts and vlogs) and apply skills they are learning in other classes into their short project work. The opportunity to create and hone these projects in portfolio enhancing and makes for additional marketable skills. 
Pre-requisite of MA 106 is required. 
Credits: 3 
On Occasion 

MA 222 Social Media in Theory and Practice
Examines best practices in social networking from the perspective of writers, journalists, media professionals, and other communicators. Students learn to write, edit, and research for blogs and news-feeds, gaining familiarity with current platforms. Requires active collaboration in online discussions and digital projects, in addition to class meetings. 
Credits: 3 
Cross-Listings: JOU 222, MA 222, SPE 222 
Rotating Basis 

MA 233 Music Theory for Producers
A comprehensive knowledge of music composition is extremely beneficial to today’s music producer. Music composition topics will be covered such as rhythm, melody, harmony, intervals, chord progressions, structure, and instrumentation. In addition, students will have the opportunity to improve their music writing skills through hands-on use of software like Apple’s Logic Audio and Propellerhead’s Reason. This course is suitable for students who want to expand their knowledge of music creation and production. 
Credits: 3 
On Demand 

MA 245 Introduction to AR/VR
This is an introductory level course in contemporary Augmented Reality, Virtual Reality and related Extended Reality technologies. Students will learn and work with popular platforms for AR and VR as standalone experiences and also integrated into social platforms for entertainment, branding, and gaming. Special emphasis is placed on design for AR/VR. Students will work with 2d and 3d assets for AR/VR, popular filters for social media, and engaging experiences in AR/VR, while exploring the social media aspects of Extended Reality. 
The pre-requisite of MA 124 is required. 
Credits: 3 

MA 256 Music Production
Led by dynamic and experienced music professionals, the Music Production course focuses on creating, producing, recording and mixing original music and sound. Topics include MIDI, audio signal flow, digital synthesis, recording, effects processing and professional mixing techniques. Apple’s Logic Audio, Avid’s Pro Tools and Propellerhead’s Reason will be used as platforms for learning audio technology. Hands-on experience through assigned projects will take place during individual studio time. Students will produce one or more finished tracks with an opportunity to market them through the BlackBird Music Group (BBMO), a Sony/Orchard label in partnership with LIU Brooklyn. 
Credits: 3 

MA 257 The Music Business
This course provides an overview of the business of music. Topics covered included artist royalties, copyright laws, recording contracts, record labels, artist management, booking agents, touring, and publicity. Students learn skills necessary to become successful professional musicians and develop the knowledge to build a career in the music industry. 
Credits: 3 
Cross-Listings: MA 257, MUS 180 
On Occasion 

MA 1012 Audio Production II
Audio Production II is an advanced audio production class dealing with intensive remote sound recording techniques for ENG/EFP video, film, and radio. Workshops will include advanced application and techniques for single-microphone and multi-microphone mixes. Topics will include boom operation, time code, music playback, multi-track recording for narration, dialogue and music, Foley artist, FX recording, stereo recording and sound editing. 
The pre-requisite of MA 101 is required. 
Credits: 3 
On Occasion 

MA 1081 Video Workshop II
This is an intermediate level course that will expand upon the material covered in MA 106, Video Workshop I. This course is designed to assist students in the exploration of more sophisticated video production aesthetics, concepts and technologies, including non-linear editing (Final Cut Pro), lighting, electronic cinematography, sound for video, directing and producing. Class members will practice and refine their production skills by completing a series of creative and challenging projects. 
The pre-requisite of MA 106 is required. 
Credits: 3 

MA 1531 Introduction to Public Relations and Strategic Communication
Introduces principles and practices of public relations, with attention to its historical development, trends, and sociocultural impact. Familiarizes students with PR goals, theories, ethics, research, planning, and strategies. Explores PR issues across a range of organizations, including corporations, government agencies, healthcare, education, and nonprofit groups. Offers a foundation in strategic communication for students who aspire to managerial careers. 
Credits: 3 
Cross-Listings: JOU 145, MA 1531 
On Demand 

MA 1561 Video Journalism I
An introductory course that trains students to work as video journalists, integrating TV production with newswriting skills. Using a digital camcorder and non-linear editing equipment, students learn the technical and aesthetic aspects of news shooting while applying journalism principles in the field. 
Credits: 3 
Cross-Listings: JOU 1561, MA 1561 
Every Fall 

MA 1581 On-Camera Performance I
An introduction to the practice and principles of on-camera performance for broadcast and moving image media. Students work on writing and creating characters, auditioning skills (commercial vs dramatic), teleprompter news reading, improvisation and scene study. Using closed-circuit television interactively, students see their work each class. 
Credits: 3 
Cross-Listings: MA 1581, THE 1391 
Rotating Basis 

MA 1582 On-Camera Performance II
An intermediate workshop designed to expand upon the skills and knowledge gained in On-Camera Performance I. Emphasis is on cold reading, character creation, teleprompter reading and scene analysis.
The pre-requisite of MA 1581 / THE 1391 is required or permission of the Department.
Credits: 3
Cross-Listings: MA 1582, THE 1392
Rotating Basis

**MA 1583 On-Camera Performance III**
An advanced workshop designed to enable a small group to work collaboratively on mastery of techniques learned in MA 1582. Emphasis is on audition technique and creating monologues.
The pre-requisite of MA 1582 / THE 1392 is required or permission of the Department.
Credits: 3
Cross-Listings: MA 1583, THE 1393
Rotating Basis

**MA 1585 Comm/Voice Over Perf**
This course is the study and practice of oral performance for radio, TV, theater, and non-broadcast applications. Students study the techniques of master communicators and vocalise; reading aloud, monologues, and public speaking exercises to develop clear diction, proper placement and confidence. Special sessions in commercial copy writing provide insight into the marketing and production side of creating a commercial or narration. Simulated (recorded) auditions, script analysis, and chats with casting agents and performers prepare students for the real thing.
Credits: 3
On Demand

**MA 1591 Acting I**
An introductory study of acting, training the body and the voice to prepare for the creation and development of characterization. The course consists of acting exercises, analysis and interpretation of roles, and improvisation. Student prepare and perform one dramatic monologue and one scene with a partner. Students also attend live performances to observe the craft in action.
Credits: 3
Cross-Listings: MA 1591, THE 1251
Every Fall and Spring

**MA 1592 Acting II**
A continuation of THE 125.1 and more advanced work in scene analysis and characterization. Students perform in a variety of scenes and other acting assignments.
Pre-requisite of THE 1251/MA 1591 is required.
Credits: 3
Cross-Listings: MA 1592, THE 1252
Every Fall and Spring

**MA 1601 Directing I**
The study and practice of directing for the theatre, emphasizing play selection and analysis, casting, rehearsal procedure, and the relationship of the director to the actor. Students learn staging in different performance environments. (Same as MA 160.1.) Prerequisite: At least one Theatre course or permission of the instructor.
Credits: 3
Roc Nation School of Music, Sports & Entertainment is a historic collaboration between Long Island University and the preeminent global entertainment company, Roc Nation. Degrees offered in this program, include:

- Applied Music B.A.
- Music Technology, Entrepreneurship & Production B.F.A.
- Vocal Performance B.M.
- Sports Communication & Marketing B.A.
- Sports Management B.A. and M.S.

Degree programs prepare students for a wide range of careers in performance, entrepreneurship, music technology, sports management and marketing. Students engage with University professors, learn from visiting industry leaders, and participate in immersive internships, ensuring they graduate with both hands-on experience and a network of professional contacts.

The Roc Nation School provides Roc Nation Hope Scholarships to 25 percent of each incoming class. Along with financial support, Roc Nation Hope Scholars receive individualized mentorship through LIU’s Promise Office. Scholarship recipients are selected from a pool of academically competitive first-time freshmen with the highest need.

The Roc Nation School also extends its reach to high school students interested in music technology, vocal performance, and sports management through week-long Summer Academies.

DEPARTMENT OF MUSIC

The Roc Nation School music programs include Applied Music; Music Technology, Entrepreneurship & Production; and Vocal Performance. Faculty members are cutting-edge professionals in the entertainment industry. Courses prepare students for the 21st Century with musical excellence, technology skills, and the business acumen of an entrepreneur.

B.A. Applied Music

The Applied Music Program prepares students for a wide variety of music careers through technical and experiential learning with talented LIU faculty and Roc Nation’s world-renowned artists. Applied Music students study ear training and musicianship, harmony and counterpoint, music notation software, and the origins of musical genres, while also receiving instrument training and performing in ensembles.

ROC NATION SCHOOL OF MUSIC, SPORTS & ENTERTAINMENT

Roc Nation students are able to enroll in electives that are only available at LIU, such as The Business of Shawn Carter, Women in Music, and Monetization of Music. Students graduate with insight into the process of building a successful and thriving music career.

Applied Music B.A.

Graduation Requirements

Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:

Orientation

FYS 01 First Year Seminar 1.00

Core Curriculum Requirements: 34 Credits

Humanities

English Composition - ENG 16 3.00
English Literature: ENG 61, 62, 63 or 64 3.00
Philosophy: PHI 60 3.00
Foreign Language 3.00

Social Sciences

History 1 or 2 3.00
Anthropology, Economics, History, Political Science, Psychology, or Sociology 3.00
Anthropology, Economics Political Science, Psychology, Sociology 3.00

Science and Mathematics

Mathematics 3.00
Laboratory Science: BIO/CHM/PHY 4.00

Communication, Visual & Performing Arts

Oral Communications: SPE 3 3.00
Art 61, Dance 61, Journalism 61, Music 61, Theatre 61, Media Arts 61 3.00

Applied Music B.A. Major Requirements

Required Musicianship Courses (17 Credits)

MUS 115P Advanced Individual Instruction - Piano 1.00
MUS 116P Advanced Individual Instruction for Music Majors - Piano 1.00
MUS 107A Theory/Keyboard Harmony I 3.00
MUS 107B Theory/Keyboard Harmony II 3.00
MUS 108A Aural Skills I 3.00
MUS 108B Aural Skills II 3.00

MUS 201 Introduction to Music Notation Software 3.00

Required Voice Instruction (8 Credits)

Choose 8 credits from the following:

MUS 116A Studio Lessons - Voice 1.00
MUS 116B Studio Lessons - Voice 2.00

Required Chorus/Ensemble (10 Credits)

Choose 10 credits from the following:

MUS 123J Small Instrumental and Vocal Combo 2.00
MUS 123V The Jazz Salon 2.00
MUS 125 University Chorus 2.00
MUS 205 Musical Theatre Workshop 2.00
MUS 206 Brooklyn Soul Ensemble 2.00

Required Professional Coursework (3 Credits)

MUS 130 Professional Preparation for a Music Career 2.00

Required Music History (6 Credits)

Choose 6 credits from the following:

MUS 146 History of Hip Hop 3.00
MUS 147 History of Rock Music 3.00
MUS 148 History of Rhythm and Blues 3.00
MUS 159 History of Country Music 3.00

Recommended Music Electives (16 Credits)

Choose 16 credits from the following:

MUS 180 The Music Business 3.00
MUS 211 Monetization of Music 3.00
MUS 221 The Business of Shawn Carter 3.00
MUS 231 Making of the Album 3.00
MUS 241 Women in Music 3.00
TEP 102 Introduction to Music Technology and Production 3.00
TEP 105 Sequencing 3.00
TEP 121 Foundations of Recording 3.00
TEP 148 Foundations of Mixing 3.00
TEP 146 Songwriting I 3.00
TEP 164 Songwriting II 3.00
TEP 143 Creative Promotion in Media 3.00

Credit Requirements

Minimum Liberal Arts and Sciences Credits: 90
Major Required Credits: 60
Minimum Total Credits: 120
B.M. Vocal Performance

The Bachelor of Music in Vocal Performance provides students with a full range of resources to develop their talent and prepare for a career in the current music industry. Students receive exclusive, individualized vocal training from LIU’s prestigious faculty and world-renowned visiting artists in both the solo and ensemble setting. Aspiring performers develop their aural skills; study the roots of music theory; and delve into the technical aspects of songwriting, diction, literature, and vocal pedagogy. Roc Nation students have the opportunity to enroll in electives that are only available at LIU, such as The Business of Shawn Carter, Women in Music, and Monetization of Music.

In addition to world-class training, Vocal Performance students participate in competitive internships and have a variety of opportunities to perform. While attending the Roc Nation School of Music, Sports & Entertainment, students will continue to open doors long after graduation.

Vocal Performance B.M. Requirements

Graduation Requirements

Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:

Orientation

FYS 01 First Year Seminar 1.00

Core Curriculum Requirements (30 Credits)

Humanities

English Composition - ENG 16 3.00
English Literature: ENG 61, 62, 63 or 64 3.00
Philosophy: PHI 60 3.00
Foreign Language 3.00

Social Sciences

History 3.00
Anthropology, Economics, History, Political Science, Psychology, or Sociology 3.00
Anthropology, Economics Political Science, Psychology, Sociology 3.00

Science and Mathematics

Mathematics: MTH 15 or 16 (3-4 credits) 4.00
Laboratory Science: BIO, CHM, PHY 4.00

Communication, Visual & Performing Arts

Oral Communications: SPE 3 3.00

Art 61, Dance 61, Journalism 61, Music 61, Theatre 61, Media Arts 61 3.00

Vocal Performance B.M. Major Requirements

Required Musicianship Courses (16 Credits)

MUS 107A Theory/Keyboard Harmony I 3.00
MUS 107B Theory/Keyboard Harmony II 3.00
MUS 108A Aural Skills I 3.00
MUS 108B Aural Skills II 3.00
TEP 100P Private Instruction - Piano (2 Semesters) 2.00

Required Applied Music Courses (12 Credits)

MUS 111 Vocal Pedagogy 3.00
MUS 112 Vocal Diction 3.00
TEP 146 Songwriting I 3.00
TEP 164 Songwriting II 3.00

Required Professionalism Courses (7 Credits)

ARM 162 Principles and Practices of the Music Industry 2.00
MUS 130 Professional Preparation for a Music Career 2.00
TEP 102 Introduction to Music Technology / Production 3.00

Required Music History (6 Credits)

MUS 241 Women in Music 3.00
Choose 3 credits from the following:

MUS 107 Music History I 3.00
MUS 108 Music History II 3.00
MUS 146 History of Hip Hop 3.00
MUS 147 History of Rock Music 3.00
MUS 148 History of Rhythm and Blues 3.00
MUS 159 History of Country Music 3.00

Required Vocal Concentration Courses (18 Credits)

MUS 116V Studio Lessons: Voice (4 Semesters) 2.00
MUS 149A Vocal Coaching (4 Semesters) 1.00
MUS 150 Junior Recital Ensemble 3.00
MUS 151 Senior Recital Ensemble 3.00
MUS 100 Convocation 0.00

Required Chorus/Ensemble (8 Credits)

MUS 123 Small Instrumental and Vocal Combo 2.00
MUS 123V The Jazz Salon 2.00
MUS 125 University Chorus 2.00
MUS 205 Music Theater Workshop 2.00

B.F.A. Music Technology, Entrepreneurship & Production

The B.F.A. in Music Technology, Entrepreneurship & Production is a studio-based cohort program for students who aim to succeed in the music industry. The program features an experiential teaching and learning approach grounded in the real world of music production, artist development, and marketing. The program’s cutting-edge curriculum is designed to address the dynamic and changing landscape of contemporary music, a landscape shaped by global connectivity, creative collaboration, and digital technology. The goal of the B.F.A. in Music Technology, Entrepreneurship & Production is to bring students together under one “umbrella,” while establishing a network of people in different disciplines within the industry. By creating an experiential, hands-on exploration of the music industry in an educational environment, students gain invaluable insight and skills as they progress through the program. More importantly, the relationships and connections students establish will last well beyond graduation day.

B.F.A. Music Technology, Entrepreneurship & Production

[Program Code: 39355] [HEGIS: 1099.0]

Graduation Requirements

Students must satisfy the placement, proficiency, orientation and 28 - 29 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:

Orientation

LIU Brooklyn Undergraduates Catalog 2022 - 2023
### Core Curriculum Requirements (28 - 29 credits)

**Humanities**

- English Composition - ENG 16 or 16 X: 3.00 credits
- English Literature: ENG 61, 62, 63 or 64: 3.00 credits
- Philosophy: PHI 60: 3.00 credits

**Social Sciences**

- History: 3.00 credits
- Anthropology, Economics, History, Political Science, Psychology, Sociology: 3.00 credits

**Science and Mathematics**

- Mathematics: MTH 15 or 16 (3-4 credits): 4.00 credits
- Science Lab Based Course: BIO, CHM, PHY: 4.00 credits

**Communication, Visual & Performing Arts**

- Oral Communications: SPE 3: 3.00 credits

### Music Technology, Entrepreneurship & Production B.F.A. Major

- Minimum Liberal Arts and Sciences Credits: 30 credits
Music Courses

MUS 61 Music and Culture
This course provides an introduction to musical styles that place music in its cultural contexts: history, painting, literature, and ideas. To enhance the capacity to understand and enjoy music of every kind, the course begins with the elements of music that a composer combines in distinctive and characteristic ways to form a musical composition.
Credits: 3
Every Fall and Spring

MUS 100 Music Convocation
This non-credit course brings all music majors together to observe and participate in artist presentations and master classes.
Credits: 0
On Occasion

MUS 107 Music History I
Music History I addresses the history of Western music from the sacred and secular music of the Middle Ages to the radical innovations of the 20th century.
Credits: 3
On Occasion

MUS 107A Theory/Keyboard Harmony I
This course focuses on music theory and keyboard harmony including four-part writing, harmonization, and transposition. Students learn to perform, notate, and harmonize familiar songs. In addition, students compose an original four-part composition, inclusive of open and close position chords.
Credits: 3
Every Fall

MUS 107B Theory/Keyboard Harmony II
In this course, students learn to notate and perform diatonic seventh chords, circle of fifths, and root position seventh chords. Students compose and harmonize a simple melody that includes non-harmonic tones.
Credits: 3
Every Spring

MUS 107C Theory/Keyboard Harmony III
In this course, students learn four-part writing, harmony, secondary dominants, secondary leading tones, simple figured bass realization, and simple score reading at the piano. Students compose and harmonize simple melodies that include secondary dominant and leading tone chords.
Credits: 3
Every Fall

MUS 107D Theory/Keyboard Harmony IV
In this course, students focus on four-part writing, harmonization, binary and ternary forms, augmented sixth chords, Neapolitan chords, transposition, and intermediate figured bass realization. Students also learn score reading at the piano and transposition of a selected standard work from classical or contemporary repertoires.
Credits: 3
Every Spring

MUS 108 Music History II
This course provides a history of Western music from the sacred and secular music of the Middle Ages to the radical innovations of the 20th century. Topics include the study of Impressionism, twelve-tone methods, the Avant-garde, Minimalism, through music of the 21st century.
Credits: 3
On Occasion

MUS 108A Aural Skills I
This ear training course focuses on diatonic singing using the moveable "Do" and the "La" solfege system for minor keys. Students learn intervals, triads, rhythm, clapping, and sight singing. Compound and simple meters are additionally stressed.
Credits: 2
Every Spring

MUS 108B Aural Skills II
This ear training course focuses on diatonic singing using the moveable "Do" and the "La" solfege system for minor keys. Students build upon material from Aural Skills I through the study of inversions, melodic dictation, and qualities of seventh chords. In addition, two-, three-, and four-part sight singing are major components of the curriculum.
Credits: 2
Every Spring

MUS 111 Vocal Pedagogy
This course offers an overview of vocal anatomy, physiology, and learning processes associated with healthy singing. A comprehensive understanding of the breathing apparatus, the larynx, the resonators, and articulators are the primary focus of anatomical study. Additionally, historical performance practices are emphasized, demonstrating how the student may apply the information in a functional manner for the specific of teaching voice.
Credits: 2
Every Spring

MUS 112 Vocal Diction
Vocal Diction is designed to develop the introductory skills required as a vocalist in the current entertainment industry. Topics include an introduction to vocal health, the principal genres of contemporary singing, the development of listening skills to identify healthy vs. damaged singing, an introduction to vocal anatomy, and an understanding of IPA (International Phonetic Alphabet) to gain the ability to sing in a foreign language.
Credits: 3
Every Fall and Spring

MUS 115I Advanced Individual Music Instruction for Non-Music Majors - Instrument
This course includes individual instrument instruction (e.g., violin, trumpet, saxophone, percussion, etc.) to build technique, musicianship skills, and stylistic interpretation of assigned repertory.
Prerequisite: Must be in one of the following plans: BMTEPBFA, BMUSICBA, BVPBM, BMUSMIN.
Credits: 1
Every Semester

MUS 115P Advanced Individual Music Instruction for Music - Piano
This course includes individual piano instruction to build technique, musicianship skills, and stylistic interpretation of assigned repertory.
Prerequisite: Must be in one of the following plans: BMTEPBFA, BMUSICBA, BVPBM, BMUSMIN.
Credits: 1
Every Semester

MUS 115T Advanced Individual Music Instruction for Non-Music Majors - Theory
This course includes individual theory instruction to build technique, musicianship skills, and stylistic interpretation of assigned repertory.
Prerequisite: Must be in one of the following plans: BMTEPBFA, BMUSICBA, BVPBM, BMUSMIN.
Credits: 1
Every Semester

MUS 116A Studio Lessons Voice
This course includes individual voice instruction to build technique, musicianship skills, and stylistic interpretation of assigned repertory.
Prerequisite: Must be in one of the following plans: BMTEPBFA, BMUSICBA, BVPBM, BMUSMIN.
Credits: 1
Every Fall

MUS 116B Studio Lessons Voice
This course includes individual voice instruction to build technique, musicianship skills, and stylistic interpretation of assigned repertory.
Prerequisite: Must be in one of the following plans: BMTEPBFA, BMUSICBA, BVPBM, BMUSMIN.
Credits: 2
Every Spring

MUS 116I Advanced Individual Music Instruction for Music Majors in Primary Performing Medium - Instrument
This course includes individual instrument instruction (e.g., violin, trumpet, saxophone, percussion, etc.) to build technique, musicianship skills, and stylistic interpretation of assigned repertoire.
Prerequisite: Must be in one of the following plans: BMTEPBFA, BMUSICBA, BVPBM, BMUSMIN.
Credits: 1
Every Semester

MUS 116P Advanced Individual Music Instruction for Music - Piano
This course includes individual piano instruction to build technique, musicianship skills, and stylistic
The course explores the growth of a unique youth culture from the 1950s to the present. Subgenres covered include, Rock and Roll, Classic Rock, Heavy Metal, Grunge, and Indie Rock.

Credits: 3
On Occasion

MUS 148 History of Rhythm and Blues
This course examines the history of the music, artists, business leaders, and practices of one of the most important music genres of the 20th century: R&B. Students explore the influence of R&B/soul music personalities and their lasting impact on contemporary music.

Credits: 3
On Occasion

MUS 149A Studio Lessons: Vocal Coaching
Vocal Coaching encompasses private coachings to supplement studio lessons, giving students the opportunity to expand repertory, develop performance skills, and work with a professional collaborative artist.

Prerequisite: Must be in one of the following plans: BMTEPBFA, BMSICBRA, BPVBPM, BMUSMIN.
Credits: 1 to 2
Every Semester

MUS 150 Junior Recital Ensemble
This course serves as the means of assessment for the junior recital ensemble requirement as part of the B.M. in Vocal Performance degree. Participation in the Junior Recital requires studio instructor and departmental advisor permission.

Credits: 3
Every Fall and Spring

MUS 151 Senior Recital Ensemble
This course serves as the means of assessment for the senior recital requirement as part of the B.M. in Vocal Performance degree. Participation in the Senior Recital requires studio instructor and departmental advisor permission.

Credits: 3
Every Fall and Spring

MUS 152 Senior Recital Ensemble
This course serves as the means of assessment for the senior recital requirement as part of the B.M. in Vocal Performance degree. Participation in the Senior Recital requires studio instructor and departmental advisor permission.

Pre-requisite of MUS 152 is required or permission of the instructor.
Credits: 3
Rotating Basis

MUS 153 History of Country Music
This course features singers and instrumentalists influential in the development of country music. Students study the historical, sociocultural, and stylistic factors of the genre, and develop an understanding of country music’s influence on contemporary music development.

Credits: 3
On Occasion

MUS 154 History of Rock Music
This course covers the development of rock music from the 1950s to the present. Subgenres covered include, Rock and Roll, Classic Rock, Heavy Metal, Grunge, and Indie Rock.

Credits: 3
On Occasion

MUS 155 Introduction to Music Production I
This course serves as the means of assessment for the junior recital ensemble requirement as part of the B.M. in Vocal Performance degree. Participation in the Junior Recital requires studio instructor and departmental advisor permission.

Pre-requisite of MUS 152 is required or permission of the instructor.
Credits: 3
Rotating Basis

MUS 156 Musical Theater Workshop
The 21st Century musical theater performer needs an equal background in musicals of the mid-19th century Golden Age as well as contemporary commercial genres including Rock, Country, and Pop. This workshop focuses on both solo and ensemble performance, highlighting how to develop appropriate styles for the modern performer with frequent public performances throughout the semester.

Credits: 2
Every Fall and Spring

MUS 157 Introduction to Music Production I
An introduction to the technology and aesthetics of digital composition, sound design, multi-track recording and production using digital software including Logic and/or Pro Tools on state-of-the-art hardware. Weekly individual access to studios is provided.

Pre-requisite of MA 101 is required or permission of the instructor.
Credits: 3
Cross-Listings: MA 107, MUS 175
Every Fall and Spring

MUS 158 The Music Business
This course provides an overview of the business of music. Topics covered include artist royalties, copyright laws, recording contracts, record labels, artist management, booking agents, touring, and publicity. Students learn skills necessary to become successful professional musicians and develop the knowledge to build a career in the music industry.

Credits: 3
Cross-Listings: MA 257, MUS 180
On Occasion

MUS 201 Introduction to Music Notation Software
In this hands-on primer, students will become proficient in the use of Finale, the industry standard in music notation software. Through a number of project-based activities, as well as lectures and lab work, students will learn to create professional looking lead sheets, orchestral scores, and vocal and instrumental arrangements. This course will also help students in the completion of theory, arranging, and composition assignments for other required music courses.

Pre-requisite of MUS 152 is required or permission of instructor.
Credits: 3
Cross-Listings: MA 201, MUS 201
Rotating Basis

MUS 202 Musical Theater Workshop
The 21st Century musical theater performer needs an equal background in musicals of the mid-19th century Golden Age as well as contemporary commercial genres including Rock, Country, and Pop. This workshop focuses on both solo and ensemble performance, highlighting how to develop appropriate styles for the modern performer with frequent public performances throughout the semester.

Credits: 2
Every Fall and Spring

MUS 203 Brooklyn Soul Ensemble
From Motown to Roc Nation, Brooklyn Soul
Ensemble is an audition-only ensemble performing contemporary Black popular music styles, including Classic Soul, Funk, and NeoSoul. Comprised of both vocalists and instrumentalists, the Brooklyn Soul Ensemble prepares students for a live and dynamic performance experience.

Credits: 2
Every Fall and Spring

MUS 211 Monetization of Music
This course provides students with a framework for mastering the music business. Students learn how to identify market trends and generate revenue streams from royalties, advertising, streaming services, sales downloads, live performances, and merchandising.

Credits: 2
On Demand

MUS 210 The Business of Shawn Carter
This course explores the successful music and business career of Shawn Carter (JAY-Z), an entrepreneur, investor, rapper, and producer. Students learn how JAY-Z expanded his music brand (Roc-A-Fella Records) to launch a successful apparel line (Rocawear), entertainment company (Roc Nation), and sports management agency (Roc Nation Sports).

Credits: 2
On Demand

MUS 231 Making of the Album
This course explores the album production process, from the creation of a unique and innovative sound through lyric development, genre selection, and instrumental mixing, to the practical requirement of financing the project. Students also learn how to effectively brand, promote, and distribute an album.

Credits: 3
On Occasion

MUS 241 Women in Music
This course examines the characteristics and development of successful female musicians and singers and the historical context in which they performed. Students explore issues of gender and sexuality as they are portrayed in the media.

Credits: 3
On Occasion

Music Technology, Entrepreneurship & Production Courses

TEP 100D Individual Music Instruction for MTEP Majors – Drums
This course includes individual drum instruction for Music Technology, Entrepreneurship & Production majors.
Prerequisite: Must be in one of the following plans: BMTEPBA, BMUSICBA, BVPBM, BMUSMIN.
Credits: 2

TEP 100D Individual Music Instruction for MTEP Majors – Instrument
This course includes individual instrument (e.g., violin, trumpet, saxophone, percussion, etc.) instruction for Music Technology, Entrepreneurship & Production majors.
Prerequisite: Must be in one of the following plans: BMTEPBA, BMUSICBA, BVPBM, BMUSMIN.
Credits: 2

TEP 100D Individual Music Instruction for MTEP Majors – Piano
This course includes individual piano instruction for Music Technology, Entrepreneurship & Production majors.
Prerequisite: Must be in one of the following plans: BMTEPBA, BMUSICBA, BVPBM, BMUSMIN.
Credits: 2

TEP 104 Audial Skills and Ear Training I
This course develops basic ear training skills through performance and dictation practices. Students learn to hear and write basic melodies, intervals, and common I, IV, V chord progressions. Students also study sight-singing, using the moveable "Do" and the "La" solfege system.

Credits: 3
Every Spring

TEP 105 Sequencing and Production
This course is an extension of Introduction to Music Technology & Production. Students experiment with industry-standard DAWs (Digital Audio Workstations), including Ableton Live, Logic, and Pro Tools. Students also become familiar with advanced midi techniques for studio and live performance.

Credits: 3
Every Spring

TEP 106 Piano Lab I
This course is a continuation of Piano Lab I. Instruction focuses on fundamental-to-intermediate piano techniques, advanced song forms and progressions, and comping patterns common in contemporary music.
Pre requisites: TEP 101, TEP 103
Credits: 2
Every Spring

TEP 107 Music Theory and Application II
This course is a continuation of Music Theory and Application I. Students focus on upper extension seventh chord harmony through the construction of chords and scales, their respective relationships, composition, and analysis.
A pre requisite of TEP 101 is required.
Credits: 3
Every Spring

TEP 108 Foundations of Recording
This course explores the fundamentals of analog and digital audio. Students study recording console design, function, and signal flow; principles of signal processing, such as reverberation, delay, equalization, and compression; and microphone and loudspeaker technology. This course teaches students how to monitor and sculpt EQ settings, when to process input signals, how to select the correct microphone and polar pattern for each instrument, and how to choose the right outboard gear for the track.
Credits: 3
On Occasion

TEP 109 Drum Proficiency
This course covers the basics of beginning and elementary drum techniques. Students develop an introductory understanding of reading and performing rhythms, four-way independence, and contemporary grooves.
Credits: 2
Every Fall
TEP 123 Studio Recording Lab I
In this course, students collaborate on the production of original works by producing, composing, and recording in various genres, styles, and configurations. Studio sessions are recorded, mixed, and critiqued.
Credits: 1
Every Fall and Spring

TEP 124 Aural Skills and Ear Training II
The course is a continuation of Aural Skills and Ear Training I. Students learn to hear and write intermediate-to-advanced melodies, intervals, and chord progressions. Students also study sight-singing, using the moveable “Do” and the “La” solfege system.
Credits: 2
Every Spring

TEP 126 Record Company Operations
This course presents a critical analysis of the anatomy of record companies, with a focus on the role of each department. Students become familiar with various roles, including artists and repertoire (A&R), promotions, marketing, distribution, product management, and business affairs. Special attention is given to contractual relationships with artists and master licenses.
Credits: 3
On Occasion

TEP 140 Business of Music Publishing/Copyright
This course provides a detailed analysis of the inner workings of music publishing companies. Topics covered include copyright registration and renewal, contractual relationships with composers, and an analysis of domestic and international licensing of the publisher’s catalog through recordings, motion pictures, print, and performance rights.
Credits: 3
Rotating Basis

TEP 141 Social Media/Analytics
This course focuses on the metrics and analytics that allow music marketers, promoters, and managers to develop marketing campaigns for specific demographics. The course introduces students to the evolution of social media and branding opportunities available to artists.
Credits: 3
Rotating Basis

TEP 143 Creative Promotion in Media
Today’s evolving media landscape is continuously transforming the ways in which people interact with commerce and each other. These transformations constitute a fundamental shift in the marketplace, necessitating a need for a new generation of creative talent to chart fresh creative canvases within advertising, sports, music, and beyond. This course takes an in-depth look at the possibilities of a creative career for today’s brightest up-and-coming talent. In an unconventional setting, the course examines how to turn creative curiosity and passion into a full-time career, drawing knowledge from some of today’s most innovative creative practitioners.
Prerequisite of Sophomore standing is required.
Credits: 3
Every Fall

TEP 146 Songwriting I
This workshop-style course examines the craft of popular songwriting from an elementary and practical viewpoint. Song elements covered include basic song structures, lyric writing, melody, harmonic setting, and basic accompaniment approaches. The course culminates in a class recital of original student works.
Credits: 3
Every Fall

TEP 147 Music Production for Records
This course is designed for producers, entrepreneurs, and songwriters/performers. Topics covered include song choice, song analysis, lyric analysis, artist development, creative vision, scheduling, budgeting, communication, servicing the needs of the artist and record company, and tracking the production process from demo to master.
Credits: 3
Rotating Basis

TEP 148 Foundations of Mixing
This course introduces students to the aesthetic considerations and functional operation of equipment for multi-track mixdown of stereo masters. Topics covered include common control room procedures and protocols, console and control room signal flow, control logic, patching and balance, use of outboard signal processors, and documentation protocols.
Credits: 3
Every Spring

TEP 150 The Making of Music Videos
This course focuses on the production of music videos. Looking at music videos of the past and present, students learn how digital cameras, lighting, and set design interact to create a visual depiction of the music. Working in small groups, each student develops, directs, and edits their own music video.
Credits: 3
On Occasion

TEP 152 Culture of Rhythm & Production
This interactive course focuses on the history and style of music and dance fundamentals across different regions, cultures, and musical genres, including hip-hop, pop, country, and rock.
Credits: 3
Rotating Basis

TEP 156 The Making of Music Videos
This course focuses on the production of music videos. Looking at music videos of the past and present, students learn how digital cameras, lighting, and set design interact to create a visual depiction of the music. Working in small groups, each student develops, directs, and edits their own music video.
Credits: 3
Every Fall

TEP 157 The Making of Music Videos
This course focuses on the production of music videos. Looking at music videos of the past and present, students learn how digital cameras, lighting, and set design interact to create a visual depiction of the music. Working in small groups, each student develops, directs, and edits their own music video.
Credits: 3
Every Fall

TEP 158 Artis2 Management
This course examines the leadership dynamics and motivation possessed by current and potential managers.
Credits: 3
On Occasion

TEP 159 Music Acoustics
This course explores the role and importance of an artist manager. Students develop the knowledge and skills required to pursue an entrepreneurial career, whether as the founder of a new business or a leader in any creative endeavor.
Credits: 3
On Occasion

TEP 160 Music Entrepreneurship
This course provides an extensive overview of arts entrepreneurship. Students develop the knowledge and skills required to pursue an entrepreneurial career, whether as the founder of a new business or a leader in any creative endeavor.
Credits: 3
On Occasion

TEP 161 Legal Aspects of Music Industry
This course provides an overview of business and legal issues relevant to musicians and songwriters, with special emphasis on copyright law, recording and music publishing agreements, and relationships between artists and managers, producers, and investors.
Credits: 3
Every Fall

TEP 162 Songwriting II
This course is a continuation of Songwriting I. Instruction emphasizes proper integration of lyrics, melody, integration of modulation, transitional material, culminating in a final student project.
A pre requisite of TEP 146 is required.
Credits: 3
Every Spring

TEP 164 Songwriting II
This course is a continuation of Songwriting I. Instruction emphasizes proper integration of lyrics, melody, integration of modulation, transitional material, culminating in a final student project.
A pre requisite of TEP 146 is required.
Credits: 3
Every Fall

TEP 165 Music Acoustics
This course provides an overview of sound waves and vibration, sound propagation and room acoustics, sound level and measurement, human perception of sound, and tuning systems. Coursework is directed toward the contemporary musician’s need to understand acoustical phenomena in various contexts, with performance, writing, and music technology applications.
Credits: 3
On Occasion

TEP 166 Music Acoustics
This course provides an overview of sound waves and vibration, sound propagation and room acoustics, sound level and measurement, human perception of sound, and tuning systems. Coursework is directed toward the contemporary musician’s need to understand acoustical phenomena in various contexts, with performance, writing, and music technology applications.
Credits: 3
On Occasion

TEP 167 Music Acoustics
This course provides an overview of sound waves and vibration, sound propagation and room acoustics, sound level and measurement, human perception of sound, and tuning systems. Coursework is directed toward the contemporary musician’s need to understand acoustical phenomena in various contexts, with performance, writing, and music technology applications.
Credits: 3
On Occasion

TEP 168 Music Acoustics
This course provides an overview of sound waves and vibration, sound propagation and room acoustics, sound level and measurement, human perception of sound, and tuning systems. Coursework is directed toward the contemporary musician’s need to understand acoustical phenomena in various contexts, with performance, writing, and music technology applications.
Credits: 3
On Occasion

TEP 169 Music Acoustics
This course provides an overview of sound waves and vibration, sound propagation and room acoustics, sound level and measurement, human perception of sound, and tuning systems. Coursework is directed toward the contemporary musician’s need to understand acoustical phenomena in various contexts, with performance, writing, and music technology applications.
Credits: 3
On Occasion

TEP 170 Music Acoustics
This course provides an overview of sound waves and vibration, sound propagation and room acoustics, sound level and measurement, human perception of sound, and tuning systems. Coursework is directed toward the contemporary musician’s need to understand acoustical phenomena in various contexts, with performance, writing, and music technology applications.
Credits: 3
On Occasion

TEP 171 Music Acoustics
This course provides an overview of sound waves and vibration, sound propagation and room acoustics, sound level and measurement, human perception of sound, and tuning systems. Coursework is directed toward the contemporary musician’s need to understand acoustical phenomena in various contexts, with performance, writing, and music technology applications.
Credits: 3
On Occasion

TEP 172 Music Acoustics
This course provides an overview of sound waves and vibration, sound propagation and room acoustics, sound level and measurement, human perception of sound, and tuning systems. Coursework is directed toward the contemporary musician’s need to understand acoustical phenomena in various contexts, with performance, writing, and music technology applications.
Credits: 3
On Occasion

TEP 173 Music Acoustics
This course provides an overview of sound waves and vibration, sound propagation and room acoustics, sound level and measurement, human perception of sound, and tuning systems. Coursework is directed toward the contemporary musician’s need to understand acoustical phenomena in various contexts, with performance, writing, and music technology applications.
Credits: 3
On Occasion

TEP 174 Music Acoustics
This course provides an overview of sound waves and vibration, sound propagation and room acoustics, sound level and measurement, human perception of sound, and tuning systems. Coursework is directed toward the contemporary musician’s need to understand acoustical phenomena in various contexts, with performance, writing, and music technology applications.
Credits: 3
On Occasion

TEP 175 Music Acoustics
This course provides an overview of sound waves and vibration, sound propagation and room acoustics, sound level and measurement, human perception of sound, and tuning systems. Coursework is directed toward the contemporary musician’s need to understand acoustical phenomena in various contexts, with performance, writing, and music technology applications.
Credits: 3
On Occasion

TEP 176 Music Acoustics
This course provides an overview of sound waves and vibration, sound propagation and room acoustics, sound level and measurement, human perception of sound, and tuning systems. Coursework is directed toward the contemporary musician’s need to understand acoustical phenomena in various contexts, with performance, writing, and music technology applications.
Credits: 3
On Occasion

TEP 177 Music Acoustics
This course provides an overview of sound waves and vibration, sound propagation and room acoustics, sound level and measurement, human perception of sound, and tuning systems. Coursework is directed toward the contemporary musician’s need to understand acoustical phenomena in various contexts, with performance, writing, and music technology applications.
Credits: 3
On Occasion

TEP 178 Music Acoustics
This course provides an overview of sound waves and vibration, sound propagation and room acoustics, sound level and measurement, human perception of sound, and tuning systems. Coursework is directed toward the contemporary musician’s need to understand acoustical phenomena in various contexts, with performance, writing, and music technology applications.
Credits: 3
On Occasion

TEP 179 Music Acoustics
This course provides an overview of sound waves and vibration, sound propagation and room acoustics, sound level and measurement, human perception of sound, and tuning systems. Coursework is directed toward the contemporary musician’s need to understand acoustical phenomena in various contexts, with performance, writing, and music technology applications.
Credits: 3
On Occasion

TEP 180 Music Entrepreneurship
This course explores the role and importance of an artist manager, as well as the relationship between artist and manager. Students develop a greater understanding of career planning, money management, and problem-solving. Students also examine the leadership dynamics and motivation possessed by current and potential managers.
Credits: 3
On Occasion

TEP 181 Concert Promotion
This course introduces the fundamentals of concert promotion and venue management. Topics covered include concert promotion and advertising, talent buying, music performance licenses, personnel management, and concert production and administration.
Credits: 3
On Occasion

TEP 182 Artist Management
This course explores the role and importance of an artist manager, as well as the relationship between artist and manager. Students develop a greater understanding of career planning, money management, and problem-solving. Students also examine the leadership dynamics and motivation possessed by current and potential managers.
Credits: 3
On Occasion

TEP 183 Studio Arranging
This course introduces the musical concepts of melody, rhythm, harmony, and form as applied to the principles and techniques of writing and arranging for the rhythm section (drums, bass, guitar, keyboards, basic percussion). Students study various contemporary musical styles and the musical concepts that comprise them, including
writing from the "bottom up" (groove-driven) and "top down" (working with a melody in a lead instrument or voice). Coursework incorporates combinations of acoustic, electronic, and MIDI instruments.

Credits: 3
On Occasion

TEP 198 Independent Study
This course gives students an opportunity to complete independent work while supervised by Roc Nation faculty. Students demonstrate learning through a creative production or research paper.

Credits: 3
On Demand

TEP 204 Sound for Visual Media
This course provides an introduction to sound intended for film, television, and multimedia. The course covers audio post-production with a focus on sound design, SFX editing, Foley, and ADR. Students learn how to spot, edit, and assemble dialogue, sound effects, foley, and music. Students also explore techniques for using sound effect libraries, editing production dialogue, and directing and recording.

Credits: 3
On Occasion

TEP 205 Internship
This individually arranged course aligns traditional coursework with practical industry experience and allows students to develop skills, network, and launch a career in sports before graduation. While at their internship placements, students are challenged to put theory into practice.

Credits: 0
All Sessions

TEP 300 Capstone
The Capstone course is a seminar in which students receive individual guidance in the preparation and completion of a professional project in the field of music technology, entrepreneurship, and production.

Credits: 3
On Demand

TEP 301 Thesis/ Culminating Project
This course represents the culmination of a student's work in the program and provides students with the opportunity to develop an original project in preparation for a career in music. Thesis projects may consist of a research or creative project.

Credits: 3
All Sessions
DEPARTMENT OF SPORTS

The Roc Nation School sports programs encompass Sports Communications & Marketing and Sports Management. Students work with an elite faculty and visiting guests, from executives at leading talent agencies and professional leagues to network television producers and team radio broadcasters. LIU’s location in the heart of Downtown Brooklyn gives students direct access to a wide variety of renowned sporting events, venues, media companies, and professional and collegiate teams.

B.A. Sports Communication & Marketing

The Roc Nation’s School of Music, Sports & Entertainment’s innovative B.A. in Sports Communication & Marketing is the first of its kind in the New York. The program prepares students for careers in a dynamic and growing spectrum of sports media. As the $500 billion sports industry continues to grow, there will be increased demand for professionals with business and communications training.

Drawing on years of industry experience, LIU’s faculty experts create a dynamic course of study through experiential learning and access to world-renowned sports industry professionals.

Students gain practical experience in sports writing and reporting; promotion of sports teams, events, and products; performing as a play-by-play announcer or program host; and production of sports content for traditional, online and social media. Students also have the opportunity to engage with LIU’s robust alumni network, which includes notable sports reporters, publicists and experts in New York City and beyond. Graduates of the program are ready for careers in sports broadcasting, sports management, or sports information.

LIU Brooklyn’s location in the heart of Downtown Brooklyn provides students with ample access to and opportunities with sports franchises — Barclays Center, home of the Brooklyn Nets, is just four blocks from campus.

FYS 01 First Year Seminar 1.00
JOU 191 Introduction to Mass Communication 3.00
JOU 204 The Globalization of Sports: Origins and Prospects 3.00
New York City is home to one of the largest and most iconic sports markets in the world. Roc Nation Sports Management students earn their degree while studying in a top market in the $500 billion sports industry.

The Sports Management program trains students in all aspects of sports management. Students study a variety of disciplines, including business, marketing, and communications and management, and gain industry-specific skills, like representation, administration, branding, event planning, and public relations.

Students have the opportunity to gain exceptional career experience before graduating through premier internship opportunities and access to the University’s global alumni network. Shark Nation is well represented in the sports world, and LIU alumni have risen to the heights of the sports industry.

### Credit Requirements

- Minimum Total Credits: 120
- Minimum Major Credits: 45
- Minimum Liberal Arts and Sciences Credits: 60
SCM 147 Sports Information and Public Relations
This course examines the techniques of sports publicity, promotion, and marketing for both amateur and professional athletics. Students learn to produce sports statistics, press releases, press kits, and marketing strategies for print, digital, and broadcast media. Sports information professionals meet with students to develop projects.
The prerequisite of JOU 119 / ENG 126 is required or permission of the Department.
Credits: 3
Rotating Basis

SCM 151 Sports Writing and Reporting
This course addresses all aspects of sports writing and reporting, including deadline coverage, game description, feature stories, column writing, and fantasy sports. Students compare print, digital, and broadcast sports coverage to evaluate trends and effectiveness. Students develop skills in crafting leads, reporting ethically, writing clearly, researching, cultivating sources, and conducting interviews. Guest speakers working in sports journalism are an integral part of the class.
The prerequisite of JOU119/ENG 126 or MA 150 is required, or permission of the Department.
Credits: 3
Rotating Basis

SPM 143 Brand Building Through Visual Media
This course is taught in collaboration with media giant, Conde Nast. It is structured around producing a talent profile for print and online publications. Course assignments cover creating a photo and video shoot, designing the magazine layout, distributing the story online, and promoting it on social media. Additionally, this course explores the strong relationship between an individual story and the larger brand, and how it defines its values and mission within the current cultural landscape.
Credits: 3
Every Spring

SPM 176 Introduction to Sport Management
This course provides an overview of many topics in sports management. These include ethical and legal aspects, facility management, marketing, finance, media, critical thinking, and sports management research. Students begin to explore career navigation through learning activities, professional profiles, case studies, and international examples.
Credits: 3
Every Fall

SPM 186 Sport Facilities Management
A study and systematic guide to the management issues and practical problems that sports managers must address to ensure financial, sporting and ethical success. The course will cover feasibility assessment, market research, event bidding and branding, risk analysis, contract and project management, corporate structure, budgeting as well as economic, social, community and environmental issues. The course will consist of both classroom and field experience. Students will be required to devote approximately 10 hours outside of class toward managing an on-campus NCAA Division I sports event. The students will be assigned a project that will require them to attend the event and all related functions, such as preparing the facility, managing ticket sales, promotions and marketing the event.
The prerequisite of SPS 176 is required.
Credits: 3
Every Spring

SPM 191 Leadership in Sport Management
This course examines the successful and powerful leadership methods of legendary coaches such as John Wooden and Mike Krzyzewski. Students learn how to put into practice their values, principles and lessons into the business of sport, including developing team culture, striving for personal excellence, improving productivity and building trust and relationships. Students will develop the skills to assess the strength of an organization as well as identify and address the areas of need and growth. The main topics of the course will include: communication, decision making, managing change, motivation, staffing and teamwork. Students will stay current with leadership and management issues in sports as reported in the New York Times, Sport Business Journal, USA Today, and other publications. Each week, we will discuss the application of reading assignments to breaking sports news stories. Guest speakers from the world of sports will be invited to share their leadership philosophy and experience with the class.
Credits: 3
Every Fall

SPM 200 Sport Law
This course provides an extensive overview of the legal principles, business models, and regulatory frameworks governing the sports industry. This course is not intended to be a law school class, but rather an application of legal concepts important for sports managers. Topics introduced include contractual issues related to sponsorship, endorsement, licensing, and stadium signage and concessions; the importance of antitrust and labor laws; and legal issues involving injury and risk management.
Credits: 3
Rotating Basis

SPM 266 Internship in Sport Management
This individually arranged course aligns traditional coursework with practical industry experience and allows students to develop skills, network, and launch a career in sports before graduation. With 240 hours spent in the workplace, students are challenged to put theory into practice.
Credits: 3
All Sessions

SPM 276 Sports Entrepreneurship
Frequency: Every Spring
This course introduces the primary concepts of entrepreneurship and innovation in sports. Students study successful entrepreneurs to identify distinguishable characteristics, behaviors, and skills. Using case studies, students learn how to identify gaps in the market, fund a sports business, structure a new venture, and manage growth.
Credits: 3
Every Spring

SPM 286 Sports Finance
This course provides introduces the basic principles of fiscal responsibility and accountability as applied to the sports industry. Students learn how to estimate and measure the profitability of sports ventures using analytical techniques unique to sports. The course also addresses the process of financing sports ventures, from venture capital for startups to investment-grade debt for mature ventures.
Credits: 3
Rotating Basis

SPM 296 Digital Sports Media & Marketing
This course provides an extensive overview of media and marketing. Students learn about search engine optimization (SEO) and the factors that create a searchable presence in digital media. Students practice developing compelling brand messages through storytelling and designing digital advertisements to attract and retain customers.
Credits: 3
Rotating Basis

SPM 306 Sports Branding, Sponsorship-Promotion
This course provides an extensive overview of consumer behavior.
Credits: 3
Rotating Basis

SPM 316 Global Sports
This course exposes students to sports in other countries and the institutions that govern international competition. Students gain an understanding of the International Olympic Committee (IOC) and the International Federation of Football Associations (FIFA). The course also explores popular international sports, such as soccer, cricket, rugby, table tennis, and more.
Credits: 3
Rotating Basis

SPM 326 e-Sports & Alternative Sports
Esports has transformed gaming into a global sport, generating more than $1 billion in revenue and 300 million viewers. This course introduces students to the fundamentals of Esports and alternative sports. Students identify best practices through case studies of the booming Esport industry and its associated
stakeholders, including leagues, owners, advertisers, and publishers.

Credits: 3
Rotating Basis

SPM 336 Sports Betting & Fantasy Sports
This course dives into the rapidly evolving business of sports betting. Students explore the legal and regulatory frameworks governing sports wagering. Students also become familiar with various betting models and strategic research tools. This course also provides an overview of the booming business of fantasy sports and the data analytics required to master the scoring system.

Credits: 3
Rotating Basis

SPM 386 Sports Analytics
Now more than ever, data is available to inform strategic business decisions in sports. This course provides an overview of the practices essential to predicting and assessing team, player, and event performance. Students learn how to conduct market research and master public relations strategies.

Credits: 3
Rotating Basis
The School of Health Professions at LIU Brooklyn is dedicated to providing superior quality education in the health professions to a diverse student body. With strong ties to the community and to many health care facilities that support educational efforts as well as research, our programs address clinical health care, community-based health, behavioral health, social and environmental issues. The school prepares students for careers in a variety of health professions, including physical therapy; communication sciences and disorders; exercise science; respiratory care; occupational therapy; physician assistant; public health; social work; mental health counseling; marriage and family therapy; school psychology and psychology. The rich health professions education environment at the LIU Brooklyn Campus allows our programs to introduce students to interprofessional education and practice. The programs span undergraduate, graduate, and doctoral levels, and lead to careers in growing health professions that offer a wealth of career opportunities. Graduates of our programs are in high demand in the current health care job market, and this level of demand is expected to continue for many years to come.

The School of Health Profession’s faculty members are renowned experts in their fields and have vast experience in their respective areas of specialization, which contributes to their exceptional teaching abilities. Many faculty members are engaged in research, which contributes greatly to their student’s learning experiences and their own professional growth.

### Criminal Background Checks and Drug Testing

Many clinical/field experience affiliates (i.e., hospitals and clinics) now require the completion of criminal background checks and/or drug testing for employees, volunteers, and students affiliated with the site. Therefore, School of Health Professions students who plan to participate in a clinical/field experience may be asked to undergo a criminal background check, and/or a drug screen. A criminal conviction and/or the use of illegal drugs may impede or bar your entry into your chosen field of study. Students desiring entrance into the School of Health Professions should be aware that our clinical/field affiliates have the right to reject or remove a student from the site if a criminal record is discovered or if a drug test is positive. If a student is rejected from a clinical/field site due to information contained in the criminal background check, or drug screen, you may be unable to complete a required clinical/field experience. If you are unable to complete program requirements, you may be advised to withdraw from the program.

In addition, School of Health Professions students should be aware that the presence of a criminal record could result in the refusal of the licensing/certification/registration agencies (e.g., state licensing board) to issue the credential or license to practice. Prospective students are strongly encouraged to contact the pertinent state licensing boards to inquire whether a criminal record, including driving offenses, would preclude the individual from eligibility to obtain a license/certification.

### DIVISION OF HEALTH AND EXERCISE SCIENCE

Exercise Science offers undergraduate and graduate programs for students who wish to embark on or advance their careers in the health professions. Our division offers a Bachelor of Science (BS) degree program in Exercise and Wellness Science and an MS in Exercise Science.

Our programs are complemented by excellent opportunities for hands-on experiences and applied research and community-based service that is responsive to the health and exercise needs of the diverse populations of New York City and the surrounding Tri-State area. Students enjoy the benefits of our relationships with the Steinberg Wellness Center and NCAA Division-I athletic teams. In addition, our off-campus ties include Pfizer Corporate Fitness, Brooklyn Nets, Velocity Sports Performance, La Palaestra Center for Preventive Medicine, and other clinical affiliations that specialize in athletic training, fitness, rehabilitation, and sports performance.

### B.S. Exercise Science and Wellness

The B.S. in Exercise and Wellness Science is designed to meet the growing need for health and fitness professionals versed in the science of exercise, physical activity, and sports performance. Our four-year program focuses on such areas as exercise physiology, motor learning, conditioning for sport, nutrition, biomechanics, sport management, and fitness programming for healthy and unhealthy populations, as well as those with disabilities. Our program is recognized by the National Strength and Conditioning Association (NSCA).

Credit and GPA Requirements
Minimum Total Credits: 120
Minimum Liberal Arts and Sciences Credits: 60
Minimum Major Credits: 42
Ancillary Course Requirements: See Above

PE 2 Introduction to Golf
An introduction to the fundamentals of golf, including stance, grip and swing, as well as to course play, selection of equipment, safety, and golf terminology. Two hours.
Credits: 1
On Occasion

PE 21 Sport, Functional Training and Performance I
Students receive instruction and experience in functional training of athletes and non-athletes for strength, balance, stability, agility, power and flexibility using a systematic progressive approach. Student learns basic exercises. Additional time is required other than the standard meeting times.
This course has an additional fee.
Credits: 1
Every Fall

PE 22 Sport, Functional Training and Performance II
Students receive instruction and experience in functional training of athletes for balance, agility, power and flexibility. Using a systematic progressive approach, student progresses to more advanced and challenging exercises. Additional time is required other than the standard meeting times.
The pre-requisite of ESW 21 is required or permission of the Division.
Credits: 1
Every Spring

PE 58 Introduction to Modern Dance I
A studio survey course that offers the tools with which to participate in and appreciate dance, music in relation to dance, and the dance heritage that provides the essential materials for this course. Students come to appreciate the body as an instrument capable of many forms of expression while they build strength, flexibility and control through the kinesthetic understanding of a basic movement vocabulary. Introduction to modern dance. Three hours.
(Same as PE 58.)
May be taken twice for credit.
Credits: 3
Cross-Listings: DNV 1, PE 58, TFT 150
Every Fall and Spring

PE 140 CPR and First Aid for the Health Care Provider
An opportunity for students, upon successful understanding of the theory and practice, to earn certification cards in CPR and Standard First Aid.

PE 146 Principles and Philosophy of Coaching I
A study of theory and methods of coaching in elementary, secondary schools and collegiate settings. Focus on administrative, organizational and interpersonal skills for potential coaches. The course will also address planning and teaching skills and strategies with recommendations concerning the mechanics of coaching.
Credits: 3
Every Spring

PE 150 Motor Learning and Development
This course provides students with a framework for understanding motor learning and development and how they interact and effect each other. By understanding the factors that influence the development of motor skills across the life span, students will become better prepared to teach movement skills effectively at any chronological age and at any skill level.
The pre-requisite of ESW 21 is required.
Credits: 3
Every Spring

PE 151 Functional Kinesiology
The class explores the science of human motion from a neuromuscular perspective. Emphasis will be on the application of knowledge relative to the movements, vocabulary and training principles in health sciences. Areas of course emphasis will include: Functional anatomical review of the musculoskeletal system, review of muscle morphology and an examination of movement patterns and configurations.
BIO 137 must be taken as a Pre- or Co-Requisite
Credits: 3
Every Fall and Spring

PE 152 Exercise Physiology I
This course will consider the physiologic effects of exercise on the human body, covering topics such as bioenergetics, energy transfer and thermogenics.
The effect of activating on several physiologic support systems (i.e. pulmonary, circulatory, neuromuscular, and hormonal will be discussed in detail. This course is designated as the writing intensive course for Sports Sciences majors and fulfills the University's requirement for Writing Across the Curriculum.
The pre-requisite of BIO 137 or CHE 1 is required.
Credits: 3
Cross-Listings: ESW 352, PE 152
Every Fall

PE 154 Adapted Physical Education I
This course provides students with an understanding of the physical, psychosocial and medical characteristics of people with various disabilities. Based on assessment, students learn to adapt exercise, physical activity and sports programs to the unique abilities, needs and preferences of each individual. In addition, students learn to analyze case studies and write individualized education plans (IEPs) in Adapted Physical Education.
Credits: 3
Every Fall

PE 156 Evaluation in Health and Fitness
This course combines measurement and evaluation, theory coupled with laboratory experiences in the physical assessment of health and fitness. The objective of this course is to provide the student with a broad understanding of preparticipation screening, risk stratification and assessment of strength, muscular endurance, muscular power, body composition, and flexibility.
Credits: 3
Cross-Listings: ESW 356, PE 156
Every Fall and Spring

Exercise Science & Wellness Courses

ESW 21 Sport, Functional Training and Performance I
Students receive instruction and experience in functional training of athletes and non-athletes for strength, balance, stability, agility, power and flexibility using a systematic progressive approach. Student learns basic exercises. Additional time is required other than the standard meeting times.
This course has an additional fee.
Credits: 1
Every Fall

ESW 22 Sport, Functional Training and Performance II
Students receive instruction and experience in functional training of athletes for balance, agility, power and flexibility. Using a systematic progressive approach, student progresses to more advanced and
This course is based on the American College of

ESW 104 Exercise Prescription II
This course is based on the American College of

Sports Medicine's Guidelines for Exercise Testing and Prescription. ACSM's principles are applied to develop appropriate exercise programming for individuals with musculoskeletal, neurological, auto-immune and cardiovascular impairments. Laboratory experiences and case studies are emphasized.

The pre-requisite of ESW 303 is required.

ESW 105 Lifeguard Training
This course gives the most current instruction in the American Red Cross lifeguard training techniques, First Aid and CPR skills required to gain eligibility for a lifeguard position. Upon successful completion, a student will earn certifications in both American Red Cross Lifeguard Training and CPR for the Professional Rescuer. Adequate swimming skills are necessary. Prerequisites: On first day, student must: swim 300 yards (20 lengths of the pool); 200 yards front crawl; 100 breaststrokes and 200 of your choice. Swim 20 yards, submerge to a minimum depth of 9 feet, retrieve a 10-pound brick from the bottom, return it to the surface, and bring it back to the starting point. If students cannot complete this, they will be guided into a more appropriate swim class.

ESW 107 Ai Chi Aquatics for People with Developmental Disabilities
This course offers a unique form of aquatic exercise titled ai chi to promote health, relaxation and fitness for people with developmental disabilities. LIU students will learn to use ai chi breathing techniques, gentle movement progressions and progressive resistance training in water to relax, improve movement flow, body alignment, and strengthen muscles of their clients. Ai chi will be practiced standing in shoulder-depth water in a group class as well as one-on-one instruction provided by LIU student to client with faculty supervision and guidance.

Credits: 3
Every Fall

ESW 115 Principles of Resistance Training
This course will introduce students to the fundamental skills, and principles behind resistance training. Students will learn proper exercise techniques utilizing free weights, machines, bands and other various forms of exercise modalities.

Credits: 3
Every Fall and Spring

ESW 121 Introduction to Physical Education and Exercise Science
This course provides an overview of professions in exercise science, physical education, and athletic training including career opportunities, certifications, professional standards critical current issues and professional organizations. Students will also learn about the role and implementation of interprofessional practice within each field of study.

Credits: 2
Every Fall and Spring

ESW 122 Tai Chi
The course will introduce the students to the practice and philosophy of the Asian Martial Art of Tai Chi considered by many as the perfect exercise. Tai Chi is about efficiency, effectiveness and effortless action. Students will learn basic movements of the t'ai chi form.

Credits: 2
Every Fall, Spring and Summer

ESW 123 Yoga in Action
Students will read and discuss several aspects of Yoga's place in the contemporary world, in the context of its historical, philosophical, and sociological implications. The lecture component will be supported and complimented by regular practice in the lab, so that students come away with an understanding of both the theoretical and practical aspects of yoga, as well as the relationship between them.

Credits: 3
Cross-Listings: ESW 123, HS 123
Every Fall and Spring

ESW 124 Yoga & Mindful Living
This course will explore the physiological and neurological principles of mindfulness, examining their relation to the urban environments and cultural contexts of Brooklyn, New York. Particular emphasis will be placed on how to create conditions in which improved ways of interacting mindfully with ourselves and others can be learned and practiced. Students will learn specific yoga and breathing techniques designed to improve focus, energy and performance. This course will be broadly aimed at students interested in exercise science, health care and education, as well as students who desire to enhance their personal and professional development.

ESW 125 Blackbird Aquatics Boot Camp
The focus of the course is to provide a water fitness program that offers the benefits of a pool, with little to no impact on joints while expanding lung capacity. In addition, the water environment will provide similar benefits of weight and resistance training of a traditional gym. Knowledge and skills will be taught to all levels of participants from beginner to advance. Repetitions and intensity will be based on the participants’ level of fitness. Students will participate and learn how a full body exercise program is an excellent vehicle to boost their cardiovascular endurance and strength. Participants will be required to have appropriate swim wear and caps to cover hair. Goggles are suggested but not required. The course will be taught in the shallow end of the pool. Participants do not need to know how to swim, but their heads under water, or go in the deep end of the pool at any time. Advanced aquatic skills will be provided for those students that show the aptitude and desire to swim in the deeper water.

Credits: 3
On Occasion
ESW 131 Adapted Aquatics for Children with Autism
This course is designed to enable children with Autism to experience water, fun, safety and success. Students will assist children with autism, under faculty supervision, in a one-to-one teaching ratio using a developmental skill progression model from acclimation to water, to movement exploration in water, to floating and pre-beginner swim skills. Through lecture, laboratory and hands-on experience, students will also learn about autism and how to adapt aquatic activities to meet each child’s needs. The application of principles of safety in the aquatic environment is always emphasized.

ESW 132 Health Advocacy and Wellness for people with Intellectual Disabilities
This course introduces principles of health advocacy and wellness into an adult day habilitation environment at LIU for adults with intellectual disabilities. Through lecture, simulations, laboratory and hands-on experiences, students learn about intellectual disabilities and how to organize, adapt and present wellness activities such as health eating, stress reduction, basic first aid, relaxation, exercise and socialization to meet each individual’s needs. Students will support participants with intellectual disabilities in the wellness classes and develop knowledge and leadership skills in co-leading sessions. Students will learn principles of safety and how to assist people to become more independent.

Credits: 3
Every Fall, Spring and Summer

ESW 135 Exercise and Wellness for Individuals with Multiple Sclerosis
Through lectures and hands-on experience, students will learn to design and implement exercise and wellness programs for individuals with Multiple Sclerosis. In both individual and group settings, students will conduct flexibility, cardiovascular, and strength training programs to improve physical function and quality of life. In addition, wellness education will focus on developing healthy lifestyles in areas of nutrition, stress management, relaxation, etc. Students will learn functional assessments of individuals with Multiple Sclerosis performed by the faculty member of the program and will learn ethical and safety standards during evaluation and exercise. The lecture portion of the class will provide students with basic information about the causes, symptoms, progression, and treatment of Multiple Sclerosis with special emphasis on the roles of exercise and wellness. Students will become familiar with the role of community support groups and how to build positive social/emotional relationships with their clients as health care professionals.

Credits: 3
Cross-Listings: ESW 135, HS 335
On Demand

ESW 141 Emergency Medical Technician (EMT) Certification Preparation
Upon successful completion of this course students are eligible to take the New York State and the National Registry of Emergency Medical Technicians examinations to become an EMT. Both certifications allow EMT’s to work in New York as well as other states. This course covers basic principles of Anatomy, Cardiology, Pathophysiology, Pharmacology and Neurology as it applies to emergency care. Theoretical knowledge and clinical skills will be utilized in the required clinical rotations prior to the end of the course 3 credits.

Pre-Requisite of SPS 140
Credits: 3
Cross-Listings: ESW 141, HS 141
All Sessions

ESW 145 Lifestyle Wellness Coaching
This course is designed to provide students with the tools they need to practice lifestyle wellness coaching skills that can be utilized in a variety of career settings in the health professions. Through evidence-based coaching processes, students will learn a systematic way to support and motivate clients and/or patients so that they can move toward healthier lifestyles. Students will learn core coaching competencies such as goal setting, effective communication, motivational techniques, behavior modification, and a variety of other effective principles of coaching, in a dynamic setting. Lifestyle wellness coaching, as an action-centered partnership, will empower clients to successfully achieve their health and wellness goals, and ultimately make changes that will make a positive impact on their quality of life.

ESW 146 Principles and Philosophy of Coaching I
A study of theory and methods of coaching in elementary, secondary schools and collegiate settings. A focus on administrative, organizational and interpersonal skills for potential coaches. The course will also address planning and teaching sports skills and strategies with recommendations concerning the mechanics of coaching.

Credits: 3
Every Spring

ESW 150 Motor Learning and Development
This course provides students with a framework for understanding motor learning and development and how they interact and effect each other. By understanding the factors that influence the development of motor skills across the life span, students will become better prepared to teach movement skills effectively at any chronological age and at any skill level.

The pre-requisite of ESW 21 is required.

ESW 153 The Science of Player Development and Scouting in the NBA
Working as a scout for the NBA requires a thorough understanding of the nuances of playing basketball at highest level. Featuring approximately 450 players who participate globally, the odds of making “the league” out of millions of players from around the world are not high. In this class we will address such questions as: What qualities does it take to get to the NBA? What does it take to stay in the NBA after a rookie contract? What does it take to increase value as a player in the NBA? One must be able to identify the common tangible and intangible characteristics that translate from college, D-league, and International competition to the NBA. The course provides an introduction to the guidelines and best practices for talent evaluation. High levels of participation and energy are required of students in this course.

Course Objectives: The curriculum is designed to provide a platform to explore and examine the dynamics of player development and player evaluating. During the course, you will learn how to produce a scouting report. You will understand how to create an ‘intel report’. You will do mock rankings of college players. You will analyze NBA rosters and assess why a particular college prospect might be someone a franchise should choose in the upcoming draft. Ultimately, you will have an understanding of the attributes that translate to the NBA as a viable player prospect.

Credits: 3
On Occasion

ESW 157 Fitness Evaluation for Athletic Performance
This course will provide students with a broad understanding of the evaluation of athletic ability. Through a combination of theory with actual measurement and evaluation, students will learn how to properly assess muscular strength, speed, agility, muscular power, body composition, flexibility and other attributes necessary for athletic competition.

Credits: 3
Every Fall and Spring

ESW 158 Coaching Basketball Developing Educated and Licensed Basketball Coaches (USA-BB Coaches)
This course focuses on educating future basketball coaches to become outstanding teachers of the game and supportive mentors to players. Topics covered include practice and game planning, teaching skill development, effective communication, coaching etiquette, player safety and more. The course emphasizes hands-on learning experiences teaching youth and guest speakers from the junior N.Y. Knicks Youth Program. Students will have a unique opportunity to earn a USA -BB coaching license with its many benefits.

Credits: 3
On Occasion

ESW 175 Basic Skills in Health and Exercise
Psychology

Basic Skills in Health and Exercise Psychology will teach students the necessary interviewing skills and strategies to build healthy, supportive, and therapeutic working relationships with athlete(s) and/or exerciser(s). In addition, using evidenced-based counseling, health, and exercise psychological principles, theories, and techniques, students will develop the foundational skills needed to communicate within health and/or exercise settings. This course will be taught in a blended environment which will include online activities and in-class workshops that will require students to apply and practice course material in both traditional and online classroom environments. 3 credits

ESW 180 Introduction to Sports Psychology

A review of the application of psychological concepts to the study of sports performance. Students learn how to create a positive environment for performance enhancement by incorporating such factors as motivation, concentration, relaxation, goal setting, athletic injury, recovery, and mental imagery.
The pre-requisite of PSY 3 is required or permission of the Division.

Every Fall and Spring

ESW 189 Basic Biomechanics and Motion Analysis

This course will provide students with a fundamental understanding of mechanical principles and how those principles can be utilized to analyze human movement. Analysis of human movement with simple video, as well as 2 and 3-D motion capture and force platform technology will be introduced. The course will apply both qualitative and quantitative analysis of human movement to develop the student's observation and problem solving skills. Analysis of movement/sports skills, graphical presentation of kinematic and kinetic data, and simple projects will be conducted and presented in a laboratory setting. Students must spend an additional weekly hour in the motion capture lab. Information will be presented and evaluated in the classroom and laboratory.
The pre-requisites of ESW 351 and PHY 20 are required.

Credits: 3

Every Spring

ESW 190 Neuroscience and Wellness

This course will provide students with a basic understanding of the nervous system anatomy, its structure, and its function in health and exercise. Each part of the nervous system, including the brain, the spinal cord and the peripheral nerves is presented through lectures and labs emphasizing both anatomy and physiology. This course has an additional fee.

Pre-requisite of BIO 131 is required.

Credits: 3

On Occasion

ESW 193 Exercise Training for Individuals With Parkinson’s Disease

Through lecture and clinical study students will learn to design exercise training programs for individuals with Parkinson's disease in a group setting by implementing cardiovascular and resistance training to improve and maintain physical function and quality of life. Students will become familiar with the role of community-based support groups and how to build a relationship as health professionals with support group members. Students will observe functional assessments of individuals with Parkinson's performed by faculty and staff of the program and will learn about ethical and safety standards during evaluation and exercise. The lecture portion of the class will provide basic information about the causes, presentation, progression, and treatment of Parkinson's disease with special emphasis on the role of exercise as a non-medical treatment. The role of government funding and advocacy will also be considered for conditions like Parkinson’s disease that require significant long-term financial, health, and socio-emotional support.

Credits: 3 Cross-listings: ESW 193, HS 393

Every Fall and Spring

ESW 194 Senior Project

A culmination experience for students in Sports Sciences. With the approval of faculty, a student identifies and conducts an intensive review of a topic within his or her area of concentration. The student must submit a written project and orally defend the work at the end of the course.

Credits: 3

Every Fall, Spring and Summer

ESW 195 Culmination in Sports Sciences

This course will provide students with an opportunity to apply the knowledge, theory, techniques and skills they learned throughout their academic career as a sports science student in the Division of Athletic Training, Health and Exercise Science. Students will perform a functional and dynamic movement assessment and identify goals and objective. Students will be required to design an appropriate program for their client and develop a professional plan for the future. Students will be evaluated as to their expertise in areas of fitness health including, but not limited to, intake, assessment, program design, reassessment, analysis of results and presentation of results.

Pre-requisites of ESW 303 and either ESW 320 or 351 are required.

Credits: 3

Every Fall and Spring

ESW 204 The Globalization of Sports: Origins and Prospects

Explores the rising phenomenon of internationalism in sports. Examines themes such as the growing popularity of soccer in the U.S., the professionalization of the Olympics, and the presence of players from around the world on the roster of every major team sport—from baseball to basketball to American football to hockey.

ESW 206 Customer Relations in Sport Management

Exceeding expectations rather than simply satisfying them is the cornerstone of the Disney approach to customer service. This course provides guidelines and best practices for providing excellent customer service for all levels of employees. Students will practice and learn the skills needed to attract, engage, and retain customers. Through practical application and exercises, students will learn the essential skills necessary to provide gold standard customer service and customer satisfaction.

ESW 263 Community Service

Opportunity for students to be involved in an applied working environment that may be related to their career interest. Working with an assigned faculty member, students must present a detailed outline of proposed practicum including learning objectives, activities and outcomes. Can be used as an internship type placement with an off-campus organization and/or at LIU under the auspices of a Division of Athletic Training, Health and Exercise Science faculty member. Students will begin to develop ethical and professional behaviors. This course requires additional hours other than the standard meeting times listed in the schedule of classes.

Credits: 3

Every Fall, Spring and Summer

ESW 303 Exercise Prescription I

This course is designed to teach students how to prescribe exercise for healthy individuals based on information gathered in the fitness evaluation, client health history and lifestyle questionnaire. Areas addressed will include flexibility, strength, cardio-respiratory endurance and body composition. Laboratory experiences and case studies are used to study problems and develop exercise solutions.

Credits: 3

Every Fall and Spring

ESW 320 Anatomy of Exercise

This course will investigate the mechanics of movement and the means by which movement can be analyzed and improved. This course explores basic exercise vocabulary structured to include a comprehensive look at muscle origin, insertion, actions and nerve innervations. This course will include lecture and practical experiences. 3 credits. Offered every semester.

BIO 137 must be taken as a Pre- or Co-Requisite.

Credits: 3

Every Fall and Spring

ESW 339 Health and Wellness

BIO 137 must be taken as a Pre- or Co-Requisite.

Every Fall and Spring

ESW 393 Health and Wellness

BIO 137 must be taken as a Pre- or Co-Requisite.

Credits: 3

Every Fall and Spring
This course provides a holistic approach of what it really means to be healthy today. It explores the positive mind and body relationship to achieve a healthy and active lifestyle. Topics include managing stress, wellness principles, nutrition guidelines, aging and disease prevention, spiritual perspectives and physical activity and exercise protocols.

**Credits:** 2  
**Cross-Listings:** ESW 339, HS 339  
**Every Fall and Spring**

**ESW 348 Nutritional Aspects of Fitness and Sport**  
A study of the basic nutritional principles related to fitness and sport. Topics covered include the role of nutrients in physical performance, special concerns during exercise in the heat, and special dietary considerations related to endurance and non-endurance sports.  
The prerequisite of co-requisite of EWS 352 and ESW 356 are required or permission of the Division.  
**Credits:** 3  
**Every Spring**

**ESW 351 Functional Kinesiology**  
The class explores the science of human motion from a neuromuscular perspective. Emphasis will be on the application of knowledge relative to the movements, vocabulary and training principles in health sciences. Areas of course emphasis will include: Functional anatomical review of the musculoskeletal system, review of muscle morphology and an examination of movement patterns and configurations.  
**BIO 137 must be taken as a Pre- or Co-Requisite**  
**Credits:** 3  
**Every Fall and Spring**

**ESW 352 Exercise Physiology I**  
This course will consider the physiologic effects of exercise on the human body, covering topics such as bioenergetics, energy transfer and thermogenics. The effect of activating on several physiologic support systems (i.e. pulmonary, circulatory, neuromuscular, and hormonal) will be discussed in detail. This course is designated as the writing intensive course for Sports Science majors and fulfills the University’s requirement for Writing Across the Curriculum.  
The prerequisite of BIO 137 or CHE 1 is required.  
**Credits:** 3  
**Cross-Listings:** ESW 352, PE 152  
**Every Fall**

**ESW 354 Adapted Physical Education I**  
This course provides students with an understanding of the physical, psychosocial and medical characteristics of people with various disabilities. Based on assessment, students learn to adapt exercise, physical activity and sports programs to the unique abilities, needs and preferences of each individual. In addition, students learn to analyze case studies and write individualized education plans (IEPs) in Adapted Physical Education.  
**Credits:** 3  
**Every Fall**

**ESW 355 Group Exercise Leadership**  
This course is designed to provide students with an overview of the foundational knowledge, instruction techniques and leadership skills needed to teach individual and group-led exercise classes. Students will assess their personal leadership qualities and develop a plan to enhance their leadership potential. This course will also help prepare students to sit for the ACE Group Fitness/Exercise Instructors Certification.  
**Credits:** 2  
**Every Fall and Spring**

**ESW 356 Evaluation in Health and Fitness**  
This course combines measurement and evaluation, theory coupled with laboratory experiences in the physical assessment of health and fitness. The objective of this course is to provide the student with a broad understanding of pre-participation screening, risk stratification and assessment of strength, muscular endurance, muscular power, body composition, and flexibility.  
**Credits:** 3  
**Cross-Listings:** ESW 356, PE 156  
**Every Fall and Spring**

**ESW 361 Health Coaching Certification Preparation**  
This course is designed to provide theoretical knowledge and practical skills in preparation for the well-recognized American Council of Exercise (ACE) national certification exam in Health Coaching. Topics include effective coach-to-client communication techniques, understanding behavioral, nutritional, and physiological sciences (particularly as they relate to the client with obesity), health screening and assessment, guidelines for designing and implementing safe and effective exercise, wellness, and health programs. In addition, students will learn about the legal professional responsibilities and roles of the health coach. This course requires additional fees.  
**Credits:** 3  
**Cross-Listings:** ESW 361, HS 361  
**Every Fall**

**ESW 410 Personal Training Methods and Certification Preparation**  
Personal training methods and certification preparation will be designed to provide students with the essential knowledge and skills to become a successful personal trainer. Topics will include exercise physiology and biomechanics, fitness assessment, program design, nutritional assessment, proper weight management and professional development. This three-credit course will prepare students to sit for the National Academy of Sports Medicine Personal Trainer Certification (NASM-CPT) exam. This credential is considered the gold standard in personal training and will make our students extremely marketable upon graduation.  
**Credits:** 3  
**On Occasion**

**ESW 464 Field Experience**  
This course is an opportunity for students to apply knowledge and skills at an assigned field experience site according to their field of study. Each student will work closely with their site supervisor and faculty adviser to complete assignments. Students will be required to attend all classes and complete a minimum of 90 hours at their field experience site. This course requires additional hours other than the standard meeting times listed in the schedule of classes. This course has an additional fee.  
**The prerequisite of ESW 263 is required.**  
**Credits:** 3  
**Every Fall, Spring and Summer**

**ESW 475 Fitness Marketing, Social Media and Management**  
In this course students will learn critical marketing skills such as how to create a website, an Instagram page, a business Facebook page, a business card and other relevant activities. In addition, they will develop customer service, administrative and facility management skills that are essential for health and fitness professionals, personal trainers and health coaches. The course will provide students with a strong business foundation to become future leaders, managers and entrepreneurs in the fitness industry.  
**Pre-requisite: ESW 356**  
**Credits:** 3  
**On Occasion**
B.S. in Communication Sciences and Disorders

The department offers a pre-professional program leading to a Bachelor of Science degree in Communication Sciences and Disorders (CSD). Upon graduation, students will be prepared to begin their graduate studies in Speech-Language Pathology.

Students who wish to major in CSD must make an appointment to see the undergraduate program director for an initial meeting. Students accepted into the department will be assigned a departmental advisor. Thereafter, the student should schedule a meeting with their advisor at least once a term. Students must bring an unofficial transcript of their grades to all advisement meetings. The advisor will check grades and prerequisite courses as the student is assigned to specific classes. Advisors will also assist students in developing objectives, exploring career possibilities, and devising a personalized plan of study that will best prepare them for graduate study.

Entry into the major:
All students must meet the following requirements to matriculate as a major in Communication Sciences and Disorders:

1. Acceptance to LIU Brooklyn by the Office of Admissions.
2. A personal interview with the undergraduate program director.
   - Students must bring an unofficial transcript of their grades to this interview.
   - Entry into the program is contingent upon recommendation by the program director.
3. A minimum cumulative grade point average (GPA) of 3.0 GPA.

Academic Standing
The program in Communication Sciences and Disorders is a pre-professional program in Speech-Language Pathology. This is a very competitive profession. Many students are competing for admission into graduate school, and graduate programs in the greater New York area accept a limited number of students each year. A graduate degree in Speech-Language Pathology is necessary to qualify for professional certification and licensure; the Certificate of Clinical Competence from the American Speech-Language-Hearing Association and the New York State License in Speech-Language Pathology. To ensure your success, we have established the following academic standards within the Department of Communication Sciences and Disorders at LIU Brooklyn:

1. Students must attend all class meetings and be in class on time. Consistent absences or lateness will affect students' final grades.
2. The following sequence is a prerequisite to advanced coursework:
   - SLP 100: Culture, Communication, and Language I
   - SLP 104: Articulatory Phonetics
   - SLP 113: Anatomy & Physiological Bases of Speech and Language I
   - SLP 125: Culture, Communication, and Language II
   - SLP 133: Speech Science I: Acoustic Phonetics
   - SLP 213: Anatomy & Physiological Bases of Speech and Language II
   - SLP 231: Language Acquisition Across the Lifespan I: The Early Years
   - SLP 233: Speech Science II: Research Methods and Acoustic Applications
3. Students must achieve a B- or higher in these courses to continue in the major. Students may repeat a course no more than once. Students must complete foundation and intermediate courses before taking advanced courses. Students are required to honor all course prerequisites and receive acceptable grades to continue in the program. Instructors will not allow students to remain in a class for which prerequisite coursework has not been taken.
4. It is the responsibility of students to follow the sequence of courses outlined in the undergraduate bulletin.
5. To continue in the major and take advanced 300 and 400 level courses, students must maintain a minimum overall GPA of 3.0 and achieve and maintain a minimum GPA of 3.0 across all SLP courses. (i.e., required courses in Speech-Language Pathology or Psychology). Students who receive a grade of C+ in any course must retake that course. If a student receives 2 or more grades of C+, the Academic Standing Committee will review their academic record and determine whether they will be permitted to continue in the major.
6. All students are assigned a faculty advisor. Students doing C+ or below work in any course in their major at midterm must see their advisor at once (well before the end of the term).
7. Students are expected to maintain high standards of ethical conduct and integrity. Any student who violates these standards will be asked to leave the major.
8. Students who are having difficulty managing the requirements of the program will be directed to appropriate counseling and academic support services by their departmental advisors, and recommendations will be recorded in the student’s file. Students are expected to follow up on all faculty recommendations. Students can also contact the Academic Advisement Center themselves: 718-488-1042.
9. Students who do not maintain the required academic standing as outlined above will be referred to the Department Committee on Academic Standing. This committee may recommend dismissal from the CSD major. Grievance procedures are those followed by the university.
10. Students should be aware that while they may graduate with a minimum overall GPA of 3.0 in major and a minimum SLP GPA of 3.0, most graduate programs in SLP have higher GPA admissions requirements. Therefore, students should strive to earn higher grades than those stipulated above.

Clinical Observation (SLP 410 and 411)
All majors must complete Clinical Observation as part of SLP 410 and 411. As part of these courses, students spend time observing professional speech-language pathologists and audiologists and obtain a minimum of 12.5 observation hours in each course. Students are expected to uphold all dress codes, attendance requirements, and standards of professional conduct set both by their observation sites and by the program in Communication Sciences and Disorders at LIU Brooklyn.

National Student Speech-Language-Hearing Association (NSSLHA)
NSSLHA is the pre-professional national organization for master’s candidates and undergraduate students interested in the study of normal and disordered human communication behavior. The Department of Communication Sciences and Disorders at LIU Brooklyn has established a Speech-Language-Hearing Society as a local chapter of the NSSLHA. All speech majors are encouraged to apply for membership. The Speech-Language-Hearing Society will serve as a forum for discussion of issues both in the Speech Pathology program at LIU and in the field itself. It will also serve as a network between students, faculty, and practitioners.

Any student desiring membership in the Speech-Language-Hearing Society should register with the recording secretary before a general meeting. NSSLHA application forms can also be obtained from the recording secretary or in the department office.

B.S. Communications Sciences & Disorders

Graduation Requirements
Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:

Orientation
FYS 01 First-Year Seminar 1.00

Core Curriculum Requirements (34-35 credits)

Humanities
English Composition - ENG 16 or 16 X 3.00
English Literature: ENG 61, 62, 63 or 64 3.00

**Credit and GPA Requirements**

- Minimum Total Credits: 120
- Core Curriculum Credits: 34-35
- Minimum Liberal Arts & Sciences Credits: 60
- Minimum Major Credits: 42
- Ancillary Requirement: see above
- Minimum Major GPA: 3.2
- Minimum Overall GPA: 3.0
Diagnostic Medical Sonography

Courses

DMS 250 Diagnostic Medical Sonography
This course uses class didactic instruction and laboratory experiences to prepare the student to become part of the healthcare team. Topics include: medical terminology, patient privacy and confidentiality, HIPAA regulations, sterile technique, blood and fluid precautions, body mechanics, transferring of patients, basic patient care, ergonomics, work-related musculoskeletal disorders, introduction to ultrasound system operation as well as transducer care. Also included: verbal and nonverbal communication, time management and an overview of clinical requirements.

Student must be active in the Diagnostic Medical Sonography plan and must have completed all pre-requisites. Please see the Department for a list of required courses.
Credits: 2  
Every Fall

DMS 275 Abdominal Cross-Section Sonography
This course introduces cross-sectional anatomy of the abdominal and retroperitoneal cavities. Emphasis is on normal structures visible on sonography. Structures are described in terms of their location and relationship between adjacent organs and vessels. The students will be able to identify normal sectional abdominal and retroperitoneal anatomy on sonographic images. Students are introduced to scanning protocols. Scanning laboratory sessions reinforce material covered in the sonographic didactic coursework in terms of sonographic terminology and emphasizes proper annotation, scanning techniques and instrumentation (including transducer location, image and scanning planes, image orientation) to optimally image the organs in the abdominal cavity. The importance of the prevention of musculoskeletal injuries (MSI) is stressed.

Student must be active in the Diagnostic Medical Sonography plan and must have completed all pre-requisites. Please see the Department for a list of required courses.
Credits: 3  
Every Fall

DMS 300 Abdominal Sonography I
This course reinforces basic anatomy of the abdomen and retroperitoneal cavities in conjunction with the corresponding sonographic images and imaging planes. Topics include abdominal vasculature, liver, gallbladder and biliary tree, pancreas, spleen and urinary tract with emphasis on the clinical presentation, laboratory values and sonographic appearance of abdominal pathology along with its progression. Abdominal scanning protocols are included.

Student must be active in the Diagnostic Medical Sonography plan and must have completed all pre-requisites. Please see the Department for a list of required courses.
Credits: 3  
Every Fall

DMS 310 Abdominal Sonography II
The course introduces the cause and effect of the various disease states of organs, superficial structures and vessels in the abdomen and retroperitoneum. To accomplish this objective, general anatomy will be reviewed, the relational anatomy will be discussed, and the pathologic process of a disease will be traced. Including the clinical manifestation, relevant laboratory data, diagnostic tools used to evaluate the disease and its ultimate culmination. The course familiarizes the students with the sonographic images that are representative of the diseased and non-diseased states of the abdominal organs, with emphasis of superficial structures, muscular-skeletal structures and vasculature.

The following pre-requisites of DMS 250, 275, 300, 320, 330 and 350 are all required and the student must be active in the Diagnostic Medical Sonography plan.
Credits: 3  
Every Spring

DMS 320 Echocardiography I
The course introduces sonographic terms, reference planes, anatomy, physiology and hemodynamics of the cardiovascular system along with the basics of electrocardiography (EKG). The heart and related structures seen on the M-mode and two-dimensional echocardiograms are presented. Discussion of abnormal/pathologic motion patterns and anatomy is correlated with the sonographic images and the electrical timing of the heart.

Student must be active in the Diagnostic Medical Sonography plan and must have completed all pre-requisites. Please see the Department for a list of required courses.
Credits: 2  
Every Fall

DMS 325 Echocardiography II
Different methods of evaluation of heart diseases are presented, including EKG, stress testing, cardiac catheterization and abnormal heart sounds. Valvular disease, prosthetic valves, pericardial disease, the disturbance of coronary blood flow and its effect on heart function is taught. In addition, Doppler principles and their use in the evaluation of valvular diseases will also be discussed. The laboratory sessions use hand-on training to reinforce proper ergonomics, cardiac scanning techniques, patient positioning and transducer placement. The use of instrumentation including Doppler and color to optimize images for diagnosis will be stressed.

The following pre-requisites of DMS 250, 275, 300, 320, 330 and 350 are all required and the student must be active in the Diagnostic Medical Sonography plan.
Credits: 3  
Every Spring

DMS 330 Obstetrics and Gynecology I
This course builds upon the ultrasound anatomy and pathophysiology of the non-gravid and gravid pelvis from Ob/Gyn I with the development of the female genital system and congenital anomalies. The course covers detailed anatomy and dating of the 1st, 2nd and 3rd trimester pregnancies, infertility workups, invasive procedures using ultrasound guidance, development of multiple gestations and complications, extra fetal environment, placenta abnormalities, fetal biometrics, postpartum changes and maternal diseases. Included are gravid and non-gravid transabdominal and transvaginal scanning protocols.

The following pre-requisites of DMS 250, 275, 300, 320, 330 and 350 are all required and the student must be active in the Diagnostic Medical Sonography plan.
Credits: 3  
Every Fall

DMS 335 Obstetrics and Gynecology II
This course introduces sonographic terms, reference planes, anatomy, physiology and hemodynamics of the cardiovascular system along with the basics of electrocardiography (EKG). The heart and related structures seen on the M-mode and two-dimensional echocardiograms are presented. Discussion of abnormal/pathologic motion patterns and anatomy is correlated with the sonographic images and the electrical timing of the heart.

Student must be active in the Diagnostic Medical Sonography plan and must have completed all pre-requisites. Please see the Department for a list of required courses.
Credits: 3  
Every Fall

DMS 340 Clinical I
The actual clinical training consists of supervised hands-on work with patients, discussion of cases with sonographers and physicians and exposure to a variety of duties necessary to function in a clinical facility engaged in sonography/echocardiography. State of the art equipment from various manufacturers is available for student use providing a broad professional experience. Clinical projects consist of sonographic images demonstrating understanding of image orientation, sonographic anatomy, sonographic examination protocols, patient history and documentation.

The following pre-requisites of DMS 250, 275, 300, 320, 330 and 350 are all required and the student must be active in the Diagnostic Medical Sonography plan.
The student will be introduced to the normal anatomy and the pathological conditions of the brain including intracranial hemorrhage, anatomical anomalies and infection sonoographic structures of the neonatal brain and spine. The student will also be introduced to the care required for imaging the neonate, especially the premature infant. The student will be introduced to the methods of examination and the indications for use. Students will also be introduced to transternal sonoarthography, with emphasis on the prostate examination including normal anatomy and pathology. Indications for the use of the exam as well as the exam procedure are described. The student must be in the Diagnostic Medical Sonography plan in order to register for this course.

Credits: 2
Every Fall

DMS 380 Clinical Seminar
Emphasis is placed on the medical imaging environment, and how it relates to other healthcare professions. The students will examine challenges that shaped the field of diagnostic medical sonography, history of sonography, professionalism, medical ethics, current topics and challenges to prepare them for a career in sonography/echocardiography. The student must be in the Diagnostic Medical Sonography plan in order to register for this course.

Credits: 3
Every Summer

DMS 385 Sonographic Physics I
This course reviews mathematical skills necessary for the study of sonoartographic physics and defines basic concepts. The mathematical review includes unit conversions, scientific notation, the metric system, decimals, binary numbers and algebraic equations. The main focus of the course is on tissue properties and the interaction with sound waves, attenuation, impedance, reflection, refraction, scattering, TCG and gain settings. Transducer function and an introduction to transducer design are also included. Student must be active in the Diagnostic Medical Sonography plan and must have completed all pre-requisites. Please see the Department for a list of required courses.

Credits: 4
Every Spring

DMS 395 Sonographic Physics II
This course provides an in-depth presentation of ultrasound machine components. Various types of instrumentation, the design and function of ultrasound imaging systems, the importance of sensitivity controls, transducer assembly, sound beams and focusing are thoroughly discussed. Transducer selection, comparison of transducer types and arrays, their advantages and disadvantages, biological effects and the AIUM testing objects are also covered. Students prepare for taking the SPI examination. The student must be active in the Diagnostic Medical Sonography plan and must have completed all pre-requisites. Please see the Department for a list of required courses.

Credits: 4
Every Spring

DMS 350 Abdominal Sonography III
This course provides an intensive overview of superficial organs, abdominal, retroperitoneal sonography integrating cross-sectional imaging, color flow and Doppler studies, clinical findings and sonoartographic presentation of normal and abnormal states. It focuses on case reviews, incorporating sonoartographic images with other diagnostic modalities for the final diagnoses. The student must be in the Diagnostic Medical Sonography plan in order to register for this course.

Credits: 3
Every Summer

DMS 400 Echocardiography III
This course provides an in-depth use of Doppler and includes alterations in the Doppler patterns in various disease states, and presents normal and abnormal Doppler values for pulsed wave, continuous wave and color Doppler along with spectral tracings. The student will also know the concept of flow disturbances, general principles for flow measurement and computations of pressure. The student must be in the Diagnostic Medical Sonography plan in order to register for this course.

Credits: 2
Every Fall

DMS 420 Echocardiography IV
This course provides an in-depth presentation of ultrasound machine components. Various types of instrumentation, the design and function of ultrasound imaging systems, the importance of sensitivity controls, transducer assembly, sound beams and focusing are thoroughly discussed. Transducer selection, comparison of transducer types and arrays, their advantages and disadvantages, biological effects and the AIUM testing objects are also covered. Students prepare for taking the SPI examination. The student must be active in the Diagnostic Medical Sonography plan and must have completed all pre-requisites. Please see the Department for a list of required courses.

Credits: 2
Every Summer

DMS 425 Echocardiography IV
This course provides students with a comprehensive description of the etiology and epidemiology of the diseases affecting the heart and related structures. Advanced techniques used to diagnose cardiac diseases, stress echocardiography, transesophageal, intraoperative echocardiography, intervention echocardiography, echo guided procedures, 3D, tissue Doppler imaging and the use of contrast media will also be included. The student must be in the Diagnostic Medical Sonography plan in order to register for this course.

Credits: 2
Every Fall

DMS 440 Obstetrics and Gynecology III
This course reinforces fetal growth and normal obstetrical anatomy. Fetal assessment in the second and third trimester with emphasis on fetal structural abnormalities, genetic abnormalities and syndromes is presented. Clinical findings, sonoartographic presentation, color flow and Doppler studies and the use of 3D and 4D are also covered. The student must be in the Diagnostic Medical Sonography plan in order to register for this course.

Credits: 3
Every Fall

DMS 445 Clinical IV
The clinical experience enables the student to perform sonoartographic studies on patients and the student must be working independently at this point and doing outside reading to further their knowledge. Full studies are to be completed and documented properly. The student should be concentrating on increasing their speed, accuracy and technical ability. The student is expected to perform Doppler evaluation of abdominopelvic vessels as well as Doppler studies of the heart. The student should be able to do full color and spectral analysis. The student works with limited supervision at this point and doing outside reading to further their knowledge. Fuller studies are to be completed following the institution's protocol. The student must be in the Diagnostic Medical Sonography plan in order to register for this course.

Credits: 5
Every Fall

DMS 446 Clinical III
This course is designed to acquaint the student with the routine and technical aspects of clinical sonoartography. The student will be introduced to the principles of sonoartographic examination and the interpretation of sonoartographic images. Emphasis is placed on the evaluation of the extremities, musculoskeletal system, chest, abdomen, retroperitoneum and pelvis. The student must be in the Diagnostic Medical Sonography plan in order to register for this course.

Credits: 3
Every Summer

DMS 470 Non-Invasive Vascular
This course introduces the student to the basic principles underlying the Doppler examination and clinical applications using color and spectral Doppler techniques for venous and arterial circulation of the lower extremity, upper extremity and extracranial circulation of the brain. The student will also distinguish normal and pathological situations by the use of Doppler and color. The student must be in the Diagnostic Medical Sonography plan in order to register for this course.

Credits: 2
Every Spring

DMS 475 Clinical II
This course provides the student with continued work experience in a hospital, clinical or other patient care setting. Students conduct sonoartographic examinations under direct and indirect supervision while continuing to improve their communication, professionalism and critical thinking skills. Submitted projects will demonstrate increasing sonoartographic skills in terms of images, labeling and proper/optimal machine use. The student must be in the Diagnostic Medical Sonography plan in order to register for this course.

Credits: 4
Every Summer

DMS 345 Clinical II
This course provides students with continued work experience in a hospital, clinical or other patient care setting. Students conduct sonoartographic examinations under direct and indirect supervision while continuing to improve their communication, professionalism and critical thinking skills. Submitted projects will demonstrate increasing sonoartographic skills in terms of images, labeling and proper/optimal machine use. The student must be in the Diagnostic Medical Sonography plan in order to register for this course.

Credits: 4
Every Spring
Sonography plan in order to register for this course.
Credits: 2
Every Summer

DMS 480 Clinical Applications
This course reinforces the student’s ability to improve their interpretation skills in OB/GYN, Abdominal sonography and Echocardiography by the use of image review and case studies. Students are expected to review and enrich their classroom work by incorporating their communication and critical thinking skills and practical knowledge by means of case studies, participation in Discovery Day and journal article presentations and item writing. Students are also required to go online to review CME articles and take the CME tests.
The student must be in the Diagnostic Medical Sonography plan in order to register for this course.
Credits: 3
Every Spring

DMS 485 Senior Seminar
This course prepares the student for a career in sonography by reinforcing interviewing skills; resume writing; communication skills; technical writing; professionalism; ways to keep current in the dynamic field of sonography; medical and legal issues their role in terms of emergency preparedness, research and mandatory reporting. In addition students will review computerized test taking skills required for their national credentialing examination and how to prevent MSI.
The student must be in the Diagnostic Medical Sonography plan in order to register for this course.
Credits: 2
Every Spring
DEPARTMENT OF

OCCUPATIONAL THERAPY

The Occupational Therapy Program offers a dual B.S./M.S. degree. It is designed to educate entry-level occupational therapists whose skills and training prepare them to practice competently in the rapidly changing urban health care environment and to equip patients and clients with skills for the workplace and home. The occupational therapy curriculum offers students the opportunity to focus on individual professional growth, participate in community-service learning, refine cultural sensitivity and practice skills, use health promotion in community settings, utilize an activity to promote health and independence, and develop the skills required to treat the whole person.

The Occupational Therapy Program is approved by the New York State Education Department and the Accreditation Council for Occupational Therapy Education. Occupational therapy is an upper-division professional program, spanning three years of full-time professional academic courses and clinical work that is integrated with several community-service learning experiences. The professional phase of the program also may be completed on a part-time basis over four years. Students must complete the liberal arts and sciences core curriculum, which offers a rich base of sciences, humanities, and social sciences, before entering the professional phase of the program; a minimum of 60 credits in the liberal arts and sciences for the baccalaureate degree is required.

Occupational therapy is a vital healthcare and rehabilitation profession whose practitioners help clients to develop or restore and sustain the highest quality of productive life for persons recovering from illness or injury. Occupational therapy is the therapeutic use of self-care, work/productive tasks, and play/leisure activities to increase independent function, enhance development, and prevent disability. The term occupation refers to activities that are meaningful to the individual within the environments in which the person lives and functions. Occupational therapy promotes healthy lifestyles, prevents disability, and facilitates active participation through occupation. It includes adapting tasks and the environment to maximize independence and quality of life. Occupational therapists help people adapt to changes resulting from the disability and the aging process, focus on illness and injury prevention, and promote healthy and satisfying lifestyles for people of all ages.

Our faculty is actively involved in promoting community health and wellness through funded research and programs assisting people to achieve their highest level of functioning within the context of their communities. Our students are involved in these activities as part of their training since their first year in our program. Using a variety of teaching methods and the integration of technology in the coursework, our students develop a comprehensive understanding of the practice and build their research skills. Embedded in our curriculum are activities that enhance students’ communication and critical thinking skills contributing to personal and professional growth. Our students are prepared for successful clinical careers and leadership roles within their professional community.

ADMISSIONS

Our program offers an excellent opportunity for high school students who want to pursue a degree in occupational therapy. High school students can complete a B.S./M.S. degree in Occupational Therapy in 5 years (2 years for the completion of the pre-requisites and 3 years for the professional phase of the program). Our program also offers a great opportunity for college students and college graduates with a degree in another field who want to pursue a career in occupational therapy.

Students seeking entrance into health and human service professions should be aware that the presence of a criminal record can result in the refusal of licensing/certification/registration agencies to issue the credential needed to practice in the field of study. Prospective students are urged to contact the pertinent state and/or federal licensing board to inquire whether a criminal record will have an impact on their eligibility to obtain licensure or certification. A criminal conviction and/or the use of illegal drugs may impede licensure in New York State. Students who have had a prior conviction are advised to contact NBCOT (www.nbcot.org) for clearance before beginning their academic program. For a fee, NBCOT will review the circumstances which led to a conviction and the individual’s record and render a decision concerning whether or not the individual would qualify to work as an occupational therapist.

Application Policies and Procedures

Both high school graduates and college transfer students may apply for admission to the Occupational Therapy Program, to which the following criteria apply:

Application Process for High School Students:

Students must have a minimum high school average of 85 and a minimum combined Scholastic Aptitude Test score of 1000 to apply as a pre-occupational therapy candidate. They need to apply using the LIU main application system from our Admissions office: www.liu.edu/Brooklyn/Admissions. Upon acceptance, students need to complete 60 pre-requisites and then apply for the professional phase of the program (please see details below). To maintain status as a pre-occupational therapy candidate and to apply to the professional phase of the program, students must maintain a minimum cumulative grade-point average of 3.0 in liberal arts and sciences courses. Grades below a C - are not acceptable in prerequisite courses.

Please note that LIU pre-occupational therapy students do not automatically enter the professional phase of the program. All students go through the application and selection process outlined below.

Application and Selection Process for College Students and Graduates:

The Occupational Therapy program accepts transfer students with or without a degree. LIU students can apply directly to the Department of OT at LIU (no OTCAS application is necessary). All students are required to submit 3 recommendation letters, a personal statement, and verification of a minimum of 50 hours of observation or volunteer work with a licensed occupational therapist; 50 hours is the minimum requirement and should be completed by the application deadline. It is recommended that candidates engage in more than the minimum hours and more than one setting. Admission application and reference letterforms can be obtained from the OT Department (2nd Floor, Pratts Building, Room 224, 718-780-4508).

Transfer students need to apply via the OTCAS system: www.otcas.org. If you choose this system you do not need any additional applications or documents other than what the OTCAS requires. Please follow the directions that the OTCAS system provides and complete your online application. Our department has direct access to those records.

1. Students are required to provide the following items when submitting their application, or your application cannot be processed.
   - 3 letters of recommendation
     • Your application will not be considered complete until all three reference letters are on file with OTCAS by the deadline
     • We REQUEST that letters of recommendation be completed by people who know you well; for example, college professors, academic counselors, and/or employers, and by at least one occupational therapist.
   - Personal Statement
     • In your statement explain your career goals, your interest in occupational therapy, past work/volunteer experience that is relevant, and if there is a specialized area of occupational therapy that interests you most. You may also wish to describe your experience with illness and disability, whether the experience is your own or that of a family member or close friend.
   - Verification of a minimum of 50 hours of volunteer work with a licensed occupational therapist. 50 hours is the minimum requirement
and should be completed by the application deadline. It is recommended that candidates engage in more than the minimum hours and more than one setting. We are requiring that verification of these hours are provided. OTCAS has a function that allows applicants to have their hours verified by either uploading a document or electronically requesting verification from the OT. Please make sure verification is submitted for all hours for consideration.

- Curriculum Vitae

INTERVIEW

1. Due to the competitive nature of the program, unfortunately, only eligible students will be invited for an interview. The following criteria will be considered to determine eligibility for an interview:
   - Meeting application deadline with a verified application
   - Cumulative GPA as well as Science GPA
   - Volunteer experience and extracurricular activities
   - Writing competency (personal statement, curriculum vitae)
   - Letters of recommendation

The Occupational Therapy program publishes the application deadline on the website. All students are accepted to begin the program in the fall semester of each academic year. All prerequisite courses and volunteer work must be completed before entering the program in September. We encourage students to meet with faculty in the Department of Occupational Therapy to prepare their applications and to make sure that prerequisites are completed.

Pre-requisites

College students wishing to transfer into the professional phase of the program must have a minimum cumulative grade point average of 3.0. A 3.0 minimum cumulative grade point average is also required in both liberal arts and sciences courses. An average GPA of 3.0 in the four biology pre-requisite courses is preferred (BIO 3, 4, 137, & 138). Science grades more than 10 years old are not acceptable. Official transcripts from all colleges and universities attended are required.

Below are the prerequisite courses for current LIU students, LIU graduates, and transfer students from other colleges/universities:

<table>

| Intro Sociology or Anthropology | 3 credits |

*40 credits

*The total prerequisite credit requirement for entry into the program is *60 credits. Completion of the 20 additional required prerequisite credits of Liberal Arts or Science course work must be evident on your transcript. Computer Science, Education, and Physical Education courses are not acceptable for completion of the Liberal Arts and Science requirement. All prerequisite course work must be completed before initiation of professional-phase course work.

For more information about our program visit our website: www.liu.edu/Brooklyn/Academics/Schools/SHP/Dept/Occupational-Therapy

Academic Standards

Once accepted into the Occupational Therapy Program, students must maintain a cumulative professional-phase grade point average of at least 3.0 each semester. Students also must meet standards of professional behavior with faculty, peers, and clinical instructors. Upon completion of the curriculum, students are awarded a dual Bachelor of Science/Master of Science Degree in Occupational Therapy and are eligible to take the NBCOT exam.

Occupational Therapy Curriculum

The Occupational Therapy Program curriculum includes 122 credits in the professional phase of the program. Occupational therapy course offerings provide 23 credits of basic and medical science classes, 82 credits in occupational therapy theory and practice, and 17 credits of clinical education.

The developmental nature of our curriculum allows students to be introduced, practice and master core competencies about the clinical practice of Occupational Therapy. The curriculum is brought to life through organizing strands, which serve to infuse the mission and philosophy of the program into each course. The courses are organized into sequences that aid to gradually enable students’ learning and professional competency.

The organizing strands for the curriculum are:

1. Clinical reasoning/evidence-based practice/research
2. Engagement in meaningful occupation
3. Health promotion, prevention, and wellness
4. Professional socialization/community service

The occupational therapy program will allow you to:
- Focus on your individual professional growth and development
- Participate in community service learning
- Enhance cultural sensitivity and practice skills
- Use health promotion in community settings
- Develop skills to treat the whole person including physical, cognitive, and psychosocial needs
- Use the purposeful activity to promote health and independence
- Prepare for a successful career and leadership roles within the Occupational Therapy profession.

Students spend their first year completing 72 hours of community service that introduces them to service-learning experiences related to life-span development and understanding of occupations. During the second of the curriculum, students participate in an enriched clinical component (Fieldwork I) that includes several supervised part-time experiences with clients and patients of all ages, located in a variety of medical, educational, and community-based organizations. In the third year, students participate for seven months in full-time fieldwork (Fieldwork II) that includes 3 rotations of 8-10 or 12 weeks in a variety of clinical, educational, or community settings (focus is on: mental health, physical disabilities, pediatrics). Students also have the unique opportunity to design and implement a four-credit research project in which they conduct a faculty mentored research project.

Community Service
Students will be prepared to ultimately work in the urban environment, which presents unique challenges to health care provision. Consistent with the mission of LIU Brooklyn to provide service to the community, occupational therapy students will participate in community service-learning experiences. The curriculum emphasizes the importance of community service learning, cultural competence, and the relationship of the environment to health and illness. Students must have early and consistent exposure to the community facilitated through developmental learning activities. The community-based learning experiences will foster a deep appreciation of the broad spectrum of social, cultural, political, and economic forces that shape this environment and influence the individual in their daily activities and valued occupations.

Fieldwork Education
Fieldwork education constitutes an integral part of the course of study. It provides an excellent opportunity for students to acclimate themselves to the healthcare setting, practice selected aspects of occupational therapy, observe various types of healthcare settings, and develop their professional competence.

The fieldwork education component begins with a 10-week clinical experience in the fall of the second professional year. The following fieldwork experiences gradually become more demanding and varied in nature. The program concludes with fieldwork experience, with a minimum of 28 weeks in the fall/spring/summer semesters in the final graduate year at LIU Brooklyn (at which time students will be responsible for providing all occupational therapy services to their caseload, under the supervision of licensed occupational therapists).

Many of our clinical/field experience affiliates now require the completion of criminal background checks and/or drug testing for employees, volunteers, and students affiliated with the site. Therefore, the LIU Brooklyn students who plan to participate in a clinical/field experience may be asked to undergo a criminal background check and/or drug screen. A criminal conviction and/or the use of illegal drugs may impede or bar your entry into your chosen field of study. Students desiring entrance into the School of Health Professions should be aware that our clinical/field affiliates can reject or remove a student from the site if a criminal record is discovered or if a drug test is positive. If a student is rejected from a clinical/field site due to information contained in the criminal background check, or drug screen, you may be unable to complete a required clinical/field experience. If you are unable to complete program requirements, you may be advised to withdraw from the program.

Accreditation
The entry-level occupational therapy program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA) located at 6116 Executive Boulevard, Suite 200 North Bethesda, MD 20852-4929. ACOTE’s telephone number, C/O AOTA, is (301) 652-AOTA and its web address is WWW.ACOTEONLINE.ORG. The program is registered with the New York State Education Department. Graduates will be eligible to sit for the national certification examination by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of that examination, the individual will be an Occupational Therapist Registered (OTR). In addition, all states require licensure to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate’s ability to sit for the NBCOT certification examination or attain state licensure.

B.S./M.S. Occupational Therapy

B.S. / M.S., Occupational Therapy
[Program Code: 21843] [HEGIS: 1208.0]

Graduation Requirements
Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:

Orientation
FYS 01 First-Year Seminar 1.00

Core Curriculum Requirements
(34-35 credits)

Humanities
- English Composition - ENG 16 or 16 X 3.00
- English Literature: ENG 61, 62, 63 or 64 3.00
- Philosophy: PHI 60 3.00
- Foreign Language 3.00

Social Sciences
- History 3.00
- Anthropology, Economics, History, Political Science, Psychology, or Sociology 3.00
- Anthropology, Economics Political Science, Psychology, Sociology 3.00

Science and Mathematics
- Mathematics: MTH 15 or 16 (3-4 credits) 4.00
- Laboratory Science: BIO 1 or 3 4.00

Communication, Visual & Performing Arts
- Oral Communications: SPE 3 3.00
- Art, Dance, Journalism, Music, Theatre, Media Arts 3.00

Ancillary Requirements:
Must complete one of the following (completes sequence):
- BIO 2 General Biology 4.00
- BIO 4 Life: Its Origin, Maintenance and Future 4.00

Must complete both courses
- PSY 31 Lifespan Developmental Psychology 3.00
- PSY 110 Abnormal Psychology 3.00

Must complete one of the following courses
- MTH 100 Introductory Statistics 3.00
- PSY 150 Statistics in Psychology 3.00

Must complete both courses:
- BIO 137 Anatomy & Physiology I 4.00
- BIO 138 Anatomy & Physiology II 4.00
Liberal Arts & Sciences electives: 5 credits in LA&S electives are required.

**Occupational Therapy Professional Phase Requirements**

The impact of biomechanics on
Students learn to apply principles of kinesiology, muscle
testing and goniometry in clinical cases. The pre-requisites of OT 111, OT 119, OT 120, OT 202, OT 203, and OT 206 are required. The co-requisites of OT 112, OT 121, OT 220, and OT 302 are required.
Credits: 4
Every Summer
OT 140 Neuroscience
This course provides students with an
understanding of the neuroanatomical and neurophysiologic substrates of normal and abnormal human behavior. The study of cortical
motor cortex, and subcortical anatomy and physiology includes:
cranial and peripheral nerves; the ventricular system; vascular brain anatomy; the neuron and neural activity; neurotransmitters, enzymes, and other neurochemicals; the autonomic nervous system; spinal cord tracts; and proprioceptors
muscle spindles and golgi tendon organs). The neuroanatomical and physiologic functions of special senses include: the vestibular system, vision, audition, olfaction, gustation, and proprioception.
The neurologic substrates of motor control, stress/emotions/motivation, learning and memory,
the aging of the brain, and neuroplasticity is also reviewed. Students will learn to use their knowledge of
The course provides students with an
understanding of the neuroanatomical and neurophysiologic functions of the central nervous system (CNS) to understand
CNS disease, dysfunction, and injury (e.g., spinal cord injury, traumatic brain injury, schizophrenia, comas, Parkinson’s, sensory integrative disorders).
Students will also use their knowledge of
the neurologic substrates of motor control, stress/emotions/motivation, learning and memory,
the aging of the brain, and neuroplasticity is also reviewed. Students will learn to use their knowledge of

This course provides the opportunity for students
to directly experience occupational therapy practice
with a geriatric population in a clinical or community setting. Through fieldwork experience, students will begin to integrate and apply the
theoretical knowledge, and professional behaviors/attitudes and clinical skills learned in the classroom. An integrative clinical reasoning
fieldwork seminar both in person and on-line accompanies the fieldwork experience to provide students with an opportunity to analyze the
professional and clinical practices observed in the
clinic/community setting, and integrates this with the clients’ cultural background, health status, and valued occupations. Students will complete
intensive documentation assignments that will help facilitate their understanding and ability to analyze and synthesize a client’s information in an
occupational profile/evaluation in order to create long/short-term goals, formulate an evidence based treatment plan, progress note and discharge note.
The pre-requisites of OT 112, 119, OT 220 and OT 302 are required. The co-requisites of OT 122, OT 303, OT 306, OT 320 and 420 are required.

OT 201 Professional Development 1: Occupational Therapy Student Academic Experience
This course focuses on foundation skills to support professional education and personal development as an occupational therapy student. Course
content will include student work with self-management and health promotion, learning styles and learning skills, learning contracts, study skills,
test-taking skills, use of support groups and refinement of active listening, and goal setting. Students develop e-portfolios and begin to
recognize themselves in their new professional roles. Students develop and expand skills in computer literacy, improve utilization of library and
data bases for review of professional literature, and start to develop experience with scientific and professional writing and speaking. Students will participate in writing groups with tutors from the Writing Center to identify areas for skill development in writing and refine written communication skills, critical thinking and problem solving. This course is part of our enrichment program.
Occupational Therapy majors only. Co-requisites of OT 100, 106, 110, 140 and 301 are required.
Credits: 2

The co-requisites of OT 205, OT 210, OT 330, OT 430 and OT 431 are required. The co-requisites of OT 210, OT 215, OT 330, OT 430 and OT 431 are required.

Credits: 1
Every Spring

OT 205 Professional Development 5: Health

Promotion

Consideration of current public health initiatives designed to improve the quality of health, eliminate disparities, and explore occupation-based interventions to address major indicators of poor health, to prevent disorders and to maintain wellness. The course will examine evidence-based practice, intervention programs, evaluation and outcome assessments for wellness, health promotion and quality of life. A range of approaches supporting health promotion and disease prevention in various populations, in institutional, community and home settings will be examined. Students will begin to develop skills in using occupational therapy interventions to enhance the quality of life and wellbeing. A variety of health-related occupations using traditional, alternative and complementary activities will be demonstrated and practiced. Areas of focus include enhancing coping and adaptation with stress management, time management, pain management, smoking cessation, and withdrawal from substances. Patterns of diet, physical activity, psychological states and attitude, social activities, and the role of spirituality in practice reflecting sociocultural/economic, diversity, cultural and life span factors are examined.

The pre-requisites of OT 122, 200, 303, 306, 320, and 420 are required. Co-requisites of OT 210, 215, 330, 430, and 431 are required.

Credits: 1
Every Spring

OT 206 Therapeutic Skills 2: Group Process

A group process course for treatment, teamwork, and community interventions. Introduction and application of theories of group dynamics, task, and activity groups, including evaluation of interpersonal style and group roles, therapeutic interaction and leadership skills, collaborative and professional communication skills. Students learn to carry out groups, reflect on their experiences and provide feedback to each other on the group process.

The pre-requisites of OT 100, 106, OT 110, OT 140, OT 201 and OT 301 are required.

Credits: 3
Every Spring

OT 210 Fieldwork Level I: Mental Health Practice Adolescents and Adults

This course provides the opportunity for students to directly experience occupational therapy practice in mental health with adolescent/adult populations in a clinical or community setting. Through fieldwork experience, students will begin to integrate and apply the theoretical knowledge, professional behaviors/attitudes and clinical skills learned in the classroom. An integrative clinical reasoning fieldwork seminar accompanies the fieldwork experience to provide students with an opportunity to analyze the professional and clinical practices observed in the clinic/community setting, and integrates this with the clients' cultural background, health status, and valued occupations. Students will complete intensive documentation assignments that will help facilitate their understanding and ability to analyze and synthesize a client's information in an occupational profile/evaluation in order to create long/short-term goals, formulate an evidence based treatment plan, progress note and discharge note.

The co-requisites of OT 205, OT 210, OT 330, OT 430 and OT 431 are required. The co-requisites of OT 121, 129, 303 and 420 are required.

Credits: 1
Every Spring

OT 220 Theory 2: Learning Theories Applied to Practice

This course provides students with an understanding of teaching and learning processes. Students are prompted through class activities and the discussion of theories of learning (such as Bloom’s) to reflect on their own learning process as they pursue the OT degree. In addition students are introduced in how learning theories are used to support the development of occupational therapy interventions that are designed to facilitate personal change. Learning theories that are studied include Social Learning Theory (Bandura), The Health Belief Model (Becker), PRECEDE-PROCEED Model, Theory of Reasoned Action (Fishbein & Ajzen), Stages of Change Theory/Trans-theoretical Model (Prochaska & DiClemente), Theory of Multiple Intelligences (Gardner), Learning Styles Model (Dunn & Dunn), Motor Learning, Behaviorism and Model of Human Occupation
(MOHO). Characteristics of therapists and environments that facilitate positive change are examined. Learning styles and learning contracts that are sensitive to multicultural concerns and literacy levels of patients, clients, and caregivers are explored. The course is also focused on professional writing and the ability of the students to review literature and summarize it in a logical and comprehensive manner.

The pre-requisites of OT 111, OT 119, OT 120, OT 202, OT 203 and OT 206 are required. The co-requisites of OT 112, OT 121, OT 129, and OT 302 are required.

Credits: 2
Every Summer

OT 301 Skills for Living 1: Play and Leisure
This course has a dual focus: play and leisure across the life span and activity analysis and synthesis. Meaningful occupation, with a specific focus on play and leisure will be examined in a social and cultural contexts and temporal contexts of age, developmental and life cycle stages, and disability status. Content includes the role of play and leisure in health promotion and disability prevention, and the screening and assessment of play and leisure. Students develop skills in task and activity analysis, activity modification and adaptation based on an occupational performance model.

The pre-requisites of PSY 107 and 110; and SOC 3 are required in order to register for this course. The co-requisites of OT 100, OT 106, OT 110, OT 140, and OT 201 are required.

Credits: 3
Every Fall

OT 302 Skills for Living 2: Work
This course focuses on the role of work/productive activities across the life span and in occupational therapy. Content includes vocational and functional capacity evaluation, work related assessment tools, work programs for clients with injury, developmental disabilities, cognitive deficits and mental health concerns. The influence of unique client characteristics, the environment, culture, social, economic and political factors impacting work and work programs will be considered throughout the semester. Students will be introduced to ergonomics, cumulative work injury and work hardening. Skill in activity analysis will be expanded through a job analysis, analysis of work related behaviors and skills, tool analysis, and an ergonomic seating evaluation. Lab activities link theory to clinical application.

The pre-requisites of OT 111, OT 119, OT 120, OT 202, OT 203, and OT 206 are required. The co-requisites of OT 112, OT 220, OT 129 and OT 121 are required.

Credits: 3
Every Summer

OT 303 Skills for Living 3: Self Care
This course provides students with the opportunity to examine the meaning of self-care activities throughout the life span and across various cultures. The course content emphasizes clinical reasoning/evidence-based practice research as it relates to the engagement in self-care skills as part of meaningful occupation, health promotion, prevention and wellness. The specific performance components of self-care activities (i.e., sensorimotor, cognitive and psychosocial components) will be analyzed. The way in which various performance contexts (i.e., age group, developmental stage, disability status, environmental conditions, and socio-cultural factors) influence self-care activities will be explored. Students will have the opportunity to practice activity analyses of self-care tasks (for specific populations, age groups, socio-cultural environments, etc.). Students will also practice the clinical techniques of grading and adaptation of self-care activities in accordance with an individual's disability status. There will be opportunity to practice grading and adaptation self-care skills, through case studies and problem-based learning activities. Students will have the opportunity to identify a variety of screenings, assessments, and intervention methods for clients who have disabilities, which interferes with self-care activities. The students will have the opportunity to practice documentation skills (goal and note writing) through case studies and problem-based learning.

The pre-requisites of OT 112, OT 121, OT 129, OT 220 and OT 302 are required. The co-requisites of OT 122, OT 200, OT 306, OT 320, and OT 420 are required. The student must be in the Occupational Therapy major in order to register for this course.

Credits: 3
Every Fall

OT 306 Therapeutic Skills 1: Teamwork and Leadership
This course will introduce students to the conceptual, interpersonal and self-knowledge components of teamwork and leadership. Practice in applying theory and skills to teamwork will prepare students for developing competence in interdisciplinary collaboration, client and family centered intervention and health promotion. Roles and contribution of the full range of participants from various practice domains in institutional, professional and community settings will be explored. Students will examine approaches to problem solving, ethical challenges and conflict-handling styles in leadership. Students will be introduced to mentorship models and strategies that support effective supervision. Students will design and implement wellness/health promotion groups for a variety of populations in the community (non-traditional setting). Students will play an active role in developing educational presentations using technology for educational presentations on the reading material pertaining to teamwork and leadership. Work from this course will be used to enrich students’ portfolios reflecting their continues professional development.

The pre-requisites of OT 112, 121, 129, 220, 302 are required and the student must be in the Occupational Therapy major in order to register for this course. The co-requisites of OT 122, 200, 303, 306, 320, and 420 are required.

Credits: 2
Every Fall

OT 320 Theory 3: Comprehensive Models and Mental Health Sets of Guidelines for Practice
This course provides students with the opportunity to study the underlying theories of occupational therapy comprehensive models with an emphasis on adaptation and the environment. The structure and content of theories, models, and frames of reference/sets of guidelines for practice in mental health will be described. The delineation between basic and applied scientific inquiry will also be presented. The role of occupation as described by occupational science, occupational adaptation, the Model of Human Occupation, and client-centered practice is also presented. Each comprehensive model will be examined with respect to its (a) author/source, (b) origin, (c) populations addressed, (d) theoretical foundations, (e) concepts and assumptions, (f) sensitivity to multicultural concerns of patients/clients, (g) principles of assessment, (h) client-therapist relationship, and (i) principles of intervention. These comprehensive models will be explored, analyzed and critiqued for the purpose of determining their adequacy as a basis for practice. Health promotion and wellness models are also presented and analyzed. Current practice issues such as reimbursement for services, the professions domain of concern, and research priorities will be discussed relative to contrasting assumptions about the way in which comprehensive models should be used to guide occupational therapy practice.

The co-requisites of OT 122, 200, 303, 306, 320, and 420 are required. The pre-requisites of OT 112, 121, 129, 220, 302 are required. The student must be in the Occupational Therapy major in order to register for this course.

Credits: 4
Every Fall

OT 330 Practice 1: Mental Health - Adolescents, Adults and Geriatrics
This course addresses the sequence of practice in occupational therapy: screening, evaluation, reevaluation, formulation and implementation of intervention and discharge planning in mental health practice with adolescents, adults and geriatrics in traditional and non-traditional settings. The influence of culture and diversity, environment context and psychological issues, as well as the impact of occupation and health promotion in practice are examined. Reflections on clinical reasoning are applied to practice via clinical fieldwork and field visits. Students are exposed to health promotion, wellness and quality of life principles and practices.

The co-requisites of OT 210 is required. The pre-requisites of OT 122 and OT 320 are required.
The student must be in the Occupational Therapy major in order to register for this course.

Credits: 5
Every Fall

OT 420 Theory & Physical Disabilities Sets of Guidelines for Practice
This course provides the opportunity for students to examine the primary theoretical information underlying occupational therapy practice in physical disabilities (i.e., biomechanical, sensory processing, neurodevelopmental, neurobehavioral, and cognitive-perceptual). Each set of guidelines (or frame of reference) is studied with regard to (a) its theoretical base, (b) the predominant screening and evaluation assessments used by therapists, (c) principles of intervention, (d) reassessment and revision of treatment plans, (e) applicability to specific client populations, and (f) studies reporting the degree of efficacy of the practice approach. Students are exposed to the theoretical underpinnings of occupational performance and in health promotion and wellness strategies that promote engagement in meaningful occupation. The co-requisites of OT 122, OT 200, OT 306, OT 309, and OT 320 are required. The pre-requisites of OT 112, OT 129, OT 220, OT 320 and OT 121 are required.

Credits: 5
Every Fall

OT 430 Practice 2: Neurorehabilitation Adolescents, Adults and Geriatrics
This course addresses neurorehabilitation practice with adolescents, adults, and geriatrics within a variety of healthcare and community related settings. Students will learn about the sequence of rehabilitative practice in occupational therapy specific to addressing the needs of clients with neurological impairment, including: screening and evaluation, reevaluation, intervention planning and implementation, and discharge planning. The course also acknowledges the influence of culture, diversity, environmental context, and their impact on occupation and health promotion in clients with neurological damages. Students will be expected to reflect on the clinical reasoning processes required to provide competent and evidence based practice to this client population via class discussions, case based assignments, and clinical fieldwork experiences.
The co-requisites of OT 205, OT 210, OT 215, OT 330, OT 430 and 431 are required. The pre-requisites of OT 122, 121, OT 200, OT 303, OT 320 and 420 are required.

Credits: 5
Every Spring

OT 431 Practice 3: Orthopedic Rehabilitation and Orthotics Adolescents Adults and Geriatrics
This course is designed to provide students with the background and experience in splint fabrication and orthotic management for orthopedic conditions. Furthermore, students will learn evaluation and intervention principles with adolescents, adults, and geriatrics. The lecture component will incorporate biological principles, anatomical, kinesiological concepts, and biomechanics relating to orthopedics and splinting. The class will be divided into two sections; a two-hour lecture followed by a four-hour lab. The lecture component will incorporate biological principles, anatomical, kinesiological concepts, and bio-mechanics relating to orthopedics and splinting. Common diagnoses and indications for selected splints will be reviewed as well as common protocols. In addition, students will be learning about the sequence of practice in occupational: screening and evaluation, reevaluation, formulation of intervention plans and implementation, and discharge planning. The lab portion will focus on splint design and fabrication as well as modality application. Students will be exposed to a variety of splinting equipment, tools, supplies, and low temperature thermoplastics used in clinical settings, and develop basic splinting skills. Furthermore, students will understand and demonstrate electrical safety standards. In addition, students will have the opportunity to apply modalities, such as, thermal, ultrasound, TENS, NMES, light and laser therapy. Finally, students will focus on hand evaluation and treatment skills for common hand problems. The co-requisites of OT 205, OT 210, OT 330, OT 215 and 430 are required. The pre-requisites of OT 122, OT 200, OT 303, OT 320 and 420 are required.

Credits: 5
Every Spring

OT 432 Practice 4: Medical and Surgical Rehabilitation Adolescents Adult and Geriatrics
This course addresses current occupational therapy practice methods for clients having general medical and/or surgical diagnoses- in adolescent, adult, and geriatric populations. Students will learn about the most commonly seen medical/surgical diagnoses treated by occupational therapists, as well as some specialty diagnoses. The sequence of practice for this diagnostic population will be covered-including screening and evaluation, observation of contraindications and safety protocol, formulation of treatment plans, implementation of treatment, family/caregiver education, re-evaluation, and discharge planning. The impact of multicultural sensitivity, cultural diversity, and environmental context as they affect treatment will be explored. Students will be expected to appropriately grade and analyze activities in the process of developing treatment plans for patients having general medical/surgical rehabilitation needs as well as some complex and less common diagnoses. Students will also enhance their clinical reasoning and decision-making skills as they apply treatment methods via review of fieldwork experiences and case studies. Students are asked to integrate the client’s health status, occupational performance and develop treatment plans that take under consideration the client’s values & routines and the context of care.
The co-requisites of OT 506, 520, 533, 620 & 720

Credits: 2
Every Summer

OT 506 Therapeutic Skills 5: Technology and Assistive Devices
The course provides a close look (hands on experiences, clinical visits, in-class equipment presentations) at assistive devices, assistive technology, compensatory strategies and environmental adaptations used in the treatment of children, adolescents, adults and elders with a wide range of disabilities to promote functional adaptation and accessibility in the client’s environment. Students explore the use of adaptive equipment and the processes of assessment and intervention using adaptive equipment for clients with a variety of disabilities. The role of adaptive equipment in promoting occupational performance and participation is integral to the course.
The co-requisites of OT 205, 210, 215, 330, 430 & 431

Credits: 2
Every Summer

OT 507 Therapeutic Skills 6: Organization and Administration
Application of the principles of management in the provision of occupational therapy services to individuals and organizations including: planning, marketing, organizing, fiscal management, maintaining staffing, coordination, directing, controlling, and evaluating programs. Students will develop an understanding of a variety of service delivery models and knowledge of the broad spectrum of influences that impact on health care delivery and ethical practice. Completion of a grant application or business plan complete with a literature review that includes evidence-based and best practice, background/need, mission statement, project description/implementation/evaluation, budget, sources of income, foundation support, staffing and job descriptions.
The pre-requisites of OT 432, 506, 520, 533, 620, 720 are required. The corequisites of OT 510, 530, 533, 716 are required.

Credits: 3
Every Fall

OT 510 Level II: Fieldwork I
This course provides 10 to 12 weeks of full-time supervised fieldwork. It provides in-depth initial experience in delivering occupational therapy services to various groups of clients across the life span, persons with a variety of psychosocial and physical performance deficits, in various service delivery models reflective of current and emerging practice and trends in the profession. Through this fieldwork experience, students will integrate and apply the theoretical knowledge, and professional behaviors/attitudes and clinical skills learned in the classroom. A peer supervision process via
Blackboard discussions will be incorporated for additional supervision amongst students and from the faculty.

The pre-requisites of OT 432, OT 506, OT 520, OT 533, OT 620, and OT 720 are required. The corequisites of OT 533, 530, 507 and 716 are required.

Credits: 5
Every Fall

OT 511 Level II: Fieldwork II
This course provides 10 to 12 weeks of full-time supervised fieldwork. It provides in-depth initial experience in delivering occupational therapy services to various groups of clients across the life span, persons with a variety of psychosocial and physical performance deficits, in various service delivery models reflective of current and emerging practice and trends in the profession. Through this fieldwork experience, students will integrate and apply the theoretical knowledge, and professional behaviors/attitudes and clinical skills learned in the classroom. A peer supervision process via Blackboard discussions will be incorporated for additional supervision amongst students and from the faculty.

The pre-requisite of OT 510 is required.
Credits: 5
Every Fall

OT 512 Level II: Fieldwork III
This course provides 8 to 12 weeks of full-time supervised fieldwork. It provides in-depth initial experience in delivering occupational therapy services to various groups of clients across the life span, persons with a variety of psychosocial and physical performance deficits, in various service delivery models reflective of current and emerging practice and trends in the profession. Through this fieldwork experience, students will integrate and apply the theoretical knowledge, and professional behaviors/attitudes and clinical skills learned in the classroom. A peer supervision process via Blackboard discussions will be incorporated for additional supervision amongst students and from the faculty.

The pre-requisite of OT 510 is required.
Credits: 5
Every Spring

OT 513 Level II: Fieldwork IV (Elective)
This elective course provides 6 to 12 weeks of full-time supervised fieldwork. The number of credits awarded is prorated on the length of the fieldwork experience. It provides in-depth fourth experience in delivering occupational therapy services to various groups of clients across the life span, persons with a variety of psychosocial and physical performance deficits. It is taken place in various service delivery models reflective of current and emerging practice and trends in the profession with a concentration in practice focus substantially different than the setting and population in OT 510, OT 511 & OT 512. Through this fieldwork experience, students will integrate and apply the theoretical knowledge, and professional behaviors/attitudes and clinical skills learned in the classroom. A peer supervision process via Blackboard discussions will be incorporated for additional supervision amongst students and from the faculty.

The pre-requisite of OT 512 is required.
Credits: 2
Every Summer

OT 520 Theory 5: Research
This course provides the opportunity for students to learn the primary approaches of research design, methods, data collection, and analysis. Students will study (a) quantitative research designs (experimental, quasi-experimental, and non-experimental), (b) qualitative designs (ethnography, phenomenology, grounded theory, etc.); and (c) quantitative and qualitative data collection and analysis methods. Students will develop an applied research question based on the health promotion needs of individuals within a community service setting, and will begin the process of writing a research/grant proposal that will be refined throughout the remainder of the curriculum (in OT 620, 720, and 820). Students may also have the opportunity to implement and evaluate a research project.

Pre requisites: OT 205, 210, 215, 330, 430 & 431
Co requisites: OT 432, 506, 533, 620 & 720
Credits: 3
Every Summer

OT 530 Practice 3: Pediatrics
A comprehensive review of best practices related to clinical decision making, interdisciplinary collaboration, client-centered practice and supervision is discussed in this course. The focus is primarily in pediatric practice. The role of legislation, policy, and reimbursement are extensively discussed. The students are exposed to pediatric clinical cases from a variety of practice settings. The occupational therapy process of screening, assessment, reassessment, formulation of intervention plans, implementation and discharge is carried out, while addressing the influence of culture, diversity, and environment on occupation and health promotion. Hands-on experiences provide students with challenges in observation, clinical reasoning skills, communication skills, professional writing and documentation skills. Students bring in examples from their clinical experiences with children and their families. Evidence based practices are reinforced through assignments and class activities, to support clinical decision making and advocacy needs of clients (pediatrics).

Pre requisites: OT 716, OT 510, OT 533 and 507 are required. The pre-requisite of OT 533, OT 432, OT 506, OT 620, and OT 720 is required.
Credits: 5
Every Fall

OT 535 Fieldwork Level I Practice 3: Pediatrics
This course provides the opportunity for students to directly experience occupational therapy practice in children/adolescents with a variety of disabilities a clinical or community setting. Through fieldwork experience, students will begin to integrate and apply the theoretical knowledge, and professional behaviors/attitudes and clinical skills learned in the classroom. An integrative clinical reasoning fieldwork seminar accompanies the fieldwork experience to provide students with an opportunity to analyze the professional and clinical practices observed in the clinic/community setting, and integrates this with the clients’ cultural background, health status, and valued occupations. Students will complete intensive documentation assignments that will help facilitate their understanding and ability to analyze and synthesize a client’s information in an occupational profile/evaluation in order to create long/short-term goals, formulate an evidence based treatment plan, progress note and discharge note.

The pre requisites of OT 510, OT 530, 507 and 716 are required. The pre-requisites of OT 432, OT 506, OT 520, OT 620, OT 720 and OT 533 are required.
Credits: 3
Every Fall

OT 620 Theory 6: Research Proposal Development
The course exposes the students to the process of research proposal development. Students engage in mentored research projects with their faculty advisors. They are asked to develop research questions and/or hypotheses pertaining to the research problem of interest. They explore plausible theoretical frameworks that provide the conceptual context of their research project. They complete a research proposal that includes methods of research proposal development.
**OT 716 Professional Development 6: Student Clinical Experience**

This course prepares for the transition from academic to clinical student roles and from student to practitioner. Ethics, supervision, conflict resolution, documentation, evolution of clinical reasoning skills, scientific inquiry, teamwork, and collaboration with certified occupational therapy assistants will be covered. Students will have a better understanding of national and state regulatory bodies and their effects on practice. The course gives students knowledge related to national and state requirements for credentialing and licensing. Tools and information are also given to the students to prepare them for becoming fieldwork educators.

**Pre requisites:** OT 205, 210, 215, 330, 430 & 431  
**Co requisites:** OT 432, 506, 520, 533 & 720  
**Credits:** 2  
*Every Summer*

**OT 720 Theory 7: Community Practice**

**Education and Health Promotion**

This course presents the theory and practice of community-based practice, education, health promotion and prevention services for the well population and populations at risk for specific physical, mental, social, or environmental problems. Foundation material includes community context, multicultural competence, and principles of prevention, use of evidence to plan and evaluate services, and consultation and collaboration. Utilizing a life-span developmental perspective, information is presented on the needs of each target group, settings to access the population, and empirical evidence supporting prevention services. The program development process is described in depth, with special emphasis on needs assessment and outcome evaluation. Students will participate in the process of identifying potential grant funding sources and understanding the requirements for grant submission. Occupational therapists and other professionals will present their experience with consultation, marketing, grant writing, implementation and evaluation.

**Pre requisites:** OT 205, 210, 215, 330, 430 & 431  
**Co requisites:** OT 432, 506, 520, 533 & 620  
**Credits:** 2  
*Every Summer*

**OT 820 Theory 8: Community Practice Research Project**

This course provides students with the opportunity to refine their research proposals (from OT 620) and implement as part to the Capstone Research Project complete in this course, OT 820. Students will carry out their project under the supervision of their research mentor. Students will continue to refine skills in professional and scientific writing through the production of successive drafts leading to the final scientific peer-reviewed style manuscript, oral presentation, and poster production. Students will expand knowledge of resources to research professional and current literature resources, expand understanding of evidence based practice and literature review, further develop skills in applying principles of theory and practice to formulating and implementing a viable capstone research project. Students will be guided in data coding, analysis, results and interpretation of findings as well as development of discussion that describes the scientific and clinical contributions of their projects. Students are asked to produce a manuscript and present their project in a poster format during OT research day.

**Pre requisites:** OT 507, OT 530, OT 535, OT 716, OT 520, 620 and 720 are required.  
**Credits:** 4  
*Every Spring*
DEPARTMENT OF PHYSICAL THERAPY

The Department of Physical Therapy offers a Doctor of Physical Therapy degree at the graduate level. Please refer to the LIU Brooklyn Graduate Bulletin for full details about the program.

DIVISION OF PHYSICIAN ASSISTANT STUDIES

The Division of Physician Assistant Studies offers a 28-month, professional-phase curriculum leading to the M.S. in Physician Assistant Studies. Please refer to the LIU Brooklyn Graduate Bulletin for full details about the program.

DEPARTMENT OF PSYCHOLOGY AND COUNSELING

B.A. Psychology

B.A. in Psychology

The B.A. in Psychology provides students with a broad understanding of the principles that explain human behavior and interaction. In addition to learning the latest science and theory regarding human and nonhuman animal behavior, students in the program gain the vital skills and experience employers seek. These skills include research and writing skills, problem solving skills, and, well developed, higher-level thinking ability as evidenced in analyzing, synthesizing and evaluating information. In addition to working directly in psychology related fields such as counseling and teaching, our students and graduates find jobs in such varied areas as public affairs, education, business, sales, service industries, health, and the biological sciences. They also work as employment counselors, correction counselor trainees, interviewers, personnel analysts and probation officers.

Many of today’s most pressing social problems relate directly to problems in behavior. Violence (at home or on the street), drug addiction and poor interpersonal relationships are just some examples of the types of issues explored in the field of psychology. Psychologists strive first to describe, understand and explain behavioral problems and also to contribute solutions to such problems, through careful collection of data, analysis of data, and development of intervention strategies. Psychology is a broad discipline, encompassing subjects that range from biology to sociology. Biology studies the structures and functions of living organisms. Sociology examines how groups function in society. Psychologists study the intersection of two critical relationships in these fields; particularly, the relationships between brain function and behavior and between the environment and behavior. Psychologists employ scientific methods, including careful observation, experimentation and analysis, to develop and test theories through research. Psychology has many subfields, including clinical, counseling, cognitive and perceptual, developmental, educational, experimental, evolutionary, and engineering psychology. Other subfields include forensic psychology, neuropsychology, industrial/organizational psychology, quantitative and measurement analysis, rehabilitation and social psychology.

B.A. Psychology

[Program Code: 06946] [HEGIS: 2001.0]

Graduation Requirements

Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:

Orientation

FYS 01 First-Year Seminar 1.00

Core Curriculum Requirements

(34-35 credits)

Humanities

English Composition - ENG 16 or 16 X 3.00

English Literature: ENG 61, 62, 63 or 64 3.00

Philosophy: PHI 60 3.00

Foreign Language 3.00

Social Sciences

History 3.00

Anthropology, Economics, History, Political Science, Psychology, or Sociology 3.00

Anthropology, Economics Political Science, Psychology, Sociology 3.00

Science and Mathematics

Mathematics: MTH 15 or 16 (3-4 credits) 4.00

Laboratory Science: BIO, CHM, PHY 4.00

Communication, Visual & Performing Arts

Oral Communications: SPE 3 3.00

Art, Dance, Journalism, Music, Theatre, Media Arts 3.00

Distribution Requirement

- Six credits or two courses of upper-level History (HIS) or
- Six credits or two courses of upper-level Economics (ECO) or
- Six credits or two courses of upper-level Sociology/Anthropology (SOC/ANT) or

Major Requirements

The following three (3) courses are required,

PSY 101 Research Design and Analysis I 4.00

PSY 103 Research Design and Data Analysis II 4.00

PSY 149 Writing in Psychology 3.00

A minimum of three (3) lower-level Psychology courses (100 level) totaling nine (9) credits are required.

A minimum of three (3) upper-level Psychology courses (over 200 level) totaling nine (9) credits are required.

The major in Psychology requires 29 credits (3 required courses, 3 lower-level electives, and 3 upper-level electives) of Psychology courses.

**Psy 3 is not required.**

Social Science Capstone Requirement

Choose One of the Following Two Courses:

SSC 223 Capstone Seminar in the Social Sciences 3.00

SSC 224 Capstone Seminar in Social Science 3.00

Credit and GPA Requirements

Minimum Total Credits: 120

Minimum Liberal Arts and Sciences Credits: 90

Minimum Major Credits: 33

Ancillary Course Requirements: See above
Psychology Courses

PSY 3 Introduction to Psychology
An introduction to the basic concepts and empirical data in the scientific study of human behavior, including a study of the biosocial basis of behavior and personality development, the measurement of individual differences, processes of learning, sensorimotor functions, social interaction, and emotional conflict and adjustment. 
Credits: 4
Every Semester

PSY 31 Lifespan Developmental Psychology
This is an examination of theories and experiences of developmental processes that occur during an individual’s lifespan, from prenatal development through old age. This course is only open to non-Psychology majors.
Credits: 3
Every Fall and Spring

PSY 101 Research Design & Analysis I
A survey of the methods used in psychological research. Students learn about the various methods that psychologists use to address research questions. Discussions will focus on generating research questions, collecting data, measuring constructs, and sampling issues. The lab component of this course will provide hands-on experience with conducting research including the steps involved from generating a research question to reporting findings. A brief report to document each step of the research process will be generated. This course replaces PSY 151 and does not require 102 as a co-requisite. Prerequisite: MTH 15 or 16.
The prerequisite of MTH 15 or MTH 16 is required.
Credits: 4
Every Semester

PSY 103 Research Design & Analysis II
This course builds from Research Design and Analysis I. This discussion and lab course is a study of research design, statistical concepts and techniques employed by the psychologist, including measures of central tendency, variability, relative position and association; concepts of probability and sampling; and techniques of estimation and hypothesis testing. Students learn about the various research designs and statistical techniques that psychologists use to address research questions. The lab component provides hands-on experience with conducting data analyses. This course replaces PSY 150 which is only open for non-majors in psychology. This course requires a C or better in PSY101, MTH 15/16.
Pre-requisites of MTH 15 or 16 and PSY 101 (with C or better) are required.
Credits: 4
Every Semester

PSY 107 Child Development
An examination of human development from birth through the adolescent years. Topics covered include social-emotional development and changes in intellectual functioning. Also considered are special issues such as infant care, schooling and the effects of the community on development. Not open to students who have completed Teaching and Learning 250 or PSY 31.
Credits: 3
Every Semester

PSY 108 Adult Development
A lifespan approach to human development and an examination of development from puberty through adulthood to old age. Topics discussed focus on crucial issues throughout that period, such as the establishment of a career, the influence of family and community, retirement, and the impact of conception and death.
Credits: 3
Every Semester

PSY 109 Personality
A study of the dynamics of personality adjustment, with an analysis of constitutional and environmental interaction in personal development, with some attention to different theoretical viewpoints.
Credits: 3
Every Semester

PSY 110 Abnormal Psychology
A study of how clinical psychologists think about behavior that might be considered "abnormal" or "pathological" in modern life. Concepts related to defining and diagnosing disorders will be discussed, and these concepts will be applied to a variety of specific diagnoses such as mood, anxiety and personality disorders. Individual cases will be discussed that illustrate principles related to causation, diagnosis, treatment, and prevention of a range of disorders.
Credits: 3
Every Semester

PSY 113 Social Psychology
A study of human nature and behavior as influenced by the social environment, emphasizing the relationship of culture and personality and the psychological implications of individual and group differences. The theoretical and methodological bases of applications of behavioral science to social problems are examined.
Credits: 3
Every Semester

PSY 127 Cognition
A survey of the history, theories and methods of cognitive psychology. An examination is made of such topics as attention, thinking, problem solving and memory. Applications to computer systems theory are covered.
Credits: 3
Every Fall

PSY 215 Group Processes & Intergroup Relations
A review of principles and research findings on psychological processes within and between groups, both small and large, as well as social institutions and culture and their applications to education, community action, and political life.
PSY 101 and 103 (or 150), and 9 credits in 100+ level electives
Credits: 3
On Occasion

PSY 216 Introduction to Clinical Practice
A survey of the mental health professions; past, present, and future roles of the clinical psychologist; assessment and treatment; and major research issues. Concurrent practicum experience may be required. Designed primarily for psychology majors who plan to do graduate work in one of the mental health professions, particularly clinical psychology.
PSY 101 and 103 (or 150), and 9 credits in 100+ level electives
Credits: 3
On Occasion

PSY 217 Psychology of Women
An examination of the relevance of gender to the experiences of the individual and the overall functioning of society. Theories that come from all major areas of psychology, psychological, comparative, cognitive, developmental, personality - provide insight into the position of women in culture. The primary objective is to use historical, theoretical and comparative information to understand current gender relations. Same as HUM 117.
The prerequisite of PSY 3 or HPS 21 is required.

PSY 218 Brain and Behavior
This course will introduce key concepts in the relationship between brain and behavior. The basic structures and functions of the brain will be reviewed as they relate to how we think, feel, and act. Various brain-based systems will be reviewed in terms of their implications for emotional experiences, learning, remembering and forgetting, sleep and attention, and language. Research and clinical methods for evaluating brain structures and functions will be discussed, as well as their implications for various mental disorders.
PSY 101 and 103 (or 150), and 9 credits in 100+ level electives
Credits: 3
On Occasion

PSY 219 Psychology of Art
An exploration of the psychological aspects of both the creation and interpretation of art, focusing mainly, but not exclusively, on modern and postmodern visual art and its relation to modern life. Topics include basic concepts and problems in the psychology and philosophy of art, the role of modern art in contemporary society, and the relationship of the artistic imagination to other forms of creativity. In addition, opportunities are provided to view, experience and comment on art
exhibits in the New York City area.

**PSY 220 Psychology of Perception**

A review of selected theories of perception as well as certain philosophical questions that bear upon such theories and experimental findings. The development of perceptual processes and personality aspects involved in perceptual processes (e.g., cognitive styles) are also covered.

**PSY 221 Learning and Memory**

An examination of historical and current theories and research in learning and memory. Behavioral, cognitive and psychoanalytic perspectives are included, and influences of culture, pathology and development on learning and memory are discussed - all leading to an examination of how such information can be used in education, treatment and everyday life.

**PSY 223 Introduction to Behavior Modification**

An introduction to behavior modification, including the learning principles underlying treatment of behavioral disorders. Treatment strategies are considered in the following settings: schools, prisons, hospitals, outpatient clinics. Psychology 221 is recommended before this course.

**PSY 224 Cross-Cultural Issues in Psychology**

An introduction to issues of particular significance to different cultural groups in the United States and elsewhere. Cultural differences related to the psychology of the individual and family, norms, and mental health issues, as well as dominant and minority group membership issues are discussed.

**PSY 225 Contemporary Issues of Psychology**

A review in depth of the philosophic roots as well as the major contemporary schools of thought in psychology, such as behaviorism, psychoanalysis, existentialism, gestalt, and biocultural theory. Comparisons are made of the various schools, and appraisals of specific contemporary issues, with special attention to the leading proponents of each school, are conducted.

**PSY 226 Psychology and the Law**

An examination of the various ways in which psychology and criminal and civil law interact. Topics include the insanity defense and competence to stand trial, the legal rights of mentally ill persons (e.g., involuntary hospitalization), predicting potential violence, the death penalty, sex crimes and offenders, eyewitness identification, hypnosis and polygraph testing, jury selection and jury law.

**PSY 229 Biofeedback and Self-Regulation**

Biofeedback is a psychotherapeutic modality which provides individuals with information about certain aspects of their physiological functioning as an aid in treating a variety of conditions including stress, anxiety, ADHD, headache, Reynaud’s disease, etc. This course provides an introduction to biofeedback principles and practice, and fulfills the knowledge domain requirement recommendations set forth by the Biofeedback Certification Institute of America for biofeedback technicians.

**PSY 283 Health Psychology**

This course examines the biological, psychological, social and cultural factors that are important to the promotion and maintenance of health and illness. Topics include health-enhancing and health-compromising behaviors (i.e. health habits and lifestyle), risk factors for leading causes of death, stress and coping, the interplay among patients, their health-care providers, and health care settings, pain and chronic illness, and specific illnesses ranging from heart disease, cancer, and HIV/AIDS to neurological and age-related disorders.

**PSY 289 Senior Seminar for Psychology Majors**

Extensive readings and discussions of special topics with one or more members of the Psychology Department. Limited to psychology majors with a quality-point ratio of 3.0 or better and no more than 20 students.

**PSY 295 Honors Study**

Honors Study is designed to give outstanding students an opportunity to do independent work in their major under the guidance of a member of the faculty. There are no regular class meetings. To be eligible, students must have upper-junior or senior status, a cumulative quality-point ratio of 3.00 and a 3.25 ratio in their major subject, and the permission of the Chair of the Department and the Dean. A total of six credits of Honors Study is the maximum allowed.

**PSY 297 Independent Study**

Independent Study is designed to give students an opportunity to do independent work in their major under the guidance of a member of the faculty. There are no regular class meetings. To be eligible, students must have the permission of the Chair of the Department and the Dean. A total of six credits of Independent Study (from PSY 297 and PSY 298) is the maximum allowed. Prerequisite: Permission of the Chair of the Department and the Dean. PSY 101 and 103 (or 150), and 9 credits in 100+ level electives.
of Independent Study (from PSY 297 and PSY 298) is the maximum allowed. Prerequisite: Permission of the Chair of the Department and the Dean. PSY 101 and 103 (or 150), and 9 credits in 100+ level electives
Credits: 3
Every Semester
DEPARTMENT OF PUBLIC HEALTH

The Department of Public Health, in the School of Health Professions (SHP), offers a Master's degree in Public Health (MPH) at the graduate level. Please refer to the LIU Brooklyn Graduate Bulletin for full details about the program. In addition, SHP offers several shared-credit tracks that may save students time in completing both the MPH and other degree programs.

Bachelor of Science in Health Science and Master of Public Health (BS/MPH)

The Department of Public Health, in conjunction with the Division of Health Science and Exercise Science, offers an accelerated, 3+2 track that leads to a Bachelor of Science in Health Science and a Master of Public Health (BS-MPH). Note that a separate admission into the MPH portion of this program is required. Please refer to the Division of Health Science and Exercise Science section in this bulletin for full details about the program. See the LIU Brooklyn Graduate Bulletin for MPH course descriptions.

Doctor of Pharmacy and Master of Public Health (PharmD/MPH)

The Department of Public Health, in conjunction with the Arnold and Marie Schwartz College of Pharmacy and Health Sciences, offers a shared-credit track in which students can earn both the Doctor of Pharmacy (PharmD) and the Master of Public Health (MPH) degrees simultaneously. The PharmD-MPH track provides students with greater knowledge and skills in public health practice. Students receiving the PharmD and MPH degrees will be well-positioned for broader career opportunities in public health pharmacy, public health policy, government positions in public health monitoring and vaccination deployment, community agencies, research institutions, or academia. PharmD Students can apply to the PharmD-MPH shared-credit track during the spring of their first professional (P3) year with a minimum Professional Grade Point Average (GPA) of 3.00 at the time of application AND the end of the first professional year. Full details about the program are listed in the LIU Bulletin under Arnold and Marie Schwartz College of Pharmacy and Health Sciences.
DIVISION OF RESPIRATORY CARE

The four-year B.S. in Respiratory Care is designed to provide students with educational and clinical competence, emphasizing comprehension, versatility, and advanced clinical knowledge. The two-year, pre-professional phase of the program consists of preparation in the basic sciences and mathematics, as well as in the humanities and social sciences, providing students with a broad-based liberal arts foundation.

During the professional phase of the program – usually years 3 and 4 – students are engaged in the theoretical, practical, and clinical aspects of adult, pediatric, and neonatal respiratory care. They gain in-depth knowledge of clinical science and its application in health care. Through classroom, laboratory, and diverse clinical practical education, students develop the necessary knowledge, bedside skills, and problem-solving abilities to serve the health needs of patients from premature newborns to the elderly. Thus, students are prepared to address both acute and chronic diseases that affect the cardiopulmonary system as well as trauma, sub-acute disease, and public health issues, ranging from asthma and disaster management to tuberculosis and epidemic or pandemic diseases.

In addition, they learn about mechanical ventilatory support, the therapeutic use of medical gases and administration apparatus, environmental control systems, humidification, aerosols, medication, cardio-pulmonary rehabilitation, advanced cardiopulmonary resuscitation, airway management, pulmonary function testing, and hemodynamic monitoring. They also become well-grounded in disaster management and public health education.

Those who successfully complete the program are eligible to take the national board examinations given by the National Board for Respiratory Care (NBRC). The B.S in Respiratory Care is accredited by the Committee on Accreditation for Respiratory Care (CoARC) as program 200205 (www.coarc.com). It is registered with the New York State Department of Education.

The field of respiratory care is an ideal choice for individuals interested in healthcare who enjoy working with people and who have an aptitude for working with technology. Our program will provide those individuals with the opportunity to develop long and highly satisfying careers. Respiratory care professionals treat patients who exhibit a range of diverse health issues including asthma, pneumonia, emphysema, cystic fibrosis, lung cancer, sleep disorders as well as those who are having respiratory problems related to trauma, strokes, heart attacks, and premature birth.

**Graduation Requirements**

Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:

**Orientation**
- FYS 01 First Year Seminar 1.00

**Core Curriculum Requirements (34-35 credits)**

**Humanities**
- English Composition - ENG 16 or 16 X 3.00
- English Literature: ENG 61, 62, 63 or 64 3.00
- Philosophy: PHI 60 3.00
- Foreign Language 3.00

**Social Sciences**
- History 3.00
- Anthropology, Economics, History, Political Science, Psychology, or Sociology 3.00
- Anthropology, Economics Political Science, Psychology, Sociology 3.00

**Science and Mathematics**
- Mathematics: MTH 15 or 16 (3-4 credits) 3.00
- Laboratory Science: BIO 1 or 3 (see below) 4.00

**Communication, Visual & Performing Arts**
- Oral Communications: SPE 3 3.00
- Art, Dance, Journalism, Music, Theatre, Media Arts 3.00

**Ancillary Course Requirements**

**Must Complete All Six (6) Science Courses Below:**

**NOTE:** BIO 1 or 3 satisfies a Laboratory Science core requirement. A math and science GPA of 2.75 is required before starting RC courses in the professional phase.

- **BIO 1 or 3** General Biology or Life: Its Origin, Maintenance and Future 4.00
- **BIO 2 or 4** General Biology or Life: Its Origin, Maintenance and Future 4.00
- **BIO 101** Microbiology 4.00

**BIO** 131 or Human Anatomy & Physiology I 4.00
- 137 or Anatomy & Physiology II 4.00
- 132 or Human Physiology 3.00
- 138 or Anatomy & Physiology II 4.00

**CHM** 1 or Chemistry for Health 4.00
- 3/2 or General Chemistry I 3.00

**Must Complete One (1) Science Course Below:**

- **CHM** 2 or Introduction to Organic and Biochemistry or General Chemistry II 4.00
- **PHY** 20 The Physical Universe 4.00
- **PHY** 27 Physics for Pharmacy 4.00
- **PHY** 31 General Physics 4.00

**Major Requirements**

**Respiratory Care Professional Phase Year 3**

**Respiratory Care Professional Phase Year 3**

**General Requirements**

- **RC** 100 Health Education 3.00
- **RC** 300 Clinical Experience I 3.00
- **RC** 301 Clinical Experience II 3.00
- **RC** 302 Clinical Experience III 3.00
- **RC** 300 Clinical Experience IV 3.00

**RC** 101 Cardiopulmonary Physiology I 3.00
- **RC** 105 Cardiopulmonary Diagnostic Testing 3.00
- **RC** 109 Clinical Experience I 3.00
- **RC** 112 Theory and Practice of Respiratory Care I 5.00
- **RC** 200 Cardiopulmonary Pathology 3.00
- **RC** 204 Methods of Community Health Education 3.00
- **RC** 210 Clinical Experience II 3.00
- **RC** 213 Theory and Practice of Respiratory Care II 4.00
- **RC** 214 Cardiorespiratory Pharmacology 3.00

**Respiratory Care Professional Phase Year 4**

**Respiratory Care Professional Phase Year 4**

**Respiratory Care Professional Phase Year 4**

**General Requirements**

- **RC** 208 Research Design and Methodology 3.00
- **RC** 212 Case Management in Clinical Practice 3.00
- **RC** 225 Neonatal and Pediatric Respiratory Care 3.00
- **RC** 229 Clinical Experience III 6.00
- **RC** 302 Evidence-Based Practice in Respiratory Care 3.00
- **RC** 304 Ethical and Legal Practice in Health Administration 3.00
- **RC** 330 Principles to Practice in Respiratory Care 3.00
- **RC** 331 Principles to Practice in Respiratory Care 3.00

**RC** 208 Research Design and Methodology 3.00
- **RC** 212 Case Management in Clinical Practice 3.00
- **RC** 225 Neonatal and Pediatric Respiratory Care 3.00
- **RC** 229 Clinical Experience III 6.00
- **RC** 302 Evidence-Based Practice in Respiratory Care 3.00
- **RC** 304 Ethical and Legal Practice in Health Administration 3.00
- **RC** 330 Principles to Practice in Respiratory Care 3.00
- **RC** 331 Principles to Practice in Respiratory Care 3.00
Credit and GPA Requirements

Minimum Total Credits: 120
Minimum Liberal Arts and Sciences Credits: 60
Minimum Major Credits: 60 credits
Minimum Credits in Courses > 100 Level: 45
Pre-Professional Requirements: See Above
Minimum Science and Math GPA: 2.50
Minimum Overall GPA: 2.50
Respiratory Care Courses

**RC 101 Cardiopulmonary Physiology**
A study of the anatomy and physiology of the cardiopulmonary system, specifically, the physiology of the lung, the function and enervation of cardiac muscle, cardiac circulation, cardiac pump, bio-mechanics of breathing, oxygen and carbon dioxide exchange and control of ventilation. This course is open only to matriculated Respiratory Care students or those with permission of the Program Director. A letter grade of "C+" or better is required for graduation.
The prerequisites of BIO 101, 137, 138; CHM 1 or CHM 3 or CHM 2 or CHM 4; PHY 20 or PHY 27 or PHY 31; are required.
Credits: 3
Every Fall

**RC 105 Cardiopulmonary Diagnostic Testing**
This course will cover the techniques of patient assessment and diagnostic evaluation of the cardiopulmonary system. Topics covered include arterial blood gas analysis, pulmonary function testing, and electrocardiograph interpretation. This course is open only to matriculated Respiratory Care students or those with permission of the Program Director. A letter grade of "C+" or better is required for graduation.
A prerequisite of BIO 138 is required.
Credits: 3
Every Fall

**RC 109 Clinical Experience I**
This course focuses on infection control, HIPPA and other health care regulations, basic patient assessment, patient interviewing and recordkeeping skills needed to prepare the student to enter the clinical setting. Students receive a supervised experience in a metropolitan respiratory care department, where they have the opportunity to apply their newly acquired skills in actual patient-care settings. Three lecture or laboratory hours and clinical experience as assigned. This course is open only to matriculated Respiratory Care students or those with permission of the Program Director. A letter grade of "C+" or better is required for graduation.
The prerequisites of BIO 101, 137, 138; CHM 1 or CHM 3 or CHM 2 or CHM 4; MTH 15 or 16 or 30 or 40; PHY 20 or PHY 27 or PHY 31; are required.
Credits: 3
Every Fall

**RC 112 Theory and Practice of Respiratory Care I**
This course is a study of the theory behind the clinical preparation. Selection and application of respiratory care equipment, modification of interventions, and troubleshooting of devices used are covered in this course. Topics included are medical gases, medical gas therapy, aerosol and humidity therapy, bronchial hygiene, lung expansion therapy, and non-invasive monitoring. This course is available to matriculated Respiratory Therapy students or those with the permission of the Program Director. A letter grade of "C+" or better is required for graduation.
The prerequisites of BIO 101, 137, 138; CHM 1 or CHM 3 or CHM 2 or CHM 4; MTH 15 or 16 or 30 or 40; PHY 20 or PHY 27 or PHY 31; are required.
Credits: 3
Every Fall

**RC 200 Cardiopulmonary Pathology**
This is the study of pathophysiology as compared to the normal physiology of the cardiopulmonary system. Special emphasis is placed on respiratory function in obstructive airway diseases, head and neck trauma, diseases of the pleura, atelectasis, thoracic cavity diseases, infectious diseases, interstitial lung diseases, and sleep-disordered breathing. Case studies, pulmonary function evaluation, radiologic evaluation, and lung scans are used to elucidate the pathophysiology. This course is available to matriculate Respiratory Therapy students or those with the permission of the director. A letter grade of "C+" or better is required for graduation.
The prerequisites of RC 101, 105, 109, and 112 are required.
Credits: 3
Every Spring

**RC 204 Methods of Community Health Education**
Students will learn to effectively communicate health education information and strategies that have positive and lasting effects on the health behaviors of individuals and communities sensitive to the culturally diverse aspects of each individual and/or community. Students will initiate and conduct patient and family education on safety and infection control, home care and equipment, smoking cessation, pulmonary rehabilitation, and the management of asthma, COPD, cystic fibrosis, and neuromuscular disorders. This course is open only to matriculated Respiratory Care students or those with permission of the Program Director. A letter grade of "C+" or better is required for graduation.
Offered online.
The prerequisites: RC 101, RC 109 and RC 112
Credits: 3
Every Spring

**RC 208 Research Design and Methodology**
This course will provide an opportunity for participants to establish or advance their understanding of research through critical exploration of research language, ethics, and approaches. The course introduces the language of research, ethical principles and challenges, and the elements of the research process within quantitative, qualitative, and mixed methods approaches. Participants will use these theoretical underpinnings to begin to critically review literature relevant to respiratory care and determine how research findings are useful in forming their understanding of their work, social, local and global environment. This course fulfills the writing across the curriculum graduation requirement. As such, writing assignments are a major component of the course grade. This course is open only to matriculated Respiratory Care students or those with permission of the Program Director. A letter grade of "C+" or better is required for graduation.
Offered online.
The prerequisites: MTH 15 or MTH 16 and ENG 16 and RC 200
Credits: 3
Every Fall

**RC 210 Clinical Experience II**
This course focuses on patient assessment and the evaluation of data in the patient record, gathering clinical information to recommend diagnostic procedures, and prepares the student to continue their practice in the clinical setting. Students receive a supervised experience in a metropolitan respiratory care department, where they have the opportunity to apply their newly acquired skills in actual patient-care setting. This course is open only to matriculated Respiratory Care students or those with permission of the Program Director. A letter grade of "C+" or better is required for graduation.
The prerequisites of RC 109 and 112 are required or the student must be an active member of the Respiratory Care Professional Student Group.
Credits: 3
Every Spring

**RC 212 Case Management in Clinical Practice**
This course focuses on essential functions, roles and practice settings of case management utilizing case studies as a learning tool. Students will flow through the case management processes from facilitation, integration, coordination of care, and transition of the patient through the continuum of care for conditions including bariatric surgery, geriatric and psychiatric care, drug overdose, and lung cancer. An interdisciplinary structure of care is applied during the assessment, collaborative consultation, and referral to optimize the patient-hospital outcome while maintaining client privacy and confidentiality, health, and safety through advocacy and adherence to ethical, legal, and regulatory guidelines. The student will identify issues pertinent to documentation and evaluate overall patient outcomes. This course is open only to matriculated Respiratory Care students or those with permission of the Program Director. A letter grade of "C+" or better is required for graduation.
Offered online.
The prerequisites: RC 200, RC 204, 213, 214
Credits: 3
Every Fall

**RC 213 Theory and Practice of Respiratory Care II**
The theory and practice of artificial airway management, positive pressure volume expansion therapies, mechanical ventilators, and interpretation of ventilator waveforms are discussed. Integration of oxygen and specialty gases mixtures and pharmacology is covered. Students assemble, operate, and troubleshoot equipment used in such therapies. This course is open only to matriculated Respiratory Care students or those with permission of the Program Director. A letter grade of “C+” or better is required for graduation. The prerequisites of RC 109 and 112 are required or the student must be an active member of the Respiratory Care Professional Student Group. 

Credits: 4  
Every Spring

RC 214 Cardiorespiratory Pharmacology
This is a study of the use of medicines for the treatment of cardiovascular and respiratory tract diseases. Discussions of particular interest are drugs that affect the central nervous system and sympathetic and parasympathetic nervous systems. Also discussed are pharmacological support for cardiovascular, respiratory and renal dysfunction/disease and moderate sedation anesthesia. For each drug, students learn the indications, contraindications, adverse reactions, doses, mechanism of action and routes of administration. This course is open only to matriculated Respiratory Care students or those with permission of the Program Director. A letter grade of “C+” or better is required for graduation.

Credits: 3  
Every Spring

RC 225 Neonatal and Pediatric Respiratory Care
This course addresses the development of the fetus and the transition from fetal to neonatal life, which forms the basis for understanding the problems that may arise in the newborn period. Assessment and monitoring of the neonatal and pediatric patient and therapeutic procedures for treatment of congenital and cardiovascular disorders are discussed. Presentation, diagnosis and treatment of neonatal and pediatric disorders are examined along with adaptation of therapeutic strategies for each developmental stage and the concept of family-centered care. This course is open only to matriculated Respiratory Care students or those with permission of the Program Director. A letter grade of “C+” or better is required for graduation.

Credits: 3  
Every Fall

RC 229 Clinical Experience III
In this course, classroom/laboratory instruction is combined with student practice of respiratory care skills while rotating through critical care units such as; adult, neonatal, pediatric, and surgical care units in the New York City region. Learning focuses on respiratory monitoring in the ICU, and critical care procedures such as chest tubes, thoracentesis and bronchoscopy. A special emphasis on hemodynamic assessment and the respiratory management of near drowning and obese patients is also provided. Students continue to apply and refine their knowledge of mechanical ventilation in clinical critical care settings. This course is open only to matriculated Respiratory Care students or those with permission of the Program Director. A letter grade of “C+” or better is required for graduation. The prerequisites of RC 200, 210, 213 and 214 are required. 

Credits: 6  
Every Fall

RC 301 Independent Study
The student will be challenged to thoroughly investigate an aspect of Evidence-Based Medicine as it pertains to respiratory care. This course is open only to matriculated Respiratory Care students or those with permission of the director. A letter grade of “C+” or better is required for graduation.

Credits: 3  
On Demand

RC 302 Evidence-Based Practice in Respiratory Care
The principles of evidence-based medicine provide the tools to incorporate the best evidence into everyday practice. This course examines the integration of the best available research evidence as a basis for clinical decision-making for conditions including heart failure, thoracic trauma, traumatic brain injury, neurologic injury, shock, sepsis, acute respiratory distress syndrome, sepsis, burn and inhalation injury, and lung transplant. High-level studies are presented identifying the metrics used in assessing the evidence for a therapy and applying the practice and principles of evidence-based medicine as a valuable approach to respiratory care practice. This course is open only to matriculated Respiratory Care students or those with permission of the Program Director. A letter grade of “C+” or better is required for graduation. 

Offered online. 
Pre Requisites: RC 200, 210, RC 212 and RC 213  
Credits: 3  
Every Spring

RC 304 Ethical and Legal Practice in Health Administration
This course provides an overview of the theories of ethical decision making as it applies to: scope of practice, informed consent, confidentiality, discrimination, conflicts of interest, illegal or unethical acts, fraud, research, and end-of-life practices. Various perspectives of health policy are explored including special populations, and political action groups within the context of legal and ethical rights. This course is open only to matriculated Respiratory Care students or those with permission of the Program Director. A letter grade of “C+” or better is required for graduation. 

Offered online  
Pre requisites: RC 109, RC 210 and RC 229  
Credits: 3  
Every Spring

RC 330 Clinical Experience IV
This course focuses on certifications in Advanced Cardiac Life Support (ACLS) and Pediatric Advanced Life Support (PALS). Students continue to receive instruction on invasive and non-invasive ventilation for neonatal and pediatric care. Students complete clinical rotations in adult intensive care, neonatal critical care, and pediatric units in affiliated metropolitan hospitals. This course is open only to matriculated Respiratory Care students or those with permission of the Program Director. A letter grade of “C+” or better is required for graduation. An additional course fee is associated with this course.

The pre-requisites of RC 225 and 229 are required.  
Credits: 6  
Every Spring

RC 331 Principles to Practice in Respiratory Care
As the final component to the Baccalaureate Degree Program in Respiratory Care, this course provides the students with the opportunity to synthesize, and apply prior knowledge and clinical practice experience gained in this program. This course provides a review of the techniques and methods used to analyze and evaluate the health status of critically ill patients with an emphasis on the respiratory and cardiovascular systems. This course is open only to matriculated Respiratory Care students or those with the permission of the Program Director. A letter grade of “C+” or better is required for graduation. An additional fee is associated with this course.

The pre-requisites of RC 213 and 229; and MAT 100 or PSY 150, are required; or the student must be an active member of the Respiratory Care Professional Student Group. 

Credits: 4  
Every Spring

LIU Brooklyn Undergraduate Catalog 2022 - 2023
**DEPARTMENT OF SOCIAL WORK**

The Bachelor of Science in Social Work program seeks to provide students with a foundation for entry-level generalist social work practice. The program builds on the liberal arts foundation and seeks to ground students in a bio-psycho-social approach to human behavior and group/community dynamics. Our purpose is to provide students with the knowledge, values and skills for effective generalist intervention at the individual, family, group, organizational, and community levels as well as with diverse client populations.

The program’s vision of generalist practice is rooted in a person-in-environment framework and an ethnically sensitive perspective. The person-in-environment framework means the generalist practitioner must be able to connect individual client problems to larger social, political and economic issues. The ethnically sensitive approach, often referred to as cultural competence, is a critical component of the curriculum, particularly important because of the diverse makeup of the residents of Brooklyn. Students must be able to relate to clients from all types of backgrounds in an understanding and sensitive manner. The B.S. in Social Work is accredited by the Council on Social Work Education (C.S.W.E.). Visit www.cswe.org for more information.

**Social Work Program Mission**

The mission of the Long Island University-Brooklyn Bachelor of Science in Social Work (BSSW) program is to guide diverse students on a path of critical inquiry with the goal of building competent and ethical generalist practitioners. The BSSW program's generalist practice curriculum, grounded in a liberal arts foundation and guided by a person-in-environment framework, prepares diverse students to apply and demonstrate generalist practice knowledge, values, skills, and cognitive and affective processes at the micro, mezzo, and macro level to enhance the quality of life for all persons. Further, the program prepares students to advance human rights by promoting and advocating for social, economic, and environmental justice locally and globally.

**Social Work Program Goals**

Goal 1: To prepare students with the foundation of social work knowledge, skills, and core values necessary for generalist practice with diverse populations, across different settings, and with clients systems on micro, mezzo, and macro levels.

Goal 2: To advance social work values and ethics emphasizing a commitment to social change, promoting social justice, and diversity while incorporating a global perspective.

Goal 3: To educate students for practice with diverse populations to promote well being, with special attention to age, economic status, race, ethnicity, culture, family structure, gender identity, sex, sexual orientation, disability, health, mental health, national origin, immigration status, religion, and spirituality.

Goal 4: To work closely and collaboratively with community resources to achieve mutually beneficial goals.

**Admissions Requirements**

Although students can declare a social work major at admission to LIU Brooklyn, students are not officially part of the BS Program unless they meet all of the following criteria:

1. Have an overall GPA of at least 2.5.
2. Achieve a grade of “B” or higher in SWK 101.
3. Meet with a social work faculty advisor.

**B.S. Social Work**

The 120-credit Bachelor of Science in Social Work will prepare you to enter the workforce, launching a career of helping people cope with life’s challenges and advocating for a just society, as well as continuing to graduate-level education. We offer liberal arts-based, relationship-centered education where students form close connections with their professors and each other. The curriculum includes courses related to policy, practice, human development and social justice behavior, as well as field practicum-related seminars. Students learn the social work foundation of knowledge, skills and values through small class engagement with stimulating topics, role plays, case studies, videos, readings and reflective writing. They enter the Junior and Senior years in the field practice in diverse settings including schools, homeless shelters, child and family counseling centers, charitable organizations, senior citizen facilities and social service agencies. Beyond the classroom and field placement, we offer opportunities for engagement via social work department events and Interprofessional events.

**Becoming a Social Work Major**

If you are considering becoming a social work major, talk to a social work faculty member. It is important you declare social work as your major as early as possible. To declare a major you must complete a "Request for Change of Major" form, which requires the signature of the social work department chair. The sooner you declare a major, the sooner we can provide advisement and mentoring.

**BSSW Program Acceptance Requirements**

To be accepted into the BSSW program you must meet the following criteria:

- Maintain an overall GPA of at least 2.5.
- Achieve a grade of “B” or higher in SWK 101.
- Have met with a social work faculty advisor.

Failure to maintain the criteria above may be grounds for removal from the social work major.

**Professional Field Placement Requirements**

Field education is a critical part of the Social Work educational experience and is considered the signature pedagogy by the Council on Social Work Education (CSWE). The program offers intensive field experience and supervised individual and group instruction. Students are required to complete a minimum of 400 hours in the field, typically 2 days a week (14 hours), from September through April (SWK 180 & SWK 181 Fieldwork), and participate in a field seminar course each of the two semesters (SWK 182 & SWK 183). STUDENTS MUST BE REGISTERED FOR FIELDWORK AND FIELD SEMINARY BEFORE THEY CAN START THEIR FIELD PLACEMENT.

**B.S.S.W Social Work**

{Program Code 20469} {HEGIS: 2104.0}

**Graduation Requirements**

Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin.

**Orientation**

FYS 01 First-Year Seminar 1.00

**Core Curriculum Requirements**

(34-35 credits)

**Humanities**

- English Composition - ENG 16 or 16 X 3.00
- English Literature: ENG 61, 62, 63 or 64 3.00
- Philosophy: PHI 60 3.00
- Foreign Language 3.00

**Social Sciences**

- History 3.00
- Anthropology, Economics, History, Political Science, Psychology, or Sociology 3.00
- Anthropology, Economics Political Science, Psychology, Sociology 3.00

**Science and Mathematics**

- Mathematics: MTH 15 or 16 (3-4 credits) 3.00
- 4.00
Major Requirements

Must Complete All 13 Courses Listed Below.

SWK 101 Introduction to Social Work 3.00
SWK 114 Social Welfare History & Institutions 3.00
SWK 116 Diversity 3.00
SWK 121 Social Work Research 3.00
SWK 123 Human Behavior in the Social Environment I 3.00
SWK 124 Human Behavior in the Social Environment II 3.00
SWK 132 Human Rights and Social Justice 3.00
SWK 170 Social Work Practice I 3.00
SWK 171 Social Work Practice II 3.00
SWK 180 Social Work Fieldwork I 4.00
SWK 181 Social Work Fieldwork II 4.00
SWK 182 Fieldwork Seminar I 3.00
SWK 183 Fieldwork Seminar II 3.00

Social Work Electives: 6 credits required

Social Science Elective: 3 credit course numbered 100 or above from History, Sociology, Psychology or Anthropology
Health Professions Elective: 3 credit course numbered 100 or above from any other program in the School of Health Professions (Health Science, Athletic Training and Wellness, Sport Management, Communication Sciences)

Credit and GPA Requirements

Minimum Total Credits: 120
Minimum Liberal Arts and Sciences Credits: 60
Minimum Major Credits: 47
Ancillary Course Requirements: See Above
Minimum Social Work Major GPA: 2.5
Social Work Courses

SWK 101 Introduction to Social Work
This course introduces students to the social work profession. It examines historical and contemporary social work practice focusing on the knowledge, values and skills of generalist social work practice. Students will learn about the wide range of career opportunities in social work.
Credits: 3
Every Fall and Spring

SWK 115 Social Welfare Policy & Analysis
Students learn about social welfare policy and how to engage in a comprehensive policy analysis. The connection between social welfare policy analysis and social work practice is highlighted with effective policy action as the goal. Close attention is paid to how the historical and contemporary development of the social welfare system intersects with forms and mechanisms of oppression and discrimination. Prerequisite of SWK 101 is required. Pre/Co-requisite of HIS 2 and POL 11, ECO 1, or ECO 2 is also required.
Credits: 3
Every Fall and Spring

SWK 116 Diversity
Human diversity is thoroughly examined and students gain a better understanding of how to work with diverse populations. The course explores how structures and values may oppress, marginalize, alienate or enhance power and privilege. Self awareness to eliminate personal bias is examined. The course draws from a range of disciplines and theories such as: the strengths perspective, the person-in-environment concept, theories of intersectionality, critical race theory, and social constructionism.
Credits: 3
Every Fall and Spring

SWK 121 Social Work Research
This course is a basic introduction to research methods in the social sciences and in the field of social work in particular. The fundamentals of research are taught as a problem-solving, critical thinking approach that ultimately relates to the knowledge of and ability to engage in research informed practice and practice-informed research. Prerequisite of MTH 15 or MTH 16 is required. Prerequisite of SWK 101 is also required. Seniors only.
Credits: 3
Every Fall

SWK 123 Human Behavior in the Social Environment I
Human behavior and the social environment (HBSE) I examines the human within the micro context. The course integrates multiple theories and knowledge of bio-psycho-social development to understand the individual within the larger environment. The course focus is on the individual yet uses a person-in-environment framework to view behavior in the context of the family, community, culture, and world.
Pre requisites: SWK 101, BIO 22. Pre or Co-requisite: PSY 3
Credits: 3
Every Fall

SWK 124 Human Behavior in the Social Environment II
Human behavior and the social environment (HBSE) part II is a continuation in the HBSE sequence. Part II utilizes theories to explain human behavior through the macro lens, which explores how systems and institutions influence and affect human behavior.
Pre requisite: SWK 123
Credits: 3
Every Spring

SWK 131 Contemporary Challenges in Community Mental Health
This elective examines the policy and practice challenges of providing community mental health services to the seriously mentally ill. Designed as an upper level course in the social work sequence, the course will cover de-institutionalization, the consumer movement, best practices, and the recovery movement. Topics will include an overview of major mental illness, working with the homeless mentally ill, mental illness and incarceration, and community mental health services to the military. Ethical dilemmas about the tensions between self-determination and mandated treatment will be explored.
Credits: 3
On Demand

SWK 132 Human Rights & Social Justice
This course will engage students in a critical discussion of both local and global human rights and social justice issues. To prepare students to play a significant role in responding to the needs of individuals, families, and communities, course topics will include: domestic and international sex trafficking; health/mental health care; immigration; poverty; sexual orientation and gender identity; gender based violence; juvenile and criminal justice; economic, social and cultural rights.
Credits: 3
Every Fall and Spring

SWK 133 Case Management Services
This course will examine concepts and principles of case management practice with special populations. The core functions of case management practice in a range of settings are addressed in relationship to issues of diversity, vulnerability and empowerment, while identifying and collaborating with resources and agencies. Emphasis is placed on case coordination, type of delivery agency, negotiation in bokering for health care services by utilizing the application of case management models. Students will understand health care priorities on the national and local level.
Credits: 3
Cross-Listings: HS 478, SWK 134
Every Fall

SWK 135 Case Management Practice with Populations at Risk
This course provides students the opportunity to work with case managers present actual cases based on “case of the week model.” Students will develop hands on experience through presentations from experts in the varied fields in which case management is practiced. Students will build on their case management knowledge by applying theories to real world case management situations. The pre-requisite of HS 478 or SWK 134 is required.
Credits: 3
Every Spring

SWK 137 Stress Management
An analysis of the sources and consequences of stress and stress reaction in a variety of daily living settings; examination of a variety of instruments used to measure stress levels. Exploration of personal lifestyle with regards to present stress levels and coping abilities. Practical application of intervention techniques designed to enhance adjustment to the demands of stress. This course will be helpful to all students for their personal and professional lives. Crosslisted with HS 480.
Credits: 3
Every Fall and Spring

SWK 138 Stress Management
An analysis of the sources and consequences of stress and stress reaction in a variety of daily living settings; examination of a variety of instruments used to measure stress levels. Exploration of personal lifestyle with regards to present stress levels and coping abilities. Practical application of intervention techniques designed to enhance adjustment to the demands of stress. This course will be helpful to all students for their personal and professional lives. Crosslisted with HS 480.
Credits: 3
Every Fall and Spring

SWK 170 Social Work Practice I
Beginning social work practice skills used with individuals, families and groups are examined with a particular focus on engagement, assessment, intervention and evaluation. Cultural and diversity issues in treatment, ethical dilemmas and social justice as it impacts and shapes contemporary social work practice are identified. Methods of student learning include, but are not limited to, case study, role-play, group work, and class discussion.
Pre or Co requisite: SWK 123
Credits: 3
Every Fall

SWK 171 Social Work Practice II
This second practice course that follows Practice I (SWK 170) teaches concrete practice skills in the context of macro systems: groups, organization, and communities. Knowledge and skills about engagement, assessment, intervention and evaluation are explored through a macro lens.
Pre or Co requisite: SWK 124
Credits: 3
Every Spring

SWK 180 Social Work Fieldwork I
During senior year, students complete an intensive field internship (a minimum of 200 hours during fall semester and 200 hours during spring semester = 400 hours) at approved social service programs with professional social work supervision. Students apply the theories and knowledge learned in the
classroom to develop and strengthen their social work skills in practice. An integral part of the internship experience is the accompanying field seminar, SWK 182.

Pre/Co-requisites of SWK 123 and SWK 170 are required. Co-req of SWK 182 is also required.

Credits: 4

Every Fall

**SWK 181 Social Work Fieldwork II**

During senior year, students complete an intensive field internship (a minimum of 200 hours during fall semester and 200 hours during spring semester = 400 hours) at approved social service programs with professional social work supervision. Students apply the theories and knowledge learned in the classroom to develop and strengthen their social work skills in practice. An integral part of the internship experience is the accompanying field seminar course, SWK 183.

Pre/Co-requisites of SWK 124 and SWK 171 are required. Co-requisite of SWK 183 are required.

Prerequisites of SWK 180 and SWK 182 are also required.

Credits: 4

Every Fall

**SWK 182 Fieldwork Seminar I**

Concurrent with senior-year field placement, students participate in a seminar to assist in integrating the experiential component with their theoretical knowledge. Students are also made aware of the implications of field experiences for policy, research, and ethical issues.

Pre/Co-requisites of SWK 123 and SWK 170 are required. Co-requisite of SWK 180 are also required.

Credits: 3

Every Fall

**SWK 183 Fieldwork Seminar II**

Concurrent with senior-year field placement, students participate in a seminar to assist in integrating the experiential component with their theoretical knowledge. Students will create a capstone project that integrates field learning, research, and links to the CSWE competencies.

Prerequisites of SWK 180 and SWK 182 are required. Pre/Co-requisites of SWK 124 and SWK 171 are required. Co-requisite of SWK 181 is also required.

Credits: 3

Every Spring

**SWK 195 Honors Study**

Honors Study is a course in which students will connect theory to practice on a level that demonstrates their full range of social work knowledge and skills as they attempt to explore a social work related issue. To this end, the student may choose to focus on an approved topic or social problem by starting from a theoretical position and work towards practice issues or visa-versa. The process and transition from theory to practice or practice to theory must be supported by evidence.

The evidence may come from the existing fund of knowledge or may be the result of their own discovery and research. Students will be encouraged to generate new knowledge, choose appropriate practice skills and tools and develop effective interventions.

**SWK 196 Honors Study**

Honors Study is a course in which students will connect theory to practice on a level that demonstrates their full range of social work knowledge and skills as they attempt to explore a social work related issue. To this end, the student may choose to focus on an approved topic or social problem by starting from a theoretical position and work towards practice issues or visa-versa. The process and transition from theory to practice or practice to theory must be supported by evidence.

The evidence may come from the existing fund of knowledge or may be the result of their own discovery and research. Students will be encouraged to generate new knowledge, choose appropriate practice skills and tools and develop effective interventions.

**SWK 197 Independent Study**

Students are able to work intensively with faculty on a topic of interest.

Credits: 1 to 3

On Demand
Surgical Technology Certificate Program

The Surgical Technology Certificate Program is designed to give individuals the knowledge and skills required to function within an operating room environment. Students receive surgical technology training during classroom lectures, practice in a mock surgical lab and get clinical experience in various hospitals’ operating rooms. Surgical technologists are an important part of a surgical team working closely with surgeons, anesthesiologists, registered nurses and other surgical personnel. They assist in surgical procedures and help supply the operating room with the instruments, equipment and supplies that will be needed during surgery.

The Program goal of the LIU Surgical Technology program is: “To prepare competent entry-level surgical technologists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains”.

Certificate Requirements

Surgical Technology Courses
The following courses are required for successful completion of the certificate program.

SURG 095 Introduction to Surgical Technology
This course provides an introduction to Long Island University’s Surgical Technology Certificate Program. Students meet with instructors. Policies, procedures and educational objectives are discussed. Goals and outcomes are reviewed and career opportunities are presented. (3 hours)

SURG 150 Medical Terminology /Anatomy and Physiology I
This course concentrates on word structure with a focus on the vocabulary for surgical procedures. The prefixes, word roots, suffixes, and their combining forms will be studied. Students will receive an introduction to the study of the human body and its function. Coursework includes lessons on the organization of cells, tissues and organs of the body. The course includes an individual study of body systems. (80 hours)

Prerequisite: SURG 095.

SURG 155 Anatomy and Physiology II
This course is a continuation of Medical Terminology/Anatomy and Physiology I, where each body system is viewed independently. Systemic body systems are covered in great detail to further student knowledge of the body and how it works. (60 hours)

Prerequisite: SURG 150.

SURG 210 Microbiology
It is crucial for students of surgical technology to understand the basic concepts of microbiology because outcomes of surgical procedures and overall patient safety are directly affected by this knowledge. An introduction to microbiology and microorganisms is presented, accompanied by studies of bacteriology, pathogens of body fluids and systems, virology, parasitology, mycology and wound healing. (60 hours)

Prerequisite: SURG 155.

SURG 160 Pathophysiology
This course is an introduction to the study of diseases and their causes, tumors, fluid and hemodynamic disorders, inflammation and infection, surgically treatable diseases and disorders. (45 hours)

Prerequisite: SURG 210.

SURG 220 Pharmacology
Students learn about surgical pharmacology, including lessons in mathematical calculations, drug regulation and drug administration. Antibiotics, diuretics, hormones, ophthalnic agents and anticoagulants are explained in detail relating their applications in surgery. Preoperative, intra-operative and postoperative anesthetic medications are studied along with blood and fluid replacement and anesthesia complications. (55 hours)

Prerequisite: SURG 160.

SURG 180 Patient Care Concepts
Perioperative care includes preoperative, intraoperative and postoperative periods of the patient’s surgical experience. This course reinforces the principles and practices for the delivery of premium patient care, by applying concepts of teamwork, skills, knowledge and effective and respectful communication between team members. (45 hours)

Prerequisite: SURG 220.

SURG 181 Surgical Technology I
This course will use lecture and laboratory components to teach students the basic skill requirements needed to function in an operating room. Laboratory sessions include an introduction to various surgical instrumentation; basic surgical scrubbing; opening sterile supplies; and basic loading and unloading of sharp objects. (76 hours)

Prerequisite: SURG 180.

SURG 182 Surgical Technology II
A continuation of the students’ surgical education, using classroom and practical lessons to help the student further their skill levels with more technological theory. Students are expected to accomplish the following practical skills: Surgical scrub, gowning self and others, setting up a sterile field, and organizing supplies and instrumentation within the sterile field. Theory topics include general patient care and safety, equipment and supplies, wound healing, case management and diagnostic procedures. Laboratory sessions help familiarize the students with stapling devices, positioning the patient, the patient, surgical counts and drawing medications. (80 hours)

Prerequisite: SURG 181.

SURG 324 Technological Science
An introduction to the study of technological science including the study of electricity, information technology and robotics is taught. The course teaches electrical terms, basic principles of electrical flow, types of current and electrical safety. Robotics covers terms, robotic systems, and other technologies. Information technology includes computer hardware, applications, document processing, the internet, and patient confidentiality. (20 hours)

Prerequisite: Surg 182.

SURG 183 Surgical Technology III
Students gain additional required skills through the guidance of their instructors and hands-on learning. By integrating the knowledge from the textbook and abilities achieved through the first-hand experience inside the lab, students develop confidence in their skill levels. The practical skills sessions will focus on the organizational aspects of the sterile field, including the back table, instruments, ring stand and Mayo stand. (80 hours)

Prerequisite: SURG 182.

SURG 184 Surgical Technology IV
Through lecture and laboratory sessions, students learn the remaining skills and procedures required to participate in their clinical rotations. A formal practical evaluation is performed for each student. (72 hours)

Prerequisite: SURG 183.

SURG 421 Clinical Preceptorship I
The clinical preceptorship provides the student with initial hands-on experience in an operating room, reinforcing concepts taught during the academic and laboratory portion of the program. A formal clinical evaluation is performed for each student. The clinical preceptors also assess the performance of the student in the operating room. A total of 120 scrubs are required to complete the clinical phase of the Surgical Technology program. This class will fulfill a minimum of 60 scrubs towards the requirement. (240 hours)

Prerequisite: SURG 184.

SURG 422 Clinical Preceptorship II
Students acquire advanced hands-on experience in an operating room, reinforcing concepts taught during the academic, laboratory, and Clinical Preceptorship I portion of the program. A formal clinical evaluation is performed for each student. The clinical preceptors also assess the performance of the student in the operating room. A total of 120 scrubs are required to complete the clinical phase of the Surgical Technology program. This class will fulfill a minimum of 60 scrubs towards the requirement. (240 hours)

Prerequisite: SURG 421.
The Department of Business Administration is an illustrative example. By including four classes related to data analytics – a specialty in high demand by employers – students in the program will be better equipped to have results-oriented interviews and success on the job. Our graduate-level satellite programs at leading financial institutions are a testimony to our ability to deliver an education to the world’s most demanding and discerning customers. Outside the classroom, research has proven that those students active on campus tend to encounter greater career success. The School has responded accordingly with extracurricular activities that more closely resemble internships than clubs, thereby bolstering student resumes. With a set of new initiatives that began in 2018, our LIU students now have the chance to manage a real-money portfolio of stock market investments through our Student Managed Fund. Students can earn Internal Revenue Service certification to professionally complete tax returns through our Accounting Society and NABA chapters. Students can assume responsibility for the social media promotion of our school through the Marketing Society, and students interested in going on to law school interact with sitting judges not just in the classroom but also in their chambers through our Pre-Law Society. We realize that getting involved leads to being hired and a successful career launch. More fundamentally, each incoming student is encouraged to enroll in our Passport to Personal and Professional Development mentorship program. Through a series of personalized coaching sessions, students hone their professional behaviors and prepare for the demands of the job search.

The School of Business and Information Sciences offers the following undergraduate degrees: Bachelor of Business Administration (with concentrations in Accounting, Entrepreneurship, Finance, Human Resource Management, Management and Marketing), Bachelor of Science (B.S.) degrees in: Accounting, Finance, Entrepreneurship, Marketing, and Data Analytics.

Graduate degrees include the Master of Business Administration (M.B.A.) with concentrations in Entrepreneurship, Finance, International Business, Management, Management Information Systems, and Marketing. The M.B.A. is delivered in a 3-credit traditional format which can be customized to suit the needs of corporate, hospital or government institutions that wish to provide employees with a dedicated cohort. In addition, the School of Business offers an accelerated shared credit program combining Pharm.D. and M.B.A. in conjunction with LIU Pharmacy. In addition, the school offers a Master of Science program in Data Analytics and Strategic Business Intelligence.

Mission Statement

The School of Business and Information Sciences at LIU Brooklyn is dedicated to advancing scholarship and preparing our diverse student population to meet the challenges of their future. Located in the heart of Brooklyn, New York, we have been both tightly connected to and reflective of our community for almost 100 years, embracing LIU’s overarching mission of access and excellence.

Our mission is to provide a transformational educational experience for our students based on the following principles:

- Our programs are relevant. Our faculty maintains close ties to practice and is continually updating their skills to keep up with our students’ needs. Our courses apply theory to practice and provide a wide variety of experiential learning opportunities.
- We teach our students to be entrepreneurial - they learn to create value in society through creativity and innovation.
- We believe in ethical professional practices and are committed to public and community service.
- We believe that all students have value. We foster close ties between faculty and students through small class sizes and faculty availability.

By following these principles, we produce graduates with:

- Marketable skills that lead to successful job placement and productive careers.
- Critical thinking and problem-solving abilities make them lifelong learners.
- A commitment to ethics and civic responsibility that makes them solid global citizens.

DEPARTMENT OF BUSINESS AND ACCOUNTING

The world today is one of consistent and often rapid change, especially in light of evolving technologies. Regardless of whether a student is interested in a career in accounting, entrepreneurship, finance, management, or marketing, the recipe for a successful career in business, government, the not-for-profit sector, or being self-employed, is knowledge and skills. The Department of Business helps students gain the knowledge and develop the skills that will prepare them for managing in the global marketplace. These skills include communication, critical and analytic thinking, teamwork, as well as the specific technical skills and functional knowledge associated with each student’s major. In addition, students are prepared to develop a sense of ethical and social responsibility as well as an appreciation for and the ability to navigate in the context of global and ethnic diversity.

The Department of Business offers the Bachelor of Business Administration (B.B.A.) with concentrations in Accounting, Entrepreneurship, Finance, Human Resource Management, Management, and Marketing; the Bachelor of Science (B.S.) in Accounting, Entrepreneurship, Finance, and Marketing.

B.B.A. Business Administration

The goal of the Business Administration B.B.A degree is to provide students with an exceptional undergraduate business education that provides experiential and project-based learning, in-demand and relevant professional skills, and opportunities to plan for a meaningful career upon graduation. Students in the B.B.A. take a structured core business curriculum that not only includes coursework in the basic areas of business – accounting, finance, management, and marketing – but is also focused on in-demand skills such as entrepreneurial thinking and innovation, selling and negotiating, data analytics, and computational thinking and coding. Students also develop a career plan and complete a practicum or internship where they can apply their skills and gain experience in their field of concentration.

Students select a concentration in one of six areas: accounting, entrepreneurship, finance, human resource management, management, and marketing. Concentrations consist of at least five courses outside of the business core and allow students to specialize in an area of interest. Concentrations, and the types of careers they prepare students for, are described in more detail below. Whether a student is interested in careers in the for-profit or non-profit sector, these concentrations provide students with the foundational skills to be successful.

B.B.A. Business Administration

[Program Code: 39393] [HEGIS: 0501.0]

Graduation Requirements

Students must satisfy the placement, proficiency, and orientation requirements outlined in the Graduation Requirements section of this bulletin and the core curriculum requirements
below.

**Orientation: 1 Credit**
FYS 01 First Year Seminar 1.00

**Core Curriculum Requirements: 28 Credits**

**Humanities and Social Sciences**
- English Composition - ENG 16 or 16 X 3.00
- English Literature: ENG 61, 62, 63 or 64 3.00
- Anthropology, History, Philosophy, Political Science, Psychology, Sociology 9.00

**Science and Mathematics**
- Mathematics: MTH 16 3.00
- Laboratory Science: BIO/CHM/PHY 4.00

**Accounting Concentration**

Accountants, who are responsible for recording, analyzing, and reporting on the financial transactions of an organization, ensure that an organization abides by rules and regulations and is able to understand its financial performance. The B.B.A. in Business Administration with an Accounting concentration provides a systems approach to prepare students to be technically competent, alert to ethical issues, and able to adapt to changes in technology, regulation, and globalization. Students are trained in the concepts and techniques needed to evaluate organizational performance and make recommendations for improved future performance. In addition to accounting, the curriculum includes some law and finance. The accounting concentration may lead to careers in accounting or finance, either in a for-profit business, a non-profit, or government, for a public accounting firm, or as a self-employed person. Common entry-level jobs include accountant or financial analyst.

**Business Core Requirements: 49 Credits**
The following sixteen (16) courses are required for the Accounting concentration:

**B.B.A.: Entrepreneurship Concentration**
Entrepreneurship is the ability to recognize a problem or need and develop and launch a product, service, or process in response. Whether a student wants to start her own organization, be an innovator within corporate America or the non-profit sector, or be a freelancer, the skills, practices, and mindset associated with entrepreneurs are applicable across a broad range of settings and types of jobs. This B.B.A. in Business Administration with an Entrepreneurship concentration is a creative exploration of ideas, a study in attracting stakeholders, and a disciplined set of practices to lower risk. Coursework is experiential, and students interact with the startup and innovation community both inside and outside the classroom. The program of study culminates with a business plan that is both defensible to potential investors and actionable in the real world. The entrepreneurship concentration may lead to careers in local startups and general management within larger firms.

**Entrepreneurship Concentration Requirements: 15 Credits**

**B.B.A.: Finance Concentration**  
Finance is a powerful and influential field that can be defined as the art and science of managing money. The study of finance provides a framework to guide the financial decision-making of individuals, small businesses, large corporations, and financial institutions of all types. The B.B.A. in Business Administration with a Finance concentration is designed to provide students with an in-depth understanding of financial markets and financial concepts, exposure to and practice with the tools used by financial professionals to analyze information and make decisions, and training in how to optimize financial performance while minimizing risk. The finance concentration may lead to careers in investment or commercial banking, insurance, mortgage banking, or corporate finance across a range of industries. Common entry-level jobs include financial analyst, budget analyst, financial advisor, auditor, and investment analyst.

**Capstone Experience: 3 Credits**  
BUS 401 Business Capstone 3.00

**B.B.A.: Human Resource Management Concentration**  
Human resource management is focused on how an organization maximizes the performance of its human capital—its employees. The human resource field has undergone a significant change in recent years as more organizations have come to understand that a strong human resource function is critical to helping an organization live its mission and realize its goals. The B.B.A. in Business Administration with a Human Resource Management concentration is designed to provide students with the skills and knowledge key to succeeding in the HR field, covering areas that include employee relations, training and development, and compensation and benefits. The program is in alignment with the curriculum guidelines of the Society for Human Resource Management (SHRM), the world’s largest HR professional society. The human resource management concentration may lead to careers in staffing, training, organizational development, performance management, benefits and compensation, or other fields in human resources. Common entry-level jobs include human resource coordinator, compensation analyst, and recruiter.

**Human Resource Management Concentration Requirements: 15 Credits**

| HRM | Human Resource Management | 3.00 |
| HRM | Employee and Labor Relations | 3.00 |
| HRM | Compensation and Benefits | 3.00 |
| HRM | Training and Organization Development | 3.00 |
| HRM | Workplace Safety Health | 3.00 |

**Advanced Electives: 9 Credits**  
Choose three (3) advanced courses that meet the Advanced Credit Requirement outlined above. At least one (1) course must be taken in Conolly College to satisfy the 30-credit liberal arts requirement.

**Capstone Experience: 3 Credits**  
BUS 401 Business Capstone 3.00

**B.B.A.: Management Concentration**  
Management is how organizations achieve their goals through developing strategy, organizing work, and building and supporting their workforce. The B.B.A. in Business Administration with a Management concentration is designed to give students a broad perspective on organizational management and is the most flexible in the B.B.A. Students can assemble courses in their major based on their interests, from topics that span human resource management, organizational behavior, operations management, project management, decision-making, and systems analysis, among others. The program develops students’ leadership, teamwork, and communication skills along with computer and quantitative competence. The management concentration may lead to careers in any type of industry or organization. Common entry-level jobs include business analyst, account associate, operations associate, and project coordinator.

**Management Concentration Requirements: 15 Credits**

Choose five (5) advanced MAN courses numbered over 300.

**Advanced Electives: 9 Credits**  
Choose three (3) advanced courses that meet the Advanced Credit Requirement outlined above. At least one (1) course must be taken in Conolly College to satisfy the 30-credit liberal arts requirement.

**Capstone Experience: 3 Credits**  
BUS 401 Business Capstone 3.00

**B.B.A.: Marketing Concentration**  
Marketing is the practice of getting a product or service into the hands of a consumer and includes every step from product development to point-of-sale. Marketing is a core function of any business organization; without strategic marketing, even the most innovative or groundbreaking products or services may fail. The B.B.A. in Business Administration with a Marketing concentration is designed to enable students to develop the creative, analytical, and communication skills needed to succeed in areas such as product and service promotion, distribution, buyer behavior, and market research. Courses focus on integrating theory and practice through the use of cases and hands-on field projects. The marketing concentration may lead to careers in market research, product development, advertising, public relations, sales, or other fields in marketing. Common entry-level jobs include ad sales agent, event planner, sales rep, and public relations specialist.

**Marketing Concentration Requirements: 15 Credits**

| MKT | Consumer Behavior | 3.00 |
| MKT | Marketing Research | 3.00 |
| MKT | Marketing Strategy | 3.00 |

**Capstone Experience: 3 Credits**  
BUS 401 Business Capstone 3.00

**Credit and GPA Requirements**

| Minimum Total Credits: 120 |
| Minimum Liberal Arts and Sciences Credits: 30 |
| Minimum Major Credits: 82 |

**B.S. Accounting**

The B.S. in Accounting prepares students for the Certified Public Accounting examinations. Additionally, the B.S. in Accounting prepares students for employment in either the public, private, government or not-for-profit sectors, as well as entry-level positions in business, financial and accounting firms. Students learn essential skills in financial and managerial accounting, taxation and auditing. The curriculum provides a systems approach for students to be technically competent, alert to ethical issues, and able to adapt to changes in technology, regulation and globalization.

**B.S. Accounting**

**B.S. Finance**
The B.S. in Finance degree prepares students to succeed in careers in corporate, public or personal finance. Students are taught to make sound investments using such skills as planning, strategizing, fund raising, risk management, etc. Students are also able to join the Student Management Investment Fund—one of the College’s experiential learning programs. This along with Bloomberg Terminal training and internship opportunities provide students with real-world, hands-on experiences in the latest technologies and methodologies in finance today.

Because of LIU’s proximity to Wall Street, students have access to high profile internship and job opportunities with leading financial industries. Members of the College’s strong alumni base regularly mentor students in their job searches. The LIU Brooklyn B.S. in Finance program is taught by world-class faculty from highly reputable Universities.

B.S. Marketing

The B.S. in Marketing program prepares students for careers in the marketing industry by including two concentration options, Branding and Licensing and Digital Marketing. These concentrations give graduates a focused skillset that allows them to showcase their knowledge to potential employers. Student in the B.S. in Marketing program has access to a network of experienced alumni who guide students in their internships and jobs searches.

The LIU Brooklyn B.S. in Marketing program is taught by world-class faculty from highly reputable Universities.

B.S. Marketing

[Program Code: 06898] [HEGIS: 0509.0]

Graduation Requirements

Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:

Orientation

FYS 01 First Year Seminar 1.00

Core Curriculum Requirements: 34 Credits

Humanities

English Composition - ENG 16 or 16 X 3.00
English Literature: ENG 61, 62, 63 or 64 3.00
Philosophy: PHI 60 3.00
Foreign Language 3.00
Social Sciences

History 3.00
Anthropology, Economics, History, Political Science, Psychology, or Sociology 3.00
Anthropology, Economics Political Science, Psychology, Sociology 3.00

Science and Mathematics

Mathematics: MTH 16 3.00
Laboratory Science: BIO/CHM/PHY 4.00

Communication, Visual & Performing Arts

Oral Communications: SPE 3 3.00

Liberal Arts Elective Requirements: 22 Credits

Introductory Arts & Sciences Electives (1) 13 credits
Advanced Arts & Sciences Electives (2) 9 credits
(1) Any introductory or advanced course offered by Conolly College
(2) Any advanced course (numbered over 100) offered by Conolly College

Major Requirements

Business Core Requirements: 39 credits

The following thirteen (13) courses are required:

ACC 110 Accounting for Business Majors 3.00
BUS 101 Introduction to Business in the 21st Century 3.00
BUS 110 Foundations of Business Information Systems 3.00
BUS 228 Business Statistics I 3.00

Accounting Courses

ACC 110 Accounting for Business Majors
This course is a survey of financial and managerial accounting for majors other than accounting. The course includes an overview of accounting responsibilities of the manager, including budgeting and decision-making. In addition, the course covers accounting procedures, preparation and the interpretation of financial statements and the need and procedures for internal controls.
Pre-requisite: BUS 101; Co-requisite: BUS 110
Credits: 3
Every Fall

ACC 111 Principles of Accounting I
An introduction to the fundamental principles and theory of accounting applied to business organizations. Topics covered during the semester include the balance sheet, income statement, and the principles required to understand financial accounting information. Consideration is given to the recording process, income determination, and the effect of accounting concepts on financial statements.
Credits: 3
Every Fall

ACC 112 Principles of Accounting II
Building on Accounting 111, this course covers additional topics in financial statement development and the effect of cost relationships on management planning and supervising. Case analysis is utilized to provide a solid foundation in the principles of accounting.
The pre-requisite of ACC 111 is required.
Credits: 3
Every Spring

ACC 221 Intermediate Accounting I
An in-depth study of concepts of financial accounting and income determination; analysis of current accounting theory.
The pre-requisites of ACC 111 and 112 are required.
Credits: 3
Every Fall

ACC 222 Intermediate Accounting II
The course is a continuation of Accounting 221 and includes topics such as stockholder equity, retained earnings, earnings per share, stock options, revenue recognition, accounting changes and error analysis, statement of cash flows and full disclosure in financial reporting.
The pre-requisite of ACC 221 is required.
Credits: 3
Every Spring

ACC 329 Accounting Information Systems
A study of the principles of computerized accounting, databases, and the way information flows through accounting systems. This course develops an understanding of accounting information, information technology, operational support and internal control.
The pre-requisites of ACC 111 and 112 are required.
Credits: 3
Every Spring

ACC 331 Management Accounting
A study of the principles of cost accounting in relation to managerial usage. Job order cost systems are developed, and direct costing, relevant costing, profit planning and budgeting are considered.
Students will learn to relate these topics to real world businesses.
The pre-requisite of ACC 222 is required or permission from the Chairperson of the Department.
Credits: 3
Every Spring

ACC 338 Advanced Accounting
A study of consolidated financial statements, international accounting, partnerships, governmental accounting, bankruptcy, and other advanced topics.
The pre-requisite of ACC 222 is required.
Credits: 3
Every Fall

ACC 395 Honors Study
Eligibility to take this class: Student must have upper junior or senior status, 12 credits in one of the majors of the School of Business, Public Administration and Information Sciences, a cumulative quality-point ratio of 3.0 and a 3.25 ratio in the major subject, permission from the Chairperson of the Department and the Dean. Students must complete an Application for Honors Study outlining the research project or independent work to be undertaken and the name of the supervising faculty member. A total of six credits of Honors Study is the maximum allowed.
Credits: 3
On Demand

ACC 396 Honors Study
Eligibility to take this class: Student must have upper junior or senior status, 12 credits in one of the majors of the School of Business, Public Administration and Information Sciences, a cumulative quality-point ratio of 3.0 and a 3.25 ratio in the major subject, permission from the Chair of the Department and the Dean. Students must complete an Application for Honors Study outlining the research project or independent work to be undertaken and the name of the supervising faculty member. A total of six credits of Honors Study is the maximum allowed.
Credits: 3
On Demand

ACC 442 Auditing
This course provides an introduction to auditing, including basic concepts, techniques, and audit applications. The course covers a review of standards and procedures currently used by independent public accountants in examining financial statements and their applications in report preparation. The ethical concepts and requirements of the profession are reviewed together with an overview of the legal responsibilities of audit professionals.
The pre-requisite of ACC 222 is required.
Credits: 3
Every Spring

ACC 445 Federal Income Tax
This course is an introduction to basic federal tax. The application of federal requirements to individual tax returns is considered. The study of tax law will cover topics concerning income recognition, exclusions, property transactions, including capital gains and losses, and tax computations.
The pre-requisite of ACC 222 is required.
Credits: 3
Every Fall

ACC 454 Contemporary Topics in Accounting
A study of ethics, regulation, emerging issues and other topics relevant to contemporary accounting.
The pre requisite of ACC 112 is required.
Credits: 3
Every Spring

Business Courses

BUS 101 Introduction to Business in the 21st Century
This is an introductory course that provides a broad and comprehensive view of today's businesses in a dynamic, technology-driven global economy. This course provides a survey of the field of business and consists of specific topics including: starting a small business, satisfying customers, managing operations, motivating employees and building self-managed teams, developing and implementing customer-oriented marketing plans, managing information, managing financial resources, and exploring ethical and social responsibilities of American businesses.
Credits: 3
Every Fall and Spring

BUS 210 Economics for Business
Business economics looks at production, distribution, and consumption of goods and services in the context of the starting, running, and exiting businesses. The key concepts of economics such as supply and demand, money supply, trade, and the theory of price and relates them to the operation of businesses are explored. The course introduces students to the monetary system, the impact of taxes and government regulations, inflation, and unemployment, all from the perspective of business.
Credits: 3
Every Fall
BUS 211 Applied Business Statistics
A survey of the fundamental statistical methods as applied to the analysis of business conditions and projections. Topics covered include: graphic and tabular representations, measures of central tendency and dispersion, probability, binomial and normal distributions, sampling distributions and hypothesis testing, simple regression and correlation analysis, and index numbers. Students apply tools to business cases.
Pre requisites: Math 16, Finite Math or Higher.
Credits: 3
Every Spring

BUS 212 Career Development and Planning
A hands-on course where students develop a career roadmap to prepare them for successful transition into the job market upon graduation. Students complete a career assessment, research and present labor market data about business careers, analyze careers from the human resource management perspective, explore business trends, and develop a toolbox of resources to assist in their job search.
A pre requisite of BUS 101 is required.
Credits: 2
Every Fall

BUS 228 Business Statistics I
A study of the foundations in statistical methods as they apply to the analysis of business conditions and projections. Topics covered include: graphic and tabular representations, measure of central tendency and dispersion, probability, binomial and normal distributions, sampling distributions and hypothesis testing, simple regression and correlation analysis, and index numbers.
The pre-requisite of MTH 16 or MTH 30 or MTH 40 is required.
Credits: 3
Every Fall

BUS 229 Business Statistics II
This course prepares students to apply statistics and probability concepts to business decisions. Students learn important criterion for developing effective research questions, including the creation of appropriate sampling populations and instruments. Other topics include descriptive statistics, probability concepts, confidence intervals, sampling designs, data collection, and data analysis including parametric and nonparametric tests of hypothesis and regression analysis.
The pre-requisite of BUS 228 is required.
Credits: 3
Every Spring

BUS 390 Business Practicum
This practicum may take the form of an internship, a project done in collaboration with a community partner, a campus-based project, or another structure approved by the department. By working in a professional office or for a client, students compare their knowledge of business with the on-the-job realities and practice the specifics of business interaction and behavior.
Pre requisites: BUS 212, MAN 201, LAW 201 (or LAW 212), MAN 231 and MKT 201
Credits: 3
Every Fall

BUS 401 Business Capstone Experience
Students integrate and apply the functional knowledge and management skills that they have been developing throughout their program to a real-world business problem. Working in multidisciplinary teams, students perform a comprehensive analysis of the business problem or opportunity and develop a coherent, viable, and defensible strategy.
Pre requisite: Senior Standing (completion of minimum 90 credits)
Credits: 3
Every Spring

Finance Courses

FIN 201 Financial Markets and Institutions
This course is designed to familiarize students with the U.S. financial system - its financial institutions, financial markets, and financial instruments and its relationship to the aggregate economy with which the manager must interact when making financial or investment decisions on behalf of companies, nonprofit institutions, government agencies or individuals.
ACC 111, MTH 16 or MTH 30 OR BUS 101, BUS 110, MTH 16, or MTH 30.
Credits: 3
Every Fall and Spring

FIN 202 Introduction to Corporate Finance
This course is designed to familiarize students with the theory of value and financial decision making in the firm relating to financial analysis and planning, working capital management, investing in fixed assets, and the long-term financing of assets - concepts that apply to any type of company or nonprofit institution.
The pre-requisite of FIN 201 is required.
Credits: 3
Every Spring

FIN 315 Analysis of Financial Statements
Balance sheets and income reports are analyzed individually and comparatively for their value to owners, managers, investors and creditors. Determination of standard ratios and variations in earnings. Each student prepares an analysis of actual reports issued to the public.
The pre-requisite of ACC 110 or 111 is required; and the pre-requisite of FIN 202 is also required.
Credits: 3
Every Fall

FIN 325 Financial Strategies in an Uncertain Economy
This course examines the problems of making major financial decisions in a dynamic, uncertain environment. External variables from financial markets, real goods markets, labor markets, and international markets, as well as fiscal policy implementation and monetary policy implementation are identified. The problems of monitoring and forecasting those variables are considered. Decision making is practiced.
Pre requisites: FIN 202 and BUS 228 or BUS 211
Credits: 3
Every Spring

FIN 393 Independent Study
For students in the last semester of their senior year who require one to three credits to meet minimum requirements for graduation. Students must complete an Application for Independent Study to be approved by the Department Chair and the Dean. Students are assigned to a faculty member who supervises the Independent Study course or project.
Credits: 3
On Demand

FIN 396 Honors Study
Eligibility to take this class: Student must have upper junior or senior status, 12 credits in one of the majors of the School of Business, Public Administration and Information Sciences, a cumulative quality-point ratio of 3.0 and a 3.25 ratio in the major subject, the permission of the Chair of the Department and the Dean. Students must complete an Application for Honors Study outlining the research project or independent work to be undertaken and the name of the supervising faculty member. A total of six credits of Honors Study is the maximum allowed.
Credits: 3
On Demand

FIN 397 Internship Study
This course is designed for Sophomore-Senior students in good academic standing who have taken the introductory course and at least 6 additional credits of advanced coursework in the discipline. Student's internship must be approved by the department. Students are assigned to a faculty member who supervises the Internship Study course or project.
Pre requisites: FIN 201, FIN 202 and two advanced Finance courses.
Credits: 1 to 3
On Demand

FIN 403 Security Analysis
Qualitative and quantitative techniques used in evaluating securities, as well as practical tests of investment theories. Emphasis is placed on the special problems encountered in analyzing industrial, railroad, public utility, bank and insurance company issues, stressing economic as well as financial considerations.
Pre requisites: FIN 202 and BUS 228 or BUS 211
Credits: 3
Every Spring
FIN 404 Portfolio Management
This course considers the most efficient methods of meeting the investment objectives of investors, both for individuals and for institutions. Portfolio patterns are analyzed and appraised in terms of those objectives, economic changes, interest rate movements, tax and legal considerations.
Pre requisites: FIN 201, 202 and BUS 211 or 229
Credits: 3
Every Fall

FIN 405 Corporate Financial Policies
A study of the cost of liquidity of an individual corporate enterprise. Problems are centered around capital budgeting, structure of capital, cost of capital, and mergers, acquisitions and corporate reorganization.
Pre requisites: FIN 202 and BUS 211 or BUS 228 or MTH 100
Credits: 3
Every Spring

FIN 409 International Finance
Analysis of the balance of payments and the International Monetary System. Includes the role of reserves in international payments, the adequacy of international liquidity, a study of the proposed international monetary arrangements, and the role of the World Bank, International Monetary Fund and other facilitating agencies.
The prerequisite of FIN 202 is required.
Credits: 3
On Occasion

FIN 410 International Banking
A survey of the organization, structure, function and regulation of the international activities of U.S. banks. An examination is made of the role and impact of the international financial and money market activities, along with a comparison of foreign banking structure and organization with that of U.S. banks. The international lending decision process and the use made of the international banking facilities by multinational firms are also analyzed.
The prerequisites of FIN 201 and FIN 202 are required.
Credits: 3
On Occasion

FIN 420 Seminar Current Topics in Finance
Advanced financial topics. Required for all finance majors.
The prerequisite of FIN 325 is required.
Credits: 3
Every Spring

FM 211 Introduction to the Fashion Industry
This is a beginning course in the study of fashion merchandising within the free enterprise system. The course is designed to blend both concepts and applications from the field of fashion. Topics include the evolution of fashion, the consumer’s interaction with the market, production and acquisition of raw materials, an introduction to the textile industry, an overview of fashion accessories, and the buying and selling functions within the field of fashion merchandising.
Credits: 3
On Demand

FM 340 Textile Analysis
This course is designed for students whose career direction will require knowledge of textiles as part of the professional prerequisites of industry. The major changes and development in the world of textiles will be covered with an emphasis of textiles as a major international industry. Terminology, organization, and structure of this multi-faceted industry will be highlighted. Working fabric specimens (fabric swatches) will be used in conjunction with the assignments to enhance the combined textbook/handson format.
Pre requisites of MKT 201 is required.
Credits: 3
On Demand

FM 346 Fashion Marketing
An overview of the fashion industry in the U.S. and other foreign countries. Areas of study include history, terminology, theories of fashion, fashion development from concept design to consumer end use. American and European designers, apparel manufacturers, retailers, and fashion marketing practices will be discussed.
Credits: 3
On Demand

FM 401 Fashion Forecasting
This course is a comprehensive study of trend forecasting, demographics and social issues that affect fashion and related industries. Students explore and apply various forecast research methods in preparation for developing, planning, purchasing, or merchandising apparel lines and collections. Using the case study method, trend research is evaluated through the use of scholarly texts, articles, databases, and relevant websites to identify opportunities for growth and profitability in a fashion business.
Pre requisites of MKT 201 is required.
Credits: 3
On Demand

International Business Course

IBU 221 International Business
This course presents a broad overview of the fundamentals of international business and trade, and familiarizes the student with the basic terminology, key concepts and issues unique to the subject. The student studies the global economy including international trade, investments, and the business environments. The management of multinational firms is studied in the context of the international financial systems, global market research, and comparative advantage.
The prerequisite of BUS 101 is required.
Credits: 3
Every Spring

Law Courses

LAW 201 Business, Law, and Society
This course explores the legal and social contexts within which businesses operate and the interaction between business entities and the American legal system. The aspects underlying consumer decisions and experiences in relation to effective marketing management. This course includes an examination of the social sciences on which behavior is based, drawing on the fields of psychology, sociology, and cultural anthropology. Topics include learning, motivation, consumer attitudes, ethical issues, cross-cultural consumer behavior, and technological aspects influencing consumer behavior. Pre-requisite of MKT 201 is required.
Credits: 3
Every Fall

**MKT 331 Marketing Research: Its Planning Techniques and Evaluation by Management in the Solution of Marketing**
Marketing research viewed as a systematic problem-solving activity concerned with the compilation, analysis and interpretation of marketplace trends. Makes available the various techniques that are generally derived from the physical and social sciences. Pre-requisite of MKT 201 is required.
Credits: 3
Every Spring

**MKT 333 Advertising and Marketing Communications**
This course offers a comprehensive understanding of promotional tools using traditional and nontraditional marketing channels for designing communication strategies that are consistent with an organization’s goals. Emphasis is placed on Integrated Marketing Communications (IMC) in order to provide synergy and consistency between different promotional tools for maximum effectiveness. Students learn how to plan, implement, control, evaluate, and adjust the IMC process in order to achieve marketing objectives. Pre-requisite of MKT 201 is required.
Credits: 3
On Occasion

**MKT 334 Advertising Management**
This course focuses on the management of an advertising campaign and its development process. It examines the analysis of the target audience, the definition of objectives, the creation of advertising platforms, the determination of budget, the development of a media plan, the creation of an advertising message, the execution of the campaign, and the evaluation of advertising effectiveness. The course is intended to provide students with real-world experience in the development of advertising campaigns for actual organizations. Pre-requisite of MKT 201 is required.
Credits: 3
On Occasion

**MKT 335 Digital Marketing**
The objective of this course is to give students an overview of utilizing the Internet as a marketing tool and to provide a practical framework for effective Internet marketing. Course topics include understanding the impact of the Internet on business, developing Internet marketing strategies, and describing the consumer online exchange process and its outcomes. Pre-requisite of MKT 201 is required.
Credits: 3
On Occasion

**MKT 337 Advanced Market Research**
The application of marketing research to problem areas such as sales management, market potential, advertising pre-testing and post-testing, and new product introduction and distribution. The use of marketing research as a tool in specialized areas such as sales forecasting, media evaluation, consumer motivation, and buyer behavior is explored. Mathematical programming and case studies are used. The pre-requisite of MKT 201 and 331 are required.
Credits: 3
On Occasion

**MKT 338 International Marketing**
The rise of the global corporation is now an irreversible trend that poses many unique challenges not only to multinational American corporations but also to other worldwide corporations. The course deals with diversified socioeconomic and political environments in different parts of the world and considers basic marketing principles and tools as they relate to the international framework. International demand analysis, channels of distribution, technical and legal features of international exchange, pricing and credit arrangements, and advertising and promotion are considered. Pre-requisite of MKT 201 is required.
Credits: 3
On Occasion

**MKT 341 Sales Management**
Analysis of sales strategy and adaptive selling methods. Topics include finding and reaching prospective buyers, developing effective sales presentations, handling objections, closing sales, and developing the personal attributes necessary for pursuing a career in sales. Pre-requisite of MKT 201 is required.
Credits: 3
On Occasion

**MKT 342 Social Media Marketing**
The objective of the course is to give students an overview of utilizing social media as a strategic marketing tool and integrating it with offline efforts in order to boost the organization’s performance. Course topics include SMM (Social Media Marketing) goals and strategies, rules of engagement, SMM platforms, content marketing, SMM monitoring, and SMM planning.
Pre-requisites of MKT 201 is required.
Credits: 3
On Occasion

**MKT 343 Healthcare Marketing**
Focuses on the application of marketing principles and concepts to the healthcare industry, specifically with regard to hospitals and pharmaceutical and insurance firms. Topics include market segmentation, marketing mix, patient behavior, and strategic marketing planning. Pre-requisite of MKT 201 is required.
Credits: 3
On Occasion

**MKT 344 Sports Marketing**
The course examines the specific application of marketing principles and processes to sports products and non-sports products through an affiliation with a sport. How sports organizations define their businesses as entertainment providers that use the latest marketing techniques to understand consumers and provide sports products that satisfy their needs is discussed. Also explored is the role of major corporations in sponsorships, team and event promotions, and advertising in mass media such as national TV networks, cable TV, and the Internet.
Pre-requisite of MKT 201 is required.
Credits: 3
On Occasion

**MKT 346 Fashion Marketing**
An overview of the fashion industry in the U.S. and other foreign countries. Areas of study include history, terminology, theories of fashion, and fashion development from concept design to consumer end use. American and European designers, apparel manufacturers, retailers, and fashion marketing practices will be discussed. Pre-requisites of MKT 201 is required.
Credits: 3
On Occasion

**MKT 350 Brand Management**
This course introduces branding and brand management. The course covers how to develop a brand strategy, with customer based brand positioning, utilizing brand resonance and value chain; how to design and implement brand marketing programs, with brand elements, and by integrating marketing communications; how to measure and interpret brand performance based on sources and outcomes of brand equity, capturing customer mind-set and market performance, and how to grow and sustain brand equity, with new products and brand extensions. Pre-requisites of MKT 201 is required.
Credits: 3
On Occasion

**MKT 351 Marketing Strategy**
This course presents the marketing strategy concept as a management tool for optimizing profitability and long-term goals under uncertainty. It focuses...
on the marketer's deployment of resources to achieve stated goals in a competitive environment by following a unified, comprehensive, and integrated plan. Topics include environmental scanning, marketing opportunity and performance analysis, competitive forces analysis, brand positioning and management, optimal pricing, and distribution.

*Pre-requisite of MKT 201 is required.*

**Credits: 3**

*On Occasion*

**MKT 396 Honors Study**

Eligibility to take this class: Student must have upper junior or senior status, 12 credits in one of the majors of the School of Business, Public Administration and Information Sciences, a cumulative quality-point ratio of 3.0 and a 3.25 ratio in the major subject, the permission of the Chair of the Department and the Dean. Students must complete an Application for Honors Study outlining the research project or independent work to be undertaken and the name of the supervising faculty member. A total of six credits of Honors Study is the maximum allowed.

**Credits: 3**

*On Demand*

**MKT 397 Internship Study**

For Sophomore-Senior student in good academic standing who has taken the introductory course in the discipline and at least 6 additional credits of advanced coursework in the discipline. Student's internship must be approved by the department. Students are assigned to a faculty member who supervises the Internship Study course or project. Students may be required to write a research paper or complete a project in addition to all other course requirements.

*The pre-requisites of MKT 201 and two advanced Marketing courses are required.*

**Credits: 1 to 3**

*On Demand*
DEPARTMENT OF
ENTREPRENEURSHIP AND
INNOVATION

B.S. Entrepreneurship

The B.S. in Entrepreneurship program is designed to engage students to think entrepreneurially while they learn how to execute their vision efficiently and effectively. Entrepreneurship majors will learn how to prepare and execute a comprehensive strategy for launching a new venture. The venture can be in any organizational context – large or small, new or existing, non-profit or for-profit. The entrepreneurial process of value creation through innovation remains the same regardless of the context or the ultimate goal.

Students will interact extensively with the business community both inside and outside the classroom and produce a plan that is both defensible to potential investors and actionable in the real world.

B.S. Entrepreneurship

[Program Code: 36215] [HEGIS: 0501.0]

Graduation Requirements

Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:

Orientation

FYS 01 First Year Seminar 1.00

Core Curriculum Requirements: 34 Credits

Humanities

English Composition - ENG 16 or 16 X 3.00
English Literature: ENG 61, 62, 63 or 64 3.00
Philosophy: PHI 60 3.00
Foreign Language 3.00

Social Sciences

History 3.00
Anthropology, Economics, History, Political Science, Psychology, or Sociology 3.00
Anthropology, Economics Political Science, Psychology, Sociology 3.00

Science and Mathematics

Mathematics: MTH 16 3.00
Laboratory Science: BIO/CHM/PHY 4.00

Communication, Visual & Performing Arts

Oral Communications: SPE 3 3.00

Art, Dance, Journalism, Music, Theatre, Media Arts 3.00

Liberal Arts Elective Requirements: 22 Credits

Introductory Arts & Sciences Electives (1) 13 credits
Advanced Arts & Sciences Electives (2) 9 credits
(1) Any introductory or advanced course offered by Conolly College
(2) Any advanced course (numbered over 100) offered by Conolly College

Major Requirements

Business Core Requirements: 36 credits

The following twelve (12 courses) are required:

ACC 110 Accounting for Business Majors 3.00
BUS 110 Introduction to Business in the 21st Century 3.00
BUS 110 Foundations of Business Information Systems 3.00
BUS 228 Business Statistics I 3.00
BUS 229 Business Statistics II 3.00
FIN 201 Financial Markets and Institutions 3.00
FIN 202 Introduction to Corporate Finance 3.00
IBU 221 International Business 3.00
LAW 201 Business, Law, and Society 3.00
MAN 201 Principles of Management 3.00
MAN 231 Managerial Communications 3.00
MKT 201 The Fundamentals of Marketing 3.00

Entrepreneurship Specialization Requirements: 15 credits

The following five (5 courses) are required:

ENT 200 Entrepreneurship and Innovation 3.00
ENT 301 Developing a New Venture 3.00 Value Proposition
ENT 302 Developing a New Business Model 3.00
ENT 303 Entrepreneurial Consulting 3.00
ENT 304 New Venture Planning 3.00

Advanced Business Electives: 9 Credits

Choose three (3) advanced business courses numbered over 300

Capstone Experience: 3 Credits

BUS 401 Business Policy 3.00

Credit and GPA Requirements

Minimum Total Credits: 120
Minimum Liberal Arts and Sciences Credits: 60

Minimum Major Credits: 60

Data Analytics, B.S. Requirements

Graduation Requirements

Students must satisfy the placement, proficiency, orientation and 34-35 credit core curriculum criteria outlined in the Graduation Requirements section of this bulletin:

Orientation

FYS 01 First Year Seminar 1.00

Core Curriculum Requirements (30 Credits):

Humanities

English Composition - ENG 16 or 16 X 3.00
English Literature: ENG 61, 62, 63 or 64 3.00
Philosophy: PHI 60 3.00

**Data Analytics Electives: 12 Credits**

Any combination of four (4) elective courses from the following areas:

- Artificial Intelligence
- Computer Science
- Business
- Health

**Credit and GPA Requirements**

Minimum Total Credits: 120
Minimum Liberal Arts and Sciences Credits: 60
Minimum Major Credits: 60
DA 103 Programming in Python
Problem solving, algorithmic dDA
Credits: 3
Every Fall

DA 118 Introduction to Data Analytics
The course provides students with the opportunity to learn data processing skills needed to execute business and professional functionalities using Microsoft Excel. It also prepares students to master more advanced, data analytics skills in Excel. Emphasis is placed on how to efficiently navigate big datasets and use the keyboard to access commands for finance and other business scenarios. Students will also learn the basis for conceptualizing and designing data analytics projects with the highest level of integrity. Data visualization skills are also introduced and reinforced throughout the course. At the end of the course students are expected to pass the exam and earn the Microsoft Office Specialist certification in Excel.
Credits: 3
Every Spring

DA 120 Data Analytics
This course provides a comprehensive introduction to the principles of data science that underlie the data mining algorithms, data-driven decision-making process, and dataanalytic thinking. Topics include learning commands, arithmetic operators, logical operators, and functions in the analytical languages, writing scripts, performing descriptive analytics, creating analytical graphs, and working and manipulating data sets using the two most popular analytic languages of R and Python.
A pre requisite of DA 118 is required.
Credits: 3
Every Spring

DA 125 Multivariate Statistics
This course is designed to provide students with a working knowledge of the basic concepts underlying the most important multivariate techniques used for analysis of data sets that contain more than one variable, and the techniques are especially valuable when working with correlated variables. The techniques provide a method for information extraction, regression, or classification. This includes applications of data sets using R and Python.
A pre requisite of Math 100 is required.
Credits: 3
Every Fall

DA 131 Data Structures and Algorithms
A comprehensive study of the design and analysis of efficient data structures in Python. The course provides the fundamentals of data structures and algorithms, including their design, analysis and implementations. Fundamental data abstractions include: linear lists; strings; stacks; queues and deques; priority queues; multi-linked structures; trees and graphs; maps; hash tables; skip lists. Three hours lecture, one hour laboratory.
A pre requisite of DA 103 is required.
Credits: 3
Every Fall

DA 140 Data Visualization
This core required course in the Data Analytics program provides a comprehensive introduction and hands-on experience in basic data visualization, visual analytics, and visual data storytelling. It introduces students to design principles for creating meaningful displays of quantitative and qualitative data to facilitate managerial decision-making in the field of business analytics. Students will learn about how to leverage the power of data visualization to communicate business-relevant implications of analyses and the difference between using visualization for analytics vs. data storytelling. Modules cover the visual analytics process from beginning to end-from collecting, preparing, and analyzing data to creating data visualizations, dashboards, and stories that share critical business insights.
Credits: 3
Every Fall

DA 153 Data Analytics Ethics
This course surveys the domestic and international development of data and information privacy law and regulation in response to the growing sense of urgency around data breach and analytics ethic. The course also addresses the way in which law, legal and regulatory institutions, and private sectors govern and control the flow of data and information. Topics also include ethical use of AI, oversight for algorithms, digital profiling, free speech, open government, cybersecurity, data communications.
Junior status.
Credits: 3
Every Fall

DA 155 Introduction to Fintech
Fintech (financial technology) plays an essential role in modern finance and business. Fintech knowledge and skills are the state-of-the-art components for data scientists and data analysts. This course introduces Fintech through a hands-on data analytics approach and fosters student’s essential fintech data analytics skills. Topics include Fintech data acquisition, visualization, and analysis; High-frequency trading (HFT) data analytics, implied volatility analytics, Blockchain in Fintech, Smart contract, machine learning in Fintech, and other state-of-the-art fintech knowledge and skills.
Pre requisites: DA 120 or AI 163
Credits: 3
Every Fall

DA 166 Computational Genomics
The course offers an introduction to basic theories, history of the field, current research areas and clinical applications of genomics including disease diagnosis and risk assessment, genetic counseling, microbiome testing and pharmacogenomics. The impact on personalized medicine and medical products will be highlighted. The course emphasizes the principles underlying the organization of genomes and the methods and approaches of studying them. Methods for understanding concepts such as gene regulation, evolution, complex systems, genetics, and gene: phenotype relationships are covered. Topics explored include sequence alignment, comparative genomics, phylogenetics, sequence analysis, structural genomics, population genetics, and metagenomic analysis. Bioinformatics tools as provided in the BioPython library will be utilized.
Pre requisites: BIO 26 and DA131
Credits: 3
Every Spring

DA 360 Capstone Project
This capstone course in the Data Analytics program first trains students on the fundamental concepts needed for the role of a Business Analyst/Business Intelligence Engineer/Data Scientist in companies, and then equips students with the latest available tools to implement these concepts in answering business questions in a data driven way. This course uses hands-on project in the application of data analytics in various areas such as business, health, and other fields of interest.
Co requisites: AI 260, DA 120, DA 140, DA 155
Credits: 3
Every Spring

Entrepreneurship Courses

ENT 200 Entrepreneurship and Innovation
This course has been designed to stimulate interest in entrepreneurship in general and in particular, instruct students about business startups an disruptive technologies. Class instruction will include readings, case studies, field trips, and/or guest speakers. Examination of the literature of entrepreneurial behavior while focusing on several high visibility industries/businesses as well as local entrepreneurs will be covered.
Credits: 3
Every Fall and Spring

ENT 301 Developing a New Venture Value Proposition
This course will focus on key marketing strategies relevant for new ventures. Students will: (1) apply marketing concepts to entrepreneurial company challenges; and (2) understand the special challenges and opportunities involved in developing marketing strategies. Students will develop a comprehensive entrepreneurial marketing plan over the semester, selecting either their own
business idea or an actual company's project, and choosing to work in teams or individually. The prerequisite of ENT 200 is required.
Credits: 3

Every Fall

**ENT 302 Developing a New Business Model**
This course will focus on financing new ventures and existing businesses. The course addresses key questions which challenge all entrepreneurs: how much money can and should be raised; when should it be raised and from whom; what is a reasonable valuation of the company; and how funding should be structured. The course aims to prepare students for these decisions, both as entrepreneurs and venture capitalists. The prerequisite of ENT 200 is required.
Credits: 3

Every Spring

**ENT 303 Entrepreneurship Seminar**
This course is for students who have already developed a business plan/marketing plan. Students will: (1) review business plans independently and/or as part of a case analysis, (2) review their own business plan and plans of their classmates, (3) have their plan reviewed by members of the business community and then rework the plan based upon their feedback, and (4) finalize their plans for presentation to a panel of "experts". The prerequisites of ENT 301 and ENT 302 are required.
Credits: 3

Every Spring

**ENT 304 New Venture Planning**
This is the capstone course for entrepreneurship majors. In this course, students will assimilate what they have learned in their previous entrepreneurship courses to produce a professional, actionable plan for a new business venture. The prerequisites of ENT 200, 301 and 302 are required or permission of the Instructor.
Credits: 3

Every Spring

**ENT 399 Entrepreneurship & Innovation Summer Program**
Students in this course will be given the opportunity to participate in a three-week intensive and experiential entrepreneurship endeavor. Participating students will work in teams and receive high-level mentorship to develop and launch a business over the course of the program. A prerequisite of ENT 200 is required.
Credits: 3

On Demand
The LIU Brooklyn School of Education is no longer accepting new students; current students are encouraged to refer to the appropriate academic year’s catalog for their program requirements by visiting https://liu.edu/enrollment-services/registration/academic-catalogs. The School of Education Department of Teaching, Learning, & Leadership (TLL) continues to support undergraduate and graduate students in programs leading to multiple teaching certification areas. The graduate programs in Mental Health Counseling, Family and Marriage Therapy and School Psychologist can be found in the School of Health Professions (Psychology and Counseling) section of the catalog.
LIU Global offers a Bachelor of Arts degree in Global Studies. Students complete the Global Studies degree through four years of coursework and integrated field experience undertaken as they travel around the world. They begin with the Global Studies foundation year in Costa Rica. They then move in their second year to Europe and then to Australia, New Zealand, Bali, and Fiji. In the first semester of their senior year, they are placed in an international internship with a leading organization aligned with their mission and carry out independent research. In the final Capstone Semester in New York City, they complete their senior thesis project and enroll in a second senior internship. As students move around the world, they acquire the knowledge, skills, and perspectives necessary to provide leadership in the Global Age.

Area Studies courses and fieldwork are delivered drawing on LIU Global’s decades of engagement with partners and communities around the world, these courses deepen students’ knowledge of the countries, languages, and cultures of the region in which the center is located. The area studies courses combine classroom work with integrated field experiences and travel (http://liu.edu/global/Academics).

Core courses and fieldwork that build academic knowledge and skills across the program’s four years. This sequence of required courses, distributed systematically around the world, equips students with disciplinary lenses to explore the world’s interdependent cultural, political, environmental, and economic systems, as well as critical thinking, communication, and research skills. Students also examine local manifestations of the world’s most pressing global issues and explore approaches to addressing these in each of the regional contexts. The sequence culminates in a set of upper-division courses in the last four semesters that include two senior-year internships and the completion of a senior thesis or senior project.

LIU Global students have the opportunity to pursue one or more minors of their choice in Arts and Communications, Entrepreneurship, and International Relations. All minors require the completion of a minimum of 15 credits from the approved courses listed on the website which should be taken into consideration in students’ academic planning.

B.A. in Global Studies Overview and Curriculum

Description and Mission

LIU Global Mission and Vision

Mission
It is the mission of LIU Global to provide its students with the knowledge, experiences, and skills that will enable them to become socially responsible, engaged leaders in a richly diverse and increasingly complex world. Through an innovative, inquiry-driven, experientially-focused curriculum, LIU Global is committed to offering life-changing educational opportunities to students that expose them to the direct effects of global issues on local communities.

LIU Global considers the world as its campus and sees engagement with people of different cultures as integral to the learning process. An LIU Global education is a transformative educational experience that combines rigorous academics, career development, and individualized learning in the world’s dynamic regions.

Vision
As a program within Long Island University, LIU Global seeks to support the LIU mission and vision by promoting the development of a learning community that actively contributes to a global dialogue addressing the world’s most pressing issues.

1. LIU Global aspires to become a leader in the field of global studies through an innovative, experiential, and globally-based curriculum guided by local scholars that integrates coursework with community engagement in the search for greater understanding, cooperation, and collective action in the interests of the world community.

2. LIU Global aspires to develop a superior student-centered experience that will enhance an appreciation of diversity, cultivate sensitivity towards the human and ecological impact of examined issues, and inspire creativity and commitment to exploring a peaceful and sustainable future for all peoples and the world.

3. LIU Global’s future is guided by the understanding, belief, and commitment that our graduates will have the skills, knowledge, awareness, and cross-cultural competencies that will prepare them for a personal and professional life of committed action in the interest of the world community and the environment. LIU Global alumni will contribute positively to the communities in which they will live and will apply the program’s goals to any future professional endeavors.

4. Through its own practice, LIU Global intends to model the principles it hopes to teach, that of creating a global community that promotes individual respect and collective responsibility, ecological sustainability, solidarity and service to others, and support of local efforts to address locally identified needs.

Overview of the Four-Year Curriculum

Program Sequence
(Note: Travel locations are subject to change)

Year One: Costa Rica
Year Two: Europe
Year Three: Australia, New Zealand, Bali, Fiji
Year Four: Spring: New York City, Excursions to Washington D.C.

Why Choose LIU Global?

The LIU Global undergraduate program couples innovative classroom work, research, and direct engagement with people, places, communities, and organizations throughout the world. Rather than presenting students with abstract fragments of the world divorced from reality, the LIU Global classroom is a place where students prepare themselves for fieldwork and study travel through reading and research. The LIU Global classroom is also a place, after students return from the field, where students reflect and write about their experiences, transforming them into useful knowledge.

In addition to moving from country to country, students dive deeply into local and regional realities everywhere that they go. Courses at every center include experiential programming that takes local reality as the curriculum’s living textbook.

The worldwide program is designed to build students’ capacity and confidence to carry out independent work.

In the over 55 years of its existence, LIU Global has developed a full range of experiential programs that take full advantage of local opportunities.

Although the specific details for each program are included in each location’s individual web page, each program combines several elements from the list below to deliver a powerful set of experiences:

- Field excursions, lasting up to a day and usually linked to a specific course.
- Extended study travel, regional travel lasting from several days up to two weeks with itineraries often integrated into several courses.
- Community engagement projects linked to a global issue or service opportunity carried out with a local partner.
- Field Experiences engaging with Non-Governmental Organizations (NGOs), local enterprises, and institutions whose mission is related to either a course topic or a student's field research.
• IRIS and Capstone Internships, semester-long placements carried out in both semesters of the senior year, first abroad and then in New York City.
• Senior Thesis Field Research carried out during the first semester of the senior year in a field placement co-designed by the student and advisor. Students complete a Senior Thesis Project during their final Capstone semester.

Learning Goals

LIU Global Goals and Outcomes

Learning Goal 1: Global Solutions

Global College graduates are committed to engaging with humanity’s collective challenges. Through multi-disciplinary inquiry, as well as through experience of several world regions, they comparatively articulate local manifestations of global problems, and identify and contribute to solutions to them.

Outcome 1: Use scholarly research and field experiences to identify pressing global issues, local and global responses to those issues, and productive paths toward addressing them.

Outcome 2: Conduct trans-disciplinary inquiry using economic, cultural, political, and environmental lenses to critically analyze complex global issues from multiple, distinct perspectives.

Outcome 3: Synthesize and integrate distinct global field experiences through engagement with and refinement of theoretical frameworks, demonstrating implications for productively addressing humanity’s collective challenges.

Learning Goal 2: Academic Research

Global College graduates execute high-quality academic bibliographic and field research that contributes to knowledge about global issues. They persuasively communicate their findings using the conventions of written, oral, and digital media.

Outcome 1: Demonstrate command of academic writing and argumentation, as well as capabilities in oral and multimedia communication.

Outcome 2: Execute ethical qualitative field and bibliographic research.

Outcome 3: Engage in inquiry-driven research design; evaluate, analyze, and synthesize evidence.

Learning Goal 3: Professionalism

Global College graduates are creative, socially conscious professionals prepared for a life of committed engagement. They bring to public, private, and civic enterprises a sense of personal and social responsibility, and have the capacity to adapt to and thrive in uncertain and changing circumstances.

Outcome 1: Successfully pursue defined career and life goals that align with social responsibility.

Outcome 2: Demonstrate professional and ethical communication skills and behavior.

Outcome 3: Demonstrate resilience, flexibility, and self-care in face of challenges and uncertainty.

Learning Goal 4: Global Leadership

Global College graduates lead, support, and collaborate effectively in diverse, purpose-driven teams in international contexts. They communicate across cultures to empower others and develop and achieve shared goals.

Outcome 1: Integrate knowledge and applications of global leadership theories and concepts into daily life.

Outcome 2: Communicate across languages and cultures, engaging and collaborating effectively and appropriately with diverse communities to address critical global issues.

Outcome 3: Effectively and strategically plan and work with diverse groups in order to develop and achieve shared goals.

Program Policies

As part of Long Island University, our students and staff must respect the LIU Brooklyn Code of Conduct which can be found at: http://liu.edu/Brooklyn/Campus-Life and the policies outlined in the Undergraduate Bulletin, including the LIU Sexual Violence and Harassment Policy. The LIU Global Program and Policy Handbook complements the information and policies in the aforementioned documents. The LIU Global Program and Policy Handbook contains program-specific information, policies and procedures for LIU Global students and staff: http://liu.edu/Global/Global-Life. The LIU Global Program and Policy Handbook aims to provide guidance that will help develop a positive learning environment, ensure academic integrity, promote students’ well-being and comply with university policies. The LIU Global Program and Policy Handbook also contains the LIU Global Disciplinary Policy and Procedure. Where the terms or processes in the LIU Global Disciplinary Policy differ from the LIU Brooklyn Student Handbook, the LIU Global Disciplinary Policy shall control.

Policies are subject to change. Below are some of the policies. Note that policies can be amended and will be incorporated in the revision of the LIU Global Program and Policy Handbook.

DEGREE-GRANTING PROGRAMS

First-Year Student Status

Applicants with a high school diploma or a GED are eligible to apply for admission as a first-year student. Applicants who have earned college credits while enrolled in high school, and received AP, or IB credit must disclose such information to the LIU Admissions Office when submitting an application. Failure to inform the Admissions Office of such credit will affect placement within the program.

Transfer Status

Applicants who have completed academic work at other colleges or universities may apply for admission as a transfer student to LIU Global with advanced standing based on the number of credits previously earned. All transfer students are required to spend at least three semesters abroad with LIU Global to qualify for the degree.

Students take 15-18 credits each semester for a total of 120. Transfer students will be advised about their academic pathway and graduation plan.

Credits transferred in must be a grade of “C” or better. LIU Global also awards credit for College Level Examination Program (CLEP) test scores of 50 or higher, Advanced Placement (AP) test scores of three or higher, or IB test scores of HL 4 or higher. To transfer credits, applicants must submit an official college transcript from an accredited university and/or submit official test score reports.

NON-DEGREE-GRANTING PROGRAMS (FOR NON-LIU GLOBAL STUDENTS)

Visiting Students

Although LIU Global is a four-year Global Studies program, students from other U.S. universities, LIU Brooklyn and LIU Post are heartily encouraged to study abroad as visiting students at any of the college’s centers for one or more semesters. Visiting students do not matriculate for an LIU Global degree, rather they return to their home institutions to complete graduation requirements.

LIU Global offers visiting students a full range of advising and support services, focusing on such issues as program selection, academic planning, registration, credit transfer, cultural adjustment, on-site support and re-entry. Visiting students receive a letter grade in each course. Visiting students are advised to talk with their LIU Promise Success Coach, registrar, and/or financial aid office at their home universities to determine the home institution’s requirements with regard to application deadlines, credit transfer, and financial aid procedures.

Please review policies and procedures for visiting students at: http://liu.edu/Global/Global-Life#visiting

Visiting Student Application

LIU students, fill out the Study Abroad form found here: http://liu.edu/Global/Global-Life#visiting

Students outside of LIU, fill out the application
find https://apply.liu.edu/quickapp2/?campus=g

Required Forms
All visiting students must complete the forms found here: http://liu.edu/Global/Global-Life#visiting

Center/Semester
Fall and/or Spring: Costa Rica, Europe, China, Asia-Pacific Australia

GENERAL TRAVEL INFORMATION
Passport
Students are responsible for having a valid passport. The passport must be valid for at least one year, in good shape, and have at least 10 empty pages.

Visa
Applying for a visa varies from country to country. The staff advises on this process. Students are responsible for complying with the visa requirements for each country.

REGISTRATION
Important
Register for courses through the MY LIU portal: https://my.liu.edu

Students are charged a flat tuition rate for 12-18 credits. If students register for 19 credits and up, they will be charged an additional per credit rate. Students interested in registering for 19 or more credits must get permission from the Center Director.

Students will have the opportunity to drop and add courses during the program change period in consultation with their Center Director. The deadline is posted on the academic calendar: http://liu.edu/Global/Global-Life.

Students who register or who wish to change centers beyond the registration deadline (see http://liu.edu/Global/Academics/Academic-Calendar) are not guaranteed participation in the selected program due to student and center preparation requirements (visas, housing, staffing, etc.). Students should not incur any expenses for participation in the program (e.g., flights, visas), payments to service providers, etc.

The calculation of your tuition and fees liability, if any, is based on the date of your official withdrawal or change of center in accordance with the LIU Academic Calendar: https://www.liu.edu/academiccalendar

TUITION LIABILITY SCHEDULE
Any registered student who withdraws after the dates below is bound by this schedule for tuition and university fees:

Withdrawal Date Liability
Prior to start of LIU term 0%
During 1st calendar week of classes 0%
During 2nd calendar week of classes 25%
During 3rd calendar week of classes 50%
During 4th calendar week of classes 75%
After 4th week of classes 100%

ROOM AND BOARD AND CENTER FEE LIABILITY SCHEDULE
Any registered student who withdraws after the dates below or changes centers is bound by the schedule below to cover upfront costs incurred by the center on the students’ behalf.

Withdrawal Date Liability
7 weeks or more before start of LIU classes 0%
From 7 weeks before start of LIU classes to 1st day of start of LIU term 25%
During 1st calendar week of LIU classes 50%
During 2nd calendar week of LIU classes 75%
During or after 3rd calendar week of LIU classes 100%

Health & Safety
LIU Global’s highest priority is the health and safety of its students. Staff members at each center have knowledge about the best medical facilities in the region, are trained to help manage emergency situations, and are on call 24 hours a day. All LIU Global students are required to register with their home country’s embassy in the country where they are residing during the academic term. Students who are U.S. citizens or residents are required to complete the Smart Traveler Enrollment Program (STEP) with the U.S. State Department. Enrolling in STEP allows students to:

• Receive important information from the Embassy about safety conditions in the destination country, helping students make informed decisions about their travel plans.
• Help the U.S. Embassy contact students in an emergency, whether natural disaster, civil unrest, or family emergency.

Link: https://step.state.gov/step/

More detailed health- and safety-related information is included in the Program and Policy Handbook http://liu.edu/Global/~link.aspx?_id=5D580E34817A413FA39B9716AEC2C6S&_z=z#Policies. LIU Global students are required to follow all health and safety policies outlined in the handbook as well as those specific to each region which are shared and reviewed in each country’s orientation.

Application Procedure

Minimum Requirements for Admission:
Applicants for admission to LIU Global should have a minimum 2.50 GPA to be considered for admission. Students who do not meet this requirement may be considered on a case-by-case basis dependent on supplementary materials (i.e. test scores, essays, personal interviews). We accept students on a rolling basis throughout the year.

Application Forms:

• Freshman Application (high school seniors or applicants with fewer than 18 college credits: select LIU GLOBAL on the drop-down menu item “Interested Campus”).
• Transfer Application (applicants with between 18 and 75 credits)
• Study Abroad with LIU Global Application (Non-LIU applicants wishing to study abroad with LIU Global for one or more semesters).
• Study Abroad with LIU Global for LIU Students (LIU applicants wishing to study abroad with LIU Global for one or more semesters).

LIU Brooklyn Undergraduates Catalog 2022 - 2023
Freshman and Transfer applicants: In addition to the application form, all students **should** submit the following:

- Official transcripts from all schools attended—high school diploma or GED (either in progress or showing degree conferral)
- Official copies of your ACT, SAT or AP scores. ACT code: 2747; College Board code: 2248
- Note: If you were unable to take the SAT or ACT due to the pandemic, please submit your application and then contact an LIU Global Admissions counselor at global@liu.edu or 718-488-1011.

Additional documents that may be requested:

- An official copy of TOEFL iBT or IELTS, if English is not your native language. Use school code 2369.
- Official CLEP score reports or Official University Transcripts, if applicable.

Note: candidates are encouraged to submit a “complete” package with the application, fees, transcripts, and all other documentation listed at one time.

Please submit the completed application and supplemental materials to LIU Brooklyn Admissions <bkln-admissions@liu.edu> or mail them to:
LIU Brooklyn Admissions
One University Plaza
Brooklyn, NY 11201

For questions regarding the application process, contact an admissions counselor at global@liu.edu or 718-488-1011.

Stay connected and follow us around the world on Facebook, YouTube, and Tumblr.

**International Transfer Students Only**

Transfer students who were educated at institutions outside the United States must submit official transcripts in the original language with English translation/evaluation (if applicable) from an approved evaluator.

Agencies listed here provide evaluations of educational credentials and course reports for students who were educated at foreign educational institutions:

- World Education Services
  P.O. Box 745, Old Chelsea Station
  New York, NY 10113-0745
  Phone: 212-966-6311
  Fax: 212-966-6395

- Center for Educational Documentation
  P.O. Box 170116
  Boston, MA 02117
  Phone: 617-338-7171
  Fax: 617-338-7101

- International Educational Services
  AACRAO
  One Dupont Circle, NW, Suite 520
  Washington, DC 20036
  Phone: 202-296-3359
  Fax: 202-822-3940

Note: LIU Global is a program in which students are required to study outside their home countries; therefore, all LIU Global students are at some point, international students. Non-U.S. students need to be aware of visa requirements in obtaining permission to study in various countries. Not all country visas may be obtainable by students from certain countries. Non-U.S. students should discuss their interests and intentions thoroughly with their LIU Global admissions counselor.
Students also visit the Pacific island microstate of Fiji, inhabited in almost equal proportions by Native Fijians and overseas Indians whose ancestors came as indentured laborers to Fiji in the 19th Century. Based on tourism and agriculture, Fiji’s economy is subject to global market forces at the same time that it is dealing with the severe impacts of the global climate emergency, such as rising sea levels and extreme weather events.

The third site for the fall semester is Aotearoa/New Zealand. Home to powerful Maori culture, breathtaking landscapes and impressive green credentials, Aotearoa/New Zealand will allow us to not only gain a deeper understanding of the Pacific, an oft-neglected world region that is playing an increasingly important role in international conversations around oceans, climate change, cultural diversity and transnational collaboration, but further add an important comparative dimension to our strong program focus on sustainability, Indigenous peoples and settler colonialism, race and ethnicity, and social justice.

In the spring semester, students deepen their introduction to Australia by spending most of the semester in the vibrant beachside community of Byron Bay, approximately 100 miles south of Brisbane, as well as excursions to other parts of the country. Renowned for its beautiful natural environment, entrepreneurial spirit, and cultural vitality, Byron Bay boasts a dynamic mix of a strong Aboriginal heritage, a cosmopolitan counter-culture, and dynamic creative industries. Students live on the doorstep of Byron’s stunning South Pacific beaches, interact with locals and travelers from all over the world, and immerse themselves in the region’s thriving cultural and activist life. The spring semester includes a visit to Bali, a culturally autonomous Hindu island in the Islamic Indonesian archipelago. Renowned for the way in which its ancient culture continues to thrive and adapt itself to the modern world, it is an example of a people striving to manage its cultural and environmental resources in the face of globalization.

**Academic Program & Field Experiences** (Note: Travel locations are subject to change)

The fall semester program centers on environmental and economic challenges across the Asia-Pacific region, organized via the key themes of social justice, cultural diversity and sustainable livelihoods. Students receive an intensive introduction to these issues and the region, and then conduct a more focused investigation throughout the semester. Based in Byron Bay, Australia, with extended field trips elsewhere in the country as well as to Fiji and Aotearoa/New Zealand, students draw heavily on their experiential engagement with the local environment and Indigenous peoples struggling for sovereign self-determination. Apart from courses focusing on regional histories, international development, eco-philosophy, and race and ethnicity, students also take the Global Studies Seminar, which models transdisciplinary approaches to studying critical global issues and supports students in developing their academic concentration for their senior year by way of an extensive bibliographic research project.

The spring semester program deepens students’ engagement with the key issues facing both the region and the wider world by foregrounding cultural and sociopolitical challenges via a decolonizing framework. Byron Bay, Australia’s easternmost point, is the setting for studying the forces of European colonialism that shaped the modern Australian nation-state and its devastating impacts on both Aboriginal peoples and local ecosystems. Through extensive fieldwork within the wider Byron region and extended field trips to other parts of the country, students have the opportunity to learn directly from local activists, social entrepreneurs, and community leaders about alternative and decolonial responses to shared challenges. On an extended field visit to Bali, Indonesia, students deepen their entrepreneurial thinking and leadership skills through engagement with local social and environmental issues. They develop collaborative partnerships with Balinese students in search of local solutions to global issues. In terms of preparing for their senior year concentration, the
Field trips form an essential component of the Asia-Pacific Australia Program curriculum in both the fall and spring semesters. All trips are tightly integrated with the theories, concepts, and themes that students learn about in their courses. It is important to note that field trips are subject to change.

Australia: Students can expect to experience weekly field trips in and around Byron Bay to local community organizations, social enterprises and national parks. Extended trips to other major cities including Sydney, Melbourne and Brisbane may be incorporated into both the fall and spring semesters. Trips to the Great Barrier Reef and the Outback will be included in the spring semester only. Students studying in Australia in the spring will also participate in a multi-day Aboriginal bush camp experience. During this trip, students will be camping on Aboriginal land and learn directly from respected Aboriginal elders and knowledge-holders, experience the beautiful local environment, and gain a finer appreciation for Indigenous values, perspectives, and knowledge.

Indonesia: While traveling around Bali, students have the opportunity to experience different environments and aspects of Balinese culture. They also interact with and learn from a range of Balinese community leaders, students, and organizations engaged in activism, advocacy, and social and ecological entrepreneurship. Students will also have the opportunity to visit a coral reef restoration site and develop collaborative projects with local Indonesian students at Ganesha University.

Aotearoa/New Zealand: Field experiences include hiking and canoeing with local Maori guides on the Whanganui River, the first river in Aotearoa/New Zealand to acquire legal personhood.

Housing & Food

Australia: Students live together in comfortable and modern rented beach houses located in Byron Bay region. Decisions about living arrangements are made by students upon arrival, with students sharing a house and often also sharing rooms with other students. Each of the houses generally has Internet access, a television, and a washing machine. All houses have full kitchen facilities and students will be able to cook their own meals. While traveling on field trips, students can expect to stay in hostels, guesthouses, cabins and tents.

Fiji: During the Fiji trip, students will stay in hostels, apartments, and family homestays.

Aotearoa/New Zealand: In Aotearoa/New Zealand, students stay in youth hostel dorm rooms, Maori marae (meeting places/halls) and, occasionally, in tents.

Indonesia: When in Bali, students will mostly stay in local family-owned homestay accommodations. They may also stay in hotels, beach bungalows and university dormitories.

Students will receive a weekly food allowance and are encouraged to do their own shopping and cooking, either individually or communally. During field and camping trips the program may provide some meals. Students can expect to receive a reduced weekly food allowance during weeks when there are field and camping trips where meals will be covered by the program.

International Research & Internship Semester (IRIS)

Overview

After the extraordinary three-year journey around the world, LIU Global students complete their Global Studies degree in an equally extraordinary senior year. The year is composed of two parts:

1. The International Research and Internship Semester (IRIS) in the fall
2. The Capstone Semester in New York City in the spring

Through independent research carried out over these two semesters, culminating in the senior thesis project, students develop expertise on a global issue of their choice. Then through two internships, one international and one in New York City, students prepare for the next steps in their careers.

After executing a proposal developed in the spring semester of their Junior year, students carry out their International Research and Internship Semester program at one of the LIU Global IRIS sites. This semester includes (a) the first stage of their senior thesis project research, (b) a professional internship, (c) a language course if the student is in a country where English is not an official language, and (d) electives aligned with their academic interests and goals.

Location(s)

Students can develop their International Research and Internship Semester programs for LIU Global Centers in Costa Rica, Australia, New York City, or, with approval, at one of LIU Global’s partner organizations.

Academic Program & Field Experiences (Note: Travel locations are subject to change)

In the fall semester of the senior year, students enroll in the International Research and Internship Semester, a program that facilitates the development of students’ expertise on one of the pressing global challenges of our times. The IRIS experience forms the basis of the senior thesis that will be completed in the Capstone Semester.

The Advanced Research Methods Seminar and the International Research and Internship Semester Proposal. Students develop their programs for International Research and Internship Semester during their third year at LIU Global. In the Advanced Research Methods Seminar, students identify a global challenge or issue that they wish to investigate in depth. They develop a bibliography that acquaints them with the scale and scope of the challenge, and then investigate the responses to this challenge that are being developed around the world. These responses may include policy, activist, or entrepreneurial solutions carried out in government, business, NGO, or community settings. Students then select a specific location from among the LIU Global International Research and Internship Semester sites where they can engage with the issue directly. They develop a research proposal that allows them to investigate both the issue’s local manifestation as well as the local responses to it. They also identify and secure an internship from one of LIU Global’s partner organizations whose activities are relevant to the students’ research. Students then execute their International Research and Internship Semester proposal in the fall semester of their fourth year.

The International Research and Internship Semester curriculum includes three required courses. Senior Thesis I is an online course delivered to all IRIS students around the world by the Senior Thesis Coordinator. In conjunction with regular individual academic advising, it helps students to refine and execute their research design, keeping them on track with methodology, documentation, and deadlines. The online International Internship course helps students to prepare for, execute, and analyze their internship experience as well as provide career-related mentoring. This course includes an evaluation of the internship site’s impact on the student’s chosen issue or global challenge, as
well as the student’s self-reflection on his or her role as an organizational player. Students are also required to study the official language of their location.

In addition to these three required courses, students identify opportunities that help them deepen their studies on their chosen topic, related to a minor, or another area of interest.

International Internships: Students participate in a field-based or virtual internship the entire semester with their host organization in the region of the world where they are located.

International Research and Internship Semester students develop a logistics plan around their research and internship placement as part of the Junior Research Seminar. The International Internship places students at a leading organization that is tackling the global issue they want to explore, allowing them to gain experience that assists in building a future career. Students can develop their International Research and Internship Semester programs for LIU Global Centers. Students are also able to propose IRIS programs with one of LIU Global’s partner organizations.

The semester-long immersion in a cross-cultural, professional setting also helps students in building their knowledge base around a particular global issue, through learning from local individuals who are working to solve a local manifestation of that issue. Students engage with specific scenarios and circumstances, aligning global theories with local praxis. The internship builds students’ leadership skills, develops their ability to communicate cross-culturally, and helps them to effectively navigate a complex professional environment to make an impact.

Housing & Food
Housing and food are covered by the program’s room and board fee.

Housing arrangements depend on the student’s location of study and can vary from homestays, apartments, residencies at local universities, or internship housing placements. If food is not directly provided as part of the housing arrangement, students will receive a monthly food stipend.

New York City Center - Capstone Semester

Overview
In the final semester of their senior year, students complete their LIU Global education in New York, one of the world’s great global cities. The Capstone Semester provides the opportunity for students to work with faculty and mentors to complete their senior theses projects, enroll in LIU courses along with LIU Global courses, and start their transition to post-college life through an internship aligned with their academic and professional interests.

Location(s)
LIU Global capstone semester is housed in New York. Capstone students study on the campus of LIU Brooklyn, a complex located in the newly revived, downtown Brooklyn. Founded in 1926, the Brooklyn Campus is the original home of Long Island University. Its 11-acre site located in the heart of the “Brooklyn Renaissance” is convenient to all subway lines and minutes away from the Manhattan financial district. The LIU Brooklyn complex includes an impressive array of state-of-the-art facilities, including a $40 million athletics, recreation, and wellness center.

Academic Program & Field Experiences (Note: Travel locations are subject to change)
Through a combination of coursework and field experience, students engage the global in the local, completing their four years of experiential education around the globe in one of the world’s great cosmopolitan centers.

The Capstone Semester is a culminating stage in the B.A. in Global Studies. The integrated curriculum consolidates the knowledge and skills students have gained during their studies and travels around the world. The program includes several integrated elements:

- Senior Thesis Project. Students transform the research that they completed in the International Research and Internship Semester the prior fall into a senior thesis project, framing their findings in terms of the literature relevant to a major global issue. Students present their work in a poster session at a campus-wide research event; most also give oral or poster presentations at the National Conference on Undergraduate Research, which draws more than 4,000 top undergraduate researchers from the U.S. and universities around the world.
- New York City Internship. Students secure an internship at a leading organization or enterprise relevant to their academic and professional aspirations. The internship is contextualized in a course dedicated to supporting students’ professional development. New York City is unsurpassed in the variety of organizations and resources available for internship placements.
- Global Studies Capstone Seminar. Students investigate global issues as they manifest locally in New York City and, more broadly, in the United States. Through readings, guest speakers, field visits, and participant observation, students engage on issues of economic inequality, social inequality, migration, environmental sustainability, and urbanization.
- LIU Coursework. Students also may enroll in LIU Brooklyn courses related to their academic interests and, if applicable, courses approved for their minors.

The Capstone Semester accesses New York City’s many international resources through site visits integrated into the coursework. Adjusted each semester in accordance with new opportunities, students visit NGOs, financial institutions, museums, and political entities committed to international development and activism. Students also meet with local people and community groups, assuring that students experience New York’s diverse communities and distinctive social fabric.

Through an excursion to the capital of the United States of America, Washington, D.C., students gain access to the full range of governmental and non-governmental organizations that impact foreign policy, security, global finance, and activism.

Housing & Food
Current students have a number of housing options: the on-campus dormitory or off-campus student residences.

Meal plans are required for students who live on campus. New York provides a plethora of experiences for all tastes, including inexpensive restaurants, cafes, vegetarian eateries, etc.
B.A. Global Studies

What Is Global Studies?
Global Studies is the investigation of the world as an integrated and increasingly interdependent political, economic, cultural, and ecological system. The discipline equips future leaders to understand the world’s emergent challenges and with tools to contribute to the development of solutions to these challenges that transcend national and disciplinary boundaries.

Since 1965, LIU Global (along with its parent institution, Friends World College) has been a pioneer in the field. Long before anyone had thought about “global studies,” Morris Mitchell, the founder of Friends World College, asserted the need for an experiential, multidisciplinary approach to understanding the totality of humanity’s challenges calling the college’s pedagogical enterprise “world education.” Building on an over 55-year tradition in worldwide education, LIU Global students:

- Engage in a rigorous program of experiential learning across four continents that equips them to understand the world directly.
- Acquire serious academic skills and disciplinary competencies that enable them to integrate scholarly research with field experience to make sense of the impact of global integration and rapid change.
- Develop leadership and professional skills that empower them to devise, incubate, and evaluate solutions to global challenges through policy development, entrepreneurship, and advocacy.

All LIU Global students engage in required course work, field experience, integrated travel, internships and independent research as they rotate through the centers and programs around the world. During their final year, students complete a senior thesis project and engage in two internships linked to their area of specialization. Students are also able to complete optional minors by taking a sequence of disciplinary courses in International Relations, Arts & Communications, and Entrepreneurship. LIU Global organizes its curriculum around six issues that pose the greatest challenges to human well-being through coursework and experiential programming across four continents. LIU Global teaches students how these challenges take different forms in different locations, thereby developing skills in adaptation and empathy as each locale articulates the specific nature of its engagement with these issues. By addressing each issue through multiple lenses, students gain the skills in transdisciplinary analysis and problem-solving that these complex challenges demand. Four lenses make up the core of LIU Global’s analytical method.

Six Global Issues
1. Economic inequality, poverty, and access to livelihoods
2. Social inequality: gender, race, ethnicity, and human development
3. Climate change, clean energy, and environmental degradation
4. Urbanization and sustainable human settlements
5. War, conflict, and displaced peoples
6. Justice, discrimination, and human rights

Four Lenses
1. Environmental
2. Political
3. Cultural
4. Economic

Through a stair-stepped core curriculum, students gain proficiency in applying the lenses, learning how each one foregrounds certain aspects of a global issue while leaving others in the background. Comparing lenses, locations, and analyzing the interconnection of various factors that contribute to both problems and solutions, students learn how to address the complexity that makes these issues global and enduring. They move from structured classroom learning and group field trips into more intense and prolonged endeavors, including extended field study and internship experiences. The program culminates in their senior year when students engage in both an international and a domestic internship and original field research culminating in their senior thesis.

Experiential learning lies at the core of LIU Global’s education. Students connect their classroom learning to life outside it through site visits, field trips, and immersive experiences such as homestays, community engagement, and internships. Combined with the focus on global challenges, LIU Global’s experiential curriculum displays a practical orientation. As learners and guests in their host countries, students engage through dialogue, humility, and working together with those who are impacted most directly and forcefully by the global challenges that ground the curriculum. Through such experiential learning, students learn how to enter into relationships infused with respect and reciprocity so as to draw on all the expertise and will that these enormous challenges demand.

Graduation Requirements
Graduates of LIU Global receive a B.A. in Global Studies. Students must complete the following requirements:

- Minimum total of 120 credits
  - Last 30 credits from LIU
- Students must have completed at least 3 semesters abroad with LIU Global
- Minimum of 2.0 cumulative GPA
- Required Courses for Global Studies Degree, exclusive to LIU Global:
  - Passing grade in required courses of Junior Semesters

  - GNYC 318 Global Studies Seminar: Theories, Issues, Solutions
  - GNYC 340 Advanced Research Methods
  - Passing grade in required courses of International Research & Internship Semester
  - GNYC 401 Senior Thesis I
  - GNYC 403 International Internship
  - Passing grade in required courses of Capstone Semester
  - GNYC 400 Global Studies Capstone Seminar
  - GNYC 402 Senior Thesis II
  - GNYC 433 New York City Internship

B.A. Global Studies

[Program Code 29650] (2210.0)

Plan of Study

Required Courses at each Center
Students must take all required classes on the plan of study at the center where they are enrolled. (Plus, students choose electives from course offerings)

**Credit and GPA Requirements**
- Minimum Total Credits: 120
- Minimum Overall GPA: 2.0
MINORS

Students can complete one or more minors at LIU Global in Arts and Communications, International Relations, and Entrepreneurship. Each minor requires the completion of a minimum of 15 credits from the approved courses numbered over 100 as students complete their coursework at the various centers.

The student is responsible for selecting the approved courses to complete the respective minor(s), and such courses can be taken as part of the 120-credit graduation requirement.

The description of each minor and the approved courses for each minor are listed on the website at https://liu.edu/global/Academics. Note: Other equivalent classes may fulfill minor course requirements with approval.

Minor in International Relations

The LIU Global minor in International Relations orients students to the historical origins and the contemporary operations of the global political system. After completing the program, students will understand the emergence of the nation-state system through the history of Europe and its Empires. They will likewise understand how the institutions of global governance, founded in the period following the Second World War, aspire to cope effectively with humanity’s common concerns. Students also explore the stresses that contemporary events are exerting on both the system of governance and our capacity to make sense of the world system as a whole. Students supplement their study of global governance with courses in regional and national political culture. Students can complete one or more minors at LIU Global. Each minor requires the completion of a minimum of 15 credits from the approved courses numbered over 100. The courses listed below may only count toward one minor if cross-listed in another minor.

**Minor in Entrepreneurship**

The LIU Global Minor in Entrepreneurship equips students with the knowledge and skills necessary to imagine, plan and execute sustainable ventures through entrepreneurial design thinking that produces a social benefit. Through courses and integrated fieldwork around the world, students learn how entrepreneurs use business principles to channel market forces to address important social needs. Through projects or internships, students will explore how they can become positive change agents in their communities and professional lives. Students can complete one or more minors at LIU Global. Each minor requires the completion of a minimum of 15 credits from the approved courses numbered 100 or above. The courses listed below may only count toward one minor if cross-listed in another minor.

Academic Year 2022 - 2023
### Minor in Arts and Communications

The LIU Global minor in Arts and Communications equips students with the skills and knowledge fundamental for communication. Core courses orient students to the basics of strategic communication and selective contemporary media platforms. Electives broaden students’ understanding of fine art and popular genres from around the world which they can incorporate into communication strategies. Students will be able to effectively integrate aesthetic traditions and various media strategies to work effectively in the world’s increasingly integrated communication networks. Students can complete one or more minors at LIU Global. Each minor requires the completion of a minimum of 15 credits from the approved courses numbered 100 or above. The courses listed below may only count toward one minor if cross-listed in another minor.

Costa Rica Center Courses

GCOS 110 Latin American and Caribbean Studies Seminar
The Latin American and Caribbean Studies Seminar is a three-unit course required in the fall semester of the Foundation Year. The goal of this seminar is to introduce students to the history and geography of the region; to examine current social, economic, political and environmental issues affecting the region; to explore different responses to these issues; and to assess in what ways these regional issues are manifestations of larger global issues. Short field trips in Costa Rica will allow students to gain a more specific, thorough, and intimate perspective by means of greater firsthand experience with some of these issues. Among the topics covered are colonialism and imperialism; resistance and revolution; poverty and migration; development and conservation; art and popular culture; and race, class, ethnicity, and gender. In order to register for this course, the student must be an active member of the Global College Student Group.
Credits: 3
Every Fall

GCOS 113 Introduction to Project Management
This course focuses on the key concepts in project management, such as the project life-cycle, process management, roles and responsibilities of a project manager, organizational structures, program and portfolio management, and the use of various management techniques. The course facilitates a collaborative and active learning approach in a "hands-on" environment. Students "learn by doing" through the development of a project feasibility proposal based on a case study of an international organization.
In order to register for this course, the student must be an active member of the Global College Student Group.
Credits: 3
Every Fall

GCOS 115 Introduction to Social Entrepreneurship
This course introduces students to social entrepreneurship and the related set of social enterprises that aspire to channel both market forces and entrepreneurial energies to achieve sustainable social good. The course draws upon case studies that exemplify the ways in which entrepreneurial innovators from around the world are devising and executing solutions to some of the world's most intractable social problems. Social entrepreneurship will be studied in relation to a set of related socially productive enterprises such as micro-finance, social business and corporate social responsibility. The course will include both visiting speakers and fieldwork that will expose students directly to successful practitioners and organizations that support them and that they build.
Credits: 3
Every Spring

GCOS 116 Foundations of Global Studies Environment and Sustainability
Global Studies I introduces students to the interdisciplinary field of Global Studies, key elements of ecological thinking as well as some of the world's most pressing environmental issues. Students learn about important theories, concepts and approaches to the study of the biosphere, including the scientific method, systems thinking and environmental justice studying these concepts from different perspectives and worldviews. In their engagement with critical environmental challenges and the search for sustainable solutions, students also learn about the interconnectedness of ecological issues and matters of economics, politics, intersectionality, and culture. Classes combine the study of key texts, thought leaders, case studies and audiovisual materials with experiential learning opportunities in Costa Rica and neighboring countries.
In order to register for this course, the student must be an active member of the Global College Student Group.
Credits: 3
Every Fall

GCOS 118 Foundations of Global Studies Governance
Global Studies II enhances students' understanding of Global Studies by introducing them to the structures of global governance represented by the United Nations, with its emphasis on human rights, world peace and human development. Students will also review the system of economic governance, represented by key institutions such as the World Trade Organization, the International Monetary Fund and the World Bank, and critically explore the challenges associated with governance gaps and how these relate to questions of culture, economics and ecology. The course's methodology includes the study of institutional origins, thought leaders, videos, class discussions, academic research and documentation. The course is complemented by fieldwork in Costa Rica, interactions with the United Nations University for Peace (headquartered in Costa Rica), and travel to other Central American locations.
In order to register for this course, the student must be an active member of the Global College Student Group.
Credits: 3
Every Fall

GCOS 130 Road to Success: Orientation Seminar
This seminar is an interactive and informative course that is designed to provide students with the foundation necessary to thrive in LIU Global and help them develop the academic and life skills necessary for success in their first year of college and beyond. This includes introducing students to the program's theoretical foundations and experiential educational approaches, providing health and safety prevention education and promoting self-care while abroad, developing greater self-awareness in new cultural contexts, fostering the development of intercultural communication skills and competency, and identifying common challenges faced and approaches and resources available to address these. Students collaborate on a week-long group community engagement project with a local organization to have first-hand experiences related to the content and issues examined in the seminar, including the consideration of ethical issues in community engagement abroad. The instructor also meets with the students individually to assist students with academic and life planning. This course is offered only on a Pass/Fail basis.
In order to register for this course, the student must be an active member of the Global College Student Group.
Credits: 2
Every Fall

GCOS 134 Introduction to Strategic Communication
This course introduces students to the principles and processes governing strategic communication in the digital age. After an introduction to the transformative impact that the Internet has had on global communications and politics, students gain an understanding of the relative strengths of various social media platforms and specialized tools, enabling them to design effective communication strategies targeting multiple cultural and national audiences. Central to the course are: the definition of messages and audiences, concept-guided content, visual and informational design, and measurable outcomes. They will apply these concepts to existing campaigns. The final course project calls upon students to design a model campaign of their own.
In order to register for this course, the student must be an active member of the Global College Student Group.
Credits: 3
Every Spring

GCOS 146 Introduction to Qualitative Research
This course is designed to take students through the process of thinking about, designing, and carrying out their own independent qualitative research projects. Together we will explore the basic structure of research and examine the origins of different research approaches; this includes different worldviews about research such as Indigenous, feminist and decolonial approaches. Specifically in this course, students will: 1) draft research questions, 2) create a research proposal which includes finding a research gap, 3) design a consent form, 4) apply data gathering methods, 5) analyze and discuss research findings in the context of the literature, and 6) present their results in...
written and oral formats. Students will gather data for their research topic in a field setting. In order to register for this course, the student must be an active member of the Global College Student Group.

**Credits:** 3  
**Every Spring**

**GCOS 170 Writing for Impact**  
This course introduces students to the conventions of academic reading and writing. Starting with the assumption that good reading skills are vital to good writing, students learn to read carefully, developing strategies for understanding authors’ assertions, perspective, and inferences. Responding critically to the texts that they have first learned to read closely, students then build their own arguments. In support of these arguments, students learn to write essays that are well-organized, free from unexamined assumptions or biases, and follow the conventions of academic English. Students also gain the capacity to integrate texts written by others into their essays, demonstrating their awareness of debates surrounding their topic and their ability to ethically cite the thinking of others.  
In order to register for this course, the student must be an active member of the Global College Student Group.

**Credits:** 3  
**Every Fall**

**GCOS 173 Exploring Questions: Writing the Research Paper I**  
In this course students are introduced to the processes of writing college-level research papers. They learn to identify research topics, define research questions, design bibliographic search strategies, and answer their research questions in papers supported by primary and secondary sources. Their research papers demonstrate their capacity to support their own theses with well-reasoned arguments and evidence, as well as their ability to acknowledge and respond to divergent points of view.  
In order to register for this course, the student must be an active member of the Global College Student Group.

**Credits:** 3  
**Every Spring**

**Spanish Language Courses**

**Beginner, Intermediate, and Advanced Spanish**  
Beginner, Intermediate, and Advanced Spanish language courses are taught each semester in Costa Rica. Students are required to take a four-unit language course in the fall and spring semesters.

**GCOS 120 Beginner Immersive Spanish I**  
Spanish classes for beginners have the goals of forming basic oral and written communication skills, as well as introducing the students to Latin culture. To achieve these goals, the students meet four times a week and also complete daily assignments, participate in field activities, and interact daily with Spanish-speaking people.  
In order to register for this course, the student must be an active member of the Global College Student Group.

**Credits:** 4  
**Every Fall**

**GCOS 121 Beginner Immersive Spanish II**  
Spanish classes for beginners have the goals of improving basic oral and written communication skills, as well as further introducing the students to Latin culture. To achieve these goals, the students meet four times a week and also complete daily assignments, participate in field activities, and interact daily with Spanish-speaking people.  
In order to register for this course, the student must be an active member of the Global College Student Group.

**Credits:** 4  
**Every Fall**

**GCOS 220 Intermediate Immersive Spanish I**  
Spanish classes for intermediate students have the goals of improving intermediate oral and written communication skills already acquired and learning about Latin culture. To achieve these goals, students meet four times a week and also participate in field activities, complete daily assignments, and interact daily with Spanish-speaking people.  
In order to register for this course, the student must be an active member of the Global College Student Group.

**Credits:** 4  
**Every Fall**

**GCOS 221 Intermediate Immersive Spanish II**  
Spanish classes for intermediate students have the goals of further improving intermediate oral and written communication skills already acquired and learning about Latin culture. To achieve these goals, students meet four times a week and also participate in field activities, complete daily assignments, and interact daily with Spanish-speaking people.  
In order to register for this course, the student must be an active member of the Global College Student Group.

**Credits:** 4  
**Every Spring**

**GCOS 320 Advanced Immersive Spanish I**  
Spanish classes for advanced students have the goals of improving specific advanced oral and written communication skills based on individual needs at the appropriate level. The students attend class, complete weekly assignments, interact daily with Spanish-speaking people, and write about weekly readings related to topics of interest or Latin American literature.  
In order to register for this course, the student must be an active member of the Global College Student Group.

**Credits:** 3  
**Every Fall**

**GCOS 321 Advanced Immersive Spanish II**  
Spanish classes for advanced students have the goals of further improving specific advanced oral and written communication skills based on individual needs at the appropriate level. The students attend class, complete weekly assignments, interact daily with Spanish-speaking people, and write about weekly readings related to topics of interest or Latin American literature.  
In order to register for this course, the student must be an active member of the Global College Student Group.

**Every Spring**

**Europe Center Courses**

**GEUR 110 Austria in the Heart of Europe**  
This course will familiarize students with inter alia, the political, cultural and diplomatic history of the Habsburg Empire and its relevance today, modern-day Austria and place in Europe, and Vienna as an international and multiethnic city. The course will link an academic approach led by the Diplomatische Akademie in Vienna with real-time experiences in Vienna and development of relevant soft skills. Students will gain an overview of the history, culture and politics of their host country of Austria in an international context through in-class discussions, meetings with experienced practitioners and excursions to relevant historic sites. Reading and audio-visual study material for further immersion into the topics will be provided. The course will also include a mid-term and a final exam and/or presentations.  
In order to register for this course, the student must be an active member of the Global College Student Group.

**Credits:** 3  
**Every Fall**

**GEUR 113 Introduction to Project Management**  
This course focuses on the key concepts in project management, such as the project life-cycle, process management, roles and responsibilities of a project manager, organizational structures, program and portfolio management, and the use of various management techniques. The course facilitates a collaborative and active learning approach in a “hands-on” environment. Students “learn by doing” through the development of a project feasibility proposal based on a case study of an international organization.  
In order to register for this course, the student must be an active member of the Global College Student Group.

**Credits:** 3  
**Every Fall**

**GEUR 120 Beginning German**  
In this course, students develop basic oral and written communication skills in German at the...
AI/1 level of the Common European Framework of Reference for Languages (CEFR). The course objectives include: reading and listening comprehension of simple texts; giving basic personal information; establishing contacts with others; taking part in basic conversation; acquiring fundamental vocabulary and learning basic grammar structures that enable elementary spoken and written communication in everyday situations while living in Austria. The curriculum includes conversation, reading, writing exercises, listening comprehension, grammar, pronunciation, and vocabulary. This course is Pass/Fail and includes 45 contact hours.

In order to register for this course, the student must be an active member of the Global College Student Group.

Credits: 3
Every Fall

GEUR 125 Intensive Beginning German
In this course, students develop basic oral and written communication skills in German at the AI/1 level of the Common European Framework of Reference for Languages (CEFR). The course objectives include: reading and listening comprehension of simple texts; giving basic personal information; establishing contacts with others; taking part in basic conversation; acquiring fundamental vocabulary and learning basic grammar structures that enable elementary spoken and written communication in everyday situations while living in Austria. The curriculum includes conversation, reading, writing exercises, listening comprehension, grammar, pronunciation, and vocabulary. This course is Pass/Fail and includes 60 contact hours.

In order to register for this course, the student must be an active member of the Global College Student Group.

Credits: 4
Every Fall

GEUR 206 Conversational Italian and Culture
The first part of this course introduces students to the basics of the Italian language. It orientes them to the basics in Italian grammar, syntax, pronunciation and vocabulary. It emphasizes specifically students’ capacity to communicate orally. The course also introduces key topics in contemporary Italian culture and society after four weeks of language instruction. Topics included are politics, religion, food and cultural production, stereotypes, TV, film, and other media.

In order to register for this course, the student must be an active member of the Global College Student Group.

Credits: 4
Every Spring

GEUR 210 Video and Digital Reporting
An exploration of the creative production of time-based art using digital video and audio. The course places a strong emphasis on conceptual development, experimentation, composition, sequencing of ideas, and narrative as well as non-narrative structures. Students will learn basic skills in preproduction planning, camera work, non-linear (digital) editing, and digitizing and editing sound recordings. Students will work individually and in groups to direct, produce, and edit short documentary style videos and will present their work to the class discussing both the technical and aesthetic points relating to their projects.

In order to register for this course, the student must be an active member of the Global College Student Group.

Credits: 3
Every Spring

GEUR 220 Foundations of Global Studies Culture
This course connects the semester curriculum to the global issues that constitute LIU Global’s core curriculum in Global Studies. Focusing on the cultural lens, the course will treat a number of global issues as they are addressed in other courses and manifest in the local environment, particularly migration and economic and social inequality. Comparing and contrasting the cultural lens with environmental, governance, and economic lenses, students will learn how to approach global issues from multiple angles and thereby gain a holistic perspective. To complement the classroom education, this course will arrange extensive experiential engagement with sites, institutions, and communities in the surrounding areas.

Credits: 3
Every Spring

GEUR 221 Foundations of Global Studies Economics
Global Studies IV completes the foundational understanding of the field of Global Studies by introducing students to the central problem of economic societies - scarcity, choice and the allocation of resources - and critically reviewing the foundations of macroeconomics. Students also study the models, terminology and institutions used to understand and manage the globalization of the world economy. Taking into account the domains of politics, culture and ecology, students will examine the policies used to steer these economic forces so that they impact human development and the more-than-human world as positively as possible. Students will also examine alternative approaches to solving economic problems through circular economies, systems thinking and innovative approaches to design. The course’s methodology includes the study of foundational economics, emerging thought leaders, videos, class discussions, academic research and documentation. The course is complemented by fieldwork in the program location.

Credits: 3
Every Spring

GEUR 240 International Careers and Leadership: An Introduction
This experiential course will equip you with critical skills and perspectives needed to more confidently pursue potential careers—both international and domestic—and successfully enter those professional environments. Some of these skills include written and verbal communication for professional environments; positioning yourself with strong cover letter and resume writing; searching for jobs and internships; and building and maintaining a professional network. We will begin the course by exploring your personal and professional strengths and values, and then explore your current interests, connecting them to potential career pathways, including the skills and experience needed for both an entry level position and a future career. By the end of the course, you will have polished your resume and LinkedIn profile, completed a Career Planning process (and presentation), and applied for a job, scholarship, or internship. Together we will also explore the balance between "making a living," "making a difference," and "making a life you love," engaging you in the ongoing inquiry of how to build a meaningful life and career.

Credits: 2
Every Spring

GEUR 250 Introduction to Modern Diplomacy
Diplomacy is the currency of international relations. The skills, traditions, and professionalism of diplomacy are essential for sovereign states to work with each other constructively. Diplomatic modes of interaction are also increasingly important for non-state actors, such as transnational corporations, civil society organizations, and even individuals in their pursuits of navigating an increasingly globalized world.

This course is tailored to the interests of students of Long Island University. It will take place at the Diplomatische Akademie in Vienna. It addresses relevant issues of modern bilateral as well as multilateral diplomacy and international affairs and will familiarise students with, inter alia, the art of diplomacy, the European Union, the United Nations as well as the international legal system. It will also include the history of diplomacy. The programme comprises a broad mix of academic topics, critical discussion and the training of soft and practical skills. In interactive exercises, students will sharpen their analytical capabilities, leadership capacities and negotiation skills. They will be guided by high-ranking international experts from various fields, such as diplomacy, international organisations and academia.

In order to register for this course, the student must be an active member of the Global College Student Group.

Credits: 3
Every Fall

GEUR 270 Approaching Answers: Research, Writing and Fieldwork
This inquiry-based online writing course is designed
to build on students' research, research design, and research writing skills. For it, students choose and investigate a local example of a global issue (i.e., economic inequality; social inequality; climate change, clean energy, and environmental degradation; urbanization and sustainable human settlements; war, conflict, and displaced peoples' or justice, discrimination, and human rights). They frame research questions, and, in pursuit of answers to those questions, conduct bibliographic and qualitative research. More specifically, students learn and use advanced bibliographic search methods, participate in community-engagement field experiences and other original research, and keep field and photo journals; in addition, they may interview key actors and transcribe those interviews. Students share their findings and analyses via a series of staged assignments that culminate in a 12-page research paper and oral presentation of synthesized research. Instructional time is divided between the classroom and experiential learning. The 50-hours of fieldwork are an integral part of the course.

In order to register for this course, the student must be an active member of the Global College Student Group.

Credits: 3
Every Fall

GEUR 306 Introduction to Web Design
This course will provide students the opportunity to explore the World Wide Web as a creative medium of visual communication. Students will learn design and technical skills using various new media methods and technologies in a thorough examination of current web publishing standards, concepts, and development tools. Topics covered in this course range from web design and development to include Internet-based practices, screen-based publication formats, social media and digital storytelling. Creative and investigative approaches to network driven concepts are encouraged.

Asia-Pacific Australia Center Courses

GAPC 300 History, Culture & Politics in the Indo-Pacific
This course introduces students to the social and political processes that shape economic development in the Indo-Pacific region and the impact of the various development models deployed on the region’s ecosystems. Characterized by great cultural diversity, economic inequality and rapid social change, the region’s nation-states, communities and cultures struggle to pursue livelihoods for all without destroying the ecosystems they inhabit. This course orient students to the historical, cultural and sociopolitical contexts of the nation-states they visit as well as the drivers and frameworks supporting regional economic and political cooperation. In particular, students will learn how diverse communities collaborate to pursue shared goals of sustainable development, social justice and peaceful coexistence. The course offers students opportunities to learn directly from various local communities, international organizations and experts in the field through an integrated learning experience based on lectures, seminars and fieldwork.

Credits: 3
Every Fall

GAPC 301 Multimedia Storytelling for an Interconnected World
This course introduces students to the practical and creative skills required to develop quality multimedia productions about local manifestations of key global issues. Students develop the full range of production and postproduction skills: concept generation, story research, script writing, interviewing, technical production skills, editing, software and broadcasting/publishing. This practical learning is linked to theories concerning ethics and diversity in multimedia journalism. Students are encouraged to think creatively and critically about the stories they consume and produce, and the power of selected digital media to contribute to a more just and sustainable present and future. Upon completion, students will be able to produce a high quality broadcast-ready media piece.

Credits: 3
Every Spring

GAPC 302 Anti-Racism, Indigenous Rights & Allyship
This course helps students develop comparative understandings as well as theoretical and critical vocabularies of race and racism, with a particular focus on the lived realities of Indigenous peoples. Drawing on relevant field experiences in Australia and other locations, students examine how contemporary understandings of identity and power are shaped by the discursive and material practices of coloniality. The course utilizes critical self-reflection to analyze how whiteness is performed and enacted in everyday life as well as to understand how it is embedded in institutions and systems of power, privilege and oppression. Finally, students are supported to develop decolonial skills and strategies to become change agents, allies and activists.

GAPC 320 The UN Sustainable Development Goals in Theory and Practice
This course is an introduction to the theory and practice of sustainable international development, a field of endeavor undertaken by governments, non-
governmental organizations (NGOs), and international agencies that aspire to alleviate human poverty and inequality. The course explores the definitions, institutional frameworks and goal setting that shape development practice at local, national and international levels. Students are oriented to the discourses of poverty, inequality, human development, natural resource governance, and sustainable development that have driven policy and planning. Students are also introduced to the ways in which this discourse is now enriched and contested from a number of perspectives: those of indigenous communities and local knowledge formations of various kinds, as well as alternative formulations of well-being and social justice. A robust experiential dimension of the course will link these practices and controversies to local case studies experienced directly through field study.

GAPC 330 Activism, Social Movements & Political Change in Australasia
This transdisciplinary seminar introduces students to key socio-political issues in contemporary Australian societies and supports them in developing the necessary analytical, conceptual and organizational tools to better understand and facilitate social change. Through readings, films, excursions, guest speakers, and class discussions, students will consider the major social, political, and cultural themes of contemporary society and how they have been shaped by past thinking, policies, and practices. Of particular importance will be the impact of colonialism, issues of social justice and the question of human rights for Indigenous peoples, for those seeking asylum, and for other marginalized groups. Students will explore the impact and application of important theoretical concerns and relevant contemporary debates in Cultural Studies, Postcolonial Studies, and Indigenous Studies around questions of race, gender, class, disability, and sexuality in order to enrich their understanding of local, national, and global issues. To this end, comparisons with other settler colonial societies will be included in course discussions, enabling students to consider diverse identities, cultures, and histories in light of the critiques presented in this course. Finally, through case studies of successful social movements, students will develop their own analysis and application of key principles of effective advocacy, movement building, and transformative social change.

In order to register for this course, the student must be an active member of the Global College Student Group.

Every Fall

GAPC 333 First Nations and Cultural Survival
The course introduces students to the diversity and complexity of Indigenous Australian Peoples, philosophy and cultures. Through quality print and audio-visual materials, guest lectures, field trips and class discussions students will be introduced to a diverse and challenging range of Indigenous perspectives, cultural values and practices. Students will consider Indigenous knowledge as valid contemporary ways of knowing, relevant to informing a sustainable and socially just global future. Through an investigation of the interactions between Indigenous and non-Indigenous Australian society and comparative analysis of Balinese society, students will be encouraged to develop a critical awareness of diverse dominant processes of Indigenous exploitation as a result of colonization and the imperative of human rights and social justice for Indigenous peoples in Australia and globally.

In order to register for this course, the student must be an active member of the Global College Student Group.

GAPC 335 Entrepreneurship, Sustainability & Cross-Cultural Collaboration
This course engages students with the challenge of ethically managing the human-coastal interface in the age of the anthropocene. Using an experiential case study-based approach that combines site visits with guest speakers, key readings, documentaries, class discussions and workshops, students are introduced to diverse local ecosystems and the pressures they face from various practices associated with unsustainable economic models. While the impact of climate change plays a central role, other issues such as plastic pollution, mangrove destruction, overfishing and agricultural runoff are also considered in their impacts on marine ecosystems. While developing an understanding of these threats, students will also study models of successful marine conservation initiatives, including the importance of incorporating Indigenous knowledge in protecting habitats and sustainably managing marine resources. Throughout the course, students develop the tools, vision and capacity to campaign and work collaboratively with local communities to achieve positive outcomes for both people and planet.

GAPC 337 Global Studies Seminar Theories, Issues, Solutions
The objective of Global Studies V is to orient students to the theories of globalization and use them to shed light on the major issues faced collectively by humanity. Students will acquire a basic understanding of the way major thinkers in economics, political science, environmental science and cultural studies articulate the acute issues characteristic of the Global Age. Students will also learn how these same disciplinary perspectives may contribute to holistic policy, entrepreneurial and advocacy solutions. Students will complete a project focused on a global issue that is of specific interest to them, developing their own interdisciplinary bibliography and a literature review that prepares them for their Independent Research and Internship Semester (IRIS) and their Senior Thesis. The course's review of global issues will be tied to field experiences in the center or program in which the course is delivered.

In order to register for this course, the student must be an active member of the Global College Student Group.

GAPC 339 Innovative Encounters with Nature and Knowledge
Based on an experiential learning framework consisting of intensive reading, field trips and structured reflection, this innovative outdoor course allows students to directly experience and relate to Australia’s unique environment as well as challenge their own understanding of concepts such as nature, culture and wilderness. Through engaging with cutting-edge thinking in the ecological humanities and via a range of outdoor activities such as camping in national parks, swimming under waterfalls and hiking in rainforests, students will gain a first-hand understanding of diverse ecosystems, different ways of knowing and relating to the land, and the relationships between natural and cultural landscapes, particularly by spending time with Indigenous peoples on their lands. During their extended visit to Fiji and New Zealand, students will also be able to compare and contrast their experiences in Australia with the ecosystems, philosophies and relationships to place they encounter in the geographically proximate, but culturally distinct oceanic societies.

In order to register for this course, the student must be an active member of the Global College Student Group.

**International Research & Internship Semester (IRIS)**

**IRIS**

**GNYC 401 Senior Thesis I**
This online course, the first in the year-long Senior Thesis sequence, facilitates the finalization of students’ senior thesis research proposals, the undertaking of their field research, and the presentation of their initial findings. The presentation focuses on the data gathered at the site of the undergraduate research, a site anchored by an internship or service-learning project. Through the course, students master senior-level proficiency in research design and execution, and further develop their capacity to write clear, well-reasoned, and effective academic English. In support of these projects, the course specifically develops field-note writing skills and documentation practices. At the semester’s end, students present the initial findings of their field research and lay the foundations for writing their senior thesis in the subsequent semester.

**NYC 409 Classical Theories and Contemporary Issues in International Relations**
This course critically examines classical theories and frameworks for understanding the international political system. It addresses specifically the ways in which the end of the Cold War, the fall of the Soviet Union, the legacy of colonialism and the rise of non-state actors have challenged the traditional accounts of power and global politics. The course will begin by introducing students to the classical debates in International Relations: the basic units of analysis, the utility and legitimacy of the use of force, the balance of power, the nature of threats to peace and stability and the role of international institutions, etc. It then questions the utility of these theories for making sense of contemporary issues such as ethno/religious conflict, genocide (and other mass atrocities), the origins and consequences of terrorism, threats to global health, and the persistence of poverty and global inequality.
In order to register for this course, the student must be an active member of the Global College Student Group.

Every Spring

**New York City Center Courses (Capstone)**

**NYC 400 Global Studies Capstone Seminar**
Global Studies VI investigates global issues as they manifest locally in New York City and, more broadly, in the United States. Through readings, guest speakers, field visits, and participant observation, students will engage in issues of economic inequality, social inequality, justice, migration, environmental sustainability, and urbanization. Student-facilitated class discussions bring the research and learning that students have gained around the world into conversation with these global issues in New York. Students articulate their engagement with these and other issues in an educational autobiography that reviews their academic career at Global. With the field components of the course that demand transportation and breaks, the duration of the weekly class extends beyond the traditional three hours and may vary from week to week.
In order to register for this course, the student must be an active member of the Global College Student Group.

Every Spring

**NYC 402 Senior Thesis II**
This course, the second in the Senior Thesis sequence, supports the writing of the 30-page Capstone Senior Thesis or other Senior Project. The Senior Thesis is a reconceptualization of the IRIS semester's analytical research report-it is an expansion and revision of or re-engagement with that paper, a widening of the lens to include a global perspective and critical engagement with and articulation of a specific transdisciplinary approach-while the Senior Project may take the form of a composite thesis or a pre-approved senior year media project (example,a documentary film or podcast) supported by a critical essay that positions the project in a global context. In addition to honing academic writing skills, students deepen their familiarity with the appropriate literature, creatively engage their sources, evaluate and synthesize ideas, develop persuasive arguments, and heighten their awareness of and ability to potentially enter into dialogue with their intended audiences. Finally, students present and share their senior research at events including LIU's spring Discovery Day poster-presentation event.
In order to register for this course, the student must be an active member of the Global College Student Group.

LIU PHARMACY

LIU Pharmacy (The Arnold & Marie Schwartz College of Pharmacy and Health Sciences) offers the Bachelor of Professional Studies (BPS) in Pharmaceutical Sciences as well as an entry-level, Doctor of Pharmacy (Pharm.D.) degree. Master of Science degrees are awarded in Pharmaceutics: Industrial Pharmacy, Pharmaceutics: Cosmetic Science, Drug Regulatory Affairs, Pharmacy Administration and Pharmacology/Toxicology. For the Doctor of Philosophy in Pharmaceutical Sciences (Ph.D.) degree, there are two tracks to choose from Pharmaceutics, and Pharmacology/Toxicology.

Detailed information on the pharmacy programs is provided in the LIU Pharmacy Catalog.

Pharmacy

The college offers a four-year professional curriculum leading to the degree of Doctor of Pharmacy. Students may enter the professional program in Pharmacy in the fall only.

The preprofessional phase of the program, offered through Richard L. Conolly College, consists of a minimum of four semesters of coursework in the humanities and basic sciences. The opportunity to complete the pre-professional phase of the program in less than four semesters is dependent on any incoming transfer credits. The professional segment of the program consists of six semesters of didactic coursework, 320 hours of extramural introductory pharmacy practice experiences in the third and fourth years and in the summers between the third and fourth year and the fourth and fifth year, and an extramural sixth year of 1456 hours of advanced pharmacy practice experiences that students complete in healthcare institutions, community, and other pharmacy practice settings. It provides the specialized education necessary to develop expertise in the ever-broadening field of pharmacy and prepares the student for professional licensure examinations.

LIU’s Doctor of Pharmacy program is accredited by the Accreditation Council for Pharmacy Education, 135 South LaSalle Street, Suite 4100, Chicago, IL 60603, 312/664-3575; FAX 312/664-4652, web site www.acpe-accredit.org.

A complete description of the pharmacy curriculum is contained in the LIU Pharmacy bulletin. Students seeking information about admissions requirements should contact the Office of Admissions: 718-488-1011.

Degree Requirements

Upon recommendation of the Faculty, and approval by the Board of Trustees, the degree of Doctor of Pharmacy is conferred by Long Island University upon a candidate who has completed the required curriculum, containing a minimum of 217-218 academic credits (depending upon admission status). Matriculants must maintain a cumulative and a professional phase GPA of at least 2.00 to remain in good academic standing.

All students of LIU Brooklyn must satisfy the requirements of the Writing Across the Curriculum program (WAC). To fulfill the minimum WAC requirements, students must complete, in addition to English 16, at least one writing-intensive course in their discipline. The writing-intensive course for the Doctor of Pharmacy program is PHM 420 Principles of Health Behavior and Patient-provider Communication.

Preprofessional Studies:

Four Semesters

Leadership Team

Kimberly R. Cline
President

Randy Burd
Senior Vice President for Academic Affairs

George Baroudi
Vice President for Information Technology

Michael Berthel
Vice President for Student Affairs & Enrollment Management

Mohammed Cherkaoui
Vice President of Academic Programs and Research

Elizabeth Cheung-Gaffney
University Counsel

Christopher Fevola
Vice President and Chief Financial Officer

Roy Fergus
Vice President for Facilities

Kerry Kruckel
Vice President for University Advancement

Joseph L. Schaefer
Chief Operating Officer
FACULTY

Nicholas Agrait
Associate Professor of History
B.A., Yale University; M.A., Ph.D., Fordham University

Ezihe Ahanonu
Assistant Professor of Nursing
B.S., University of Calabar (Nigeria); M.P.H., University of Ibadan (Nigeria); Ph.D., University of the Western, Cape Town (South Africa)

Syed Ali
Professor of Sociology/Anthropology
B.A., Binghamton, SUNY; M.A., Ph.D., University of Virginia

Amy Alpern
Assistant Professor of Nursing
B.S., University of Wisconsin, Madison; M.S., Massachusetts General Hospital Institute of Health Professions; D.N.P., Downstate Health Sciences University, SUNY

Naoual (Nawel) Amrouche
Associate Professor of Marketing
B.B.A., IHEC, Carthage, Tunisia; M.S., Ph.D., HEC (Montreal, Canada)

Scott Angarola
Assistant Professor of Sports Management
Ph.D., New York University; M.S., University of Central Florida; B.S., Elementary Education

Zaina Arafat
Assistant Professor of Journalism
B.A., University of Virginia; M.A., Columbia University; M.F.A., University of Iowa

Sarah Arciaga
Assistant Professor of Nursing
B.S.N., Ph.D. Philippine Christian University; M.S., Long Island University

Robin Akselrud
Assistant Professor of Occupational Therapy
B.S./M.S., Touro College; O.T.D., Quinnipiac College; Registered Occupational Therapist

Miriam Baigorri
Associate Professor of Communication Sciences and Disorders
B.S., State University of New York at Geneseo; M.S. and Ph.D., Teachers College, Columbia University

Larry Banks
Assistant Professor of Media Arts
B.A., Rutgers University; M.F.A., LIU Post

Jessica Baquero
Assistant Professor of Communication Sciences and Disorders
B.S., Fordham University; M.S., Teachers College, Columbia University

Kamila Barnes
Assistant Professor of Nursing
B.S., SUNY Binghamton; D.N.P., University of Rochester

Sarah Belizaire
Assistant Professor of Nursing
A.D.N., Eastwick College; B.S.N., Felician University; M.S.N., D.N.P., Rutgers University

Azzedine Bensalem
Professor of Chemistry and Biochemistry
B.S., École Supérieure de Mécanique; M.S., Ph.D., Université de Nantes

Kenza E. Benzeroual
Associate Professor of Pharmacology
B.S., Paul Sabatier University (France); M.S., Toulouse Polytechnic Institute (France); Ph.D., Montreal University (Canada)

Evangelina Berrios-Colon
Associate Professor of Pharmacy Practice
Pharm.D., Arnold and Marie Schwartz College of Pharmacy and Health Sciences, LIU Pharmacy; M.S., SUNY Downstate

Mrinal K. Bhattacharjee
Associate Professor of Chemistry and Biochemistry
B.S., M.S., The Indian Institute of Technology (Kharagpur, India); Ph.D., Ohio State University

Soenne Biermann
Director, Asia-Pacific Australia Center
B.A., Southern Cross University (SCU); Graduate Certificate in Higher Education; Ph.D. (ABD), Southern Cross University (SCU)

Donald Allport Bird
Professor of Journalism and Communication Studies
A.B., Rutgers University; M.A., Ph.D., Indiana University

Joseph J. Bova
Associate Professor of Pharmaceutical Sciences
B.S., St. John's University; M.S., LIU Pharmacy

Lisa Bradley
Assistant Professor
B.S., University of Kansas; M.S.W., Washburn University; D.P.T., Utica College; Licensed Physical Therapist

Rainer Braun
Dean, Global College
B.A., University of Bremen (Germany); M.A., Ph.D., Free University of Berlin (Germany)

Cindy Broholm
Assistant Professor of Nursing
B.S.N., University of Massachusetts; M.S., M.P.H., Columbia University; D.N.P., Case Western University

Marquis A. Chandler
Assistant Professor of Social Work
B.A., Centenary University; M.S.W., Morgan State University; Ph.D., Morgan State University

Cory Chen
B.S., Duke University; M.A., Ph.D., University of North Carolina, Chapel Hill

Denise Chung
Professor of Biology
B.A., M.S., Ph.D., New York University

Ping-Tsai Chung
Professor of Computer Science
Diploma, National Taiwan University of Technology (Taiwan); M.S., Stevens Institute of Technology; Ph.D., Polytechnic University of New York

Francesco Ciummo
Assistant Professor of Pharmacy Practice
Pharm.D., Rutgers, The State University of New Jersey

Caroline Clauss-Ehlers
Professor of Psychology
A.B., Oberlin College; M.A., Ed.M, M.Phil., Ph.D., Teachers College, Columbia University

Mechelle Collins
Assistant Professor of Occupational Therapy
BS/MS., Dominican College, AAS, A.A. S. LaGuardia Community College; OTD, Mary Baldwin University; Registered Occupational Therapist

Rebecca Cope
Assistant Professor of Pharmacy Practice
Pharm.D., Albany College of Pharmacy and Health Sciences

Margaret Cuonzo
