MONDAY – ON CAMPUS

59231. FRANKLIN ROOSEVELT: LET US MOVE FORWARD
Richard Walsh
FDR was the nation’s longest serving president from 1933 to 1945, winning the U.S. election an unprecedented four times. The only physically challenged person ever to hold the country’s highest office, Roosevelt would lead the U.S. through two of its worst periods, the Great Depression of the 1930s and World War II in the 1940s. Join the discussion on one of our great leaders, his life and legacy.

10 a.m. - 12 noon 1 session
January 11 Fee: $32

59232. THE VIETNAM WAR 1965 TO 1975: THE U.S. TAKES OVER
Richard Walsh
For 20 years after World War II ended in 1945, the U.S. supported the anti-Communist movement in the far-off nation of Vietnam, first through the French attempt to retain colonial control, and then by propping up a corrupt government in Saigon with money and military advisors. That changed in 1965 with the arrival of U.S. combat troops, and would not end until the departure of the last American units in 1975. Join us for an interesting look on what drew the U.S. deeper into the conflict and how things went terribly wrong over the next decade.

10 a.m. - 12 noon 1 session
March 8 Fee: $32

59233. ART OF THE NORTHERN RENAISSANCE
Marc Kopman
The term “Renaissance Art” is most commonly associated with Italian art of the 15th to 16th centuries. However, artists working in Northern Europe were also experiencing a stylistic transformation. There was a greater interest in the natural world, in depicting realistic pictorial space and the development of new subject matter such as portraiture. This series of six lectures will highlight some of the greatest artists of the period. The course ranges from Jan Van Eyck, whose innovative use of oil paint would have a lasting impact on future artists, to Albrecht Dürer, the first artist to successfully blend Italian classicism with Northern realism.

59234. NEW YORK IN FILM - THE 1970s
Keith Crocker

For fans of the neon washed grit of what was New York during the era of urban decay in the 1970s, two motion pictures will be presented that capture the era as it existed. Join film historian Keith Crocker on week one as he takes you on a historic overview of the Big Apple and its cinematic representation in The Taking of Pelham One Two Three (1974), a gritty descent into the subway system of the Manhattan of yesteryear. An all-star cast, including Walter Matthau and Robert Shaw, make this film a real nail-biter. The following week, the action is taken above ground as we explore a bank robbery committed by an inept criminal (Al Pacino) which results in grand theatrics in Dog Day Afternoon (1975).

1 - 3:30 p.m.  
March 29 - April 5  
2 sessions  
Fee: $60

59235. FILM NOIR IN THE 50S
Keith Crocker

In a follow up to the popular program offered last year, Keith Crocker will screen two more examples of film noir at its finest. We transition from the mystery element so well defined in the 1940s into the rougher and meaner era of the 1950s as film noir takes its darkest turns. In week one, we view The Big Heat (1953) in which a detective investigates a suicide that turns out to be far more than what it seems. Glenn Ford, Gloria Grahame and Lee Marvin star while Fritz Lang directs. The following week, the horrors of the nuclear age surface in Kiss Me Deadly (1955). Ralph Meeker, Albert Dekker and a very young Cloris Leachman join director Robert Aldrich for one of the most unique film noirs ever put before the motion picture camera.

The generals who led the nation to victory, Grant, Sherman, Sheridan, and Thomas all started there and fought the titanic battles, Shiloh, Vicksburg, Chickamauga, Chattanooga, and Atlanta, that turned the tide in the Union’s favor.

59244. WINTER DREAMS: BEAUTIFUL MANSIONS OF LONG ISLAND  
*Monica Randall*

Take a stroll back in history to wintertime on Long Island in the late 1800s and early 1900s. Wealthy estate owners celebrated the cold, crisp air with lavish winter carnivals, ice skating parties on frozen crystal lakes, ice boating regattas and horse drawn sleighs. No expense was spared building ice palaces that were often the crowning glory of the season's spectacular events. These transparent feats of architecture sometimes reached heights of three hundred feet. Included in the program are some of Long Island's most beautiful mansions garlanded in snow.

That is the polarizing issue raised by The New York Times through its 1619 Project, which could be part of the curriculum of a school near you. We will explore how this controversial attempt to rewrite American history in our schools could lead to more rigorous studies of civics and history.

Our presidential elections have made great material for Broadway plays, best-selling books, award-winning movies, and popular TV programs. But what is the real story behind some the most unusual ones in our history? We will examine why twice during our history, the House of Representatives had to select the new president and how it took a Supreme Court decision to help eventually declare the winner of the election. We will analyze how five times in presidential history, the winning candidate did not win the popular vote and the story behind a winning candidate who died just one month into office. Finally, in our re-enactment, you will hear from some of the presidential candidates themselves as they answer questions about the events surrounding their unusual election.

Howard Ehrlich and Harvey Sackowitz

They were so completely different not only in appearance but in their politics. Stephen A. Douglas was a short, stocky leader of the Democrats, and Abraham Lincoln was a tall, lanky, spokesman of the new Republican Party. When they debated for Senate across Illinois during the Fall of 1858, the entire country eagerly listened to their words. Their opposing views on slavery, states rights and our Constitution became clear to everyone. But who really won? You might be surprised to learn.

The course will cover the creation of light, a beguiling serpent, Adam and Eve/Cain and Abel, and man’s changing view of God from love to fear. Through it all, man set his own path to find his role in the world. The course is not to proselytize, but to study and discuss what The Book of Genesis itself says and is designed for people of all faiths.

From appeasement with other European Nations to holding the sole remaining flame of democracy in Europe, a stunning story of principled fortitude and commitment emerges. Facing both an ominous communist threat and the continued aggression of the Nazis, Britain stood alone. She had to reverse policies toward both threats to encounter each. Attention will include the role of communism as a cause of the War.

During this program we will have an opportunity to watch videos of live concert performances of a number of these pieces and learn a bit about their origin and the composers who created them.

Prior restraint held center stage with Near v. Minnesota (1931) and Landmark Communications v. Virginia (1978). Nullification was argued before the Court in Cooper v. Aaron (1958) and Ableman v. 59279. THINKING ABOUT THE NEXT FOUR YEARS  
Dr. David Sprintzen  

Having completed one of the most consequential elections in United States history, there can be no doubt that the nation is entering into new unchartered waters, buffeted by the continuing turmoil of a nation deeply divided practically down the middle. What are we to make of that election? What can we expect, and hope for, from the competing sides of this divided nation? And what, if anything, can we do about it? We will wrestle with these and related questions.

59280. TAKING A CLOSER LOOK (Part 3): DEGAS’S LITTLE DANCER AGED FOURTEEN  
Dr. Carol Tabler  

When she was exhibited in the 6th Impressionist exhibition of 1881, Degas’s teenage ballerina was perceived as controversial, even shockingly ugly, and unlike any piece of sculpture ever seen before. Now regarded as a masterpiece, she has gained virtually iconic status in the public’s imagination. Let us roll back the clock, re-imagine the act of creation and search for her original meaning. How do Degas’s works about the subject of the ballet, both painted and drawn, interrelate with her? What artistic motivation could have inspired him to make his ballerina come alive in three dimensions and physically enter our world in such a compelling way?

59282. THE DEPICTION OF DREAMS AND THE SUBCONSCIOUS IN FILM
Greg Blank

The idea of a connection between film and dreams seems to be grounded in Sigmund Freud's theories, in which film serves as the landscape for dramatizing, in a visual language, the subconscious. In a journey through film history from the early silent era of experimenting with the medium to the present day, we will examine the transcendence of the art of film as a way to mine the depths of the human mind. Visionary directors include: Buster Keaton, Stan Brakhage, Michelangelo Antonioni, Krzysztof Kieslowski, Federico Fellini, Ingmar Berman, Jean Cocteau, Maya Deren, David Lynch, Darren Aronofsky, and Christopher Nolan.

59283. THE DEPICTION OF HEAVEN, HELL, AND THE AFTERLIFE IN FILM
Greg Blank

Most world religions have their own ideas about what Heaven, Hell, and the Afterlife look like. Filmmakers throughout history have thrown in their own ideas, too. We will look at the great examples of the afterlife in the history of cinema, including horror films that imaginatively explore the ghost realms like Beetlejuice (1988), The Sixth Sense (1999), and Ghost (1990), to movies that take the viewer to the afterlife itself, like Defending Your Life (1991), What Dreams May Come (1998), It's A Wonderful Life (1946), Orphée (1950), A Matter of Life and Death (1946), and Enter The Void (2009), among many others.

Dr. John T. Tanacredi

Horseshoe crabs are significant conservation organisms as their protein eggs each year support millions of migrating birds from as far away as South America to arctic breeding sites. There are only four species of Horseshoe Crabs on earth and they are all significantly endangered. Limulus has been Red listed by IUCN as threatened and their most recent use as exotic food may finally push these animals over the brink to extinction.

59287. FAMOUS TRIALS – SPRING 2021  
*Marc Greenberg*

The public likes to obsess on scandalous people and their legal trials. Jon Stewart relates religion to negative outcomes by exclaiming, “Religion. It has given people hope in a world torn apart by religion.” How does The Trial of Socrates (399 BCE) and the Trial of Galileo (1633) confirm or deny Stewart’s statement? Should we take heed from the admonition, “Don’t pick up hitchhikers,” vis-à-vis the trials of Ted Bundy and Aileen Wournos (1992). Finally, the Godfather Don Vito Corleone said, “I’m gonna make him an offer he can’t refuse,” which was adopted in two trials: the John Gotti trial (1992) and the Whitey Bulger trial (2013).

China, like every country, has its own unique sense of national destiny. Russian claims to be the Third Rome, the USA cherishes its Manifest Destiny, Great Britain bears the weight of the White Man's Burden, and France is dedicated to its Mission Civilisatrice. China has for centuries considered itself as the Middle Kingdom, in the center of the earth radiating peace, culture, prosperity, and happiness to humanity. The great sage, Confucius, summarized this belief in writings, teachings, rituals, and traditions that dominate and inspire China until today. Through Emperors, Dictators, and today Communist Party Commissars, Confucianism remains the national faith of the Chinese.

More recently, Robert Moses redesigned New York City for the 20th century, the Brazilians carved Brazilia out of the jungle, and the film 2001: A Space Odyssey featured a perfect city in space. The human quest for the perfect city remains one of the most powerful human urges.

Dr. Ron Brown
The father of the modern Jewish state, Theodore Herzl, called on the Jewish people to migrate to Palestine and build a city that looked to a glorious future rather than to a distant past. Tel Aviv - The Hill of Springtime, was founded shortly after and was soon filled with modern Jews going to the opera, reading and writing modern literature in Hebrew, building universities and factories, and joining the modern world. Tel Aviv was the city of the Jewish future.

59317. WILL RELIGIONS DOMINATE THE 21ST CENTURY? (SERIES)
Dr. Ron Brown

The 21st century has seen religion as the focal point for the political agendas of many countries around the world. The Islamic revolution of Iran and the rise of militant Islam are notable examples of politicizing religion. The American Evangelical Christians who form the base for President Trump, President Putin who made the Orthodox Church a pillar of his politics, and India’s move from a secular state to a religious nation are additional examples. Samuel P. Huntington predicted a century, if not a millennium, of religious wars. Was he correct?

(INDIVIDUAL LECTURE)
Dr. Ron Brown

The Hasidic Jews emerged in the Jewish ghettos of Eastern Europe in the 17th century. They were persecuted by the established Orthodox Jewish establishment as dangerous, ridiculed by the educated urban Jews as backward and superstitious, and massacred by the Russian army. They taught a joyous form of Jewish worship, cultivated direct mystical contact with God, danced in the streets on holidays, and rejected modern society. Their rabbis objected to migration to America and urged them to remain in Russia. The forces of Hitler’s armies slaughtered the majority but a handful escaped to the USA where they rebuilt their kingdoms and flourished anew.

He conducted spectacular mass marriage blessing ceremonies that attracted attention and amassed a financial fortune. Most established religions condemned him and his movement as a dangerous cult that should be destroyed. But by the 1920s, extravagant movie palaces were constructed in downtowns all over the country and moviegoing was transformed into a luxury experience. Sadly, this would end in the 1950s with the rise of the suburbs and the explosion of drive-in theaters, followed by shopping mall multiplexes. Franz Joseph Haydn (1732 - 1809) was one of the most important figures in the development of the classical style in music during the 18th century. He was instrumental in the development of chamber music such as the piano trio and his contributions to musical form have earned him the epithets "Father of the Symphony" and "Father of the String Quartet." The madrigal, a form of vocal chamber music that originated in northern Italy during the 14th century, declined and all but disappeared in the 15th, flourished anew in the 16th, and ultimately achieved international status in the late 16th and early 17th centuries. The English Madrigal School was a brief but intense flowering of the musical madrigal in England, mostly from 1588 to 1627, along with the composers who produced them. This lecture will focus on some of these rarely heard works that, to this very day, are part and parcel of every high school and college singing curriculum. 59360. RUSSIAN CLASSICAL MUSIC: RIMSKY KORSAKOV AND THE “RUSSIAN FIVE”

Jeffrey Norwood

The Five, also known as the Mighty Handful, The Mighty Five and the New Russian School, were five prominent 19th-century Russian composers who worked together to create a distinct national style of classical music: Mily Balakirev (the leader), César Cui, Modest Mussorgsky, Nikolai Rimsky-Korsakov and Alexander Borodin. They lived in Saint Petersburg, and collaborated from 1856 to 1870. The Five struggled to promote Russian classical music as a unique “Russian” art form. The result of their work was the development of a truly “Russian style” that would affect legions of Russian composers to come.

59361. BROADWAY OVERTURES
Richard Knox

The idea of using a symphonic introduction for a musical theater production had its roots centuries earlier when composers of grand opera decided to begin their works with a collection of musical motifs that allowed audiences to become acquainted with melodies that followed once the curtain was raised. This musical “foreshadowing” became a key ingredient in productions such as “Showboat,” “Oklahoma!”, “Guys and Dolls,” “My Fair Lady,” and “Gypsy.” During this program we will have an opportunity to watch symphony orchestras perform the overtures to several classic Broadway musicals including the ones mentioned above. Be prepared for a wonderful experience reliving a host of melodies that have become an essential part of American music.

Franz Schubert is the master of the art song, a composition for solo voice and piano. His career took place in the transformative years between the Classical and Romantic eras.
